REPORT

OF THE

COMMITTEE OF VISITORS.

To

*The Berkshire County Council,
The Council of the Borough of Reading, and
The Council of the Borough of Newbury.*

THE COMMITTEE OF VISITORS OF THE MOULSFORD
LUNATIC ASYLUM REPORT WITH MUCH PLEASURE :—

That the condition of the Asylum is thoroughly satisfactory in all respects, and that everything belonging to it has been kept in a proper state of repair.

The Asylum has lately been visited by two of the Commissioners in Lunacy, and their Report expresses their high approval, and bears testimony

to the able management of the Medical Superintendent, Mr. Douty.

The Committee are glad to place on record that the general conduct of the Staff has been very good.

For some time past the Commissioners in Lunacy have been strongly advocating the appointment of a second assistant Medical Officer, to bring up the Medical Staff to the average of other Asylums with a similar number of Patients ; but the Committee up to the present time, from motives of economy, have abstained from carrying that recommendation into effect. Now however it has been found, that owing to the multitude of returns required by the New Lunacy Act, the time of the Medical Superintendent is so much occupied in office work, that the appointment could no longer be delayed, and the Committee have just appointed Dr. Beaver to that office.

The old Harmonium in the Chapel has been replaced by an Organ, and the improvement in the musical portion of the services occasioned thereby has been much appreciated both by the Patients and Staff generally.

As heretofore the Members of the Fire Brigade are constantly drilled and exercised, and the smart and quick manner in which they turn out when called upon is very creditable and deserving of much praise.

The only case of Typhoid Fever was in the person of one of the Nurses, who for a long time was very seriously ill, and grave fears were entertained about her. At length, after a tedious illness of about four months, she is convalescent.

The cost of Repairs has been £1124. 9s. 11d., and of "Additions and Improvements," £252. 7s. 7d., for the year ending 31st March, 1892; of this latter sum £222. 16s. 3d. has been spent in providing an Organ for the Chapel, and in laying down a main and supplying gas fittings for that edifice.

Lodging-money has been earned for the same period from the Boroughs of Reading and Newbury to the amount of £255. 14s. 0d. This with the amount of the profit on out-county, private, and criminal patients, viz.: £271. 9s. 6d., has been applied in aid of the Repairs Fund.

The principal Repairs, Renewals, and Improvements carried out during the year have been:—

Painting outside woodwork of river front of Male Wards 2 and 3, Female Wards 2 and 3, Dining Hall and Recreation Hall.

Painting, Whitewashing, Colouring, Varnishing, &c., in the Committee Room, large Kitchen, Male Hospital, and Second Assistant Medical Officer's Quarters.

Plastering walls of Female Hospital.

Putting up new staircase to Second Assistant Medical Officer's Rooms.

Replacing internal leaden soil pipes by external iron ones in Male and Female Wards Nos. 4 and 5.

Laying new main to supply water to the Asylum Cottages.

Laying gas main to Chapel.

Building new chimney at Gas Works, and setting a new bed of Retorts.

The patients on the books of the Asylum on the 31st March, 1892, were :—

	M.	F.	TOTAL.
From Unions in Berkshire	150	214	364
„ The County of Berks	3	1	4
„ Parishes in the Borough of Reading..	50	68	118
„ „ „ Newbury	27	12	39
„ Unions not in the County of Berks ..	1	0	1
Private patients	5	5	10
Criminal patients	1	0	1
Totals	237	300	537

Since the 1st of April, 1891, there have been admitted Pauper Patients, 51 Males and 38 Females, total 89, and Non-pauper Patients, 2 Males and 6 Females, total 8. Of the Pauper Patients, 2 Males and 1 Female were received from other Asylums.

The discharges have been :—

	M.	F.	TOTAL.
Of Patients recovered	13	11	24
„ relieved	5	9	14
„ not improved	2	3	5
Total	20	23	43

Of these 2 Males and 2 Females were removed to other Asylums.

