STATE OF ILLINOIS OFFICE OF THE COMPTROLLER

REPORT OF THE COMPTROLLER TO THE BOARD OF LAND AND MINES, CONCERNING THE REVENUE FROM THE STATE LANDS, FOR THE YEAR 1905.

For the year ending June 30, 1905, the total revenue from the state lands was \$1,450,000.

The following table shows the distribution of the revenue from the state lands for the year ending June 30, 1905:

Category	Amount
Land sales	\$1,000,000
Interest on bonds	\$250,000
Income from investments	\$150,000
Other	\$50,000

The total revenue from the state lands for the year ending June 30, 1905, was \$1,450,000. This revenue was used for the following purposes:

Purpose	Amount
To the Board of Land and Mines	\$1,000,000
To the State Treasury	\$250,000
To the State University	\$150,000
To other state institutions	\$50,000

KING EDWARD'S SCHOOLS.

CHAPLAIN'S REPORT, 1884.

To the Right Worshipful the PRESIDENT, the
Worshipful the TREASURER, and the
GOVERNORS of King Edward's Schools.

MY LORDS AND GENTLEMEN,

I have the honour to present my Annual Report to you on the state of your Schools. The past year has, on the whole, been so uneventful, that I have little more to do than to record the numbers admitted, discharged, and disposed of during the year 1884.

Between the 1st of January and the 31st December there were—

ADMITTED.				DISCHARGED.			
Boys 75	Boys 76
Girls 58	Girls 54
Total 133	Total 130

There were remaining in the two Schools at the end of the year 236 boys and 240 girls, making a total of 476 inmates, in addition to two male and three female Pupil Teachers. You have increased the number of inmates by twenty in each School, so that our normal aggregate number is now 480.

Our two present Pupil Teachers in the Boys' School have obtained Queen's Scholarships, high up in the second class at the Government examination, and will proceed to the Winchester Training College at the end of the present month. In my Report for the year 1881, I stated that in consequence of the supply of Elementary School Teachers being far in excess of the demand, I should hesitate in recommending the appointment of any more Pupil Teachers at the termination of the engagement of the present. Recent enquiries have confirmed the impression I then had; and the Treasurer has consented to engage the services of one additional Assistant Schoolmaster in the place of the two Pupil Teachers who are leaving us. I may mention that if the School were under the State Education Department, this addition to the teaching power in a School of our number would be required as a necessary condition for a Government Grant. It is also in accordance with the recommendation of the Government Inspector who examines the School annually. I am not at present prepared to advise a similar change in the Girls' School, though it may ultimately come to that. We have not up to the present time, sent any of the Female Pupil Teachers to a Training College; but appointments of some kind or another have been readily obtained for them at the expiration of their engagement.

The inmates discharged during the year, were disposed of as follows:—

BOYS.							
To the Army	2
To Situations, Various	74
Died	2
							78

GIRLS.

To Situations as Domestic Servants	50
Appointed Pupil Teacher in School	1
Removed by their Friends	3
				54

It will be observed that we have lost two boys by death. Early in the year scarlet fever broke out in the Boys' School and we had over 30 cases. The services of skilled nurses were obtained, and the patients were attended daily by the local practitioner, Mr. PARSON of Godalming, with the advice of the Medical Officers of Bethlem Hospital. Nearly three months elapsed before the epidemic was stamped out, and notwithstanding all our care it was fatal in two instances. It was a period of great anxiety to me, and it emphasises the recommendation contained in my last Report for the provision of a separate sanatorium.

For the first time in my experience of twenty-nine years, not a single boy has entered the Royal Navy. One boy only volunteered, and he failed to pass the medical examination on board the Training ship. This is a cause of much regret to me; but whether it be owing to the influence of the parents or otherwise, there seems to be a growing reluctance to volunteer for this most excellent service. Many of those placed by me in the service in former years, are now Warrant and Petty Officers, and on a recent visit to the Training Ship I recognised in one of the Instructors of Gunnery, an old King Edward School boy. I have taken every means of making known the extraordinary advantages the Royal Navy affords to those who enter it as boys; but I cannot overcome the prejudices which seem to exist against it.

I present the Reports of the Government and Diocesan Inspectors.—

Written Work			very good indeed.	
Discipline and Tone			Excellent.	

GENERAL REMARKS :—

I was greatly pleased with the examination in religious knowledge in this School. Brightness with intelligence were the chief features

combined with an interest in the work seldom met with, and this applies to both Teachers and Scholars.

I can without hesitation pronounce the results to be "*uniformly good throughout.*" Evidence of careful and conscientious teaching was displayed in each division, thus reflecting great credit upon Miss WILSON and her staff.

The tone and discipline were excellent. I feel sure that everything is done to make the children highly value their Religious Training.

The Bible subjects were thoroughly prepared, and the Prayer Book and Catechism sections had received attention. The Repetition consisting of Hymn singing, Text of Scripture, with longer portions &c., was "*Very Good.*"

The written work was most creditable.

THEODORE JOHNSON,

Diocesan Inspector for Rochester."

MR. HOLGATE'S REPORT FOR 1884.

"*July 21st, 1884.*"

"SIR,

I have to report that I examined King Edward's Girls' School, St. George's Road, Southwark, on the 7th and 8th inst., and King Edward's Boys' School, Witley, on the 15th and 17th insts.

In the Girls' School the work is, in all the Standards, done with great neatness, and creditable accuracy; handwriting is clear and good; sums unusually good for girls; and with the exception of great timidity evinced by all the children in reading (which weak point should be strenuously dealt with), the whole examination was very satisfactory, and showed thorough conscientious teaching by all the staff.

The singing is very fair, but the Teacher would get better results if she led the girls from a raised desk, and gave them the time with a bâton.

Needlework and industrial pursuits are well carried out: I would suggest that on future occasions a class of girls of different ages be assembled in the needleroom to show their actual power in the

presence of the Inspector and the Governors. Religious Knowledge is good, and the tone and manner of the Girls are alike satisfactory.

In the Boys' School for the first time, handwriting and arithmetic were shewn by all standards on paper, and with satisfactory neatness: the accuracy in spelling and sums was perhaps not quite so good as in former years, but the school has been much kept back by a serious outbreak of fever.

