STATE LUNATIC HOSPITAL

TWENTY-FOURTH ANNUAL REPORT

OF THE

TRUSTEES OF THE STATE LUNATIC HOSPITAL,

AT WORCESTER,

1856.

---

*To His Excellency HENRY J. GARDNER, Governor, and the  
Honorable Council.*

The Trustees of the State Lunatic Hospital at Worcester, in compliance with the provisions of law, hereby submit their Twenty-fourth Annual Report.

In reviewing the history of this institution for the past year, the Trustees find abundant occasion to reiterate an acknowledgement of the superintending care of a merciful Providence, and to express their convictions that the institution, as heretofore, has been the means of unspeakable benefit to those unfortunate beings committed to its care.

For a particular account of the operations of the hospital for the past year, the number and condition of its patients, and the success which has attended the efforts of its immediate officers and managers, the Trustees refer to the full and minute report of the Superintendent, which is herewith presented.

The financial condition of the hospital will be ascertained from the report of the Treasurer, which contains a statement of the receipts and expenditures for the past year.

The last annual report of the Trustees announced the fact

that Doctor Chandler, who for more than ten years had most acceptably discharged the duties of Superintendent of the hospital, had resigned his situation, and that Doctor Merrick Bemis had been appointed as his successor. After the appointment of Doctor Bemis, the Trustees cheerfully assented to his request for leave of absence, for the purpose of visiting Europe. He was absent about six months, having visited the various institutions for the relief of the insane in England and Scotland, and upon the continent, and having thus acquired much valuable information which we doubt not will be made available for the benefit of the institution committed to his care.

Doctor Bemis entered upon the duties of his office at the hospital, July 16, 1856, Doctor Chandler having kindly consented to retain the charge of the institution up to that time.

During the short period which Doctor Bemis has discharged the responsible duties of his situation, the Trustees have discovered ample evidence to satisfy them of the wisdom of his appointment.

During the last year Doctor Frank H. Rice has been appointed Assistant-Physician at the hospital, and has also performed the duties of Clerk of the institution. The duties devolving upon Doctor Rice have been performed to the entire satisfaction of the Trustees, and we regard him as a most valuable officer.

During the same period, Doctor Thomas H. Gage has been employed as Assistant-Physician, and has rendered very efficient aid to the Superintendent. So long as the institution can retain his services, the Trustees will deem themselves fortunate in securing his valuable aid in the various and difficult duties devolving upon the Superintendent and Assistant-Physicians.

During the past year the Rev. George Allen, who, for many years, has discharged the duties of Chaplain, resigned his situation, and the Trustees have appointed Rev. Isaac Horsford in his place, and who has entered upon the duties of his appointment.

The Trustees cannot withhold the expression of their satisfaction at the change of the treatment of the more violent and furious patients, which has been adopted at the hospital within the last two years, and which Doctor Bemis, since entering upon the duties of his office, has carried out more fully than ever

before. We allude to the dispensing with the use of the strong rooms for the confinement of the more violent patients.

Doctor Bemis, since he entered upon his duties, has not, in a single instance, made any use of the strong rooms for the confinement of patients, nor has he as yet found it necessary to employ any extra attendants in the various wards.

We are not fully prepared to draw any specific conclusions upon this subject from the experience of the last four months. We are prepared, however, to state the fact, that during that period we have found the patients, as a whole, at our monthly visits, more quiet than during any other four months since our connection with this institution. Occasions have not been rare when, out of some 370 patients, not a single one was subjected to any kind of restraint, other than the care of the attendant within the ward. It is true that it is frequently necessary to separate the violent and furious patients from the others. This is done by confining them for short periods in their sleeping-rooms, and by this mode of treatment it is found that these violent paroxysms pass off more readily than by confinement in the strong rooms.

In the last annual report it was stated that of the thirty-six strong rooms, twenty-four had been removed by order of the Trustees, and that four large and airy parlors or sitting-rooms had been substituted in their place.

Of the twelve strong rooms remaining, the six in the female department have not been used for more than twelve months, and the six in the male department have not been used for the last four months, and the Trustees have no doubt that these remaining twelve strong rooms may be removed, and the space occupied by them be appropriated to a much more useful purpose.

Another change is being introduced by Doctor Bemis, which, in our judgment, promises highly beneficial results; we mean the giving of employment to the patients upon a more systematic plan than heretofore adopted. As far as the experiment has been tried, it promises the best results, both as a curative process, and as calculated to arrest that tendency to entire dementation, which is liable to follow long confinement in the wards without any employment.