17 Males and 22 Females have died, total 39.

Of the number of Pauper Patients belonging to the Bodies in Union there has been an increase of 18 Males, but a decrease of 1 Female, or a net increase of 17 Patients.

The Establishment consists of :—

A Medical Superintendent	1
Two Assistant Medical Officers	2
A Chaplain	1
A Clerk to the Visitors	1
A Steward and Clerk of the Asylum	1
A Housekeeper	1
A Head Male Attendant	1
A Head Female Attendant	1
A Stores Assistant	1
A Superintendent's Clerk and Organist	1
A Foreman of Works	1
An Engineer	1
A Farm Bailiff	1
A Gatekeeper	1
A Gardener	1
A Baker	1
A Carpenter	1
Two Painters	2
A Bricklayer	1
A Gasman	1
Two Stokers	2
A Shoemaker	1
A Tailor Attendant	1
Male Attendants	22
Nurses	25

Indoor Servants, Laundrymaids, &c.	10
A Hall Porter	1
Farm and Garden Servants	9
			—
Total	93

The weekly charge for paupers has been 8s. 6d. throughout the year.

ALBERT R. TULL,

CHAIRMAN.

April, 1892.

REPORT
OF
COMMISSIONERS IN LUNACY.

REPORT
OF
COMMISSIONERS IN LUNACY

(Entered in Visitors' Book.)

BERKS LUNATIC ASYLUM,

Dec. 8th, 1891.

In this Asylum are 528 patients upon the books, of whom 230 are males, 298 are females. Three patients only are absent on trial. All the rest we have seen. The vacant beds are returned to us as being 82. A ward on each side is reserved for the isolation of infectious cases. This appears to us to be a costly substitute for that which would be a proper provision for such cases, viz.: a detached Hospital. In the women's ward so reserved is a nurse very ill from typhoid fever, which cannot be traced to any insanitary state of things in the Asylum, but which is at present attributed by Dr. Douty to a recent visit by her to friends resident in Wallingford, where the sewerage is in course of improvement. We trust that proper provision for the treatment of fever cases will be a matter considered by the Committee as urgent.

Of the cases under care and treatment here, 110 are chargeable to Reading, these are 26 in excess of the number received upon calculation of the requirements of the Borough, and for those 26 lodging money is paid. There

are only 2 out-county patients, 9 private patients, and one criminal. The weekly charge for Unions whose patients are admitted is 8/6, the charge for out-county cases is 14s., private patients pay 17/6 per week.

We are glad to report that a second medical assistant has been appointed, and is on duty. Suitable rooms have been found over the entrance hall for his accommodation. We understand that he will devote some part of his time to pathological inquiry, and assume that the Committee will supply the necessary apparatus.

The admissions since the Commissioners visit on the 15th December, 1890, have been 83; the discharges 32; the deaths 43. Of the 32 discharged, 19 were upon recovery. The deaths were all natural—the postmortem examinations have been 38, and 1 body is awaiting autopsy. There has been no inquest.

The patients under medical treatment, and so registered were 55 last week. The actively suicidal appear to be 35, and the general paralytics 15, of whom as many as 7 are women. The male epileptics are nearly $\frac{1}{8}$ th of the total number of patients in the men's division. Including both sexes there are 72 patients subject to fits. A dormitory has been provided for the suicidal women, and another will shortly be set apart for the men of that class, with a night attendant sitting up in each dormitory. The observation dormitories for epileptics are good. The casualties by falls, &c., have been few, and do not call for special mention. There has been no epidemic. Seclusion is recorded of 1 man and 6 women, the former on 6 occasions for an aggregate of 52 hours, the latter on 16 occasions, for an aggregate of 126 hours. Two male patients have been restrained for surgical reasons one of them also to prevent self mutilation. A woman has also been restrained to prevent self mutilation. Sleeves and gloves have been the means of restraint used.

During inspection the patients were generally well behaved, and no one was noisy or much excited. We were

satisfied with their clothing and personal cleanliness. In the dining hall the fare was good and substantial, and no complaints except in regard to detention were made to us, and so far as we could judge, no one had just ground for complaint on that point.

