TO THE COUNCIL OF THE CITY OF BRISTOL.

THE FIFTEENTH ANNUAL REPORT

OF

THE COMMITTEE OF VISITORS

OF THE

LUNATIC ASYLUM, FOR THE CITY AND COUNTY OF BRISTOL,

Your Committee have pleasure in reporting that the state of the Asylum during the past year has been satisfactory.

The number of Patients in the Asylum at the date of our last report was 129 Males and 143 Females, making a total of 272.

There are at the present time 122 Males and 147 Females.

The highest number resident at one time during the past year was 293.

The enlargement of the Asylum has been commenced, and that on the male side is progressing rapidly, but that on the female side has been delayed on account of quarrying, for the purpose of making a large rain water tank.

Your Committee are now negotiating with the Water-Works Company for a supply of pure water to the whole of the establishment.

On the 10th of November last C. P. Phillips and J. D. Cleaton, Esquires, two of the Commissioners in Lunacy, visited the Asylum and reported of the establishment, and a copy of their minute will accompany this Report.

Your Committee regret to say that on the 19th of November last, Miss Yeamans, the head female attendant, died, after a severe illness; her loss was much felt.

On the resignation of Dr. H. Dickson, the assistant medical officer, Mr. de Denne was elected to the vacant appointment, and has given your Committee much satisfaction.

The Report of Mr. Thompson, the Superintendent, annexed hereto, will afford important information as to the condition of the Patients.

The whole of the establishment is in good order.

FREDERICK TERRELL,

Chairman,

Council House, 31st December, 1875.

REPORT

OF THE

VISITING COMMISSIONERS IN LUNACY.

BRISTOL ASYLUM,

November 10th, 1875.

Our inspection of this Asylum to-day informs us that the patients on the books are 277, the males being 123, the females 154. The women's division is overcrowded, there are 9 vacant beds on the men's side. No person of either sex is absent on leave. All whose names are now on the books are paupers except a woman who was here at the date of our colleagues' visit last year. The out-county patients are 7, of whom one only is a man. The charges weekly for those patients is still 14s., the Bristol paupers are received at 12s. The changes by admission, re-admission, discharge and death since the Commissioners' visit on the 11th September, 1874, have been these:—

	Men.	Women.	Total.
Admitted	36	43	79
Re-admitted	4	13	17
Discharged	20	36	56
Died	31	17	48

Recovery was recorded by Mr. Thompson in 41 of the 56 discharged cases. The rate of mortality has again been very high, amounting to fully 15 per cent. per annum, calculated on the average daily number resident, and 13 per cent. upon the total number who have been under treatment. This death

rate is 5 per cent. higher than the usual average in English County Asylums. The following table shews the causes of deaths, post-mortem examinations having been made in all but 7 of the deaths:—

	Males.	Females.	Total.
General Paralysis	8	1	9
Epilepsy	8 5	4	9
Other forms of Brain Disease, including those having terminated in ordinary	6	3	9
paralysis and apoplexy) Exhaustion after Mania and Melancholia	0	2	2
Pulmonary Consumption	4	ī	5
Other forms of Lung Disease and Heart	3	1	4
Diseases of Abdominal Organs	1	0	1
Senile Decay	2	3	5
Other ordinary Causes	2	1	3
Typhoid Fever	0	1	1
particular and descriptions and delegated	31	17	48

There has been no suicide or fatal casualty and no Coroner's inquest has been held. One of the deaths was from typhoid This disease first made its appearance in the Asylum in September 1873, and it has prevailed during the summer and autumn months ever since. Altogether there have been 28 cases, and of these 10 have occurred since the last visit of the Commissioners, two of these latter cases being male patients, 6 female patients, and 2 female officers. At the present moment the head female attendant has the fever in a most severe form, and her life is in a very precarious state. It appears that the fever has always broken out after the usual winter water supply of the Asylum has been supplemented by pumping from what is called "The Grove." The well in "the Grove" is probably supplied by percolation from the neighbouring stream, and that stream, it is stated to us, receives a portion of the drainage from the adjoining Stapleton workhouse, where fever cases are often under treatment. The attention of the visitors has, at the last