Improved articulation, distinctness, purity of pronunciation, and expression are needed in reading: the boys sing sweetly and well, and should therefore be able to read better than they do. Religion is thoroughly well taught; the boys answered fairly well in *vivâ voce*, questions on Geography, History, and Mental Arithmetic. Military drill is solid, steady, and accurate, and the supernumerary rank move quickly, know their places, and speak out clearly. The brass band is well taught, and is greatly improved both in time and style.

I have the honour to be,

Sir,

Your obedient Servant,

WYNDHAM HOLGATE,

H. M. Inspector.

The Treasurer, Bethlem and Bridewell Hospitals."

Our Pupil Teachers were again placed in the first class at the annual examination in Religious Knowledge for the Winchester Diocese, and had prizes awarded to them. EDWIN WEBB, who obtained the Bishop's prize last year, was again placed first in the examination list. But I waived his claim to the prize a second time, and he received honourable mention, and a prize of books of considerable value. I allowed eight boys to compete for prizes in Religious Knowledge with all the Schools in the Surrey portion of the Diocese. Five out of the eight obtained first classes with prizes. Much the same result followed the examination for

the Rochester Diocese, and four female Pupil Teachers obtained prizes.

The usual Governor's and other prizes were given after the annual examination by the Inspector in each School. One of our Governors, Mr. JOHN H. FOSTER, placed £8 at my disposal to be given as "Chaplain's prizes."

ERNEST TOBY and SUSAN ST. MARTIN obtained the "Sir JAMES TYLER'S" prizes for Religious Knowledge, and the boys elected ERNEST RICHARDS as Truscott Medalist. It may be interesting to note as the result of Sir FRANCIS TRUSCOTT'S gift, that with the exception of the first Medalist, of whom I have utterly lost sight, every "Truscott Medalist" has done remarkably well in his situation. The second, after serving three years as assistant shoemaker in our School, has recently obtained the appointment as master shoemaker in a public Institution.

Fifty boys were confirmed at Witley Church in the month of June by the Bishop of Winchester. There was no Confirmation at the Girls' School during the year, the Bishop of Rochester only visiting the School for that purpose in alternate years.

Two hundred and twenty-three rewards—seventeen more than in 1883, were given by the Committee to former inmates who had maintained good characters in their situations. 52 boys and 34 girls were rewarded for the first time; and 87 boys and 50 girls were rewarded partly for the second and partly for the third time.

I have to thank the Committee for facilitating my going abroad for the recovery of my health in the Autumn.

I should not be doing justice to my own feelings if I were not to allude to the serious loss which the Institution has sustained during the year by the death of our most kind friend and Governor Mr. JOSEPH JOHNSON MILES.

Mr. MILES was seldom absent from the meetings of the Sub-committee, and took a most lively interest in welfare and happiness of the children; and we have had to thank him for many kind gifts of books and pictures. Only a short time before his lamented death, he had treated the whole of the Girls' School and Officers to a visit to the "Health Exhibition."

Entering as I do this month, on the 30th year of my office, I record with deep thankfulness the uniform kindness and support I have received from all the Governors, both past and present. So long as health and strength enable me to continue the work of the Schools, my interest in the welfare of the Institution with which I have been so long connected, will remain undiminished.

I have the honour to be,

My Lords and Gentlemen,

Your obedient Servant,

EDWARD RUDGE,

WITLEY, *January 17th*, 1885.

REGULATIONS.

1. The Boys are in two divisions, which attend the Shops, &c., and the Schools, on alternate days, receiving on an average 15½ hours Instruction in School and 24 hours Industrial Employment per week.

2. Half Holiday every Saturday, from 12 a.m., when boys are to bathe.

3. Choir practice, and Brass Band, on alternate days, from 12 to 12.45 p.m.

4. Drill for School Boys in summer from 5 to 5.45; and in winter from 12 to 12.45, when weather will permit.

The whole School to Drill twice-a-week during the summer months, after supper.

* Half-an-hour later in Winter Months.

No. 10.

1884.

LONDON.

DAILY ROUTINE.

Hours of Rising.

Six o'clock in the summer months, and not later than 7 o'clock in the winter months.

After private prayer in each dormitory, washing, dressing, &c.

On Week Days.

The girls selected for employment in the Laundry and Kitchen, and in Household Work, to be engaged in their particular occupations, and the rest in making beds, and sweeping and cleaning the dormitories and other apartments.

From 8 to 9 o'clock.—Prayers, breakfast, and recreation.

Girls selected for particular employments to be at their respective occupations from 9 to 1 o'clock, as the Matron shall direct; and on alternate days at School during the same hours.

From 1 to 2 o'clock.—Dinner and recreation.

Girls selected for particular employments to be at their respective occupations, and the rest at needlework, from 2 till 5 o'clock, and in occupation from 5 till 6 o'clock, as the Matron shall direct.

From 6 to 7 $\frac{3}{4}$ o'clock.—Supper and recreation.

From 7 $\frac{3}{4}$ to 8 o'clock.—Prayer.

8 o'clock.—Bed-time.

On Saturdays.

No school to be kept, either in the morning or afternoon. The girls on this day to be engaged in cleaning the establishment, assorting and distributing clean linen, using the bath, and in such other occupations as the Matron shall direct. The recreation of the inmates to be, when the weather will permit, in the airing grounds, and at other times in the day-rooms, which are to be provided with suitable books for amusement and instruction.

On Sundays.

Until 8 o'clock.—The inmates to be occupied in *making beds, changing linen, and delivering up all that is dirty*, and preparing for the proper spending of the day.

From 8 to 10 o'clock.—Breakfast, and walking in the airing grounds, when the weather will permit.

From 10 to 11 o'clock.—In school rooms, reading the Lessons for the day repeating Catechism, and answering questions on scriptural subjects.

From 11 to 1 o'clock.—In Chapel for Morning Service and Sermon.

1 o'clock.—Dinner.

From 1 $\frac{1}{2}$ to 3 o'clock.—In the day rooms, and airing courts.

3 o'clock.—Afternoon Service in Chapel and Sermon,

7 o'clock.—Supper.

8 o'clock.—Bed-time.