The staff of attendants is in the male division in the proportion of 1 attendant to 13 patients, on the female side 1 to 14 or thereabouts. They present a good example to the patients of neatness in dress, and the condition of the patients and their conduct is some proof that the staff does its duty in a praiseworthy manner.

With reference to the laundrymaids, we think that they work under the disadvantage of a laundry too small for the requirements of the Asylum. We trust that at no distant day the laundry will be enlarged.

We found all the wards clean, comfortable, well warmed and properly ventilated. The W.C.'s were free from offensive odour, and their improvement is in progress, the soil pipes being successively removed outside. Plastering the walls in the Infirmeries is a very noteworthy improvement. Dangerous gas brackets in the galleries, &c., are somewhat numerous, and a coil in No. 1 male ward requires protection. There appears also to us to be a real necessity for better means of intercommunication by electric apparatus and telephones between the officers' quarters and the wards. Four artisans have the keys of the female side. Dr. Douty doubts whether the withdrawal of those keys would be wise, though such keys have elsewhere rendered possible what are euphoniously styled 'accidents' when in the hands of male artisans. We observe that 29 of the attendants, 13 males and 16 females, have been not longer than 2 years in the Asylum service. More cottages for the married men might induce longer service on their part. The wages given seem sufficiently high, however the Medical Superintendent informs us that Workhouses are his rivals for attendants.

The returns of employment inform us that 161 men and 236 women are usefully employed, of the former 37, of the latter as many as 66 are chiefly wardcleaners, 87 of the men work on the land, 45 of the women in the laundry, 112 women do knitting and needlework.

The attendance at church last Sunday morning was 111 men and 137 women, not quite so many in the evening. There is a good choir composed of the staff, and a very nice organ has been set up in the chapel which cannot fail to make the Church Services more attractive to many of the patients ; 119 of the insane inmates go to the Asylum daily prayers.

The associated entertainments bring together about 258 patients. Kind friends outside the Asylum assist in these entertainments.

Walking exercise is daily given, weather permitting, in the Asylum grounds to 123 men and 274 women, 87 males, and 142 females are taken weekly beyond the grounds, about 154 of both still oftener.

