REPORT

OF

THE VISITING JUSTICES.

The following Report of the Visitors of the Lunatic Asylum at Wotton, in and for the County of Gloucester, made in accordance with the provisions of the "Lunatic Asylums' Act, 1853," was laid before the Epiphany Court of Quarter Sessions, held at Gloucester, for the County of Gloucester:—

HE Visitors of the County Lunatic Asylum, in making their Annual Statement, have to report a continuation of the struggle which has been unceasingly maintained for the last seven years to make the extent of the present Asylum sufficient for the accommodation of the pauper lunatics of the County.

The difficulty this year has been increased by the largely increased number of admissions, amounting to 194, the greatest which has yet occurred, exceeding those of the exceptionally large year, 1868, by nine, and being 37 above the average of the four

years preceding it.

Of course if such numbers could be taken to indicate the ordinary condition of pauper lunacy in this country, some largely increased provision for meeting its claims must be sought for. Happily, however, the proportion of cures has increased with the increase of admissions, and now amounts to about 50 per cent. on those received, so that the number of patients at the close of the year was only 600, being seven in excess of 1869, and only two more than were in the house at the end of 1863, when the number was 598.

If attacks of lunacy are to be looked for in the increased ratio which facts seem to indicate, the most philanthropic as well as economical mode of meeting such a state of things must be by increasing, as far as possible, the means of cure, rather than by building and maintaining hospitals sufficiently capacious to receive all requiring admission, but too large to admit of that individual attention and study of character on the part of the Medical Superintendent which are essential for the successful treatment of lunatics.

Such has been the system attempted in this county, and carried out with the success indicated under the able superintendence of Mr. Toller.

The difficulties of the Superintendent have been increased of late by frequent changes in his medical staff. Upon the resignation of Dr. Casey, who succeeded to a private business, it was found impossible to induce persons, considered to be sufficiently qualified for the office of senior medical assistant, to offer themselves as candidates upon the terms advertised; engagements merely temporary were therefore of necessity made, which led to such inconveniences as were to be anticipated. The Visitors, therefore, found it advisable to raise the salaries of the senior medical assistant to £150, and the junior to £80 per annum, with their board; and they have now been enabled to appoint two gentlemen of superior qualifications, who promise to discharge

their duties satisfactorily.

The Visitors regret that the proposal which they laid before the Trinity Court of Quarter Sessions for building new day-rooms, with several additional conveniences, and also raising a suitable new chapel over them, such as had been repeatedly recommended by the Lunacy Commissioners in their reports, could not be carried out, because the Commissioners declined to sanction it on account of the chapel being over male wards, a thing obviously not desirable, but which the Visitors believe would not in practice have led to any of the evils anticipated by the Commissioners. The Visitors have, therefore, considered in what other way they could best meet the existing wants of the institution, and render the amount of accommodation it is suitable to afford more complete for the care and cure of lunatic patients.

They hope to lay before the Easter Court of Quarter Sessions other plans for providing the day-room accommodation required, comprising also an extension of the recreation-hall, which is quite inadequate for the present requirements of the institution, in a manner which will render necessary some re-arrangements and re-constructions calculated greatly to improve some of the worst portions of the Asylum, and to add slightly to the extent of its accommodation for patients. Also plans for a new separate

chapel.

The Visitors, however, think it their duty to keep before the public the prospect which must be looked forward to of having to provide another Asylum for some description of lunatics, which cannot be indefinitely postponed, however successful the treat-

ment at the County Asylum may continue to be.

The Visitors desire to recognize the assistance which has been afforded by the guardians of some unions in the county in granting more liberal allowances towards the maintenance of discharged patients at their homes, which has been the means of enabling

several persons to remain and do well with the friends, who could not have been discharged under other circumstances, or if discharged, would have soon returned to the Asylum. It is believed that this practice might, under due care and occasional supervision, be beneficially extended. At the same time the Visitors would remark that it is desirable that more care should be given by guardians and parish officers to discriminating between cases which, by a little extra care and assistance, might properly be retained at home or in the workhouse, and those which require to be brought to a Lunatic Asylum, since, during the last year, 10 aged imbeciles have been admitted, who, with ordinary care and an increased amount of relief, might well have been retained at their homes.

There is another increasing class also which has tended to fill the asylum, namely, those who are in a condition much above that of paupers, but whose friends are unable to pay the charges of a private asylum. Several such cases, three of whom were governesses, have been admitted during the year. It is well that the friends of such parties should know that there are such institutions as St. Luke's and Bethlehem Hospitals, where lunatic cases are received and maintained gratis for 12 months if deemed suitable.

Some inconvenience has also arisen from the fact of the work-house of the Clifton Union being situated in the parish of Stapleton, in this county, whereby parties who were residing within the boundaries of the City of Bristol, being temporarily removed to the workhouse, have been improperly sent from thence, by orders of County Magistrates, to this Asylum, whereas their legal domicile being still in the parish from which they came to the workhouse, they should have been sent to the asylum to which such parish contributes. Although such patients are chargeable at the increased rate of 12/- per week, this is a grievance and irregularity which the mention of may be sufficient to prevent in future.

J. CURTIS HAYWARD, Chairman.

REPORT OF THE COMMISSIONERS IN LUNACY.

GLOUCESTER COUNTY ASYLUM, 27TH OCT. 1870.

PON our visit, on Tuesday last, we inspected the Asylum in its several departments, and saw the patients resident; and we have since made all the statutory enquiries in reference to its condition, visitation, and management.

