# REPORTS

ON

## BROADMOOR CRIMINAL LUNATIC ASYLUM,

1888.

### TWENTY-SIXTH ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT.

*Broadmoor Criminal Lunatic Asylum,  
Crowthorne, Berks,*

SIR,

31st August 1889.

I HAVE the honour to submit, for the information of the Council of Supervision, the following report upon this asylum for the year 1888; together with the usual statistical tables for the same period.

The financial statistics in the Appendix have reference to the twelve months ending on the 31st of March 1889.

On the 1st of January 1888, the asylum contained 553 inmates, Population. there being 406 men and 147 women.

During the year, 101 men and 12 women were admitted, 2 men and 3 women were discharged out of custody, 19 men and 4 women were transferred to other asylums, and 14 men and 3 women died.

On the 31st of December 1888 the inmates numbered 618, of whom 471 were men and 147 were women.

In the course of the year, 664 persons in all were under care, namely, 506 men and 158 women. The average number resident was 567, namely 419 men and 148 women.

The following is the numerical distribution of the two classes of inmates on the 31st of December, 1888.

Class.	Males.	Females.	Total.
Under Detention during Her Majesty's pleasure - - - -	385	124	509
Under Sentence { of penal servitude (Convicts)	83	23	106
{ of imprisonment for shorter periods - - - -	3	0	3
Total -	471	147	618

Table 27 details the crimes of the 618 patients who were inmates of the asylum on the 31st of December 1888, and their classification according to the various official stages at which insanity was recognized. It will there be seen that the population included 308 inmates who had committed homicide (290 cases of murder and 18 of manslaughter). Of these 195 were men and 113 were women.

As regards the crimes committed, the proportion of cases of homicide was, for the whole population, 50 per cent.; for male inmates alone 41 per cent., and for female inmates alone 76 per cent.

As many as 154 inmates (139 men and 15 women) were under detention for "attempt to murder, maim, &c."

#### Admissions.

Of the 113 admissions (101 men and 12 women) 39 (31 men and 8 women) were "Queen's pleasure" patients, *i.e.*, insane persons (being criminal offenders) not sentenced to any term of imprisonment but ordered to be detained during Her Majesty's pleasure. The remaining 74 (70 men and 4 women) consisted of insane convicts, *i.e.*, of persons certified to be insane whilst undergoing various terms of penal servitude, the sole exception being that of a man who was certified in the course of a term of ordinary imprisonment, and who, for special reasons, was sent to Broadmoor instead of to the asylum of his county.

With regard to the Queen's pleasure patients, the number admitted may be taken to represent the occurring cases of this class of insane offenders during the year. It is not, however, to be understood that the admissions of insane convicts represent the insanity occurring in convict prisons for one year only, as they were, in fact, the accumulated insane of a number of years detained for treatment at Woking Prison.

#### Re-admissions.

The admissions include five men and one woman who had previously been inmates of Broadmoor. Of these, three men were insane convicts who after transfer to their county asylums upon expiration of a former sentence had been set at large, and who, upon committing a fresh offence, were again sent into penal servitude.

Two men and one woman were Queen's pleasure patients who, upon recovery, had been conditionally released from the asylum to the care of their relations, and who, having relapsed into a state of insanity, were brought back to Broadmoor in accordance with the terms of release. No fresh offence was committed in any of these cases. The particulars of all the re-admissions into Broadmoor are given in Table 21.

#### Discharges.

Two men and three women were discharged out of custody to the care of relatives upon warrants of conditional release. Two of these, one man and one woman, were re-admitted during the year in consequence of their having relapsed into insanity.

There were 19 men and four women transferred to other asylums. Of these, 10 men and four women were removed as pauper lunatics at the expiration of their sentences. The remainder

were Queen's pleasure patients who had become demented and harmless and fit for removal to ordinary asylums. Two Italians, one a convict under sentence for attempted murder, and the other a Queen's pleasure inmate who had committed murder, were handed over to the Italian Government for transfer to asylums in their own country.

The deaths numbered 19, namely, 14 men and five women. The percentage of deaths, reckoned upon the average number resident during the year, was, for men 3·34; for women 3·37; for both sexes 3·35. The yearly average percentage of deaths for both sexes since the opening of the asylum is 3·03. Deaths.

Eleven of the deaths were directly caused by disease of the brain; three were due to cancer of various organs, three were caused by disease of the heart, one by inflammation of the bowels, and one man died from old age and natural decay.

There was no death from consumption, nor was any death caused by violence, suicide, or accident.

In accordance with regulation, the coroner held an inquest in each case. The *post-mortem* notes of all the cases are recorded in Table 36.

The general health of the inmates throughout the year was good, and there was no epidemic amongst them. General health.

The epileptics, always a source of trouble and anxiety in an asylum, numbered 44 at the end of the year. They are kept under careful supervision by day as well as by night.

The usual return is given in Table 33 of the various kinds of work at which inmates were employed, with the estimated value of their labour, for the year ending with March 1889. It will there be seen that 218 men and 117 women were usefully employed at remunerative work, and that the value of their labour amounted to 3,647*l*. Industrial occupation.

The question as to the employment in lunatic asylums of what is known as mechanical restraint, occupied a considerable amount of public attention last year. Mechanical restraint.

The legitimate or justifiable use of mechanical restraint is one thing; the authorised abuse of it is another.

The sanction of modern times in this country is clearly against the use of mechanical restraint; and very properly so, in recollection of the extent to which it was carried in days gone by. The existing practice is, as a matter of fact, in accordance with this sanction; and the exceptions, where this form of restraint is used for other than surgical reasons, are sufficiently few to afford the best proof of the rule. Besides sanction and practice, an element of sentiment has crept into the matter which would fain make it of the nature of a crime to use mechanical restraint at all, unless, perhaps, in surgical cases.

Mechanical restraint is practically unknown at Broadmoor. It was, I believe, used on a few occasions in the early days, but for

over 20 years it has been found possible to do without it. The comparatively numerous staff of attendants at this asylum enables exceptional strength to be brought to bear when occasion requires it: but my own feeling in the matter is that in a case of continuous and long-sustained maniacal violence, with an activity avowedly and determinedly homicidal, it is possible to carry the non-restraint principle (so called) too far and at too great a cost. Few people who have not been engaged in it are able to estimate the wear and tear of nerve and heart which a tussle with a desperate lunatic of this sort means to the attendants, apart from the risk of positive injury either to patient or warders. And when this struggle has not only to be anticipated but to be engaged in several times a day for a lengthened period, the justifiability and humanity of simple, effective, and safe mechanical restraint become apparent. If ever it should be my lot to be a lunatic such as the one whose treatment is here in question, I hope my good friend the superintendent who has me in charge will not be too squeamish about recent traditional usage, but will see that I am checked by the minimum but necessary amount of mechanical restraint to ensure my own safety and that of others. On the one hand, I do not wish to think that under any circumstances I should be the means of inflicting injury upon my attendants: on the other hand I would infinitely prefer mechanical restraint to the long-continued manipulations, however skilful and friendly, of four or more attendants heaped together upon my prostrate form.

I have thought it right to dwell at some length on this subject as public reference was made to Broadmoor practice in the correspondence that took place.

I have no intention of breaking our long record by the introduction of mechanical restraint if I can possibly help it. If I should be compelled to have recourse to it in any case it will be because I regard it as the kindest, the most humane, and the least harmful mode of treatment under the particular circumstances.

The evil to be feared with regard to the employment of mechanical restraint is lest its legitimate use should lead to its authorised abuse. This could never happen if, in every case, the medical superintendent himself were to order it to be used and that only after careful and complete personal investigation. When the restraint is applied by underlings and its use afterwards sanctioned by the responsible officers, we have the authorised abuse which is altogether wrong and reprehensible.

The casualties during the year were few in number—

J. B., under the influence of a dangerous delusion made a sudden and determined attack upon an attendant. Another attendant speedily came to his colleague's assistance. In their efforts to control the man's violence, he sustained fracture of one of his lower ribs. The patient though lusty was well advanced in years, and the brittleness of the rib not improbably facilitated its fracture. After careful investigation I satisfied myself that the injury was

Casualties and  
exceptional  
occurrences.

accidental and not due to the use of any intentionally unnecessary force.

This is the only casualty of the sort (having relation to the contact between attendants and patients) that occurred.

J. M. pushed a fellow inmate, an epileptic, aside out of his way and was afterwards stooping down in the act of tying his bootlace. The epileptic, in retaliation, went forcibly at J. M. from behind, and, pushing him over, caused a fracture of the neck of the femur. He made a good recovery from the injury.

I. C., a female, fell accidentally in her room and fractured her fore arm.

M. C., another female, suffered from extensive syphilitic disease of the bones of her left ankle and of the soft tissues of the leg. It was necessary to have recourse to amputation below the knee. The operation was performed by Dr. Isaac, and the stump healed by the first intention, without an unfavourable symptom.

L. O., who was admitted into the asylum on the 10th of February, gave birth to a male child on the 2nd of April following. At the husband's request the infant was transferred to the care of his wife's relations.

Two members of the Board of Commissioners in Lunacy visited the asylum on the 11th and 12th of July; and a copy of their report will be found at page 13. Visit of Commissioners in Lunacy

Of the attempts at escape, three were successful, but only one completely so. One man in January by means of a surreptitiously made key escaped from his block at nightfall, and succeeded in getting into the kitchen garden, whence he reached the open by getting over the wall. He has, up to the present, managed to avoid recapture; and he has not improbably left the country. Escapes.

Another male patient while at work one forenoon in the kitchen garden took advantage of a sudden accession of fog and escaped by climbing over the wall. He was captured next morning in the neighbourhood and brought back to the asylum.