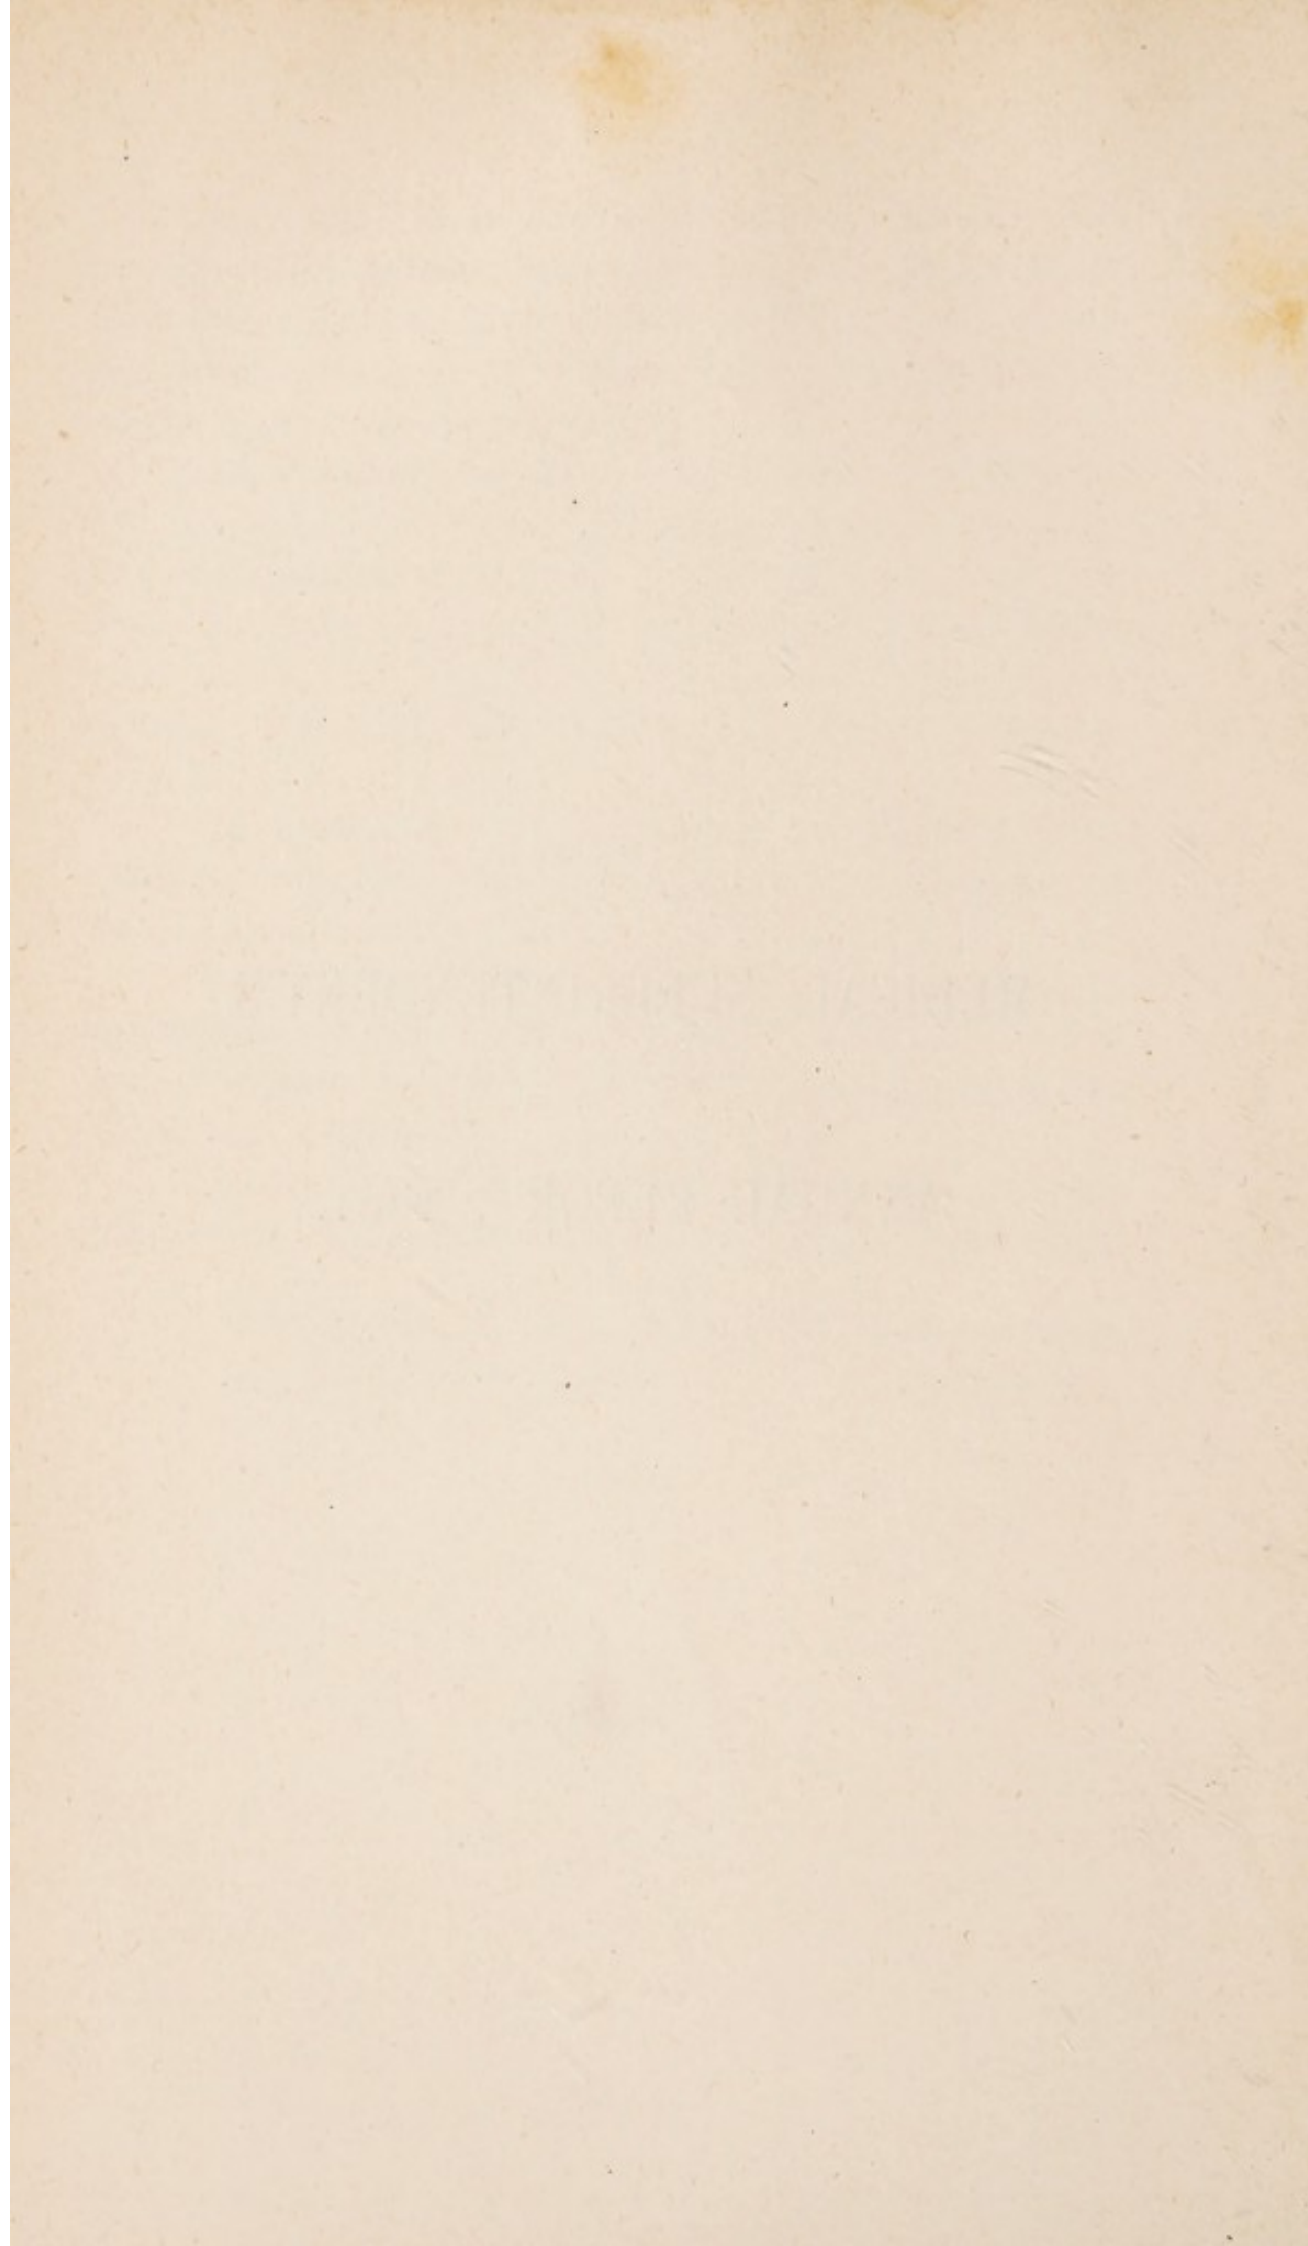

The case books examined by us appear to be well kept, but the entries should be authenticated by signatures in full.