In the annual report of 1854, attention was called to the condition of the hospital, and many defects in its accommodation

pointed out, which, in the judgment of the Trustees, called imperatively for a remedy.

The most important of these defects were, 1st, the very imperfect ventilation; 2d, the mode of warming by hot-air furnaces, placed in the cellars, and so constructed as to create great exposure to fire, and 3d, the condition of the wards as gloomy and forbidding, having a very insufficient amount of light.

The report of last year stated that the last defect had been substantially remedied, and that the Trustees were then engaged in carrying out other changes which promised to remedy substantially the other two.

The Trustees of 1854 instituted inquiries whether the defective ventilation, and the dangerous mode of warming the buildings, could be obviated within any reasonable expense.

The result of those inquiries were that it would require an outlay of from sixty to seventy thousand dollars to remove these defects. This fact induced the Trustees of that year to abandon the idea of making any extensive improvements in the present building; and they suggested to the legislature the expediency of a sale of the present land and buildings, and the purchase of a new site, and the erection of new buildings upon a more improved plan.

This subject, thus brought to the attention of the legislature, resulted in the appointment of a commission, consisting of Hon. Levi Lincoln, Doctor Edward Jarvis, and Hon. Increase Sumner, whose report embodied a vast amount of valuable information, not only upon the number and condition of the insane within the Commonwealth, but also upon the kind and construction of building for the reception of this class of persons.

As the report of that commission recommended the continuance of the present hospital building at Worcester, and the erection of a third hospital for the insane, to be located in the western part of the Commonwealth, and as the legislature substantially adopted those recommendations, the Trustees of 1855 again directed their attention to the condition of the hospital at Worcester, with a view to applying a remedy to defects which were conceded by all to exist.

The defect in regard to the wards, resulting from a great deficiency of light, was remedied as reported in the annual report of last year.

The great difficulties which seemed almost impossible to remove within any reasonable expense, related to the mode of heating and ventilating the buildings.

The various wards were so low studded, being only about eight feet in the clear; the construction of the hot-air furnaces were such, and the hot-air flues so contracted, and the ducts or passage ways for conveying away the foul air, were so small, that to secure an economical and safe mode of meeting with an efficient ventilation, would, in the opinion of competent judges, as well as in the opinion of the Trustees, have required an almost entire change in the internal arrangement of the building, unless some different mode of warming and ventilation could be resorted to than that which had been generally in use in such buildings.

While the Trustees of 1855 were encountering these difficulties, their attention was called to a mode of warming and ventilation, which had been recently adopted at the asylum for the insane at Utica, in the State of New York.

The Trustees also acknowledge their indebtedness to John Wright, Esq., of Lowell, for many valuable suggestions, and under whose direction and that of one of their own number, (Mr. W. T. Merrifield,) the work has now been carried to a successful termination.

After mature consideration of the plan adopted at Utica, and of the suggestions of Messrs. Wright and Merrifield, the Trustees of 1855 determined to adopt it, and immediately commenced the work. This has now been completed, and, in the opinion of the Trustees, with entire success.

The plan consists in the use of steam for the purpose of heating. A general description of it may here appropriately be given, referring, however, to the report of the Superintendent for a more detailed and minute description of it in its various parts.

Four large steam boilers are placed outside the main buildings, at a distance of about 120 feet. Between the boilers and the main building is constructed a large air chamber underground, which is filled with steam-pipes. From this chamber proceeds a spacious passage way to the cellar, and through the cellar under the main building and all its wings. This passage way is so constructed in the cellar as to embrace within it all

the old flues which conveyed the hot-air from the old furnaces to the various apartments of the building.

Near the boilers is placed two small steam-engines, only one of which is to be used at the same time. The steam used for driving the engine, after it has passed through the same, is conducted into the steam-pipe in the hot-air chamber, which, with steam taken directly from the boilers, is used for keeping it at any desired temperature.

The steam-engine drives a large fan which is fourteen feet in diameter, by which fresh air is constantly forced into the hot-air chamber, when it is heated to the necessary temperature, thence by means of the force furnished by the fan, is forced through the large passage way under the building and wings, and through the flues connected therewith into all the apartments of the building. The same force from the fan still operates upon the air in the various apartments, forcing it out at the old ventilating ducts, with any rapidity which may be desired. Thus is secured a constant change of air in all the apartments of the building. This change may be increased or retarded at pleasure, by simply increasing or slackening the speed of the fan.

One of the chief recommendations of this plan, which is called mechanical ventilation, is that by means of the pressure upon the air in the various departments secured by the fan, the foul air can be forced out with great rapidity through much smaller ducts, than by the ordinary process of ventilation. We were therefore enabled to use all the old hot-air flues and ducts, while with the ordinary process of ventilation, they must all have been taken down and enlarged at very great expense.