two visits by members of our board, been called to the probable impurity of the drinking water, and the want of ventilation of the drain leading to the sewage tank. The latter has been remedied; but nothing has been done in the way of further analysis of the water from the various sources, one at least of which has long been thought to be not free from contamination. The matter urgently calls for immediate scientific investigation and for prompt action on the part of the visitors, with the view of stopping the further appearance of what experience proves to be, if due sanitary precautions are adopted, a readily-preventible disease. A grave responsibility will rest with the authorities of this Asylum, if any further delay should take place in the matter. We have inspected every part of the building, and we have also viewed the structural works in progress for its enlargement. The wards were in good order when seen by us, and they have on the whole a cheerful aspect. The bedding was everywhere clean, and sufficient in quantity for the present season. When the occupation of the blocks in course of erection shall have swelled the population of the Asylum, we feel confident that the chapel, the dining hall, the workshops, and the laundry will all be insufficient in size for so many patients as will then have to be cared for here. The additions to the female side have as yet scarcely got above the foundation walls; the extension of the men's accommodation is built up to the first floor. No mischief has apparently yet resulted to the patients from these works; nevertheless, such operations often disturb the discipline of an Asylum, and we therefore trust that no unnecessary delay on the part of the contractor will be tolerated. Among the improvements in the interior of the Asylum since last visit, we especially noticed the re-painting and re-papering of five day rooms, and as many dormitories. During our presence in the wards the patients of both sexes conducted themselves as well as could be expected of insane persons, and noisy excitement was limited to one or two individuals. No one was under restraint or in seclusion. The epileptics are 33 men and 22 women. For the continuous night

supervision of these patients provision will, we trust, be made so soon as the additions to the Asylum have been opened. The dress of a few patients might have been more tidy, but the personal appearance of the great majority inspected by us was satisfactory. The men's linen can, however, scarcely be clean during a whole week's wear by day and by night, and we therefore repeat the recommendation made last year that a change should be given in the middle of each week. The insufficient supply of water is still a hindrance to proper bathing, and we are inclined to think that the dormitory washhand basins are not as often used as they should be. We saw 60 men and 58 women at dinner in the hall; although with these numbers the room was overcrowded, good order prevailed. The dinner consisted of pie partly made with Australian meat, but a good many patients refused or objected to the food. We think that the pies would be better liked if they also contained potatoes, which are now cooked separately and distributed in an unpeeled state. The number in bed as we passed through the wards were 6 of each sex; under medical treatment-last week, we find registered 17 males and 26 females. The records show that during the last 14 months there has been one instance of restraint, that of a man who was tied to his bed by means of sheets, having also his ankles and wrists secured for 84 days to prevent self-mutilation. During the same interval 7 men and 24 women have been secluded, the former on 21 occasions, and for a total duration of 207 hours, and the latter on 83 occasions, and for 413 hours. The attendance at Divine service, and the arrangements for out door exercise and amusement of the patients, and the numbers usefully employed are about the same as heretofore reported in former years. staff of attendants, in the female division, is temporarily 2 below the proper complement, owing to one vacancy and the illness of the head attendant; in these circumstances 2 additional nurses should at once be appointed. We are glad to learn that the wages of the female attendants which formerly did not rise above £14 a year have recently been increased, so that they commence at £14 and

advance annually £2 up to £20. We had no complaints of illtreatment from the patients against any of the present attendants in either division, and there were many indications that the medical superintendent and the assistant medical and other officers, are zealous and active in the discharge of their duties.

CHARLES PALMER PHILLIPS, Commissioners JOHN D. CLEATON, in Lunacy.

FIFTEENTH ANNUAL REPORT

THE MEDICAL SUPERINTENDENT.

1875.

To the Committee of Visitors of the Bristol Lunatic Asylum.