CHARLES PALMER PHILLIPS	} Commissioners
REGINALD SOUTHEY	
	} in Lunacy.

MEDICAL SUPERINTENDENT'S

ANNUAL REPORT, 1891.

TWENTY-FIRST ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT.

MR. CHAIRMAN AND GENTLEMEN,

I beg to present to you my report upon the general management of your Asylum, and its Medical History, for the twelve months ending December 31st, 1891, and to append the usual Tables for the compilation of which I am indebted to Dr. Murdoch.

The changes amongst the patients during the year have been as shown in the following table :—

	Males.	Females.	Total.
Patients in the Asylum on January 1st	218	296	514
Admissions.. .. .	48	40	88
Total cases under treatment	266	336	602
Discharges—"Recovered"	13	11	24
" "Relieved"	2	10	12
" "Not Improved"	3	1	4
Deaths	22	18	40
Remaining in Asylum on Dec. 31st ..	226	296	522

The patients chargeable to Unions in the County of Berks have increased in number by 3, and those chargeable to Reading by 9, whilst in the number chargeable to Newbury there is a decrease of 2.

Admissions.

Excluding all patients admitted during the year who had had previous attacks of insanity, it will be seen in Table IV. that the number of new cases of Insanity (79) occurring in the County and Boroughs during 1891, is considerably below the average of the last 8 years (88). Notwithstanding this reduction, the number of patients in the Asylum has increased by 8 during the year, and as the number of deaths is about the average, it follows that the number of discharges must be below the average. Reference to Table III. shows that this falling off is mainly in the Recoveries, a fact which taken by itself appears unsatisfactory. This somewhat discouraging result of the year's work has not been brought about however by any difference in our methods of treatment, but is attributable, I think, entirely to the bad class of material, so to speak, upon which we have had to work. Of the 88 cases admitted only 26 were prognosed as curable, in 14 there was a bare chance of effecting recovery whilst no less than 48 were hopelessly incurable. Of the 26 curable cases, 13 have been discharged Recovered, 3 have died, and 10 remain, most of whom will probably be cured during 1892. On referring to Supplementary Table IV., it will be observed that the months of May and June supplied no less than 25 per cent. of the total Admissions. A review of the year's admissions may be said to show that the number of cases of acute insanity occurring during 1891, is below the average, and it is this fact which practically brings about the low recovery rate of the year, inasmuch as acute cases present, as a rule, the best chance of cure.

Causes of Insanity.

The predisposition supplied by a neurotic inheritance holds, as usual, a prominent place amongst the causes of insanity, Heredity being shown in Table X. to be present in no less than 37 per cent. of the cases. An idea is prevalent amongst the public that intemperance in drink is the cause of a majority of the cases of insanity which occur amongst both the upper and lower orders of society; I have

even heard a man make a definite statement to the effect, that the patients in public Asylums were worthy of faint sympathy, because they were "pretty well all of them there through drink." I desire again to take the opportunity, provided by my Annual Report, to say that such statements could be made only by those ignorant of facts, that they are untrue, and constitute therefore, a great injustice to those afflicted with Mental Disease in this County. No one is more cognizant of the disastrous effects of the abuse of Alcohol than the members of my profession, and we make therefore as careful inquiries as we can, when taking the history of a case, to discover the previous habits of the patient; of the persons sent to us during 1891, only 4 could be suspected of having been addicted to the abuse of Alcohol. The remaining 84 were, on the other hand, persons who had led sober and hitherto industrious lives, had been held in respect by their neighbours, and were sent to the Asylum because their health had failed through no fault whatever of their own. I think I may safely say that as a rule 90 per cent. of our cases have no connection whatever with Alcohol. In some agricultural counties the abuse of alcohol appears to be more common than it is here, and in the large towns, as well as in the thickly populated districts of the Midland Counties, drunkenness is, I believe, a more frequent cause of insanity.

As I have already stated, the Recovery Rate for 1891 is a low one, being only 28.9 per cent. calculated upon the admissions, excluding transfers.

Recovery
Rate.