With this method of ventilation low studded apartments can be kept pure with as great facility as those which are more capacious.

This plan of ventilation will also be found admirably adapted for preserving a pure and healthful air in the various apartments in the warm season of the year. It is expected that the fan will continue to run in warm as well as in cold weather, and by it it is estimated that the whole air throughout the whole building can be changed as often as once in from ten to fifteen minutes.

As before stated, it is now in successful operation at the Wor-

cester Hospital. We are satisfied that by this plan a much more perfect and economical mode of warming and ventilation is secured than by any other process. It has been completed at about half the expense which the plan considered by the Trustees of 1854 was estimated to cost.

The Trustees desire to bring to the notice of your excellency, and through you to the attention of the legislature, another subject, which, in their judgment, is one of considerable importance. We allude to the laws and regulations now in force in regard to the amount paid for the support of such patients as are chargeable to the Commonwealth.

Prior to 1844, the hospital was allowed by the Commonwealth for the support of its patients, the whole expense of their support.

By certain Resolves passed by the legislature of 1844 and 1845, the compensation for such patients was fixed at the rate of \$2.50 per week, for a term not exceeding thirteen weeks; \$2.25 per week for a term not exceeding twenty-six weeks, and \$2 per week for a term exceeding twenty-six weeks, and less than one year, and for one year \$100 per year. Other laws in force require the Trustees, for the foregoing compensation, to furnish such patients all necessary clothing, and, when they leave the hospital, to send them away well and comfortably clad. The hospital is also required to pay the funeral charges of such as die at the institution. All other patients in addition to the sum fixed per week for their support, are charged extra for clothing, funeral charges, and also for damages done by the patient to the buildings and property of the institution.

The laws further require the Trustees, from year to year, to fix the price of the support of all other patients, except those chargeable to the Commonwealth, (which by the foregoing Resolves remain at a fixed sum,) at such prices as will cover the expenses of the institution, except the salaries of such of its officers as are paid out of the treasury of the Commonwealth.

From 1845 to 1854 the compensation allowed for the Commonwealth's patients, at the Worcester Hospital, did not fall so much below the sum paid by other patients, as has been the case since that time. Since the present compensation for the support of State paupers at the lunatic hospitals was fixed by the Resolves of 1844 and 1845, the cost of sustaining them has greatly increased. This difference is most perceptible since the

close of the year 1853. In 1854 the State Lunatic Hospital at Taunton was opened for the reception of patients, and the number at Worcester was consequently greatly reduced. For a few years prior to 1854, the hospital at Worcester was greatly crowded with patients. In the summer of 1853, the number reached 567, and although during that year, and a few years preceding, the number of patients was far too great to be properly cared for, yet as one result of the great number, the cost of support per patient was less than since, or during the earlier history of the institution.

One fact should here be stated, that the Commonwealth's patients are usually of a class which remain for a period of at least one year, so that substantially the Commonwealth pays for its patients at the rate of \$100 a year for support and clothing and other expenses.

A few statements of the number of State paupers, and of other patients, and the cost of the support of patients at the hospital, will place the whole subject in a clear light.

In 1853 the number of State paupers in the hospital was	216
" all other patients, . . . . .	304
1854, State paupers, . . . . .	151
" all others, . . . . .	230
1855, State paupers, . . . . .	115
" all others, . . . . .	221
1856, State paupers, . . . . .	141
" all others, . . . . .	235

In 1853 the expense of supporting each patient, was .	\$103	00
1854           "           "           "           "	123	77
1855           "           "           "           "	157	29
1856           "           "           "           "	128	64

It will thus be seen that under the present law the amount allowed by the Commonwealth for the support of its patients at the hospital is from thirty to fifty per cent. less than the actual cost of their support.

During the last year the price charged upon all the patients per week, except State paupers, was, for the first six months, \$3, and after that \$2.75 per week, while the State, for its pa-

tients, allowed less than \$2 per week. With the present cost of provisions and supplies, the price for the future must of necessity be as high as during the last year.

The effect of this state of things is practically to impose, as it were, a tax upon those unfortunate individuals who are committed to the lunatic hospitals of the State for the benefit of the State's own lunatic paupers.

The injustice of this state of things will be more strikingly apparent, when we reflect that this tax is imposed, not upon the rich and the prosperous, but in most cases upon the poor and afflicted.