January 1st, 1876.

GENTLEMEN,

I have the honour of submitting to you the Fifteenth Annual Report of the Medical Superintendent, which, together with the Statistical and Financial Tables annexed, will afford detailed information on all matters concerning the condition of the Asylum and its Inmates.

The admissions, re-admissions, discharges, and deaths have been as follows:—

		MALES.			FEMALES.	
	Private.	Pauper.	Total.	Private.	Pauper.	Total
On the Books Dec.) 31st, 1874. Admitted in 1875 Re-admitted in 1875	"	129 37 4	129 37 4	1 ,,	142 46 11	143 46 11
Discharged :— ,, Recovered ,, Relieved ,, Un-relieved Removed Died	;; ;; ;; ;;	17 3 0 2 26	17 3 0 2 26	;; ;; ;; ;;	29 3 1 4 16	29 3 1 4 16
Remaining Dec. 31st, 1875.	,,	122	122	1	146	147
Highest Numbers }	,,	130	130	1	162	163
Average Numbers } Resident	,,	126	126	1	155	156

On comparing the above Table with the similar one contained Comparison of Numbers. in the Report of 1874, it will be found that there has been during the past year an increase of 17 in the number admitted and re-admitted; of 6 in the number of patients under treatment; a decrease of 8 in the highest number resident on any given day; of 3 in the average numbers resident; and of 4 remaining on the books at the end of the year.

The proportion of curable cases of the whole year's admissions The Admissions has been higher than in recent years. It has been no less than 56.7 per cent. Of the cases admitted from the various Workhouses, a marked contrast is seen. Eighteen such cases were admitted, and only four presented a reasonable chance of recovery, or a proportion of 22.2 per cent., whilst the proportion of those brought from their homes, or found wandering, was no less than 64.4 per cent. There has been no marked increase of admissions from the Workhouses in consequence of the grant from the Treasury, as was generally anticipated, over previous years, the proportion in the year just closed being 18.3: in 1874, 18.5; in 1873, 14.4; and in 1872, 19.0 per cent. on the total admissions. None of the "Relieved" cases removed in 1874 to the Bristol Workhouse has as yet returned, which fact tends to prove that the cases had been carefully selected for discharge. Of the incurable cases, as may be seen by reference to Table VII., 5 were epileptics, 9 were general paralytics, and 7 were the subjects of other forms of organic disease of the brain. These conditions were invariably accompanied by an extremely weak condition of bodily health. Intemperance was the exciting cause of insanity in a much larger proportion than in former years, a fact which I cannot explain; but as these cases nearly always recover, an explanation may be found for the increased proportion of curable cases admitted over previous years. Two women were admitted whilst pregnant, but were both discharged before the time for their "confinement" arrived.

Fifty-nine patients have left the Asylum; of these 17 men The Discharges. and 29 women were deemed recovered; 3 men and 3 women were

discharged relieved one of each sex to the Bristol Workhouse, the others going to their friends; 2 men and 4 women were removed to other Asylums relieved; and one woman was discharged unrelieved to the care of her friends. The proportion of recoveries estimated on the admissions has been 47 per cent. It may be interesting to note that after deducting the first year's admissions and discharges, the rate of recovery since the opening of the Asylum has been 40 per cent., whilst in 1874 the rate of recovery in all the County and Borough Asylums in England was 37.9.

The Deaths.

Forty-two patients have died. Calculated on the average number resident, this number gives a per centage of 14.8; but considering that the daily average number resident has not increased since 1872, and that deaths amongst the members of the community who are long resident will go on, this death rate can hardly be called high. Eleven of the deaths occurred in patients admitted in 1875, and of these 3 had been sent in from Workhouses only a few days before death. The average age at death was 49 years. The causes of death were as follows:—General Paralysis 8, Epilepsy 8, other forms of brain disease, 8, Pulmonary Consumption 5, acute Pneumonia 1, Disease of the Heart 3, Dysentery 1, of general Diseases 8. The proportion of deaths to the total number under treatment was 11.3.