It is much to be hoped that before long the Council of Supervision may succeed in their efforts to get from the Treasury the funds necessary to provide a garden wall of proper height. Its present insufficient height not only affords a means of escape to those who can get to it, but also holds out a temptation to some who might not otherwise try to make their escape. If this wall were raised to a secure height of 16 feet, the same as the general boundary wall of the asylum, a larger number of patients could with comparative safety be advantageously employed in the kitchen garden.

The third escape was effected by means of a dangerous but successful leap made from some scaffolding on to the temporarily broken end of a partition wall. The man, an active youth who had formerly been a sailor, was recaptured about seven or eight miles from the asylum before midnight.

It is not surprising that the idea of escape is much in the minds of a population situated as the inmates of Broadmoor are. Many

of them, although fully convalescent and practically recovered, are yet quite unfit to be released from asylum supervision and permitted to go at large, in consequence of the risk that would be incurred. In order to make the daily life of the inmates as little irksome to them as possible, it is necessary to extend at least a reasonable amount of privilege and freedom to them within the walls; and it is only in the nature of things that these privileges should from time to time be taken advantage of and abused. Since the opening of the asylum in 1863, embracing a period of over 25 years, only 28 inmates out of an average yearly population of 473, have contrived to make their escape, and of these all have been recaptured with the exception of four. Up to last year no inmate had succeeded in making good his escape and avoiding recapture since 1873. Under all the circumstances, and bearing in mind the fact that no offensive or defensive weapon is permitted to the attendants, this is, for my predecessors in office, a very satisfactory record of immunity from escape, and it has reference not only to the general management and asylum distribution of the inmates, but also to the vigilance and reliability of the staff generally.

#### ACCOMMODATION FOR INSANE CONVICTS.

One of the chief features of the work of the year was the reception of the male convict lunatics for whom the necessary accommodation had been provided by the enlargement of the asylum.

Since 1863, when the asylum was opened, up to the present time, Broadmoor has been the place of detention for females becoming insane in convict prisons during their sentence of penal servitude.

Up to 1875 male convicts of this class were also transferred to Broadmoor and detained there until the expiration of their sentences. But, as it was found that the plan of the buildings was unsuited for their treatment and safe custody, and that the accommodation was insufficient for their requirements, provision was thereafter made for the detention at Woking Prison of the men who became insane in convict prisons.

In 1886, in consequence, among other reasons, of the diminution in the population of convict prisons, it was decided to discontinue the occupation of Woking male prison altogether by convicts. The authorities also decided to make provision at Broadmoor for the insane portion of the Woking Prison population, and for other males becoming insane in convict prisons, thereby securing for them the official cognizance of the Commissioners in Lunacy, their control and management being retained in the hands of the Council of Supervision under the Secretary of State.

In addition to the "Queen's pleasure" lunatics, who form the great bulk of its population, Broadmoor now receives all prisoners, both men and women, who, in the course of their sentence to

penal servitude, are removed from convict prisons upon certificate of insanity.

The new buildings were ready in September, and in the course of the month of October all the insane convicts from Woking Prison, to the number of 58, were conveyed to Broadmoor by the prison officials. They were brought over in batches, and although many of them were noisy and maniacal and difficult, and others were prostrate and helpless from paralysis, the transfer was effected comfortably and without a mishap.

The structural additions and alterations that were made in order to provide the necessary accommodation consisted entirely of enlargement of some of the existing blocks. Advantage was taken of the extension to construct alternative staircase egress in case of fire for Blocks 1, 2, 5, and 6, which were not hitherto so provided.

The following are the principal additions that were made:—

Block 2 was extended and joined to Block 1, and the connecting structure, in addition to a new staircase for the use of either block in case of fire, provides, on the ground floor, additional dining room space for Block 2, on the first floor, three single bedrooms for the same block, and on the third floor a Roman Catholic Chapel for the whole asylum. This last was a much-needed improvement, as the services had been conducted under unsatisfactory conditions in the central hall. There are now about 80 Roman Catholic inmates.

Block 5 has also by extension been joined to Block 6, but the connecting structure is occupied by 11 new single bedrooms for the former block. The day room and dormitory accommodation of Block 5 has also been enlarged by an addition to the south end. This block can now hold 19 more patients of the tranquil class than formerly. The conversion into dining rooms of the two old and unsatisfactory basement dormitories enables all the inmates of this block to dine practically together instead of on two floors; while one scullery takes the place of the former two. The former dining rooms are now utilised as day-rooms. The day rooms of the block are now all at the south end, those at the north end having been made into dormitories. By this rearrangement the supervision of the inmates of the block is made more easy and safe.

The additions and alterations in the case of number 6 Block have been very considerable, so as practically to provide for the location of the convict class of inmates.

The day-room and dining-room space on the 1st and 2nd floors has been much increased, and a third day room with dining room on the ground floor, has been added to the block at the south end, the single rooms occupying that position having been removed. Forty-eight new single bedrooms with lavatory and water closet accommodation have been built on to the Block. The old central staircase has been removed and a lavatory on each floor put in its place, so that the bath rooms in the Block are no longer used as lavatories.

The new waterclosets are provided with an automatic flush which has up to the present given every satisfaction.

Special pains have been taken with the warming, ventilation and lighting of the new portion. Besides being provided with an inspection window and a gas jet (which is outside in the corridor) each single room is separately warmed and ventilated in connexion with the heating apparatus now supplied for Blocks 5 and 6, independently of the central apparatus for Blocks 2, 3, and 4.

The boiler, steam engine and air propellers (Blackman's) of the new apparatus are placed in chambers excavated under the south end of Block 6.

At the entrance of Block 6 a low tower with staircase has been constructed. This staircase is for the general use of Block 6, and is also available for exit from Block 5 in case of fire.

The west airing court of Block 6 has been very much enlarged, and it now forms an admirable exercising ground.

By additions and re-arrangements the asylum has now been made capable of accommodating 480 male inmates instead of 405—an increase of 75. Accommodation is now provided for 630 inmates, namely, 480 men and 150 women.

The Council have repeatedly expressed their high opinion of the way in which the new works have been carried out by Mr. Stephens, the foreman of works, and upon their strong recommendation the Lords Commissioners of the Treasury were pleased to add a personal allowance of 40*l.* a year to his salary, in recognition of the fact that the works executed during the last few years have been very extensive, and that they have not only been carried out by him, but were also erected from plans both engineering and architectural, prepared by him.

The total cost of the extensions has been 11,800*l.*, the sum at which it was originally estimated. They were carried out by hired labour, although the labour of inmates was utilised in the work as far as was considered safe and prudent.

**Expenditure.**

The Parliamentary grant for the asylum (inclusive of new buildings and alterations) was 32,802*l.*, the total expenditure amounted to 32,056*l.* 18*s.* 1*d.* ; the unexpended surplus of 745*l.* 1*s.* 11*d.* was surrendered to the Exchequer.

**Average cost per patient.**

The average cost per patient for the year ending March 31st, 1889, as shown in Table 40, column 10, was 46*l.* 0*s.* 4*d.* The cost for the previous year was 44*l.* 5*s.* 8*d.* The increased cost in the past year was entirely due to the initial expenditure in furnishing the new buildings and otherwise making provision for the reception of the convict lunatics.

In the Appendix to this report full tabular details are given of general and financial matters of interest connected with the administration of the asylum since its opening.

The general conduct of the staff, both in the male and in the female divisions, was very good throughout the year. The service record of attendants is given in Table 48. The staff.

In connexion with the extension of the asylum much additional work has devolved upon Mr. Phelps, the steward and cashier. To him and also to Mr. Hazle, Superintendent's clerk, I owe much for their ready and valuable help.

Since my last report both the Assistant Medical Officers have resigned, Dr. Paterson having left to enter upon the private practice of his profession, and Dr. Baker having been selected for transfer to Portsmouth Convict Prison as Assistant Surgeon.

They have been succeeded by Dr. Reginald H. Noott as senior assistant on promotion from the junior post, and by Mr. Percy Pope as junior assistant.

In the management of the asylum, Dr. Isaac, the Deputy Superintendent, continues to give me his cordial and much valued assistance.

I have, in conclusion, to record my grateful thanks to the Council of Supervision for the full measure of confidence and support which they at all times give to me in the discharge of my duties.

I have the honour to be,

Sir,

Your most obedient Servant,  
DAV. NICOLSON, M.D.

To Sir Warwick C. Morshead, Bart.,  
*Chairman of the Council of Supervision.*

---

THE CHAPLAIN'S REPORT.

---

SIR,

*Broadmoor Asylum, 3rd July 1889.*

DURING the year 1888 the appointed services of the church were held in the chapel of this asylum on all Sundays, and also on Ash Wednesday, Good Friday, and Christmas Day. On all other days the shortened form of Morning Prayer or Litany was said in the chapel at 8.30 a.m., and the attendance was about the same as in former years.

The sacrament of the Lord's Supper was administered on Easter Day, Whitsunday, and Christmas Day, as well as on the first Sunday in every month. The number of communicants was 33; viz., 14 men and 19 women.

The short form of Evening Prayer continued to be used in all parts of the asylum.

The customary addition was made to the library, and the supply of books was found sufficient.

The school was inspected on the 22nd and 23rd of November. The number presented for examination was 113, viz., 70 in standards and 43 infants. The average attendance was 98; and per-centage of passes 90. The highest merit grant was obtained in each division, and the total amount was 95*l.* 16*s.* 0*d.*

The Inspector reports, in the upper school, "The children are in excellent discipline" and, in the infant school, "the children are bright and happy, and in excellent order."

I am extremely grateful for the kind consideration and cordial support that I have uniformly experienced from the Superintendent and all the officers of the asylum in the execution of my duties.

I have the honour to be,

Sir,

Your most obedient humble Servant,  
THOS. ASHE, M.A., Chaplain.

*To the Chairman of the  
Council of Supervision.*

---

## REPORT OF THE COMMISSIONERS IN LUNACY.

*State Criminal Asylum, Broadmoor,*  
12 July 1888.