The following is a list of the names of the officers and servants of the King Edward's Schools, Wimborne and London, for the year 1911. The names are arranged in alphabetical order of the surnames. The names of the officers are printed in bold type, and the names of the servants are printed in ordinary type. The names of the officers are printed in bold type, and the names of the servants are printed in ordinary type.

WESTERN HOSPITAL

REPORT

for the Year Ending the 31st December 1914
at the Western Hospital, and the
Officers of the Hospital in
London.

The Board of Directors of the Western Hospital
has the honor to acknowledge the receipt of the
Report of the Officers of the Hospital for the year
ending the 31st December 1914.

The Report of the Officers of the Hospital for the year
ending the 31st December 1914 is herewith
submitted.

This Report is signed by the
Chairman of the Board of Directors.

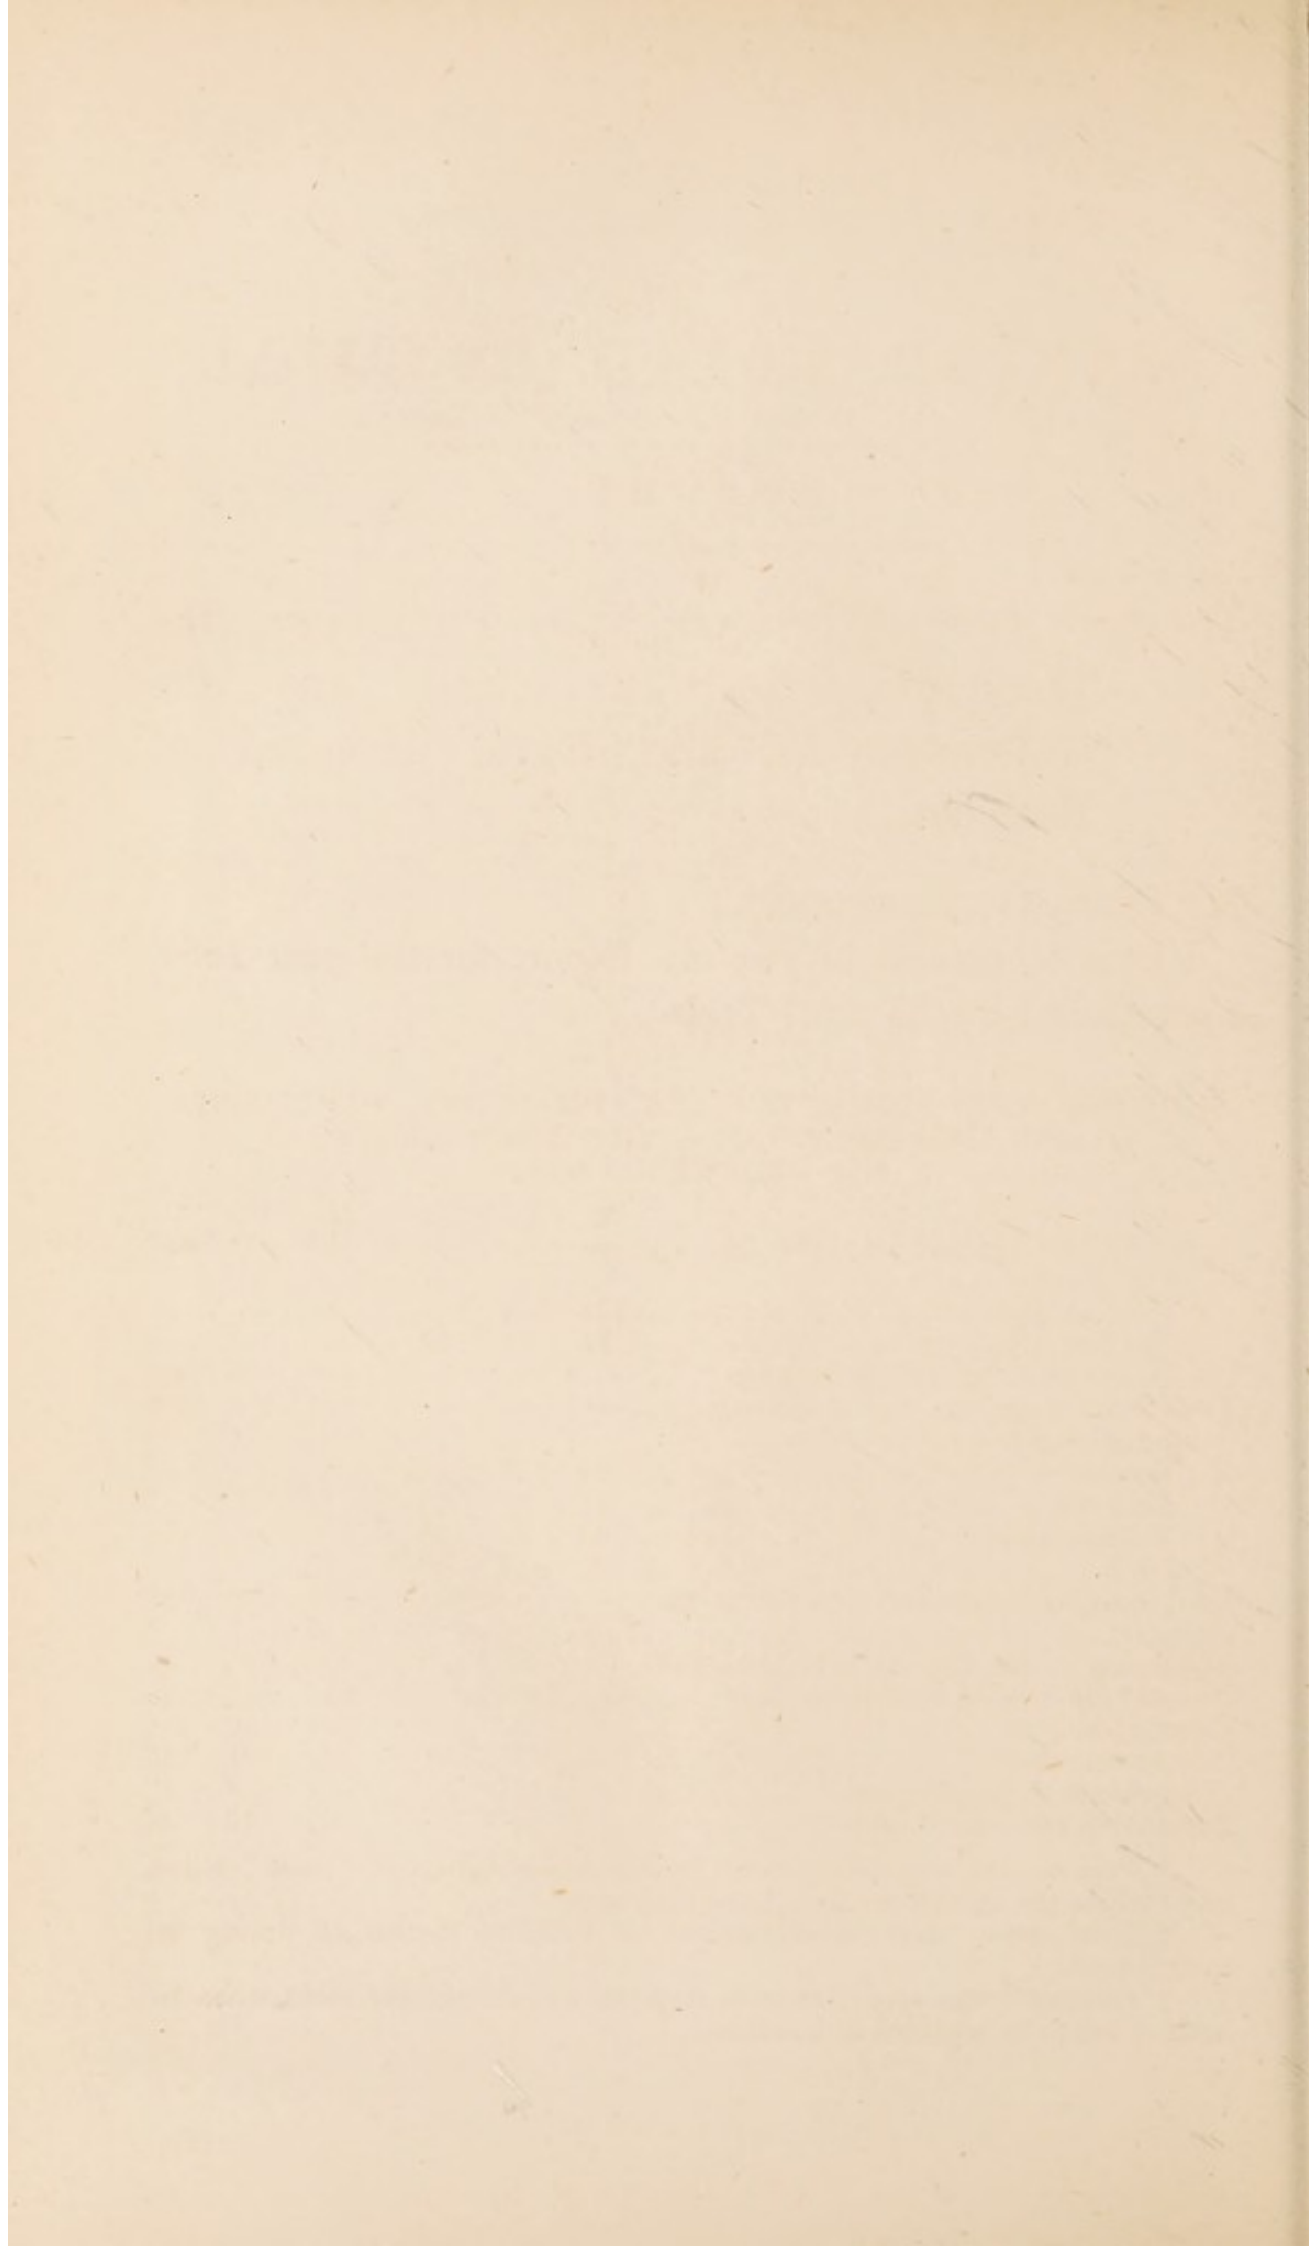

The Board of Directors of the Western Hospital
has the honor to acknowledge the receipt of the
Report of the Officers of the Hospital for the year
ending the 31st December 1914.

The Report of the Officers of the Hospital for the year
ending the 31st December 1914 is herewith
submitted.

The Board of Directors of the Western Hospital
has the honor to acknowledge the receipt of the
Report of the Officers of the Hospital for the year
ending the 31st December 1914.

The Report of the Officers of the Hospital for the year
ending the 31st December 1914 is herewith
submitted.

The Board of Directors of the Western Hospital
has the honor to acknowledge the receipt of the
Report of the Officers of the Hospital for the year
ending the 31st December 1914.

BETHLEM ROYAL HOSPITAL.

REPORT.

To the Right Worshipful the PRESIDENT, the
Worshipful the TREASURER, and the
GOVERNORS of the Royal Hospital of
Bethlem.

MY LORDS AND GENTLEMEN,

I have to present to you my Report for the year 1884,