The Death Rate calculated upon the average number resident is 7.6 per cent. ; calculated upon the total number under treatment it is 6.6 per cent.

Death Rate.

Post-mortem examinations were made in 36 out of the 40 cases of death.

Autopsies.

No serious accident has occurred ; 3 broken arms and 1 dislocation of the shoulder happened through accidental falls. A criminal patient, J.B., escaped on February 3rd, by

Accidents
and Escapes.

opening the external door of his ward with a lock-pick which he had made; he was brought back to the Asylum 5 weeks afterwards. The only other escape is that of a male patient, W.B., who was brought back after 24 hours' absence.

No suicide or serious attempt at suicide has taken place during the year, nor has any death occurred requiring special mention.

Employment.

The average number of patients usefully employed is 75 per cent. of the average number resident.

Entertainments.

Five dramatic performances have been given during the year, 2 by members of the Staff, 1 by the Wallingford Amateur Dramatic Society, 1 by some friends in the neighbourhood, and 1 by some amateurs, who came down from London for the purpose. A Concert given by some ladies' and gentlemen living in the neighbourhood on November 9th, which consisted of vocal and instrumental music, was much enjoyed, the solos and quartettes, &c., for stringed instruments being especially appreciated both by the patients and staff. Besides these, 2 Variety Entertainments were given by hired performers. There have been, of course, the usual weekly entertainments consisting of dancing and music, and in the summer time cricket matches, games and athletic sports, when the weather permitted. The time spent upon getting up these various entertainments for our patients is by no means wasted, and all those who take part in them, and devote their spare time to their preparation are certainly helping in a good and charitable work.

Sudden Death of a Nurse.

I have to record the sad death of a charge nurse, Sabina Shergold, which took place suddenly after the effort of assisting to carry a female patient out of the Dining Hall, who had a fit whilst at her dinner. Nurse Shergold had been for $4\frac{1}{2}$ years in the service of the Asylum, and her death was directly occasioned by the performance of duty.

General Health of the Asylum Population.

Only one case of illness needing special mention has occurred; this is one of Typhoid Fever in a Nurse, who was taken ill at the end of November, and is still lying in a

precarious condition. As no other case has occurred it may reasonably be hoped that the nurse contracted the disease outside the Asylum; for it is hardly probable that if this case originated from any sanitary defect in the Asylum, or in our food or water supply, it would still remain, five weeks after its occurrence, an isolated one. The Commissioners in Lunacy wrote in their report that I had formed the opinion that the nurse contracted the disease during a visit to her friends at Wallingford two weeks previously. In my conversation with them, I intended rather to convey the existence of a hope that I might be able to prove this origin than to express a definite opinion upon the matter. It is right therefore for me to add here, that the result of inquiries kindly made for me by Dr. Woodforde, the Medical Officer of Health, tends rather against than towards the justification of such an opinion.

During the last few weeks of the year, a considerable number of cases of Influenza have occurred, and as I write this Report, there is reason to fear that the disease is again becoming epidemic amongst us.

The only change amongst the officers consists in the addition of a Second Assistant Medical Officer, to which post Dr. H. Atwood Beaver, a graduate in first class honours in Medicine and Surgery in the Victoria University, Manchester, was appointed in November; he came into residence on the 7th of December, and is already proving of much assistance to us. Dr. Murdoch, as First Assistant Medical Officer and Deputy Superintendant, continues to render me valuable assistance, both in the medical and administrative work, and in the early part of the year when I was unavoidably absent from duty for a considerable period, he successfully discharged my duties. As Clerk and Steward, Mr. Nicholls deservedly merits your high esteem for his unselfish devotion to the heavy duties of his office. The other officers of the institution continue to render me valuable help, and my best thanks are due to them all for their willing co-operation, not only in the ordinary duties of their respec-

Staff.

tive positions, but in all work for the furtherance of the interests both of the ratepayers whom you represent, and of the patients for whose welfare you are responsible. I cannot omit to express also my high appreciation of the creditable manner in which the Attendants, Nurses, and Servants, have discharged their duties during the year. These duties are necessarily of a trying nature, both to health and temper, and extend usually to a daily duration of 14 hours. Your Committee will probably agree with me, therefore, in commending those who can perform such duties conscientiously, and who can maintain an even temper in their performance.