Accidents.

Fractures of bones occurred in the cases of two epileptic patients, caused by falling when seized by fits. In neither instance did anything more than temporary inconvenience ensue. No inquest has been held; and hitherto no case of suicide has occurred in this Asylum.

Case of E. W.

In the Report of 1863, my predecessor refers to this patient, a woman, as having given him much anxiety, in an attempt she made to commit suicide by swallowing the contents of a dominobox and a number of pebbles, which, when recovered weighed fourteen ounces. This year, this woman has performed a feat which puts her former one entirely in the shade. She was admitted for the third time in June last, having been removed to

her own county Asylum on two previous occasions and discharged therefrom. On the 21st of July she got possession of a number of iron screws used in the ward for securing the window shutters, of these she swallowed thirteen, before breakfast. A cursory examination sufficed to shew that what was gathered from her own statement was true, as the contents of her stomach could be made to rattle so as to be heard across a large room. The screws are 25 inches in length, half an inch thick, having a square head for the application of a key, and a collar projecting & of an inch from the main body of the screw. Thirteen similar screws weighed 24 ozs. Troy weight; one screw which had not been swallowed weighed 730 grains. She retained this mass of solid iron with very little inconvenience, except spasmodic pains, until the 6th of September, when one screw weighing 700 grains passed from the bowels. Since then she has passed 4 more screws. I give the dates and weights :- Oct. 19th, 665 grains; Nov. 26th, 645 grains; Nov. 27th, 645 grains; and Dec. 3rd, 555 grains. The case is certainly an extraordinary one, and calls for no further comment.

In February a female patient (Mrs. M. J. P.), who had been A Birth. admitted in November of the previous year, gave birth to a healthy male child.

The general health of the patients has not been good through- General Health. out the year. The sick list has been a large one, the result of which has been, besides an increased death-rate, a very considerable expenditure in wines, spirits, drugs, and extra diets. A large number of patients have suffered from boils, carbuncles, and other diseases, which are probably due to over-crowding, and seven cases of enteric fever have occurred, which may be attributed to another cause—the impurity of the water.

The first cause of deterioration of the patients' health, viz., The New Buildover-crowding, will receive a check during the course of this year by the completion and occupancy of the new buildings now in course of erection. At present the walls of the new block on the men's side are all but finished, but progress has been delayed on

the female side by the amount of work required to quarry the rock to such a depth as to allow the construction of a large rainwater tank, which, at but a small extra cost, you have been able to provide. When finished this tank will hold water to the depth of 20 feet, and each foot in depth will represent nearly 10,000 gallons of water.

The Water Supply. The analysis of the water found in the four main sources of supply, made by Mr. W. Stoddart, F. C. S.,* in December, shows that it is expedient that a new source should be looked for. If the negotiations now going on with the Water Works Company should fail, nothing but the sinking of a deep well will remedy this sad defect in our arrangements. It is a defect which has troubled us ever since the first year the asylum was occupied, as may be seen on referring to the previous Reports. There is no doubt that the attacks of Enteric fever follow the use of the water pumped from the Grove well, and until we can abandon this source the lives of those resident on the Asylum estate will continue to be endangered.

Visit of the Commissioners in Lunacy.

The usual visit of the Commissioners in Lunacy was made on the 10th of November. In a few points of detail and in the larger question of the water supply, they find fault, but, on the whole, their report, which is annexed, is highly satisfactory.

*Report of Analyses of four samples of Water, from sources from whence the Asylum is supplied—made in December, 1875, by W. Stoddart, F.C.S.

Miss Louisa Yeamans, who for six years filled the office of Death of head attendant, and to whose severe illness the Commissioners Head Attendant refer, died on the 19th of November of acute miliary phthisis, following upon a very severe attack of typhoid fever. a faithful servant, an amiable colleague, and possessed of rare ability.