accompanied by the usual Tables.

SHOWING THE ADMISSIONS, RE-ADMISSIONS, DISCHARGES,
AND DEATHS DURING THE YEAR ENDING
31st DECEMBER, 1884.

	M.	F.	T.	M.	F.	T.
In the Asylum January 1st, 1884	—	—	—	136	160	296

In Hospital 31st December, 1884	41

The past year has fortunately not been eventful, the work of the Hospital and its dependence at Witley has been carried on satisfactorily to the Medical Staff, and my Report is on the whole encouraging.

From the first Table it will be seen that fewer patients have been admitted than during last year, but that the actual number as well as the per centage of cures has been greater.

That the numbers are smaller is explained by the fact that the Treasurer and Committee, having regard to the decreasing income of the Hospital were specially careful in their examination of the cases presenting themselves for admission. The Table of professions and callings of the patients shows the class of patients selected. It is extremely hard to draw the line between cases which come up to the social standard and those which do not—thus, for example: a parent an artisan and ineligible, may have a son or daughter who has risen to a position of trust, and may be quite fit for the surroundings of the Hospital, other persons may, through misfortunes, have fallen from their proper stations into a lower grade, and yet be eligible; the Committee endeavour to reward the deserving of the lower classes by admitting old

and confidential servants who, but for their moral qualities, would not be accepted. I have often had to insist on the importance of the class distinctions in Asylums, it is injurious to put domestic servants in the same ward with governesses and cultured ladies, the servants are not comfortable, and the ladies feel a loss of self-respect and often will not help themselves by doing ordinary ward work lest they too should be considered as servants.