We have to record the following as the change in the patients since the 19th November, 1869, the date of the last visit of the

Commissioners, and their present numbers :-

apriodis can senith dalle's corre-	-	M.	F.	TOTAL
Admitted		78	99	177
Discharged and Removed		48	64	112
Ditto, of whom Recovered		33	55	88
,, ,, not Insane		2		2
Died		43	27	70
Present number on Books		283	331	614
,, ,, of whom Private		1	2	3
" , Absent on Trial		5	6	11

Of the pauper patients, four males and five females are chargeable to Tewkesbury; one man, to Tamworth; one woman, to Stepney; and one male and two female patients belong properly to Bristol, but were received, since May last, from the Clifton Union Workhouse, under orders by County Magistrates.

The present weekly charge is 8/6, and for Out-County

patients, 12/.

The deaths since the last visit were from the following causes: viz.,—

General Paralysis	 	8
Other Diseases of the Brain	 	13
Epilepsy	 	13
Phthisis	 	7
Senile Decay and Exhaustion	 	8
Other ordinary causes	 	23
Suicide, by Hanging	 	1

In the case last referred to, which was in the female division, and the particulars of which were duly referred to by our Board, an inquest was held.

One female patient, an epileptic, was found dead in bed in a dormitory; but the Coroner, to whom the facts were communicated, did not consider an inquest necessary.

The patients last registered as under medical treatment were

31 in number, viz.: 13 of the male and 18 of the female sex.

According to the medical journal, the patients secluded since the last visit appear to have been 13 of each sex; the males alto-

gether on 58, and the females on 35 occasions.

Mr. Toller, however has explained to us that out of the 93 instances of seclusion so recorded, 41 were in cases of sickness, and with the view mainly of keeping them quietly in bed and free from intrusion.

The number of patients attending Divine Service on Sundays, which are limited only by the inadequate size of the chapel, are 110 of each sex. The Week-day Services are attended by about 35 men and 30 women.

The Ward Returns, relative to employment, shew the following results:—

	MAL	ES.			FEMALES.						
Agriculture 60					Sewing and Knitting						
Trades				28	Laundry			42			
Laundry				20	Kitchen			3			
Wards				50	Wards			60			
Others				6	With Matron			4			
	Total			164	Total						

Five or six patients of each sex are at present engaged in pre-

paring appliances for the Sick and Wounded in the War.

The personal condition as to cleanliness and dress of the patients generally, at the time of our visit was quite satisfactory. Every effort, however, should be made to reduce the number of strong check or other special dresses amongst the females, and the use of woollen gowns should, as far as practicable, be extended to all epileptics.

We are glad to learn that the body-linen of the patients of both

sexes is now changed twice a week.

The average number of ordinary Day Attendants in each Division is in the proportion of about one to 14 patients. In no instance did any patient complain to us of ill-treatment on the part of the Attendants.

The Night Attendants, one in each Division, are reported to be very efficient, visiting the several Wards about once in every two hours. We are of opinion that in an Asylum of this magnitude there should on each side be at least two Night Attendants.

In the Male Division we found the patients quite free from excitement, and the same observation applies to the Female side,

with the exception of Upper and Lower Wards No. 14, wherein

a few of the patients became noisy and troublesome.

In reference to recreations and amusements we have to report that during the past summer, parties of as many as 30 patients made weekly excursions up the hills (a new van having been bought for the purpose), and that the patients of both sexes have been taken out for country walks, and enjoyed out-door games and entertainments as heretofore.

The amusements in-doors during the winter months include Dramatic Performances, Concerts, Readings, &c., the numbers attending them being limited only by the insufficient size of the

Recreation-Hall.

Mr. Toller is, we think, entitled to great credit for the pains he has taken to provide for the amusement of the patients. We had the opportunity of hearing a most efficient band, which had been formed by the Attendants and trained by the Under Steward.

The Wards throughout were clean and well ventilated, and all the beds which we examined were in proper order. The gradual disuse of cocoa-nut fibre and substitution of horse-hair is most

desirable.

Since the last visit the new School-room in the Female Division has been completely furnished and brought into use. The patients assembled for school instruction average in number 25 of each sex.

The room is also in course of being converted into a Library; and a system is in progress of being organized of weekly distribution of the books, to which a considerable addition has just

been made, and which now number about 700 volumes.

The Lavatories in two of the Male Wards have been enlarged. Those in the Female Division are still insufficient, especially as few of the female patients make use of the wash-stands in the dormitories. In respect of the bathing arrangement, we have to report that the rules still authorize the use of the same water for two or three patients. Many of the slate-baths are unnecessarily large, and we recommend the substitution of some of a smaller size, and such a distribution of the days for bathing as may enable every patient to have fresh water.

We have given special attention to the question of providing a suitable Chapel, which has lately been under the consideration of the Visitors, and plans for which were submitted to our Board,—the ojections to which, we regret to say, were such as to compel us to decline recommending them for the approval of the Secre-

tary of State.

In the existing circumstances we think that the present Recreation-Hall is, both as regards situation and convenience of access, quite the most eligible for the purpose of a Chapel, and we see no difficulty in enlarging it to an extent fully adequate to the

requirements of the Asylum, and at the same time, giving it an ecclesiastical character. We would direct the attention of the Visitors to this proposition, and also to another for the construction of a Recreation-Hall of ample size, which might also be used as a general Dining Hall, out of the Dormitories adjoining the present room, access to which would be obtainable by stairs from the passages of communication on each side.

Dr. Buck and Dr. Phillip have very recently entered upon their duties as Assistant Medical Officers, and it is important that they should at once enter up all the Case Books, which are in

many cases much in arrear.

During our visit we have had abundant evidence of Mr. Toller's anxious desire to promote the efficiency of the institution and the welfare of the patients.

R. W. S. LUTWIDGE, JAMES WILKES, Commissioners in Lunacy.