Mr. M. R. Draper, who held the office of assistant medical staff of officers. officer at the date of my last report, resigned in March, to enter upon private practice. He was succeeded by Dr. Hanmer Dickson, who resigned after six months of service for reasons peculiarly his own. My associate in the medical department is now Mr. T. V. de Denne, who entered upon his duties on October 2nd. I need only say that he is an able, experienced, and agreeable colleague. Miss Annie Webb, of the City of London Asylum, will succeed Miss Yeamans as head attendant, and will enter upon her duties to-day. In other departments the chief officers remain as before, and to them and to the attendants and servants generally my thanks are due, and are hereby tendered.

The determination to which you had come to award such of Attendants' the female attendants as remained in your service over a year by raising their wages £2 each year, has already had a good effect, by making them more settled, and, in so doing, by securing to the asylum the services of many experienced servants who might otherwise have been induced by higher wages to seek employment elsewhere.

In subscribing my name to this my fifth report, the fifteenth of the series, I have to acknowledge much indulgence and sympathy displayed on your part, and to thank you for the generous support and kindness I always receive at your hands, and

> I remain, Gentlemen, Your obedient Servant,

GEORGE THOMPSON, L.R.C.P., Lond., Medical Superintendent.

	Days.	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday

Rhubarb, or Fruit Pies in the season occasionally, in addition to the Sunday Dinner, or Green Vegetables, as Lettuces and Young Onions, &c.

Cabbage, Leeks, Parsnips, or Carrots are served with the Corned Beef not unfrequently.

Roast Veal on Easter and Whitsunday. Plum Buns for Breakfast and Tea on Good Friday. Pork substituted occasionally instead of Beef. Mutton served to the sick, and Porter, Wine, Spirits, &c., at the discretion of the Superintendent.

During the Summer and Autumn months, Baked Rice Pudding, supplemented by Bread and Cheese, is substituted for Pea Soup on Tuesdays.

Lunch for Male Working Patients, 4 oz. Bread, 1 oz. Cheese, and \(\frac{1}{2} \) pint Beer, at 11 a.m.; at 4 p.m., \(\frac{1}{2} \) pint Beer. Female Patients the same Lunch and \(\frac{1}{2} \) pint Tea at 4 in the Afternoon, to Males and Females a Hot Meat Supper once a fortnight.

A small quantity of Rag Tobacco is distributed to the Men, and snuff to the Women as a reward for good conduct.

Caraway Cake is generally substituted for the Bread and Butter at Tea on Sundays.

CHAPLAIN'S REPORT.

THE ASYLUM,

STAPLETON, NEAR BRISTOL.

MR. CHAIRMAN AND GENTLEMEN,

I have again the privilege to present to you an annual Report. I have first to remark that our services in the chapel have been performed as in past years—in this respect one year is like unto another. The Holy Communion was administered publicly four times, and in private upon several occasious, at the expressed wish of sick and dying patients. The visitations of the wards have also been regularly made; there has been the usual canvassing of the sermons; the same eagerness for explanation or consolation which makes plain the attention that has been shown, and gives hope that among the many influences for good within Asylum walls religion too is a healing power.

May I venture to appeal to you once more on behalf of our library. We have very few books, and those few well thumbed and worn. Our Asylum will soon be of considerable extent, and the want of books will become more serious; there is scarcely a day that I am not asked for something interesting to read, and I think this is sufficient to recommend the matter to your notice.

It is with pain and grief I recall before you the loss we have sustained through the death of Miss Yeamans; she, however, died the noblest of deaths—she died at her post. Conscientious, zealous, kind, she won all hearts who knew her, and will be long spoken of here and remembered. During her illness she was grateful for the least word of sympathy, and felt obliged for the least visit; I am sure, however, she was in every case the obliger rather than the obliged. No one could have lingered in her presence without remembering her worth, and hoping that at the last a goodness like hers might be a strong tower.

I have the honour to be,

Gentlemen,

Your faithful and obliged Servant,
J. BURCHELL SPRING.

24th December, 1875.
