# REPORT

OF

## THE VISITING JUSTICES.

---

*The following report of the Visitors of the Lunatic Asylum at Wotton, in and for the County of Gloucester, made in accordance with the provisions of the Lunatic Asylums' Act, 1853, was laid before the Epiphany Court of Quarter Sessions, held at Gloucester, for the County of Gloucester:—*

The visitors of the County Lunatic Asylum in making their annual report to the Epiphany Court of Quarter Sessions as to the state and condition of the County Asylum, have, first, to advert to the very important change which has taken place in its constitution from the dissolution of the union between the county, county of the City of Gloucester, and the subscribers, which had existed in the same from the opening of the asylum in 1823 until the present year, when a separation having been agreed upon was sanctioned by the Easter Court of Quarter Sessions, and finally executed and completed in October last, when the whole institution became the property of the county and the county of the city of Gloucester. A new union was at the same time entered into between these two latter parties

for the purpose of carrying on the same as a wholly pauper asylum.

By the terms of the new union, the county of Gloucester is to pay 17-18ths of the expenses and appoint 18 visitors ; and the county of the City of Gloucester to pay 1-18th of the expenses and return two visitors—the smallest number permitted by the Lunatic Asylums' Act.

The state of transition which has existed, and still more, the amount of building and alterations which have been going on during the whole year in the very centre of the institution, have rendered the conduct and management of the asylum a matter of more than ordinary difficulty, and yet the visitors are most happy in being able to report that the institution has continued in a high state of efficiency, that the general health of the inmates has been excellent, and that no serious accident or contretemps of any kind has occurred, that the mortality has been very low, and that the proportion of cures to admissions has been highly satisfactory and sufficient to maintain the well-known character of this county asylum as a curative institution—facts which they consider speak more strongly than any comments they could make as to the unremitting attention, judicious management, and skill of the superintendent, Dr. Williams, and the efficient manner in which, under him, the other officers and attendants have discharged their several duties.

The house may be considered at the present time to contain proper accommodation for 400 patients, and there are at present in the establishment 136 males, and 217 females—total, 353. Of the number of patients who remained in the house at the close of last year, there were only 15 cases which, by the tables appended to the last report, appeared to be considered curable.

There have been 104 admissions during this year, of whom 22 were re-admissions, and only 44 of that number presented any reasonable hope of cure. There have been discharged cured, 32, and 30 relieved during the present year. The deaths have amounted to 29—a very low average, not more than about 6.30 per cent, upon the whole number of cases treated—which has been 461.

The new offices, which it was hoped would have been completed

by the end of May, were not ready for occupation till September, and the dormitories and other patients' accommodation over them have but recently been fit for habitation. The greater portions of the subscriber's, buildings were given up to the county at Midsummer, but owing to the necessity of making alterations to adapt them to the use of the paupers, and the other building going on about them, they have to a very limited extent only been as yet available for accommodation of patients.

Nevertheless the asylum has been since the very early part of the year open for the reception of all fresh cases from parishes within the county, and it is hoped that no occasion will again arise for refusing admission to such, at least for some years to come. But the accommodation is as yet insufficient to provide for the reception of those patients belonging to parishes of the county, who are now in licensed houses, or in other county asylums, and it is scarcely probable that the means of receiving such can be provided until the alterations now in progress are completed, which it is expected will require at least two years.

The visitors have, under the provisions of the Lunatic Asylums Act, s. 7, entered into an agreement with the Committee of Justices of the borough of Tewkesbury for the reception of the pauper lunatics of such borough into the County Asylum, upon the terms of the borough paying 12s. per week for each such patient during his continuance in the asylum.

The new offices now in use are most commodious, and have imparted quite a new character to the institution, which instead of having to struggle as heretofore with all the inconveniences of faulty and totally inadequate arrangements for cooking, washing, &c. can now boast of advantages in these respects scarcely exceeded by any of the most approved of the new asylums.

The visitors have also been enabled to some extent to remedy another serious inconvenience which has attended the great increase of the asylum, namely, the want of sufficient land for the exercise and employment of the patients, by entering into an agreement for renting about 18 acres of land near the premises from Michaelmas last.

They have also contracted to purchase, subject to the approbation of the Court of Quarter Sessions, a cottage and plot of ground, partly freehold and partly leasehold under the Dean and Chapter of Gloucester, containing 2A. 3R. 9P. for the sum of £475. The premises are situated directly opposite to the asylum, and adjoining to the land now in its occupation.

The visitors are unwilling to close their report without again reverting to the subject of the dissolution of the union with the subscribers, and the important change which has taken place in the management of the institution in consequence.

They fully anticipate that they have not overrated the advantages which must accrue to the asylum, as a pauper establishment, from having got rid of the divided interests and government in the institution which had hitherto existed, and which with the enlargement of the asylum would have created increased difficulties.

They cannot be insensible, however, to the great inconvenience which the closing of the private portion of the institution has caused to a large class of persons who, above the condition of those who can send their relations as paupers, now experience extreme difficulty in finding any well regulated establishment willing to receive them upon such terms as they can afford to pay. Numerous applications have been recently made at the asylum by persons able and willing to pay from 12s. to 21s. per week for the care and maintenance of their afflicted relations, for advice upon the subject ; and it has been with great pain that the superintendent has been unable to give them any satisfactory recommendation, the few well-regulated licensed houses which take patients of that class being already full. The result of which is not only afflictive to the parties immediately concerned, but must ultimately prove very injurious to the interests of the county at large, as such insane parties will, no doubt, at some future time (when their case have probably become hopeless, and when they have worn out the sympathies or reduced the means of their friends) become by some means or other inmates of the County Asylum, chronic and incurable patients.

The visitors, although no longer formally connected with the

subscribers, must continue to feel a deep interest in the charity they represent, and are most anxious to see it made as largely available as possible for the class of lunatics who now stand most in need of it.

They are aware that the subscribers are equally desirous of bringing it into active operation again as soon as circumstances will permit; but it must necessarily require some time to provide an entirely new establishment: and the undertaking is not free from difficulty.

They are in possession of considerable funds; but as these may not prove sufficient to carry out the objects in view in a thoroughly efficient and satisfactory manner it is possible that they may be obliged, at some future time, to appeal to the liberality of the wealthier classes in this county for assistance; and, should such be the case, the visitors venture to express a hope that objects so deserving will meet with a generous sympathy and support.

J. CURTIS HAYWARD, *Chairman.*