Yesterday and this day we, two of the Commissioners in Lunacy, visited and inspected every part of the Broadmoor Criminal Lunatic Asylum, and have seen all the patients detained there. They are 549 in all, 401 males, and 148 females. The changes which have taken place since the last official visit paid by two members of our Board, rather more than a year ago, have been the admission of 31 men and 12 women for the first time, the re-admission of three men and two women, and the re-capture after escape of one man; four men and one woman have been discharged on recovery, 10 men have been sent to other asylums as pauper lunatics under the Secretary of State's warrant; two men and three women have become pauper lunatics by expiration of their sentence, and two men have been removed to other asylums as criminal lunatics. One man has escaped and not yet been re-captured, and 13 men and five women have died. The causes of the 18 deaths, according to the verdicts of the coroners' juries, present no features calling for remark, but many of the patients died at an advanced age, and the average age at death for both sexes was 61.

The general health of the patients has been good. There has been no epidemic amongst the patients, and the only case of an infectious disorder was of a woman who had facial erysipelas. The patients under medical treatment last week were 27 men and 20 women; the patients suffering from epilepsy are 40 males and eight females, and the general paralytics are 18 males and four females, one patient of each sex however being counted under both heads. Thirty-five men and 23 women are considered to be actively suicidal. All the epileptic and suicidal patients sleep under continuous supervision in associated dormitories, or in single rooms, where they are visited once at least in every half hour.

There is no entry of the use of mechanical restraint. Seclusion is, as heretofore, divided into three heads, viz., those in seclusion to prevent their doing injury to others, or to insure their safe custody; those in single rooms in bed for illness; and those who are secluded at their own request to prevent the intrusion of other patients. Amongst the males 13 have been secluded, and amongst the females three only under the first head.

We find that including ward cleaners, 168 men and 98 women are usefully employed. On the farm and in the garden, 34 men are engaged, but we think that this number might be increased if the boundary wall of the garden were raised so as to make escape less easy. This is a pressing matter, attention being given to the expected early increase of male patients here who will be brought from Woking Prison.

Two patients, both men, escaped since the last visit; one who got over the kitchen garden wall in a fog, was re-captured the next morning, but the other one who got out of doors by means of keys he had manufactured, and then also escaped over the kitchen garden wall, is still at large.

The dietary is as it was at the last visit, and seems to us to be sufficient. We had very few complaints either as to diet or treatment, and none that upon investigation proved to be well founded. Dr. Nicolson seems to us to act upon the sound principle of himself listening to and investigating every alleged grievance, and redressing as far as possible, any real ground of complaint.

No attendant has been dismissed the asylum for ill-treatment of a patient, and the duration of service here is very satisfactory. They are 104 in number, 74 males, and 30 females, 10 of the former and four of the latter being employed on duty by night; 77 per cent. of the male attendants have been in the asylum service for over five years, and 58 per cent. for over 10 years. Of the nurses, 47 per cent. have over five years' service here, and rather more than 23 per cent. over 10 years'.

The means of amusement provided for the patients are sufficient and varied.

At morning service last Sunday 115 patients were present, and two less at the evening service. The last Roman Catholic service was attended by 10, and the last Wesleyan service by 15 male patients.

The vacant accommodation at present in the asylum is for four men and nine women, but when the additions now in progress are completed there will be accommodation provided for about 70 men.

We are glad to be able to give a very satisfactory report of the state in which we found the day rooms and dormitories; the extreme cleanliness of the rooms, beds, and bedding, was most praiseworthy. Every patient had opportunity of telling us their grievances, and they were for the most part quiet and contented. whilst it was only in the male division that any persons were abusive, turbulent, and inclined to be violent. Their clothing was good and neat, and the personal condition of the patients as well as the state of the wards reflects much credit upon the attendants.

We have inspected the new wards in course of erection for the Woking patients, and they appear to be generally well arranged, and will have special means of heating, ventilation, &c.

We learn from Dr. Nicolson that the question of heating the upper floors in the present building, suggested by our colleagues at their last visit, has not been overlooked, and we wish to call special attention to the urgent necessity of heating Blocks 2 and 5, and hope that this matter will not be long delayed.

Of the works in progress at the last visit we have to report that Block 6 is nearly ready for occupation; a second staircase for egress in case of fire has been provided. A basement has been excavated under the day rooms, where the engine, boiler, and air-propeller for heating and ventilation are to be placed. The greater part of the

surface of the new airing court has been made. We learn that when the additions are completed the number of single rooms properly ventilated and heated on the male side will be sufficient for those patients who require to be placed in seclusion. We should be glad if we could hear that the same kind of accommodation was to be provided on the female side. The ordinary painting and stencilling has been carried on at the various blocks where such work was needed, and certain improvements have been sanctioned, and are being carried on at the farm buildings.

The principal officers are the same as were here at the last visit and the general tenour of this report shows that we are well satisfied with the management of this asylum by the Medical Superintendent, who seems to us to be ably seconded by his staff in the discharge of duties both arduous and dangerous.

(Signed) JOHN D. CLEATON, } Commissioners  
W. E. FRERE, } in Lunacy.

## APPENDIX TO THE SUPERINTENDENT'S REPORT.

TABLE 1.

Showing the ADMISSIONS, RE-ADMISSIONS, DISCHARGES, and DEATH  
during the Year 1888.

	Male.	Female.	Total.
In the asylum on the 1st January 1888 - -	406	147	553
	Male.	Female.	Total.
Cases admitted during the year:			
First admissions - -	96	11	107
Not first admissions - -	5	1	6
Total cases admitted during the year - -	101	12	113
Total cases under care during the year - -	507	159	666
	Male.	Female.	Total.
Cases discharged, removed, and died during the year:			
Recovered and discharged	2	3	5
Recovered and removed to prisons - -	—	—	—
Transferred to other asylums - -	19	4	23
Transferred to workhouses	—	—	—
Died - -	14	5	19
Escaped - -	1	—	1
Total cases discharged, removed, and died during the year - - - - -	36	12	48
Remaining in the asylum on 31st December 1888 - -	471	147	618
Average number resident during the year 1888 - -	419	148	567
Persons under care during the year - - -	506	158	664
Persons admitted during the year - - -	100	11	111
Persons recovered during the year - - -	2	3	5
Persons transferred to this asylum during the year - -	2	—	2
Persons transferred from this asylum during the year - - - - -	19	4	23

TABLE 2.

Showing the ADMISSIONS, RE-ADMISSIONS, DISCHARGES, DEATHS, and ESCAPES, from the opening of the Asylum to the 31st December 1888.

				Male.	Female.	Total.
Cases admitted during the period of $25\frac{21}{80}$ years	First admissions	-	1,381	415	1,796	
	Re-admissions	-	36	14	50	
Total cases admitted-				1,417	429	1,846
Discharged, removed, died, &c., during the period of $25\frac{21}{80}$ years:		Male.	Female.	Total.		
	Recovered and discharged -	80	76	156		
	Recovered and removed to prisons -	50	10	60		
	Transferred to other asylums -	521	114	635		
	Transferred to work-houses -	1	1	2		
	Died -	288	10	368		
	Escaped; and recaptured in subsequent years -	3	—	3		
	Escaped, and not recaptured up to 31st December 1888 -	3	1	4		
Total cases discharged, removed, died, &c., during the $25\frac{21}{80}$ years				946	282	1,228
Remaining 31st December 1888				471	147	618
Average number resident during the $25\frac{21}{80}$ years				361	112	473
Persons transferred to this asylum during the $25\frac{21}{80}$ years				468	122	590
Persons transferred from this asylum during the $25\frac{21}{80}$ years				522	115	637

TABLE 3.

Showing the ADMISSIONS, DISCHARGES, DEATHS, and ESCAPES, with the Mean Annual MORTALITY and the Proportion of RECOVERIES, for each Year since the opening of the Asylum.

Years	Admitted.			Discharged.						Died.			Escaped and not Recaptured on 31st December of each Year.			Re-maining on 31st December of each Year.			Average Number resident.			Per-centage of Recoveries on Admissions, including those recovered and removed to Prison.			Per-centage of Deaths on average Number resident.

TABLE 4.—Showing the HISTORY of the ANNUAL ADMISSIONS, &amp;c.—continued.

• The Re-admissions may be classified as follows :	Summary of the Total Admissions and Re-admissions.		Summary of the Total Admissions and Re-admissions.		Summary of the Total Admissions and Re-admissions.	
	Male.	Female.	Total.	Male.	Female.	Total.
Persons under orders of detention during Her Majesty's pleasure, who have been conditionally discharged, and who have subsequently relapsed . . . . .	13	9†	22	5.65	17.71	8.45
Persons under orders of detention during Her Majesty's pleasure who have been discharged to the care of guardians of union workhouses ; and re-admitted under fresh warrants . . . . .	1	—	1	3.53	2.33	3.25
Persons under orders of detention during Her Majesty's pleasure who have been transferred to private licensed houses ; and re-admitted under fresh warrants . . . . .	1	—	1	36.84	23.81	34.51
Persons removed to prisons, recovered ; and re-admitted under fresh warrants . . . . .	5	2	7	20.32	18.65	19.93
Persons removed to other asylums on completion of sentences of penal servitude ; and re-admitted under fresh warrants . . . . .	12	3	15	0.21	0.00	0.16
Persons removed to prison for trial ; and re-admitted under orders of detention during Her Majesty's pleasure . . . . .	1	—	1	0.21	0.23	0.22
Persons recaptured after escape . . . . .	3	—	3	33.24	34.27	33.48
	36	14	50	100.00	100.00	100.00

\* Further particulars with respect to the whole of the re-admissions from the opening of the asylum are given in the 21st Table.

† The actual number of women re-admitted under this class was 7, two women show twice, having been twice re-admitted.

TABLE 5.

Showing the CAUSES of DEATH during the Year 1888.