Many instances might be referred to in the Worcester Hospital, in which a member of a family of limited means becomes insane. The friends of the patient cannot endure the idea of making their relative a town charge, and hence they submit to every privation and self-denial, in order to save enough to support their afflicted brother or sister at an institution which promises relief from so great a calamity.

We know of instances in which two sisters have, by the daily labor of their own hands, supported a third sister at the Worcester Hospital. In another case, a daughter who had no means but what she earned, supported an aged mother at the same institution. We cannot but feel that the operation of existing laws in this respect need only to be stated to the legislature to secure an immediate remedy.

Indeed, if we rightly interpret a law passed at the last session, the legislature has already changed the operation of the Resolves of 1845, to a limited extent. We allude to the Act of 1856, chapter 113.

This Act provides that lunatics who have no known residence in the Commonwealth, may be committed to either of the State lunatic hospitals, by any two justices of the peace, one of whom shall be a justice of the quorum, or by any police court.

The fourth section of this Act provides that persons thus committed "*shall be supported at said hospitals at the expense of the Commonwealth.*" Our interpretation of this Act is, that the expression, "shall be supported at the State lunatic hospitals at the expense of the Commonwealth," means that the Commonwealth is to pay the *whole* cost of their support, and not a part of it.

But this Act has no application to the large number of State paupers now in the State lunatic hospitals, most of whom have been committed by the judges of probate.

The judges of probate have now the same authority as heretofore, to commit to the State hospitals lunatics who have no known settlement in the Commonwealth, and will probably continue to exercise that jurisdiction.

If we are right in our interpretation of the Act in question, an insane State pauper may be committed to a State lunatic hospital by a judge of probate, and on the same day another may be committed by a police judge to the same institution. For the support of one the Commonwealth would be chargeable at the rate of \$100 a year for board and clothing, and for the other at the rate of \$145 a year for board, with extra charges for clothing. This inequality surely ought not to exist. We also refer to the report of the Superintendent for further statements upon this subject.

The Trustees therefore most respectfully ask the attention of your excellency, and, through you, the attention of the legislature to this subject, as one imperatively requiring some modification of the existing laws.

## TREASURER'S REPORT.

---

*To the Trustees of the State Lunatic Hospital:—*

The Treasurer reports:—

That from the 30th day of November, 1855, to the 1st day of December, 1856, he has received:—

From the Commonwealth, for support of Paupers committed to said Hospital, . . . . .	\$15,661 38
and on account of Ellen Hart, heretofore paid by the State, . . . . .	72 11
From cities, towns and individuals, for support of patients, . . . . .	29,091 74
From the Massachusetts Cotton Mills for balance of their note, . . . . .	10,000 00
For interest on said note. . . . .	382 50
For interest on Z. Storr's legacy, . . . . .	30 00
For articles sold by the steward, . . . . .	372 00
From the Worcester Bank, overdrawn, . . . . .	9,882 86
Balance of cash account due the Treasurer, . . . . .	304 21
	\$65,796 80

And that during the year ending November 30, he has paid,  
on the Steward's orders:—

For salaries, wages of attendants, &c., . . . . .	\$9,551 11
Improvements and repairs, . . . . .	4,033 41
Furniture, . . . . .	1,809 65
Clothing, . . . . .	1,683 18
Flour, 407 barrels, . . . . .	3,832 00

For Meal, . . . . .	\$158 74
Provender, . . . . .	1,669 21
Rice, 2,454 pounds, and biscuit, . . . . .	421 91
Coffee, 2,148 pounds, . . . . .	406 45
Tea, 898 pounds, . . . . .	321 39
Sugar, 24,946 pounds, . . . . .	2,352 88
Butter, 27,107 pounds, . . . . .	5,824 58
Cheese, 2,003 pounds, . . . . .	217 83
Fresh meat, 7,605 pounds fresh Beef; 5,795 Steak; 3,507 pounds soup meat; 684 pounds Poultry, . . . . .	1,745 14
Salt Beef, 18,419 pounds; Hams, 600 pounds,	1,608 64
Fish, 5,000 pounds, . . . . .	232 90
Molasses, 477 gallons, . . . . .	209 16
Small groceries, . . . . .	427 95
Fresh fruits, . . . . .	920 85
Potatoes, 1,518 bushels, . . . . .	891 43
Other vegetables, . . . . .	224 92
Vinegar, 306 gallons, . . . . .	33 66
Fuel, 389 cords of Wood, and 32 cords of Charcoal, . . . . .	2,658 40
Gas light, 251,000 feet, and Oil, 196 gallons,	860 37
Soap, Starch, and Potash, . . . . .	105 62
Medical supplies, . . . . .	347 55
Books, Stationery, and Printing, . . . . .	204 39
Trustees expenses, . . . . .	115 00
Sexton's charges, . . . . .	203 25
Live stock purchased, . . . . .	1,184 50
Miscellaneous expenses, . . . . .	775 30
	<hr/>
	\$45,031 37
And on account of improvements in warming and ventilation, . . . . .	17,686 48
	<hr/>
	\$62,717 85
Treasurer's salary and expenses, . . . . .	619 72
Balance due as per last report, paid to the Wor- cester Bank and the Treasurer, . . . . .	2,459 23
	<hr/>
	\$65,796 80

