# ANNUAL REPORT

OF THE

## Gloucestershire General Lunatic Asylum,

FOR 1849.

---

THE Visitors, in publishing their Annual Statement, have much satisfaction in being able to present to the public a very favourable report of the state of the Institution during the past year.

The success with which the cases admitted during the year have been treated, will be best seen, by a reference to the Tables appended. In the continual accumulation of Chronic cases, which of necessity takes place in all asylums of this nature, the hopes of cure are confined almost entirely to the recent admissions. By the last Report, it appeared, that of all the Patients in the Institution on the 31st of December, 1848, only 29 presented any reasonable prospect of cure, nevertheless, from such and 111 admissions during the year 1849, 62 Patients have been discharged cured, or materially relieved, while the deaths in the whole establishment, during the same time, have been only 23. In alluding to the latter circumstance, the Visitors cannot but express their heartfelt gratitude to an Almighty Providence, which has preserved them from the visitation of a Pestilence, which has so fearfully desolated some other similar establishments during the past year. Although the Cholera prevailed for several weeks in the adjoining city, and some persons fell victims to it in the immediate vicinity, not a single case occurred in the Asylum. They believe they are mainly indebted, under Providence, for such preservation—to the scrupulous attention to cleanliness which prevails in the Establishment,—and to the medical skill and promptitude with which the first symptoms of diarrhoea (at that season rather prevalent among the Patients) were treated, or it is feared that, an Establishment containing so many inmates, some of whom might be

supposed to possess a constitutional predisposition to the attacks of such epidemic, would not so completely have escaped.

The various sources of amusement and relaxation which have been long in use, with such good results, at Hanwell, and also in this Institution, have been continued during the year, and the Pauper Patients appear to have benefited by being allowed to participate in them.

The system of withholding every description of mechanical restraint, has had the fullest trial in this Establishment during the last year, not even a glove having been fastened to the hand of any Patient, although there have been some cases of extreme violence. One case of suicide has occurred during the year, under circumstances which the House Committee having investigated, did not consider to cast any blame on the vigilance of the attendants, in which opinion the Metropolitan Commissioners in Lunacy, who visited a few days after, expressed their concurrence. They considered it highly creditable to the care and vigilance of the officers and attendants of the Institution that, although of late, a more than ordinary proportion of the Patients admitted had shown a suicidal tendency, this was the first instance of a death from suicide for more than three years ; nor does the case in question seem to have arisen from the absence of the old system of restraint, but, on the contrary, being one in which restraint would in no case have been deemed necessary, was at least as likely to have happened under the former as under the latter treatment.

The Visitors consider that their experience enables them to speak with increased confidence, of the success of the system now in operation, of managing violent Lunatics without the use of mechanical restraint, which has, more or less, been adopted in this Establishment for many years ; but, of late the modified description of restraint, which though not thought necessary was occasionally deemed desirable, to prevent destructive Patients from injuring their clothes or other articles, has been entirely abandoned, and with the best results. It is absolutely necessary, however, for the success of this mode of treatment, that care should be taken in the selection of proper attendants, who should be possessed of vigilance, gentleness of demeanour, and forbearance.

In the Subscribers' division, some important changes are in progress. Arrangements are making for the reception of Patients, by which the benefits of the charity will be considerably extended. It has long been regretted by the Visitors that the public are so little cognizant of the primary importance, with reference to cure, of such treatment in the earliest stages of Insanity, as can alone be secured in well conducted Asylums. A few weeks' or even days' delay is sometimes of most serious importance. From feelings of delicacy and kindness, relations often retain, in secrecy, under their own care, till too late, those whom a very short residence in an Asylum would have perfectly restored. They are unaware that domestic anxieties, less experienced management and greater personal restraint, all more or less inseparable from home treatment, aggravate a disease which, notwithstanding the prejudices of Patients, is found on trial, to be at once soothed and mitigated by the comparative absence of restraint, and by those comforts peculiarly adapted to their condition, which Public Asylums of the present day alone ensure.

The Visitors trust that, as the success of modern treatment in such Institutions becomes better understood, all classes will appreciate in practice the advantage of an earlier recourse to it.

There is, however, one class whose circumstances entirely deprive them of this early, or indeed of any treatment, from which ultimate cure can be expected—those whose position, just above parochial aid, precludes their admission as County Patients, but whose means are inadequate to the payments required for maintenance in the Subscribers' part of the Establishment.

The Visitors consider that *their* wants should be a primary object of the charity, and, with this view, it is intended to admit, *gratuitously*, a limited number of Patients in *the earliest stages of the attack*, a large proportion of whom may fairly be expected to be cured in a few months, but who, without such aid, would probably pass the remainder of their lives in confirmed Insanity.

In addition to these, it is proposed to extend farther pecuniary aid to Chronic Cases, by admitting more than heretofore of those who pay less than they cost.

Besides these who form the charitable part of the Establishment, a First Class will be henceforth received at £2. 2s. and a Second

Class at £1. 1s. a week, exclusive of such extras as separate sitting-room, attendant, or use of carriage. A Prospectus of the Terms and Conditions of Admissions will shortly be published, which the Superintendent will supply.

The above charge of £2. 2s. and £1. 1s. is certainly much less, than what would be ordinarily charged for equal comforts in private Asylums; but, as a considerable proportion of such charge in the latter case is for lodging, which in the former is provided for by the outlay of the Subscribers in building, &c. there remains a good excess above the cost to the Institution for maintenance and care of these classes. This excess is the chief source of the Income, which with *Rent, Donations, Interest thereon, and Annual Subscriptions*, is applicable to the maintenance of the Charity Patients.

Hitherto, Annual Subscribers have had no share in the management, which has been restricted to Donors of not less than £21.; it is now proposed to extend equal privileges to Annual Subscribers of £2. 2s. and upwards, who will henceforth elect, and be eligible for Visitors, under the Act of Parliament. It is to be hoped that, as the benefits of the Charity become more extensive and better known, Donations and Subscriptions will proportionally increase.

The Commissioners in Lunacy have visited the Asylum twice during the year, and the following is a copy of their last report.

“ We have this day visited the Gloucester County Asylum, and  
 “ have seen most of the Patients, but we have not examined every  
 “ Patient,—our attention having been mainly given to the condition  
 “ of the House, the additions and improvements recently made, and  
 “ now in progress. The whole establishment was in excellent order,  
 “ the Patients appeared to be in good bodily health, and were  
 “ remarkably tranquil and contented. The several improvements  
 “ and additions in each ward will contribute very much to the comfort  
 “ of the Patients, by promoting personal cleanliness and more correct  
 “ habits.”

“ J. W. MYLNE,  
 “ SAMUEL GASKELL, } *Commissioners in Lunacy.*”

“ November 28th, 1849.”

J. CURTIS HAYWARD, *Chairman.*