Causes of Death.	Male.	Female.	Total.
Diseases of the nervous system :			
Epilepsy - - - - -	2	—	2
Meningeal hæmorrhage and inflammation - - -	1	—	1
Softening of the brain - - - - -	2	—	2
Congestion and softening of brain (embolism) -	—	1	1
General paralysis - - - - -	3	2	5
Diseases of the circulatory system :			
Hypertrophy and dilatation of heart - - -	2	—	2
Aortic valvular disease of heart - - - - -	1	—	1
Diseases of the digestive system :			
Enteritis - - - - -	—	1	1
Cancer of liver - - - - -	1	—	1
Cancer of rectum - - - - -	1	—	1
Diseases of the urinary and generative systems :			
Cancer of the uterus - - - - -	—	1	1
Conditions not necessarily associated with general or local diseases :—			
Old age - - - - -	1	—	1
Total - - - - -	14	5	19

Table 5—continued.

An INQUEST was held in every case of DEATH, and the following were the Verdicts returned :—

Initials.	Date of Admission.	Date of Death.	Verdict.
<b>Males.</b>			
W. K. -	1 Feb. 1869	20 Jan. 1888	Died of aortic disease of heart.
J. P. -	8 Nov. 1887	9 Feb. "	Died of epilepsy.
C. R. C. -	27 Dec. 1866	14 Mar. "	Died of meningeal hæmorrhage with inflammation.
W. G. -	8 Aug. 1876	18 " "	Died of epilepsy.
P. W. -	17 Feb. 1865	18 " "	Died of old age and natural decay.
J. W. -	1 April 1874	2 May "	Died of heart disease.
S. B. -	30 Aug. 1864	29 " "	Died of cancer of the liver.
F. W. -	27 Feb. 1865	10 June "	Died of softening of the brain.
S. D. -	9 Mar. 1864	4 Aug. "	Died of cancer of the lower bowel.
T. P. -	10 April 1865	5 Sept. "	Died of softening of brain.
H. W. -	17 Feb. 1865	20 " "	Died of heart disease.
D. Mc. K. -	2 Oct. 1888	13 Oct. "	Died of general paralysis.
E. R. -	18 July 1885	28 " "	Died of general paralysis.
G. S. -	2 Oct. 1888	28 " "	Died of general paralysis.
<b>Females.</b>			
S. H. -	23 June 1863	8 Jan. 1888	Died of congestion and softening of brain.
E. J. -	6 Mar. 1884	1 Feb. "	Died of general paralysis.
E. F. -	18 June 1863	5 " "	Died of enteritis.
A. G. -	26 Jan. 1882	29 Oct. "	Died of internal cancer.
E. H. -	16 Feb. 1886	31 Dec. "	Died of general paralysis.

TABLE 6.

Showing the LENGTH of RESIDENCE in Broadmoor Asylum of those discharged recovered, and of those who have died, during the Year 1888.

Length of Residence.	Recovered and discharged.			Died.		
	Male.	Female.	Total.	Male.	Female.	Total.
Under 1 month - - -	—	—	—	2	—	2
From 1 to 3 months - - -	—	—	—	—	—	—
„ 3 „ 6 „ - - -	—	—	—	1	—	1
„ 6 „ 12 „ - - -	—	—	—	—	—	—
„ 1 „ 2 years - - -	—	1	1	—	—	—
„ 2 „ 3 „ - - -	—	—	—	—	1	1
„ 3 „ 5 „ - - -	—	—	—	1	1	2
„ 5 „ 7 „ - - -	1	1	2	—	1	1
„ 7 „ 10 „ - - -	—	1	1	—	—	—
„ 10 „ 12 „ - - -	—	—	—	1	—	1
„ 12 „ 15 „ - - -	—	—	—	1	—	1
„ 15 „ 20 „ - - -	1	—	1	1	—	1
„ 20 „ 25 „ - - -	—	—	—	7	2	9
Total - - -	2	3	5	14	5	19

Males. Females. Total.

The average length of residence in Broadmoor of those discharged was - - - -  $11\frac{1}{2}$  years.  $4\frac{1}{2}$  years.  $7\frac{1}{3}$  years.

The average length of residence in Broadmoor of those who died was - - - - 15 „  $12\frac{1}{2}$  „  $14\frac{1}{3}$  „

TABLE 7.

Showing the DURATION of the DISORDER on ADMISSION, of the ADMISSIONS, DISCHARGES, and DEATHS, during the Year 1888.

Class.	The Admissions.			The Discharges.						The Deaths.		
	Male.	Female.	Total.	Recovered.			Transferred to other Asylums or Workhouses.			Male.	Female.	Total.
				Male.	Female.	Total.	Male.	Female.	Total.			
Class I.—First attack, and within three months on admission - - -	20	1	21	—	1	1	3	—	3	—	—	—
Class II.—First attack, above three months and within twelve months on admission - - -	12	3	15	2	2	4	1	1	2	—	1	1
Class III.—Not first attack, and within twelve months on admission - - -	7	2	9	—	—	—	—	—	—	2	1	3
Class IV.—First attack or not, but of more than twelve months on admission - - -	62	6	68	—	—	—	15	3	18	12	3	15
Class V.—Sane on admission - - -	—	—	—	—	—	—	—	—	—	—	—	—

TABLE 31.

Showing the PARTICULARS of PATIENTS whose Sentences had expired on 31st December 1888.

Reg <sup>r</sup> No.	Initials.	Occupation.	Convicted.		Crime.	Sentence.	When Sentence expired.
			Where.	When.			
	<i>Males.</i>						
555	P. M.	Soldier	Birr, Ireland	October 1863	Insubordination	4 years tp <sup>n</sup> .	October 1867.
1058	T. K.	Seaman	Portsmouth	March 1881	Assault	6 months imp.	September 1881.
1143	H. W.	Soldier	North Walsham	March 1883	Incorrigible rogue	14 days imp.	March 1883.
203	J. D.	Labourer	Glasgow	April 1864	Theft	3 years P.S.	April 1867.
22	<i>Female.</i>						
	C. C.	Not known	Salford	December 1856	Receiving stolen goods	4 "	December 1860.

555 P. M. detained, being not in sufficiently good health to be removed.

1058 T. K. detained after expiration of sentence in consequence of having murderously assaulted a warder in Portsmouth Gaol.

1143 H. W. detained on account of his history.

203 J. D. detained, being not in sufficiently good health to be removed.

22 C. C. detained after expiration of sentence in consequence of having murdered a fellow patient in the F sherton House Asylum.

TABLE 32.

The following FIGURES, extracted from the ANNUAL VOLUMES of the JUDICIAL STATISTICS for ENGLAND and WALES, show the RATE of MORTALITY which has prevailed amongst CRIMINAL LUNATICS since the Year 1856, and also show the Extent to which the Rate of Mortality, and the Degree of safe Custody, have been affected by the opening of Broadmoor Asylum.

In this Table each Year, up to 1883 inclusive, ends on the 29th of September, and from 1884, the year ends on the 31st of October.

(1.) Returns relating to the Seven Years immediately preceding the opening of Broadmoor.

Year.	Total Number of Criminal Lunatics under Detention in England and Wales during each Year.	Number of Deaths in each Year.	Number who escaped and who were not recaptured before the end of each Year.
1856 - -	686	21	6
1857 - -	746	39	7
1858 - -	798	33	1
1859 - -	901	43	4
1860 - -	957	51	9
1861 - -	970	49	4

TABLE 32—*continued.*

The foregoing figures, reduced to per-centages, for the sake of more ready comparison, give the following results :—

Description of Asylums.	Rate per cent. of Deaths calculated upon the aggregate of the Yearly Totals of Numbers of Criminal Lunatics under Treatment, during the Periods specified.	Rate per cent. of Instances in which Criminal Lunatics escaped and were not recaptured before the end of each year, during the Periods specified.
In all the ASYLUMS in ENGLAND and WALES, taken together, in which criminal lunatics were confined during the seven years immediately preceding the opening of Broadmoor, from 1856 to 1862 inclusive	4.59	0.62
In all the ASYLUMS in ENGLAND and WALES, taken together, in which criminal lunatics were confined from 1863 to 1887 inclusive, with the EXCEPTION of Broadmoor	5.46	0.82
In BROADMOOR, from the date of its opening in 1863 to the 31st of October 1887	2.64	0.03

The following TABULAR STATEMENT shows every instance of ESCAPE that has taken place, from the opening of the Asylum, in 1863, up to the 31st of December 1888, together with the date of recapture where recapture has been effected.

Under Detention during Her Majesty's pleasure.		Under current Sentences of Penal Servitude or Imprisonment.		Date of escape.	Date of recapture.

TABLE 33.

SHOWING the Kinds of INDUSTRIAL OCCUPATION in which PATIENTS were employed during the year ended 31st March 1889, with the ESTIMATED VALUE of their LABOUR.

Description of Employment.	Value of Labour.
	£ s. d.
Making and repairing uniform clothing - - - -	62 18 9
Making and repairing clothing for patients, and bed and house linen for patients and attendants - - - -	600 14 4
Making and repairing boots, shoes, &c. - - - -	204 6 8
Making and repairing mattresses, carpets, mats, &c. - - - -	113 1 11
Making and repairing furniture, tinware, &c. - - - -	204 7 10
Printing, book-binding, writing, &c. - - - -	175 12 6
In the garden, and on the terraces and farm - - - -	369 4 8
In the kitchens, bakehouse, and stores - - - -	292 18 6
In the laundry - - - -	418 7 9
Cleaning the wards, &c. - - - -	675 19 1
Carrying coals and cutting up firewood - - - -	33 2 6
Carpenters, Bricklayers, Painters, and Labourers, employed in repairs and alterations to buildings - - - -	496 11 6
Total - - - -	£ 3,647 6 0

The above estimate refers only to the work done by patients, and does not include the work performed by the attendants and journeymen in the various wards and shops.