Asylum treatment is so eminently social that matters of this kind cannot be neglected.

The first point to note is that in 1884, 134 men were admitted, against 153 admitted during 1883; but in 1884, 82 men were discharged cured, that is, 61 per cent. on the admissions, against 52, or 30 per cent. last year, and on the other side 145 women were admitted in 1884, and 176 in 1883; in the former year 81 were cured, a little over 50 per cent., and in the latter, 98, or 67 per cent.

The death-rate was rather higher this year than last, in proportion to the number, there being 20 deaths among the men, and eight among the women; 14·9 and 5·5 per cent. respectively on the admissions. The death-rate is greatly increased by the admission of so many paying cases suffering from General Paralysis of the Insane; this year, 12 of the 20 deaths in the men were due to this disease, and seven deaths occurred among the paying patients.

Exhaustion, associated with melancholic symptoms, accounts for six men and two women, and I am convinced some of

these former belong to the group of cases of progressive nervous degeneration, and are not far removed from General Paralysis; one patient died soon after admission, from Insanity following child-birth, and my surprise is that so few succumbed to this disease, considering the number admitted, and the exhausted condition in which they were. I shall refer to these cases later. This year, again, the newly suggested Statistical Tables are given, Dr. WOOD having completed them in a very satisfactory manner. From these the absolute number of individuals can be seen, and at a glance the recurrences and relapses made evident.

From Table 1A it may be seen that 24 of the admissions had one previous attack, that ten had had two and five four or more, that in fact 29, or close on 10 per cent., were re-admissions; this percentage corresponds with the past experience of this Hospital.

This is, to my mind, fairly satisfactory, and though it points to the nervous instability which is so common in those who have once suffered from insanity, yet it must be understood that very many do recover and remain permanently well. One of the advantages of a comparatively small Asylum of the nature of Bethlem is that a personal interest is felt in the cases, who in most instances on recovery look to the Hospital as to a friend, and return for advice, or in many cases to contribute by small presents to the comfort of present patients. The galleries now contain many pleasing souvenirs of cured patients. Weekly we have visits from old patients, and are thus able to verify perfect recovery on the one hand, or to warn in case of threatening relapses on the other. I

am more than ever in favour of extending the use of the free or voluntary boarders' clause of the Lunacy Act, which seems to me, if properly used, a very great boon. During the past year there have been boarders, both on the male and female side, and there have been among the former paying as well as free patients.

By means of the liberty of admitting patients without certificate who have been formerly in Asylums, I have been able to receive old patients who have at the end of a few weeks been quite restored, and able to resume their places in the world. I have in one such case allowed the patient to go at once to Witley, and in a second to go there in about a week after admission, the quiet and freshness of the Surrey hills restoring the nervous balance very rapidly.

Without calling myself a believer in the much vaunted open door system, I give as much liberty to patients as I can, and trust the time is approaching when more and more persons will be allowed to place themselves in Hospitals or Asylums without incurring any evil, but reaping good. If Superintendents are afraid to run some risk and responsibility in granting leaves of absence, one cannot wonder at friends being still more nervous, and thus not infrequently upsetting the good done by the residence away from home. Risk has to be run and it is only after long and often painful experience that a Physician learns whom to trust and how much, and even with the best experience one may be mistaken.

During the past year hundreds of patients have been on short or long leave and a fair number have been allowed

to go out alone on parole, one only broke his word and instead of returning enlisted, he remained a short time in the army and was then bought out by his friends. The present unsatisfactory state of the Lunacy Laws or rather the unsatisfactory result of foolish, misguided public opinion on the Lunacy Law was well shown by two cases during the last year. In one case the friends removed the patient who was temporarily sane, against my direct advice, they seemed to think he was being kept unduly in the Hospital, he became worse and after a re-development of his old dangerous homicidal symptoms, endeavours were made to obtain fresh certificates, but the dread of prosecutions and Lunacy vexations prevented the certificates being signed and the patient killed himself. In a second case the wife insisted, in spite of warning, in taking out her husband during a sane interval and the result in this case was that she was murdered by him during the succeeding outbreak of violence.

Instead of patients being unduly retained, I believe many are unduly discharged through the want of confidence of the friends of patients in the Superintendent. Slowly and steadily I have extended the liberty of patients and it appears to me satisfactory that during Christmas week about 40 patients were on leave without any evil resulting in any case and in many the short leave was extended till the patients were discharged altogether. I have granted leave to patients who have during the leave started afresh at work, so that I was able to watch the effect, not only of freedom but of the return to work and advise as to the fitness of the patient to pursue his former calling. The Convalescent

Establishment has been kept open during the greater part of the year with the exception of the time required for painting the outside of the building and for Christmas week. The summer painting necessarily controlled the number that could be received, hence the total visitors to Witley are smaller this year than last, still the whole being 181, is satisfactory. I had to bring back three men who proved unfit for the liberty granted at the Convalescent Home, and this was not to be wondered at considering the larger number of men sent during the past two years compared with former years. In fact the experiment was tried of sending patients into the country to complete their cure and not merely to convalesce. This from experience is found to work satisfactorily with the women, but the men are not to be trusted with liberty so readily as are the women. There is no doubt that some patients are best treated in the country where there are large grounds and out of door work and amusements, but that it is at all desirable that Bethlem should be in the country instead of in London is more than doubtful, the patients who come to us are able as soon as they are well enough to see friends and go with them to their homes, to places of amusement and the like and are thus definitely tried before their return to their old surroundings. Country air alone will not cure acute insanity, nor will hard gardening or farming work do much good to the Clerk or Tradesman who is unused to mechanical labour and who look down upon it as degrading. During the year several changes have been made in Bethlem itself and the result of former changes can now be reported on. The result of separating the more violent patients on the male side into two groups in two sub-divisions of one ward has proved very useful and I have thus been able to separate

the most violent maniacal cases from the more dirty and thus to reduce the chances of injury to the more feeble but troublesome general paralytics, from those suffering from mania. On the Male side I have now over 20 beds in number 4 ward so arranged that the doors of the bedrooms being open all night the nightwatchman is able to observe the patients as he patrols the gallery. At present this part of the gallery has not been constantly used because the acute cases require warmth as much as observation and the part of the gallery used for constant watching has no good warming apparatus. On both sides of the Hospital I consider it of the utmost importance that something should be done in the way of warming the ends of the galleries. The addition to the Night Attendance has been beneficial and I feel much greater security both for patients and attendants now that two always visit together. Patients can be more thoroughly attended, "changed," and fed, during the night by two than by one and struggles are now unknown.