## STATE OF THE HOSPITAL FUND.

Amount due for support of patients, December 1, 1856, estimated at . . . . .		\$39,181 03
Bond of Worcester and Nashua Railroad Com- pany, . . . . .		500 00
Cash in the hands of John Wright, Esq., . . . .		500 00
Cash in the hands of the Steward, . . . . .		140 61
		<hr/>
		\$40,321 64
Cash due the Worcester Bank, . . . . .	\$9,882 86	
Cash due the Treasurer, . . . . .	304 21	
Balance, . . . . .	30,134 57	
	<hr/>	\$40,321 64

## SUPERINTENDENT'S REPORT.

*Twenty-fourth Annual Report of the Superintendent, to the  
Trustees of the State Lunatic Hospital.*

GENTLEMEN:—At the commencement of the year just closed there were in the hospital 336 patients, of whom 168 were males, and 168 females.

There were admitted during the year, 241 patients, of whom 112 were males, and 129 females.

The whole number under treatment was 577, of whom 296 were males, and 281 females.

Of the patients under treatment, there were discharged

Recovered, . . . . .	97
Much improved, . . . . .	20
Improved, . . . . .	26
Not improved, . . . . .	23
Died, . . . . .	35
Total, . . . . .	201
Remaining under treatment December 1, 1855,	376

Of the patients discharged recovered, 51 were under treatment for a less period than three months; 17 for a period longer than three months, and not exceeding six months; 12 for a period longer than six months, and not exceeding one year; and 17 for more than one year.

Of those discharged much improved, 4 were under treatment less than six months; 4 for a longer time than three months, and not exceeding six months; 3 for a period longer than six

months, and not exceeding one year; and 8 were residents of the hospital more than one year.

Of those discharged improved, 6 were under our care less than three months; 5 more than three months, and less than six months; 3 more than six months, and less than one year; and 11 were inmates of the institution more than one year.

Of those discharged not improved, 7 were with us less than three months; 1 more than three, and less than six months; 5 for a longer time than six months, and less than one year; and 9 were residents in the hospital for more than one year.

Thirty-five deaths have taken place during the year, 18 of which have occurred to males, and 17 to females.

Of these deaths, 7 occurred within one month after commitment; 5 within three months; 7 within six months; and 8 within one year.

Eight had been inmates more than one year, 3 of whom had been with us more than ten years.

Of those admitted, there were 104 whose insanity was of less duration than three months.

Thirty who had been insane more than three, and less than six months; 23 who had suffered more than six months, and less than one year; and 84 who had been insane more than one year.

There were committed by the Courts, 95 males and 98 females. Total, 193.

Committed by Overseers of the Poor, 18 males and 30 females. Total, 48.

Of those admitted, there were foreigners and those having no settlement in the State, 41 males and 47 females. Total, 88.

Of those discharged there were foreigners and those having no settlement in the State, 37 males and 39 females. Total, 76.

Foreigners and those having no settlement in the State remaining December 1, 1856; males, 67; females, 74. Total, 141.

TABLE 1,

*Showing the supposed Causes of Insanity of those admitted during the year.*

Ill health, of various kinds, . . . . .	48
Intemperance, . . . . .	24
Domestic affliction, . . . . .	21
Irregular habits of life, . . . . .	15
Faulty education, . . . . .	11
Masturbation, . . . . .	10
Jealousy, . . . . .	10
Hard labor, . . . . .	9
Religious excitement, . . . . .	9
Palsy, . . . . .	7
Puerperal, . . . . .	5
Turn of life, . . . . .	5
Epilepsy, . . . . .	5
Spiritualism, . . . . .	5

Of the above, there were hereditary cases, 36 ; hereditary and periodical, 25 ; have committed homicide, 2 ; have attempted suicide, 7.

It has always been difficult to ascertain the causes of insanity of the patients sent to us. In many cases the friends fail to give any rational account of the origin and progress of the disease.