The number of patients employed in the work above described was 218 men and 117 women.

TABLE 34.

SHOWING the Number of Cases of the Principal DISEASES among the INMATES who came under Treatment during the Year 1888.

DISEASES.	Remain- ing under Treat- ment 31st Dec. 1887.		Admitted under Treat- ment during 1888.		Total Number treated.		Recovered, Relieved, or Removed from Treat- ment.		Died.		Remaining under Treat- ment 31st Dec. 1888.

TABLE 36.  
POST-MORTEM RECORDS.

No. in Register.	Sex, Age, Height, Date of Admission and of Death.	HISTORY.		
		General History.	Mental State during Residence.	Bodily State during Residence.
74	S. H. Female, 78. 4 ft. 10 in. June 23, 1863. Jan. 8, 1888.	A domestic servant; single. Indicted at the Central Criminal Court in Jan. 1855 for manslaughter (of her mother) by wounding her in the hand with a pair of scissors, and found insane. Admitted from Fisherton House Asylum.	Subject to attacks of sub-acute recurrent mania, when she became rambling and incoherent in conversation. Also at times depressed and melancholic.	Indifferent; latterly became paralytic and enfeebled, due to softening of the brain.
615	W. K. Male, 74. 5 ft. 8½ in. Feb. 1, 1869. Jan. 20, 1888.	A brickmaker. Killed his son by cutting his throat, while lying in bed with him. Admitted from Warwick Prison.	Mentally feeble, but free from active delusions; liable to periods of depression.	Fairly good, until a year ago when he began to suffer from heart disease and dropsy.
367	E. J. Female, 29. 4 ft. 10 in. Mar. 6, 1884. Feb. 1, 1888.	Married; formerly a book-finder. Tried at the Central Criminal Court 25th June 1880, for uttering counterfeit coin, and sentenced to seven years penal servitude. Admitted from Woking Prison.	On admission maniacal with delusions of grandeur, latterly became more demented and paralytic.	Indifferent; latterly became very enfeebled; suffered from general paralysis with severe epileptiform convulsions.
63	E. F. Female, 68. 5 ft. 1 in. June 18, 1863. Feb. 5, 1888.	A widow; formerly a domestic servant, certified to be insane whilst awaiting trial for maliciously wounding her niece, a little girl. Admitted from Wilts County Asylum.	Suffered from chronic mania with delusions.	Fair on admission. Latterly suffered from hypertrophy of heart and cardiac asthma. Subsequently died of enteritis.

TABLE 36.  
POST-MORTEM RECORDS.

	POST-MORTEM NOTES.			
	Head and Spine.	Thorax.	Abdomen.	Absolute Weights of Principal Organs in ounces avoirdupois
F. st. urs.	Scalp thick, calvaria thick and dense. Dura mater thickened, congested and firmly adherent to calvaria. Arachnoid and pia mater congested and clouded from old inflammation. Brain substance generally congested. A patch of softening about size of a crown piece implicating the grey matter of the supra marginal upper middle and lower occipital convolutions of left side. Vessels of brain atheromatous.	Several slight old pleuritic adhesions on right side. Both lungs congested. Heart enlarged. Mitral orifice contracted. Tricuspid orifice dilated. Muscular substance generally flabby.	Liver pale and fatty. Kidneys granular, cortical substance wasted, pyramids indistinct. Uterus contained a mass of villous growth, causing it to bulge to a considerable extent posteriorly.	Right hemisphere 17½ Left " " 17½ Cerebellum " 3½ Pons and medulla ½ Total encephalon 39½ Right lung - 17 Left " - 12½ Heart " - 15½ Liver - 46½ Spleen - 5 Right kidney - 4½ Left " - 4½
F. st. urs.	Scalp and calvaria moderately thick; dura mater adherent to calvaria and to arachnoid; a cyst, about size of half a walnut, in connection with the arachnoid membrane, lay on the left middle and lower temporo-sphenoidal convolutions; causing by its pressure softening and atrophy of the grey matter. Cerebro spinal fluid increased in quantity.	Both pleura adherent at base, and both contained some serous fluid. Both lungs oedematous. Pericardium contained about 1½ oz. of serous fluid. Heart enlarged, full of dark fluid blood, mitral valve thickened and contracted, aortic cusps thickened, with vegetations on side next aortic wall; small white endocarditic patches on surface of left ventricle. Aorta atheromatous.	Liver cyanotic; gall bladder almost empty of bile; bile ducts in liver much distended. Capsule of spleen very dense, greater part of its substance converted into fibro - calcareous plates, kidneys cystic, fibrous, and contracted, cortex much wasted.	Right hemisphere 21 Left " 20½ Cerebellum " 4½ Pons and medulla 1 Total encephalon 47½ Right lung - 23½ Left " - 17 Heart " - 20½ Liver - 52 Spleen - 8½ Right kidney - 7½ Left " - 7
F. v. urs.	Calvaria thick and dense. Dura mater thickened and adherent to calvaria. Arachnoid and pia mater filmy and gelatinous in appearance; both membranes adherent at points to brain substance and much congested. Grey matter atrophied. White matter congested. Lateral ventricles enlarged and full of fluid. Ependyma of all the ventricles, especially the fourth, granular.	Several slight old pleuritic adhesions on both sides. Right lung slightly oedematous. Lower lobe of left lung infiltrated with tubercle. In the lower part of this lobe was found a cavity about size of a pigeon's egg full of pus. Heart small; muscular substance pale and firmly contracted.	Kidneys small, pale, and anæmic.	Right hemisphere 12½ Left " 12½ Cerebellum " 3 Pons and medulla ¼ Total Encephalon 28½ Right lung - 11½ Left " - 21½ Heart " - 5½ Liver - 25½ Spleen - 1½ Right kidney - 2½ Left " - 3
F. v. urs.	Dura mater much thickened and adherent to calvaria. Arachnoid and pia mater thickened, cloudy at points from old inflammatory action, and slightly adherent at points to brain substance. Grey matter of convolutions indistinctly marked. Brain substance generally softened and anæmia. Vessels of brain slightly atheromatous.	No pleuritic adhesions. 8 oz. of fluid in right. 10 oz. in left pleural cavity. Both lungs slightly congested low down posteriorly. Left ventricle of heart much enlarged and hypertrophied. Aortic valves incompetent, left auriculo ventricular orifice dilated. Aorta dilated.	General peritonitis. Membrane red and inflamed. General and severe enteritis commencing about middle of jejunum and extending down to the end of the rectum. Mucous membrane thickened and infiltrated. Liver slightly congested. Kidneys small and contracted. Substance wasted and granular.	Right hemisphere 17½ Left " 17½ Cerebellum " 4½ Pons and medulla 1 Total encephalon 40 Right lung - 13½ Left " - 11½ Heart " - 22 Liver - 41 Spleen - 3½ Right kidney - 2½ Left " - 2½

		General History.	Mental State during Residence.	Bodily State during Residence.
1308	I. P. Male, 51. 5 ft. 6 in. Nov. 8, 1887. Feb. 9, 1888.	A cripple from infancy, unfit for any employment. Tried at Northampton, on 10th July 1855, for murder, and sentenced to death. Sentence afterwards commuted to penal servitude for life. Admitted from Parkhurst Prison.	Partially demented and suffering from epilepsy.	General bodily health the right arm and leg small, ill-developed, and contorted said to be due to an attack of infantile paralysis. Suffered from frequent severe epileptic fits, with for last six days of life very almost constant, causing death from exhaustion.
388	C. R. C. Male, 40. 5 ft. 8½ in. Dec. 27, 1866. Mar. 14, 1888.	Glassworker. Arraigned at Durham Assizes on 6th December 1866 for wilful murder of a little girl whom he had violated. Found insane and unfit to plead. Admitted from Durham County Gaol.	Chronic mania with delusions	Bodily health good up to within a few months of death.
882	W. G. Male, 50. 5 ft. 4½ in. Aug. 8, 1878. Mar. 18, 1888	A labourer. Tried at Taunton on 30th June 1874 for inflicting grievous bodily harm. Found not guilty on the ground of insanity. Admitted from Taunton Prison.	Demented - - -	Subject to epilepsy. rather more than a year before his death the epileptic fits were very numerous, severe, and he died from exhaustion.

Table 36—continued.