We still want a Central Recreation Hall and I shall not think the Hospital complete till this is obtained. It would be useful for the more frequent re-union of the patients and would tend to keep the attendants more at home of an evening. We have had a regular supply of amusements during the year.

During the summer patients went in parties of about twelve for drives and this I found most useful for those who were too insane to be allowed to go out for walks in the streets, very many patients went for drives who belonged to the refractory wards. One managed to escape, but the idea only

came into his head when he found the drag stopping near his mother's home, no harm resulted and he returned within a few days. Theatres, Concerts, Lectures and other indoor and outdoor amusements were enjoyed. At Bethlem during the autumn and winter dances or entertainments took place weekly. This year we have had more paid performers than formerly and have found this on the whole to give more pleasure, to cause less trouble and cost less money.

The past year will be noted by the fact that Lunacy agitation has been general, and as a result, vexatious prosecutions by former patients have been threatened not only private but public institutions.

Bethlem has not escaped and before this report reaches the Governors the result of an action by HASKER *versus* the Medical Officers of Bethlem will have been decided. Certain other patients have written threatening letters but have gone no further. All Superintendents are used to discontent in patients, in some it is merely a stage on the way to recovery, in others it is the sign of chronic mental derangement a phase of moral perversion.

From the latter cases troubles will constantly arise and no one is safe from the perverse moral malignity of uncured cases or of those whose mental disturbance was due to intemperance. One inquest was held during the year 1884, and a verdict of "natural causes" was found, and I am glad to have to record the fact that no accidental death occurred.

One patient who had been 41 years on the Incurable Fund died and this fund will certainly be further reduced during

the coming years more rapidly as many patients of great age still remain and no fresh ones are being added in consequence of the decrease in rent received. I trust this will not continue long for the Incurable Fund is especially useful for cases where particular hardship would be felt in the necessity of a County Asylum.

I purpose here referring to a few details of the admissions during the past year, though I feel it would be much more satisfactory if at some future time a special Medical Report could be prepared and sent out; a Report which would be of use to the Medical profession as well as to Superintendents of other Asylums. In all 30 patients suffering from General Paralysis of the insane were admitted, most of these being either paying patients or only admitted because from the early stage of the disease, the diagnosis was doubtful. In the latter case as a rule three months observation confirmed the opinion first formed.

Little or no advance has been made in the treatment of this fatal disease, though rest in an Asylum has the most useful effect in producing quiet and temporary arrest of the disease. Several patients have been discharged sufficiently well to spend the rest of their lives among their friends, the excitement having given place to childishness.

Among the women 23 have been admitted suffering from Puerperal insanity. Two were pregnant and in four the insanity followed suckling. One puerperal case died and several are under observation, but about twenty per cent. recover, the per centage being pretty uniform from year to year.

Another class deserves notice not only from the number belonging to it which are yearly received but because through a *priori* one would have not expected satisfactory results, yet many cures are effected, I refer to cases as a rule suffering from melancholia, whose symptoms have come on after they have reached 60 years. The rest of the Asylum enables such patients to re-collect their forces and though they may not be fit for their former occupations they are quite fit for home and some work.

Change from other Asylums has resulted in cure in some cases and certainly many cases which we have had to discharge uncured have improved in other Asylums. I am convinced change is of great service in young and middle aged cases after a year or less of treatment. In one case a barrister had been several years in another Asylum, he was admitted to the paying establishment and rapidly improved, as the result of meeting each of his delusions by the contradicting evidence and was discharged recovered. Many cases associated with change of life were admitted and many of these were discharged uncured at the end of a year, not that they are incurable but that they require more time and more change. I should like to see most of these cases in cottage treatment in the country.

Changes have taken place on both sides of the Hospital among the attendants and I still have to report a want of really earnest, active, and trustworthy men as applicants for vacancies on the Male side, men of all sorts apply and those with good characters from other occupations often find themselves unsuited for the work of the wards while others are found by me untrustworthy.

The Head Attendant, Mr- DAVIES, has by twelve months' zealous performance of his duties confirmed the judgment formed of him on his election, and I can report his conduct as in every way satisfactory.

On the female side resignation for marriage have caused vacancies which were easily filled. Mrs. EVANS who for many years has acted as Deputy Matron at the Convalescent Establishment, retired on a pension and has been succeeded by Miss MARONEY, who for twelve years has been connected with Bethlem.

No special changes have been made in the dietary, though the service of meals is improved.

Before closing my Report I must in the name of all connected with Bethlem Hospital express the most sincere grief which has been felt by the loss of J. J. MILES, Esq., who for so many years has not only been a Governor of the Hospital but as a member of the Sub-Committee was most constant in his attendance at the Hospital. I cannot express the feeling which possessed all in regard to Mr. MILES. I can only say, as Superintendent, that hundreds of kind deeds were done by him to patients and officers which he, last of all men, would have mentioned. Sufficient to say he was the kind and just friend to one and all and left as one of his last living acts, souvenirs in the hands of Mr. HAYDON, with whom he said "he had worked so happily for so many years," for those for whom he had so long and kindly worked.

My colleagues generally have assisted me willingly and

loyally in my work and by their aid the Hospital has I trust in no way departed from its path of progress.

Dr. W. R. Wood has decided to resign his appointment as Assistant Medical Officer for the purpose of going to Queensland and he will carry with him the best wishes of all in Bethlem, his kindness and consideration for all and especially for those who were ill and in distress will ever be remembered and will doubtless prove the basis of a success such as he merits in his new home.