Foreigners are generally brought to us by officers who have never seen the patient previous to having the commitment placed in his hands.

Ill health, especially with females, is a prominent cause, and perhaps brings to us more patients than our table shows.

Under the head of domestic affliction, are classed all cases of insanity arising from loss of property, or loss of friends. Also

all from neglect, abuse or desertion ; or whatever disturbs the peace and harmony of the family circle.

It will be sufficiently obvious what cases are placed under the heads, "Irregular habits of life," "and faulty education."

The popular excitements of the day have not brought to us so many patients as is generally believed by the community at large.

No doubt they are a prolific cause of insanity yet in almost all the cases received here, other causes have been sufficiently prominent.

Chronic Dysentery, . . . . .	1
Diarrhœa, . . . . .	1
Old age, . . . . .	1
Carbuncle, . . . . .	1
Total, . . . . .	35

Although the number of deaths have been somewhat larger than the previous year, yet the general health of the house has been good. We have suffered but little from acute disease. Late in the summer there were several cases of dysentery, three of which proved fatal. And in the autumn there were a few slight cases of fever. There have been also several protracted cases of diarrhea. A majority of the deaths occurred to feeble, worn-out patients.

During the year the largest liberty has been allowed patients, consistent with public safety.

The old and feeble, and those whose previous habits and condition prevent their laboring in the fields or shops, are at all times seen in groups about the grounds of the institution. Some are in the streets who would hardly be taken for the inmates of an insane asylum.

The women take frequent rides about town, and a few of the old men ride occasionally, while all take frequent and long walks.

These people are close observers of all that transpires in the street, and are amused and relieved of many troubles by the ever-changing scene before them. They hear the hum of the busy shops; witness with interest the tide of business; watch with pleasure the blossoming of the trees, the growth and ripening of the fruit, and gather much of it with their own hands, for their own gratification.

Few of our patients are, or have been, in restraint during the year. Since July last, no "strong room" has been occupied.

Patients often require some seclusion, as one sick of acute disease requires his bed. But those whose malady has made it necessary to resort to such means, have been kept in their own room, the common dormitory of the house. And only in few cases has the furniture been removed, and fewer still have we suffered from much destruction of clothing or furniture. We think that patients who have formerly been exceedingly noisy, filthy and disgusting during their periods of excitement in the "strong rooms," have been, to say the least, more easily controlled, and less troublesome during similar excitements, when not removed from their ordinary rooms.

This does not interfere with a proper classification of patients. And we have not found that other patients have been much annoyed by the confusion or excitement thus far.

We do not expect always to succeed. The wisest mistake. The most patient do not always control themselves. There is a limit to the forbearance of the most kind and persevering assistants we can procure.

But we are more and more assured that, with patient and persevering assistants, fully imbued with the spirit of the enter-

prise in which they have embarked, it will seldom be necessary to resort to mechanical restraint.

It is often a sore grief, sufficient to embitter the remainder of life, for a patient to remember that he has been cast into a room little better than a criminal's cell, when perhaps a little more effort would have been successful in assisting the patient to recover himself, and secure again his self-control.

Sometimes, however, the patient desires nothing so much as to be placed where he can throw off all the decencies of life, and descend to every vulgar and debasing habit. The result of "strong room" treatment in such cases is sufficiently apparent.

Amusements have always entered largely into the plan of treatment in this institution.

Rides, parties, balls, and games of all kinds are in almost constant operation. While this is as it should be, much care is necessary lest those who will not and cannot engage in recreation without assistance, are forgotten in the more pleasant duty of associating with those whose minds are but little disturbed.

It seems to be the duty of those engaged in this enterprise—while not forgetting the more delicate and accomplished patient,—to direct their energies to that more hopeless and sometimes neglected class, whose bodies are slowly wasting away, whose minds are becoming daily more and more vacant, and who are by certain steps approaching a state of fatuity from which there is no return. This class may be reformed and re-educated, and made to assume the decencies and proprieties of life to some extent.

In order to procure more intellectual amusement, and make it the means of instruction, a plan is in operation to establish a system of daily intellectual entertainments.

Historical readings, with familiar explanations, courses of lectures and school exercises. Thus beginning what we hope may prove a source of pleasure and profit at least, a part of the year.

Our patients are well supplied with newspapers; so that almost any patient can have the paper he has been accustomed to read at his own fireside. For this we are indebted to the many publishers who send their papers to us free of charge.

Some of our best galleries are supplied with libraries, and all patients have free access to the books.