Temperature and state of body, No. of hours after death when the Post-mortem examination was made.	POST-MORTEM NOTES.			
	Head and Spine.	Thorax.	Abdomen.	Absolute Weights of Principal Organs in ounces avoirdupois.
5° F. Moist. 10 hours.	Scalp thin, calvaria thick and soft, dura mater thick and adherent to calvaria; beneath the arachnoid was a considerable amount of clear serous fluid, which bulged the dura mater over left parietal lobe, filling the sulci, and evidently pressing on the grey matter; vessels of pia mater injected, most markedly over right ascending frontal convolution, pia mater slightly thickened over vertex. Grey matter atrophied at part where collection of serous fluid greatest, of a salmon colour throughout, and softer than normal. White matter injected throughout, puncta cruenta marked, ventricles contained much clear serous fluid. Choroid plexus cystic, <i>inter a tertio</i> distended. Cerebellum soft. Branches of middle cerebral artery of left side markedly atheromatous in parts, as was also the basilar. At point where left corpus striatum merges into left crus cerebri was a hard calcareous body, irregular in shape and projecting in spines on every side, its outside circumference being equal to that of a large pea. It was imbedded in the white matter, which was congested and rosy pink in colour immediately around it.	Right pleura adherent to chest wall and diaphragm. Bronchi deeply congested. Both lungs congested, and slightly oedematous, cicatricial thickening at both apices. Pericardium normal. Heart flabby, contained dark fluid blood, small spot of atheroma on mitral valve, posterior segment of aortic valve atheromatous.	Liver fatty. Gall-bladder contracted and full of gallstones. Bile ducts in liver distended and full of bile. Kidneys contracted, pyramids wasted, left contained acyst size of a walnut.	<p>Right hemisphere 20½  Left " 20½  Cerebellum - 5½  Pons and medulla ½</p> <hr/> <p>Total encephalon 47</p> <p>Right lung - 24  Left " - 18  Heart " - 14½  Liver - 37½  Spleen - 4½  Right kidney - 4  Left " - 4</p>
8° F. Moist. 10 hours.	Scalp thin. Calvaria thick and dense. Dura mater somewhat thick and dense with a good deal of adhesion posteriorly. Over right fronto-parietal and left frontal regions there were portions of extravasated blood spread over in a membranous form with small cysts. Arachnoid congested with subarachnoid opacity. Along the under surface of the hemispheres was a film of extravasated blood interspersed with numerous small flat clots the size of millet seed to a small pea. Grey matter of convolutions of cerebrum well marked. Brain substance generally firm.	Slight pleuritic adhesions on the right side. Both lungs congested at the base. Pericardium contained an ounce of yellow clear fluid. Heart walls very firm.	Mucous membrane of stomach bile-stained. Groups of petechiæ at the cardiac end. Liver pale, firm, and fatty. Gall-bladder distended and contained about thirty small gallstones. Spleen large and firm. Both kidneys much contracted, tough, and fibrous. Cortical substance much wasted.	<p>Right hemisphere 25½  Left " 25½  Cerebellum - 5½  Pons and medulla ½</p> <hr/> <p>Total encephalon 57</p> <p>Right lung - 27½  Left " - 22  Heart " - 18  Liver - 58½  Spleen - 9½  Right kidney - 3½  Left " - 2½</p>
13° F. Dry. 10 hours.	Calvaria thick and dense. Dura mater congested. White matter of cerebrum oedematous and generally softened.	Slight pleuritic adhesions of apex of right lung. Both lungs oedematous, and congested at the base. Right side of heart full of dark thick semi-clotted blood. Clot extending down right pulmonary artery.	- - -	<p>Right hemisphere 19½  Left " 19½  Cerebellum - 5½  Pons and medulla ½</p> <hr/> <p>Total encephalon 44½</p> <p>Right lung - 22½  Left " - 17½  Heart " - 12½  Liver - 38½  Spleen - 4½  Right kidney - 3½  Left " - 4½</p>

248	P. W. Male, 69. 5 ft. 7½ in. Feb. 17, 1865. Mar. 18, 1888.	A labourer. Tried at York in December 1863 for murder. Found not guilty on ground of insanity. Admitted from Fisherton House Asylum.	Suffered from chronic mania with incoherence. Latterly became quite demented.	Fair until within a year of his death, when his health gradually broke down and he died of old age.
815	J. W. Male, 67. 5 ft. 7 in. April 1, 1874. May 2, 1888.	A carpenter, married. Tried at Taunton assizes, December 18th 1873, for inflicting grievous bodily harm with a knife on November 17th, 1873. Found not guilty on ground of insanity. Ordered to be detained during Her Majesty's pleasure. Admitted from Taunton Prison.	Chronic mania with delusions of persecution. Also subject to attacks of melancholia.	Health fair up to within two years of his death, since which time it has gradually failed. Died of heart disease.
164	S. B. Male, 79. 5 ft. 9 in. Aug. 30, 1864. May 29, 1888.	Formerly a brewer. Tried at Liverpool in 1853 for maliciously wounding. Acquitted on the ground of insanity. Admitted from Lancaster Asylum.	Chronic mania with delusions and incoherence.	Latterly suffered from cancer of the liver, and dropsy. Previously in fair general health.

Table 36—continued.

POST-MORTEM NOTES.			
Head and Spine.	Thorax.	Abdomen.	Absolute Weights of Principal Organs in ounces avoirdupois.
Scalp normal. Calvaria very dense, diploë almost absent. Dura mater generally and firmly adherent to calvaria.	A few old adhesions at apices of lungs; about 2 ozs. of clear fluid in each pleural cavity. Lower lobe of left lung congested and interspersed with fibrous nodules. Pericardium contained 7 ozs. of serous fluid. Heart flabby and small.	Liver friable; congested, with fibrous tissue interspersed amongst the lobules. Spleen enlarged and congested. Kidneys contracted, fibrous, and congested. Cortical substance wasted. Both kidneys cystic.	Right hemisphere 19½ Left " - 19½ Cerebellum - 5½ Pons and medulla 1½ <hr/> Total encephalon 44½ <hr/> Right lung - 13½ Left " - 18 Heart " - 9 Liver - 48 Spleen - 12½ Right kidney - 3 Left " - 4
Scalp thin. Calvaria thick and dense. Dura mater thickened and very adherent to calvaria. Arachnoid and pia mater somewhat congested and opaque along the vertex and over parietal and occipital lobes. Slight wasting of grey matter of cerebrum. Vessels of brain and cord congested.	Each plural cavity contained about 10 ozs. of fluid. No adhesions of pleuræ. Bronchial mucous membrane much congested. Right lung very oedematous. Lower lobe much congested with patches of pneumonic consolidation. Left lung in a similar condition, but less marked. Pericardium contained 1 oz. of straw-coloured fluid. Left ventricle contained a large clot weighing 2½ ozs. Right ventricle contained a clot weighing 2 ozs. Right auricle a clot 2½ ozs., and left auricle a clot 2½ ozs. All cavities of heart much dilated with insufficient compensatory hypertrophy. Aortic valves thickened, especially along free margin. Commencing atheroma of first part of aorta.	Peritoneal cavity contained about 10 ozs. of fluid. Large intestine constricted in lower part, especially below the sigmoid flexure, where a constriction of over a foot in length existed, the bowel being barely wide enough to admit one finger. No evidence of malignant disease. Liver in an advanced state of cyanotic atrophy. Spleen small, firm, and congested. Kidneys small, congested. Very marked atrophy of cortical substance. A small cyst in left kidney.	Right hemisphere 18½ Left " - 18 Cerebellum - 5½ Pons and medulla ½ <hr/> Total encephalon 42½ <hr/> Right lung - 44 Left " - 24 Heart " - 22½ Liver - 43 Spleen - 3½ Right kidney - 4 Left " - 4½
Scalp thin. Calvaria thin. Dura mater adherent to calvaria and to brain substance. Arachnoid and pia mater congested. Some wasting of convolutions on vertex of the brain. Grey matter, pale and soft. Cerebellum large and soft. Vessels of the brain large and congested.	Pleuritic adhesions on left side, posteriorly and at the base of the lung. Slight pleuritic adhesions on right side at the apex, and ½ pint of fluid in right pleural cavity. Both lungs congested at the base. Heart small, pale, and flabby. A few small calcareous deposits in mitral and aortic valves.	7½ pints of dark straw coloured fluid in the abdominal cavity. Slight contraction of descending colon. Liver closely adherent to diaphragm, the adhesions forming sacs, which were full of fluid. Surface of liver rough and nodular. Left lobe a mass of small cancerous nodules with many cavities containing soft matter and pus with broken down tissue, disorganised blood, and bile matter. Right lobe large, congested, and disorganised in part. Spleen firm. Investing membrane covered with rough fibrous nodules. Both kidneys congested and partly disorganised.	Right hemisphere 22½ Left " - 22½ Cerebellum - 5½ Pons and medulla 1 <hr/> Total encephalon 52½ <hr/> Right lung - 33½ Left " - 25 Heart " - 8½ Liver - 49½ Spleen - 3½ Right kidney - 5½ Left " - 4½

		General History.	Mental State during Residence.	Bodily State during Residence.
263	F. W. Male, 59. 5 ft. 4½ in. Feb. 27, 1865. June 10, 1888.	Sandman, single. Tried for felony at Leicester sessions in July 1862, and acquitted on the ground of insanity and ordered to be detained during Her Majesty's pleasure.	Demented. Subject to epilepsy.	Paralysed and bedridden some years before. Suffered from disease of heart and lungs.
32	S. D. Male, 69. 5 ft. 3½ in. Mar. 9, 1864. Aug. 4, 1888.	A shoemaker. Tried at Stafford assizes 17th December 1860 for the murder of his mother. Acquitted on the ground of insanity. Admitted from Stafford County Gaol.	Weakminded, with occasional attacks of melancholia.	For two years previously to death he suffered from disease of the rectum from which he died. Previous health good.
301	T. P. Male, 70. 5 ft. 3½ in. April 10, 1865. Sept. 5, 1888.	A labourer. Certified to be insane whilst awaiting trial on a charge of burglary. Admitted from Abergavenny Asylum.	Suffered from chronic mania, with delusions. Became more and more demented latterly.	Suffered from left hemiplegia for over three years prior to death. Previously in good health.

Table 36—continued.