To the Rev. Mr. VAUGHAN and to Mr. HAYDON I tender thanks for most valuable aid.

Once more I must thank the Treasurer and Committee for their uniform kindness and consideration, which makes work for and with them a pleasure as well as a duty.

The Treasurer by his personal interest in Bethlem has been of the greatest service in making my official duties easy.

I have the honour to be,

My Lords and Gentleman,

Your obedient Servant,

GEO. H. SAVAGE,

Medical Superintendent.

REPORTS OF THE COMMISSIONERS IN LUNACY.

BETHLEM HOSPITAL,

31st January, 1884.

This Royal Hospital is still foremost in charitable relief of the insane. The incurable list is now however we believe closed. There are about 30 vacant beds on the male side but the female division is practically full. On the books there are of the incurable class 20 male and 28 female patients. The cases curable or received for payment are 254, that is to say 115 men, 139 women. Those received for payment are 29 gentlemen, among them are several paralytics. The charges are £2 2s. for each gentleman received for payment. Besides the patients there are two boarders, one of each sex. The gentleman boarder told us that he wished to leave, we think that he is insane and that he should be made a patient. At Witley (the Convalescent Home of this Hospital), are, Dr. SAVAGE tells us, eight of his male, 11 of his female patients. All the other patients upon the books of this Hospital, and not away on leave we have seen and with many we have conversed. We as usual listened to all complaints these were very few indeed and they were as far as we could ascertain utterly groundless. The records inform us of 190 admissions, 144 discharges and 28 deaths since our colleagues' visit last July. More than half of those discharged had previously recovered. One suicide is the only grave casualty which has occurred. It was the subject of correspondence between our board and the hospital. We think that the window fastening which facilitated that suicide should

certainly be altered and without further delay. We saw the same kind of latch in several dormitories here to-day. There has been no change in the Medical staff. Drs. SAVAGE and WOOD and two clinical students are on duty. There are many acute cases but the general behaviour of the patients was, during our inspection, quiet and orderly. The weather being wet they were all in doors. There is no vacancy among the attendants who appear to be of a very respectable class. There is a new head attendant on the male side, his predecessor having fallen ill after long service in the Hospital. Male No. 1 has lately been converted into two wards, known now as 1 A and 1 B. In 1 A are 14 patients with three attendants. In 1 B are 24 patients with four attendants. We think that on Sundays as on all other days three attendants should always be present in No. 1 A. An opposite practice however prevails. The wards for each sex are well ventilated and as cheerful and comfortable as the structure of the Hospital will permit, but No. 4 Male ward urgently requires repainting and repapering. We could wish that in some directions there was more light in the wards, but we are told that architects have declared that the admission of more light is impracticable. The shower baths should all be kept locked and they would be better for the admission of more light. The bath casing in No. 3 female ward is not dirty but it looks dirty, and would be much improved by scraping and perhaps by being varnished instead of being repainted. In several galleries we noticed new and tasteful furniture some of which was the work of patients, and some had been purchased with monies sent by grateful patients for that purpose after their discharge. The clothing of both sexes we thought was satisfactory, the more destructive

cases are, it seems, supplied by the Hospital with suitable dresses. No patient was in seclusion at the time of our visit except a gentleman in 1 A, and he was only restrained by closed sleeves. No one of either sex was in seclusion. According to the medical records restraint has been limited to two patients, a male and a female, the former for three nights on account of violence, the latter to prevent self-destruction also for a short period. The men secluded have been six for an aggregate of 60 hours, the women so treated have been three for 28 hours. Under medical treatment are last registered 15 males and 12 females. Three women were the only persons in bed while we inspected the Wards. Epileptics are excluded from this Hospital; but among the patients are many actively suicidal. For these it appears to us that there certainly should be continuous supervision by night as well as by day. Throughout England and Wales observation dormitories have been provided in Asylums for such and for other cases needing like supervision with the most satisfactory results. It may be difficult, though it is not impossible to provide such precautions against suicide in this Hospital; and we venture to think that the matter should again be brought under consideration of the governors, and until by alteration or new buildings, such dormitories are supplied we must continue to think that they should be. Something in this direction might be done (though it might not be a perfect provision) by conversion to such purposes of the present dance and billiard rooms, at all events till better provision could be made. Another mode of continuous night suspension of the suicidally disposed suggests itself to us in view of the structural difficulties here presented to any alteration of the existing buildings. The

actively suicidal in each division might be placed at night in adjoining single rooms, these should be sufficiently lighted from the corridors, slits for observation being made in the doors, and apertures over the doors for the transmission of sound, all means of self-destruction should of course be removed from the rooms, and an Attendant should continuously pace the corridor, recording his beat and only entering a room when and if necessity arose. At Broadmoor Asylum it is found possible for a patrol in this way to watch very closely and without detrimental interference, patients sleeping in single rooms. The ordinary night staff now consists in the male division of one man only, about to be assisted however by another who is to accompany him in his rounds. This assistance is we think absolutely necessary for feeding and general security. In the female department there are at night two nurses on duty and a third is we understand about to be employed, one of these nurses is up for the first half of the night, the other for the second half, the third nurse alone has no day duty. She works through the night going with each of the others on her round. The general rule of night visitation is once every hour, but certain cases on a list are visited every half-hour, and for extraordinary cases special provision is made, but as our Board have already been informed, there is no continuous night supervision of every case known to be actively suicidal. The admission of paying patients here has it seems increased the necessity for infirmary accommodation. To meet the necessity, Dr. SAVAGE proposes to occupy space hitherto but little used in numbers two and three on the male side. These infirmaries will probably entail some increase in the number of attendants. In this direction Dr. SAVAGE has wisely encouraged several patients to assist in the work of decoration. About the

usual number of patients is usefully employed. We are glad to hear that a new and large recreation room is about to be erected, possibly by raising the walls of the laundry in which case a new laundry is to be built beyond the kitchen at the rear of the Hospital. It seems that the finances of the Hospital are not in a state at present to meet considerable outlay in any direction. The theatrical and other entertainments subsequently given in this Hospital are, we think, much appreciated by many of the patients, and we have no doubt contribute to the recovery of many.