So far as we have been able, we beautify the walls of the galleries with pictures which give the appearance of life and gaiety, and relieve the wards of that cheerless, sober look, so often observed in similar institutions. We expect to be able to extend this pleasure to all parts of our house.

We have been trying of late to introduce a system of labor among our patients. So far as we have been able to succeed, the result has been gratifying. There seems to be no reason why strong healthy men or women should not perform some labor at an institution of this kind. It should not be compulsory. If it can be made pleasant and attractive, so that a considerable number will engage in it, I have no doubt that it will be found greatly useful as a remedial measure.

Patients who come to us slightly excited, so uneasy and restive that they cannot be controlled at home, need only that their activity be directed in proper channels, to become soon able to manage their own affairs with safety and propriety.

Others, again, more excited; impatient of all control and direction, constantly busy in destroying, defacing and defiling every thing in their reach, can, by a constant effort, be so directed as to spend their strength and activity in performing some labor, and thus work off their excess of vitality, and become quiet and correct.

Those too, who are passing into imbecility, may, by easy and pleasant tasks of labor, be amused, aroused and strengthened, to some extent. If so, they will become more decent and correct in their deportment, and though they never recover, they will experience some of the pleasures of life, and relieve their friends of much anxiety for them.

There are in the hospital 141 patients having no settlement in the State, nearly all of whom are Irish. For the support of these patients we receive from the State Treasury "two dollars and fifty cents per week each for a term less than thirteen weeks; two dollars and twenty-five cents per week for any term exceeding thirteen weeks, and not less than twenty-six weeks; two dollars per week for any term exceeding twenty-six weeks, and less than one year, and for one year the sum of one hundred dollars."

This 141 patients have been supported during the past year,

at an expense of one hundred and twenty-eight dollars and sixty-four cents.

November 30, 1855, there were 115 State paupers remaining, supported, during the year ending at that date, at an expense of one hundred and fifty-seven dollars and twenty-nine cents.

November 30, 1854, there were 151 of this class remaining, supported, during the year ending at that time, at an expense of one hundred and twenty-three dollars and seventy-seven cents. It will be easy to see that there has been a loss in the last three years of more than \$14,000. But this is not lost to the hospital.

The Trustees, at their annual meeting, are obliged to establish the price of board for the ensuing year. And if in 1855 there was a loss of \$6,588.35, the Trustees were obliged, in order to meet the wants of the house, to raise the price of board on all patients sent by their friends, or by the towns. The cost of support being raised, the towns remove their more comfortable insane. Farmers and mechanics, desirous to pay their own bills, and hardly able at the lowest rates, can but poorly bear a heavier burden. And they are obliged often to remove their afflicted ones to their homes, or to the poor-house.

Another reason why a larger sum should be paid for the support of State paupers, is found in the fact that all comfortable State paupers have been and are being removed, when able to labor, to the State almshouses, leaving only the violent, destructive and dangerous, the cost of whose support is much greater than the quiet, demented, and easily controlled.

The buildings and apparatus for heating and ventilating by steam, commenced more than a year ago, are now quite complete, and so far as we are able to judge, will answer our warmest anticipations.

These buildings and fixtures are as follows :—

First. Directly under the road is a coal cellar, 45 feet square, and 12 feet deep ; the roof being supported by groined arches and pillars of solid brick masonry, laid in cement. In these arches are coal drops from the road, above through the roof to the cellar below.

Next north, and adjoining, is the boiler room, 25 feet by 45, and arched overhead. In this room are placed four flue boilers, each 30 feet long, and 42 inches in diameter. From this leads

an arched passage 80 feet long, for containing and conducting an iron smoke flue to the chimney, which is 12 feet square at the bottom, 100 feet high above ground, and 12 below the surface. In this chimney are carried up, besides the smoke flue, warm air ducts and ventilating ducts, for future use.

Next adjoining these subterranean rooms is a building 48 feet by 24 feet, two stories high. The lower story being divided into two equal parts, one of which is occupied by two steam-engines, of each 15 horse power. The other half is the fan room, in which is a fan of 14 feet diameter by 8 feet in width; it has 12 floats or wings, and revolves in a brick box 40 times per minute, and is capable of conveying into the air chamber, and thence to the wards, 75,000 cubic feet of fresh air each minute.

The large story above the fan and engine rooms, is to be occupied as a shop in which any little mechanical apparatus, requiring power, may be placed for the occupation and amusement of patients.

Adjoining the fan room, and between it and the main building, is an air-chamber, 120 feet long by 22 feet in width, and 15 feet in depth, reaching to and under the main building of the hospital. In this chamber are placed 45,000 feet of wrought iron 3-4 inch steam pipe, and 500 feet cast iron pipe, varying in calibre from 2 to 6 inches. This steam pipe is arranged in double rows, on standards reaching from floor to ceiling, 3 feet apart the whole extent of this room.