POST-MORTEM NOTES.			
Head and Spine.	Thorax.	Abdomen.	Absolute Weights of Principal Organs in ounces avoirdupois.
Scalp of moderate thickness. Calvaria very thin. Dura mater thickened. A bony plate extending nearly the whole length of the falx cerebri. Complete softening of parts of parietal, temporo-sphenoidal and anterior-occipital lobes. Ventricles contained an excessive amount of cerebrospinal fluid.	Extensive and firm pleuritic adhesions on both sides. Extensive tubercular infiltration of both lungs with numerous ragged cavities. Heart very small, pulmonary valves much thickened. Aorta slightly atheromatous.	Liver cyanotic and of nutmeg appearance. Slight atrophy of cortex of both kidneys.	Right hemisphere 19½ Left " - 16½ Cerebellum - 4½ Pons and medulla ½ <hr/> Total encephalon 40½ <hr/> Right lung - 31½ Left " - 39½ Heart " - 7½ Liver - 37 Spleen - 4½ Right kidney - 4½ Left " - 4½
Scalp thin. Calvaria thin and dense. Dura mater slightly thickened. Pia mater congested and cloudy at points; strips easily from brain substance. Grey matter of convolutions of cerebrum not well marked. White matter of cerebrum generally softened, anæmic and pearly. Ventricles contained an excessive amount of fluid. Cerebellum softened.	General slight pleuritic adhesions on both sides. Both lungs slightly congested at base. Heart small and flabby. Walls thin. Both auriculo-ventricular orifices dilated, especially the right. Aorta slightly atheromatous at commencement and around the orifices of the coronary arteries.	A large cancerous deposit surrounding and involving the whole rectum from its commencement to the anus. Liver fatty with the large lobe closely adherent to the diaphragm. Spleen large and much congested. Both kidneys congested and cortex slightly atrophied.	Right hemisphere 20½ Left " - 20½ Cerebellum - 4½ Pons and medulla ½ <hr/> Total encephalon 47 <hr/> Right lung - 23½ Left " - 26½ Heart " - 11½ Liver - 46½ Spleen - 11½ Right kidney 4 Left " - 3½
Scalp thick. Calvaria thick and dense. Dura mater adherent to calvaria over vertex. Arachnoid and pia mater much congested and somewhat adherent to grey matter. Vessels of pia mater markedly atheromatous. Grey matter of convolutions of cerebrum thin and wasted; a well marked white line running longitudinally throughout it. Very oedematous, softened and anæmic. White matter of cerebrum generally oedematous, anæmic and softened almost to a pulp. Ventricles dilated and distended with fluid. Cerebellum oedematous, flabby and softened. Vessels of brain and cord very atheromatous.	Old pleuritic adhesions on both sides. Left lung congested at its base. Ventricular walls of the heart thin and flabby. Right auriculo-ventricular orifice much dilated. Aorta atheromatous and dilated in its first part.	Liver much congested. Spleen congested and softened. Cortical substance of both kidneys wasted. A cyst about size of hazel nut found in cortical substance of left kidney.	Right hemisphere 19 Left " - 18½ Cerebellum - 4½ Pons and medulla ½ <hr/> Total encephalon 43½ <hr/> Right lung - 18½ Left " - 15 Heart " - 11½ Liver - 38½ Spleen - 3½ Right kidney 3½ Left " - 4½

Table 36—continued.

		General History.	Mental State during Residence.	Bodily State during Residence.
245	H. W. Male, 66. 5 ft. 7½ in. Feb. 17, 1865. Sept. 20, 1888.	Waiter. Killed his daughter eighteen months old. Was tried at Central Criminal Court in October 1849, and found insane. Ordered to be detained during Her Majesty's pleasure. Admitted from Fisherton House.	Suffered from chronic mania, with delusions.	In fair general health. Suffered from heart disease, also from dropsy, for 18 months previously to death.
1360	D. McK. Male, 48. Oct. 2, 1888. Oct. 13, 1888.	A mat-maker. Tried at Clerkenwell Sessions on 9th June 1884 for larceny and receiving after pre-conviction. Sentenced to 5 years penal servitude. Admitted here from Woking Prison.	In last stage of general paralysis of the insane. Demented and incoherent.	Bedridden, suffering from paralysis.
1253	E. R. Male, 53. 5 ft. 9½ in. July 18, 1885. Oct. 28, 1888.	A shoemaker: tried at Cambridge Assizes on July 9th, 1885, for attempting to set fire to a farm building. Found guilty but insane. Ordered to be detained during Her Majesty's pleasure.	On admission was suffering from chronic mania with occasional acute exacerbations. Gradually passed into a state of dementia.	Has suffered from general paralysis since admission, from which disease he died.

Table 36—continued.

POST-MORTEM NOTES.			
Head and Spine.	Thorax.	Abdomen.	Absolute Weights of Principal Organs in ounces avoirdupois.
<p>Scalp thin. Calvaria dense. Dura mater slightly thickened and opaque. Arachnoid and pia mater congested. Grey matter of cerebrum softened throughout and somewhat indistinct. White matter of cerebrum congested. Ventricles contained an excessive amount of fluid. Cerebellum much softened. Vessels of brain and cord congested throughout.</p>	<p>Right pleural cavity contained 52 ozs. of amber coloured fluid; left contained 60 ozs. of similar fluid. Lungs fairly healthy, right lung slightly emphysematous. Pericardium adherent in front of heart. Heart large and all cavities dilated. Ventricles hypertrophied except apex of left ventricle, the muscular substance of which was atrophied, and the corresponding endocardial membrane was thickened, fibrous and contained calcareous deposit. Aorta healthy.</p>	<p>Liver congested and fatty; adherent to diaphragm in part. Spleen small and fibrous. Kidneys congested and cortex atrophied especially on right side.</p>	<p>Right hemisphere 20 Left " - 20 Cerebellum - 4½ Pons and medulla ¼ Total encephalon 45½</p> <p>Right lung - 22 Left " - 17 Heart - 17½ Liver - 31½ Spleen - 4½ Right kidney - 3½ Left " - 4½</p>
<p>Scalp thin. Calvaria of normal thickness. Dura mater thickened and congested. Arachnoid and pia mater thickened, opaque, congested and adherent to brain over vertex. Brain small. Large amount of cerebro-spinal fluid. Grey matter of convolutions of cerebrum much wasted. White matter of cerebrum soft and oedematous. Floor of the ventricles granular. Cerebellum soft and oedematous.</p>	<p>Old pleuritic adhesions on both sides. Left lung oedematous and infiltrated. Right lung slightly oedematous and emphysematous at the margin. Heart small. Muscular structure pale and flabby.</p>	<p>Spleen congested and softened. Kidneys small. Cortex atrophied especially on right side.</p>	<p>Right hemisphere 14½ Left " - 15½ Cerebellum - 5½ Pons and medulla ¼ Total encephalon 35½</p> <p>Right lung - 16 Left " - 26½ Heart - 7½ Liver - 40½ Spleen - 3½ Right kidney - 3½ Left " - 3½</p>
<p>Calvaria thin and dense. Dura mater thick and adherent to convolutions over vertex, arachnoid, and pia mater congested and cloudy from old chronic inflammation. Pia mater strongly adherent to convolutions of cerebrum. Excess of cerebro-spinal fluid. The hemispheres of cerebrum closely adherent anteriorly. Grey matter of convolutions of cerebrum atrophied in parts. Floor of ventricles markedly granular. Choroid plexus cystic. Cerebellum unusually large.</p>	<p>Old fibrous pleuritic adhesions at apex of left lung forming a sac containing about 5 ozs. of fluid. Bronchi of both lungs congested. Right lung oedematous and congested. Left lung in a state of consolidation from chronic catarrhal pneumonia, except along anterior border. Small portions of the lungs sink in water. Pericardium contained 6 ozs. of clear straw-coloured fluid. Heart large. A considerable deposit of fat on the surface. Muscular tissue fatty degenerated and flabby. Aortic valve incompetent, cusps of the valve fenestrated. Pulmonary valve fenestrated. A large white clot attached to it. Aorta markedly atheromatous.</p>	<p>Liver anæmic and fatty. Spleen large and tough, with fibrous plates in its capsule. Both kidneys pale and anæmic with atrophy of the cortex.</p>	<p>Right hemisphere 19½ Left " - 19½ Cerebellum - 5½ Pons and medulla 1½ Total encephalon 45½</p> <p>Right lung - 21½ Left " - 47½ Heart - 19 Liver - 55½ Spleen - 5½ Right kidney - 5½ Left " - 6</p>

No. in Register.	Sex, Age, Height, Date of Admission and of Death.	HISTORY.		
		General History.	Mental State during Residence.	Bodily State during Residence.
1359	G. S. Male, 49. Oct. 2, 1888. Oct. 28, 1888.	Painter; tried at Leeds session 15th of April 1884, for larceny after pre-conviction of felony. Found guilty and sentenced to five years penal servitude. Received from Woking Prison.	Demented . . .	Was bedridden from time admission to time of death, suffering from general paralysis, from which he died.
331	A. G. Female, 44. 5 ft. 6½ ins. Jan. 26, 1882. Oct. 29, 1888.	Married; formerly a "factory hand"; tried 14th July 1877, at York Assizes for Arson, and sentenced to fifteen years penal servitude. She attempted to burn York Castle Prison, while undergoing a short sentence by setting fire to her bed clothes, &c. Admitted from Milbank Prison 14th June 1880, transferred to Milbank 9th February 1881. Re-admitted from Woking Prison 26th January 1882.	Suffered from chronic mania with numerous delusions of persecution.	Good on admission. Later suffered much from intestinal cancer, from which she died.
393	E. H. Female, 27. 4 ft. 11 in. Feb. 16, 1886. Dec. 31, 1888.	Married; wife of a miner; arraigned on the 4th February 1886, at Nottingham Assizes for the manslaughter of one of her children, by roasting it before a fire. Found insane and unfit to plead. Admitted from Nottingham Prison.	Demented . . .	General health bad on admission. Suffered from general paralysis, with severe and continuous epileptic convulsions. Died of general paralysis.

Table 36—continued.