CHARLES PALMER PHILLIPS, } *Commissioners*
REGINALD SOUTHEY, } *in Lunacy.*

BETHLEM HOSPITAL,

September 10th, 1884.

Since our colleagues were here in the beginning of this year, 93 males and 99 females have been admitted; 86 males and 116 females have been discharged; 66 of the former and 67 of the latter having recovered; 13 males and five females have died. There are on the books to-day, the names of 273 patients, 129 on the male and 144 on the female side. Three men and two women were away on leave, and seven men and 18 women were absent at the Witley Convalescent Branch of this Hospital, where we hope shortly to see them. All the rest of the patients were seen by us during our visit. No one was noisy or offensive. Complaints were few and confined to alleged undue detention. We paid special attention to every case admitted since the last visit, and satisfied ourselves that all who were detained, were rightly so treated. Some of the patients who are improving will be found recorded in the patients book. The domestics were in good order. The dinner we saw served was good and ample.

The only improvement to be noticed since the last visit, is that the suicidal patients are now at night under the constant charge of a special Attendant, in either division, who has no other duty but the care of these patients.

The patients health appears satisfactory, six men and one woman were seen by us in bed, the woman was also

rightly in seclusion. She was the only patient so treated at the time of our visit. Seclusion and restraint have both been found necessary at various times, restraint only for medical or surgical reasons, and seclusion for the same reasons, or for extreme violence. Under medical treatment last week we find 24 names recorded, 14 males and 10 females. Dr. SAVAGE was absent on his annual holiday, but we received all the information we required from Dr. WOOD, who is assisted by two Clinical Students in the discharge of his duties. We have ascertained what arrangements are in force for the recreation, attendance at divine service, occupations, &c., of the patients, and having made the Statutory enquiries have nothing special to report.

W. E. FRERE, } *Commissioners*
 REGINALD SOUTHEY, } *in Lunacy.*

BRITISH HOSPITAL

The following is a list of the names of the patients who are admitted to the British Hospital, and the names of the medical officers who are attending to them. The names of the patients are given in full, and the names of the medical officers are given in full, or in initials, as the case may be. The names of the patients are given in full, and the names of the medical officers are given in full, or in initials, as the case may be. The names of the patients are given in full, and the names of the medical officers are given in full, or in initials, as the case may be.

W. R. ROBERTS
 MEDICAL OFFICER

INDEX TO TABLES.

No.	Page
1 Showing the Admissions, Re-admissions, Discharges, and Deaths during the year ending 31st December, 1884 ..	56
1A Showing (1) the Previous Attacks among Persons admitted during the year 1884; and (2) the number of times they had previously recovered in this or any Asylum ..	56
2 Showing the Admissions, Re-admissions, Discharges and Deaths during the 20 years from 1st January, 1864, to 31st December, 1884	57
2A Showing the Admissions and Recoveries of Persons from January 1st, 1864, to the present date, 31st December, 1884.. .. .	57
3 Showing the Admissions, Discharges and Deaths, with the Mean Annual Mortality and Proportions of Recoveries per cent. of the Admissions, for the 20 years 1864-1884.	58
4 Showing the History of the Annual Admissions since the year 1820, with the Discharges and Deaths, and the number of each year remaining on the 31st December, of the year reported on	59
5 Showing the Causes of Death during the year 1883, together with the Ages at Death.	60
6 Showing the length of Residence in those Discharged Recovered, and in those who have died, during the year 1884.. .. .	61
7 Showing the Duration of the Disorder on Admission, in the Admissions, Discharges, and Deaths, during the year 1884	62
8 Showing in Quinquennial periods the ages of those Admitted, Recovered and Died, during the year 1884, and of those remaining on 31st December, 1884 ..	63
9 Showing the condition as to the Marriage, in the Admissions, Recoveries, and Deaths, during the year 1884, and of Patients Resident December, 31st, 1884	64
10 Showing the probable causes of Insanity in the Patients Admitted during the year 1884	65
11 Showing the form of Mental Disorder of Admissions, Recoveries, and Deaths of the year 1884, and the Form of Mental Disorder of the Inmates on 31st December, 1884	66
12 Occupation of Patients admitted during 1884	67
12 Occupation of Patients discharged during 1884	68
12 Occupation of Patients who died during 1884	69
13 Religious Persuasion	70
14 Residence	71
15 General Health	71
16 Behaviour	72
17 Suicidal Tendency	72
18 Return of the incurable patients now in the Hospital ..	73
19 Time the incurable patients have been in the Hospital ..	76
20 Degree of education of incurable patients in the Hospital	76

† The figures in the total column represent the entire number of instances in which the several causes (either alone or in combination with others) were stated to have produced the mental disorder. The excess of the aggregate of such causes over the number of patients admitted is owing to combinations of causes.

On Easter and Whit Monday, 6 oz. of Roast Veal to be allowed instead of the usual Meat for the day.

The Steward has liberty to vary the diet occasionally by Pork and Bacon, when Peas and Beans are in season; and by Fish, Fruit Pies, &c., when Fish and Fruit are plentiful and good.

The Sick to be dieted at the discretion of the Resident Physician.

The Attendants to have at all times the means of obtaining Gruel for such Patients as may require it.

The above to be considered maximum allowances, and all quantities unaccounted for are to be taken in diminution of the next supply from the Stores of the Hospital.

		36,238 17 6	36,272 10 0	6,891 11 1			
					36,238 17 6	36,272 10 0	6,891 11 1

We find that the sum of £1,755 4s. 7d. is due from the Incurable Establishment to Bethlehem Hospital, being interest at the rate of 4 per cent. per annum upon the sum of £43,890 15s. 8d., in conformity with the resolution of the General Quarterly Court, 29th November, 1884.

A. M. JEAFFERSON,
Receiver, &c.

We, whose names are hereto subscribed, have Examined and Audited the preceding Account for the Year ending 31st December One Thousand Eight Hundred and Eighty-four, and find the same correct and the Balance as specified, this Tenth day of February, One Thousand Eight Hundred and Eighty-five.

JNO. BAGGALLAY, Treasurer,
JOHN MILES,
EDWARD W. STANTON,
WALTER D. CRONIN.