The fan forces the air into this chamber, over the heated pipes, and into the large air duct under the house, formed by cutting out the partition walls supporting the floors of the rooms on one side of each wing, thus making a continuous passage under the whole house, the partition walls and floors being now supported by arches. This was lathed and plastered above, and double brick walls built in front and rear, the interspace of four inches being filled with non-conducting substance. From this air duct the warm air passes to the rooms by the flues used in the old arrangement. In the construction of all these air chambers, double arches and double walls are everywhere made with an interspace of four inches. And in their construction more than 800,000 bricks have been used, and 500 perches of stone.

From each patient's room there is carried up in the inner wall ventilating flues, and these are gathered in the attic into large ducts, and carried out at the chimneys.

The expenses have been about as follows:—

Excavating, . . . . .	\$2,500 00
Brick and stone work, . . . . .	12,500 00
Four boilers, smoke pipe, &c., . . . . .	4,500 00
Steam engines and force pumps, . . . . .	1,850 00
Steam pipe and fittings, . . . . .	6,500 00
Shafting and pulleys and belting, . . . . .	500 00
Fan, . . . . .	500 00
	<hr/>
Total, . . . . .	\$28,850 00

Much inconvenience has been felt for want of a proper drainage. Arrangements have been made to drain all the cess pools of the establishment by means of a force pump on the hill in the rear of the buildings, and thus make it useful as a means of enriching the soil of the farm. These arrangements are a large brick tank, 36 feet by 24 feet, divided in two equal parts, each covered in by groined arches. Into one of these all sewerage passes by proper channels, which, becoming full, the solids settle, the fluid passes over into the other, from which it is pumped by a force pump, through an iron pipe of four inch calibre, to any distance required, and distributed by means of a flexible hose.

This, we hope, will be beneficial to us, and lessen the annoyance we have made our neighbors.

On the farm of one hundred acres, there has usually been kept four horses, one yoke of oxen, about twenty cows, and from fifty to one hundred swine.

Of late, but one horse has been kept on the place, and during the last year but sixteen cows. Some new stock has been purchased, and perhaps it may be necessary to purchase more as the old become fit for the butcher.

Some of the products of the farm has been as follows:—

Apples, . . . 40 barrels, at \$2 50, . . . . .	\$100 00
Cherries, . . . 15 bushels, at 2 00, . . . . .	30 00

Grapes,	2 bushels	at \$4 00,		\$8 00
Tomatoes,	100 "	at 0 40,		40 00
Cucumbers,	75 "	at 0 50,		37 50
Beans,	30 "	at 2 00,		60 00
Peas,	20 "	at 1 00,		20 00
Cabbages,	2,000 heads,	at 0 05,		100 00
Beats,	75 bushels,	at 0 25,		18 75
Onions,	100 "	at 0 50,		50 00
Turnips,	20 "	at 0 25,		5 00
Parsnips,	100 "	at 0 50,		50 00
Potatoes,	50 "	at 0 75,		37 50
Hay,	75 tons,	at 10 00,		750 00
Rowen,				50 00
Corn fodder,				50 00
Carrots,	1,000 bushels,	at 0 25,		250 00
Beef,	7,666 pounds,	at 0 08 $\frac{1}{2}$ ,		650 61
Pork,	8,224 "	at 0 10,		822 40
Total,				<u>\$3,279 76</u>

Much of the labor necessary in producing the above results, has been performed by patients.

A few men who go out and in without restriction, except proper hours, have taken nearly the whole care of the vegetable gardens, and have thus procured a quiet, happy state of mind, and good health.

Doctor Frank H. Rice has performed the duties of assistant physician, and also of clerk. He has been active and devoted to his duties, and has rendered me very valuable service.

Since July, Dr. Thomas H. Gage has also performed the duties of assistant, to whom I am under obligations for the performance of many duties.

Rev. Isaac Hosford conducts with much labor and good will the chapel exercises, in which our patients are all interested.

In looking over the events of the past year, we cannot but feel grateful to the Giver of all good, for the results which have crowned our labors. No calamity has befallen us. We have suffered but little from acute disease.

Our bill of mortality is not large. Comfort and quiet has

been the rule of our house. The changes it has been necessary to make have all been productive of good. Humbly hoping that this state of things may continue, and that our institution may be more and more useful each successive year,

I am, gentlemen,

Your obedient servant,

MERRICK BEMIS.