New Lunacy
Act.

A year's experience of the New Lunacy Act has tended only to show more clearly the futility of the sections relating to the "Continuation of Reception Orders." All the time spent in a year by Superintendents of English Asylums over the foolish Special Reports ordered by these sections is surely wasted. I believe the Commissioners in Lunacy would probably agree with me in saying that the whole of this vexatious work has not resulted in discovering the wrongful detention of a single person in any of our public Asylums; and after all, things are only where they were before, and the detention of the patient rests, as it has always rested, upon the opinion of the Medical Superintendent of the Asylum in which he is confined.

I beg to conclude this Report with a respectful expression of my best thanks for the continuance of your confidence, and for your support in an office, the duties of which necessarily tend year by year to demand more careful thought, and to involve wider responsibilities.

I am, Mr. Chairman and Gentlemen,

Your obedient Servant,

J. HARRINGTON DOUTY,

Medical Officer and Superintendent.

Berks Asylum,

January 15th, 1892.

APPENDIX
TO THE
MEDICAL SUPERINTENDENT'S
REPORT.

ASYLUM MEDICAL STATISTICS, 1891.

CHAPLAIN'S REPORT.

CHAPLAIN'S REPORT.

To the Committee of Visitors, Berks Asylum.

GENTLEMEN,

It is my privilege once more to present my Annual Report, as Chaplain of your Asylum.

Services have been duly performed in the Asylum Chapel on Sundays—morning and afternoon—Christmas Day, Good Friday, Ascension Day, and every Wednesday throughout the past year.

The Holy Communion has been celebrated in Chapel once each month, and at Christmas, Easter and Whitsuntide.

An Offertory has been made at each of the Celebrations, and an account kept by me of all such offerings, and how they have been disbursed. The greater portion of this year's offertories has been devoted to paying off the slight debt left on the Organ Fund.

The average attendance of Patients at Divine Service on Sundays throughout the last year has been 322. The behaviour of both Staff and Patients has been reverent and attentive, in fact it has been remarked by many Visitors, who from time to time have attended Chapel Services here, how orderly and attentive the patients always are during service.

Since the Organ was opened in June last (S. Barnabas' Day, June 11th), the Chapel Services have been vastly improved and brightened. Both Chaplain and Congregation

are under a very real obligation to Mr. Douty for his valuable interest in the musical portion, to the Organist, and to those Members of the Staff who form the Choir, and who so cheerfully and ably lead the Congregation in the singing, and thus make Chapel Services appreciated as they are by Patients and Staff alike.

As the Chaplain's Journal shows, I have visited the Wards, Hospitals, Airing Courts, Workshops, &c., regularly throughout the year. I have frequently held Short Services in some of the Convalescent Wards, and have done so regularly in the Hospital Wards for those who by reason of infirmity are unable to attend Chapel. The Holy Communion has been administered to Sick Patients from time to time, and I have regularly read to Patients individually who have been for the time confined to their beds. I have also attended Members of the Staff who have required my administrations as Chaplain.

Since my last Report (Dec. 19th, 1890), there have been 43 deaths among the Patients, of these 25 have been buried by me in the Parish Churchyard of Cholsey.

As a result of your kind permission of last December, a small iron cross with a number engraved thereon, has been placed at the head of each of the graves, and a Register with the name of the Patient, and the number of grave is kept by me; this will enable any one to find a Patient's grave at any future time.

During the year now closing, the Asylum Library has been enlarged, and the books catalogued. At present we have 725 good, useful and readable volumes, which are very greatly appreciated by the Patients.

I am, Gentlemen,

Your obedient servant,

AUGUSTUS E. FARRAR.

CHAPLAIN.

December 18th, 1891.