Grand total of cases after when post- morte- m ana- lysis was made.	POST-MORTEM NOTES.			
	Head and Spine.	Thorax.	Abdomen.	Absolute Weights of Principal Organs in ounces avoirdupois.
F. st. ars.	Calvaria thin and dense. Dura mater thick, congested with punctiform hæmorrhages over inner surface; adherent over vortex. Subarachnoid and cerebro-spinal fluid excessive. Pia mater adherent in places to convolutions of cerebrum. Floor of ventricles granular. Lateral ventricles much dilated and contained excessive amount of fluid.	Firm, old, pleuritic adhesions at both apices. Right lung congested and oedematous throughout. Left lung congested with commencing pneumonic solidification. Pericardium contained about 1 oz. of clear straw-coloured fluid. Heart small, flabby, and with a large deposit of fat on the surface. Mitral valve thickened at margin. Aortic cusps thickened. Right auricle contained a white clot weighing $\frac{1}{2}$ oz.	Liver congested. Right kidney contracted and granular; cortical substance wasted. Left in a similar but more advanced condition.	Right hemisphere 18 $\frac{1}{2}$ Left " 17 $\frac{1}{2}$ Cerebellum - 5 $\frac{1}{2}$ Pons and medulla 1 Total encephalon 42 $\frac{1}{2}$ Right lung - 24 $\frac{1}{2}$ Left " - 29 $\frac{1}{2}$ Heart - 11 $\frac{1}{2}$ Liver - 39 $\frac{1}{2}$ Spleen - 4 $\frac{1}{2}$ Right kidney - 3 $\frac{1}{2}$ Left " - 3 $\frac{1}{2}$
F. st. ars.	Calvaria thick and very dense. Dura mater adherent to calvaria over vertex. Arachnoid and pia mater thickened, cloudy, and adherent to dura mater along the border of the longitudinal sinus. Grey matter of convolutions much wasted. White matter of cerebrum anæmic pearly on section and somewhat softened.	Old pleuritic adhesions on both sides. Lungs oedematous and slightly congested at bases. Heart large and firm. Aortic valve incompetent. Right auriculo-ventricular orifice much dilated. Aorta atheromatous.	Liver firm and tough, in a state of well marked hob nailed cirrhosis. Spleen enlarged, tough and fibrous. Both kidneys much enlarged, pale and mottled. Ureters much dilated. Apices of pyramids wasted. A large cancerous mass, having its origin apparently at the os uteri, had eaten its way into the bladder obstructing the ureters causing retention of urine, resulting in uræmic coma which was the immediate cause of death.	Right hemisphere 17 $\frac{1}{2}$ Left " 17 $\frac{1}{2}$ Cerebellum - 4 $\frac{1}{2}$ Pons and medulla $\frac{1}{2}$ Total encephalon 40 $\frac{1}{2}$ Right lung - 33 $\frac{1}{2}$ Left " - 20 Heart - 15 $\frac{1}{2}$ Liver - 57 $\frac{1}{2}$ Spleen - 25 $\frac{1}{2}$ Right kidney - 10 $\frac{1}{2}$ Left " - 6 $\frac{1}{2}$
F. y. ars.	Calvaria dense and very thick. Dura mater thickened and congested with dark fluid blood. Arachnoid and pia mater congested and adherent to dura mater, both membranes being cloudy and generally adherent to brain substance. A large amount of fluid at base of brain. Brain substance congested with dark fluid blood. Ependyma of ventricles distinctly granular. Especially well marked on floor of the fourth.	About 6 ozs. of fluid in each pleural cavity. Both lungs congested at bases. Heart normal, all valves competent.	Liver slightly congested. Kidneys pale and fatty cortical substance, especially left, much wasted.	Right hemisphere 14 $\frac{1}{2}$ Left " - 14 $\frac{1}{2}$ Cerebellum - 4 $\frac{1}{2}$ Pons and medulla $\frac{1}{2}$ Total encephalon 34 $\frac{1}{2}$ Right lung - 17 $\frac{1}{2}$ Left " - 19 Heart - 7 $\frac{1}{2}$ Liver - 32 Spleen - 3 $\frac{1}{2}$ Right kidney - 3 $\frac{1}{2}$ Left " - 3 $\frac{1}{2}$

TABLE 37.

COPY of the APPROPRIATION ACCOUNT presented to PARLIAMENT.

ACCOUNT of the Sum expended compared with the Sum granted to defray the expense of the maintenance of criminal lunatics in the Broadmoor Criminal Lunatic Asylum, England, in the year ended 31st March 1889, showing the Surplus or Deficit upon each Sub-Head of the Vote.

Service.	Grant.	Expenditure.	Expenditure compared with Grant.

NOTE.—From the 1st April 1872 the administration of the works connected with the maintenance and repairs of the buildings was placed under Her Majesty's Office of Works, and so continued until the 31st March 1873, when it was again transferred to the control of the Council of Supervision. During the years whilst the buildings were under the care of the Office of Works the expenditure under ordinary repairs was not kept separate from that for additions and alterations. In making up this table the plan adopted for those years has been to debit ordinary repairs with the sum inserted in the Estimates for the year for that service, and to carry the balance of expenditure for the year to the debit of additions and alterations.

TABLE 43.

## PATIENTS' DIETARY.

## BREAKFAST.

Every day - Males and }  
 Females } Tea with bread and butter.

## DINNER.

*Males.*

- Sunday - Beef or mutton, without bone, and weighed after cooking, 4 ozs.; potatoes, weighed raw, 12 ozs.; currant pudding, 8 ozs., or fruit pie, 12 ozs.; beer,  $\frac{3}{4}$  pint; and bread.
- Monday - Bacon or pork, without bone, and weighed after cooking, 5 ozs., or corned beef, 6 ozs.; potatoes, weighed raw, 12 ozs.; peas pudding, 4 ozs.; beer,  $\frac{3}{4}$  pint; and bread.
- Tuesday - Beef or mutton, without bone, and weighed after cooking, 4 ozs.; potatoes, weighed raw, 12 ozs.; raisin pudding, 8 ozs., or soup, 1 pint; beer,  $\frac{3}{4}$  pint; and bread.
- Wednesday - Beef or mutton, without bone, and weighed after cooking, 5 ozs.; potatoes, weighed raw, 12 ozs.; fruit pie, 12 ozs., or suet pudding, 4 ozs.; beer,  $\frac{3}{4}$  pint; and bread.
- Thursday - New Zealand Mutton, without bone, and weighed after cooking, 5 ozs.; potatoes, weighed raw, 12 ozs.; beer,  $\frac{3}{4}$  pint; and bread.
- Friday - Pork or bacon, without bone, and weighed after cooking, 5 ozs.; potatoes, weighed raw, 12 ozs.; peas pudding, 4 ozs.; beer,  $\frac{3}{4}$  pint; and bread.
- Saturday - Beef or mutton, without bone, and weighed after cooking, 5 ozs.; potatoes weighed raw, 12 ozs.; suet pudding, 4 ozs.; beer,  $\frac{3}{4}$  pint; and bread.

*Females.*

- Sunday - Beef or mutton, without bone, and weighed after cooking, 3 ozs.; potatoes, weighed raw, 12 ozs.; currant pudding, 8 ozs., or fruit pie, 12 ozs.; beer,  $\frac{1}{2}$  pint; and bread.
- Monday - Bacon or pork, without bone, and weighed after cooking, 4 ozs., or corned beef, 5 oz.; potatoes, weighed raw, 12 ozs.; beer,  $\frac{1}{2}$  pint; and bread.
- Tuesday - Beef or mutton, without bone, and weighed after cooking, 3 ozs.; potatoes, weighed raw, 12 ozs.; raisin pudding, 8 ozs., or soup, 1 pint; beer,  $\frac{1}{2}$  pint; and bread.
- Wednesday - Beef or mutton, without bone, and weighed after cooking, 4 ozs.; potatoes, weighed raw, 12 ozs.; fruit pie, 12 ozs., or suet pudding, 4 ozs.; beer,  $\frac{1}{2}$  pint; and bread.
- Thursday - New Zealand Mutton, without bone, and weighed after cooking, 4 ozs.; potatoes, weighed raw, 12 ozs.; beer,  $\frac{1}{2}$  pint; and bread.
- Friday - Pork or bacon, without bone, and weighed after cooking, 4 ozs.; potatoes, weighed raw, 12 ozs.; peas pudding, 4 ozs.; beer,  $\frac{1}{2}$  pint; and bread.
- Saturday - Beef or mutton, without bone, and weighed after cooking, 4 ozs.; potatoes, weighed raw, 12 ozs.; suet pudding, 4 ozs.; beer,  $\frac{1}{2}$  pint; and bread.

Fish dinners are given occasionally.

Meat pie is occasionally substituted for the usual Saturday's dinner.

On four days of the week, other vegetables, such as may be in season, are given in lieu of 4 ozs. potatoes, according to the following scale—weighed, or measured, before cooking :—

Cabbage, 12 ozs.; French beans,  $\frac{3}{4}$  pint; broad beans, shelled,  $\frac{3}{4}$  pint; green peas, shelled,  $\frac{1}{2}$  pint; vegetable marrows, 1 lb.; carrots, 12 ozs.; parsnips, 12 ozs.; onions, 8 ozs.

#### TEA.

Every day - Males and Females } Tea with bread and butter.

---

Seed bread is given twice weekly in lieu of bread and butter to those of the patients who like it.

Oatmeal gruel at bed time is supplied to those who wish for it.

The sick are dieted at the discretion of the superintendent.

Working patients are allowed 4 ozs. bread and 1 oz. of cheese for lunch, with oatmeal and water.

Every patient is allowed  $1\frac{1}{2}$  ozs. tea, 7 ozs. sugar, 7 ozs. butter, and  $1\frac{3}{4}$  pts. milk weekly. Bread is unlimited; the quantity consumed daily averages 17 ozs. for males, and 14 ozs. for females.

The soup consists of the liquor from the boiling of the meat with the addition of  $12\frac{1}{2}$  lbs. of peas and barley, and 10 lbs. of vegetables, for 100 patients.

Currant pudding consists of flour,  $37\frac{1}{2}$  lbs., currants,  $12\frac{1}{2}$  lbs., and suet or dripping,  $12\frac{1}{2}$  lbs., to make 100 lbs. when cooked.

Fruit pies consist of flour 3 ozs., fruit 8 ozs., sugar 1 oz., and dripping 1 oz., to make 12 ozs. when cooked.

Seed bread is made from dough, with the addition of 10 lbs. dripping, 9 lbs. sugar, and  $1\frac{1}{4}$  lbs. carraway seeds to 100 lbs. dough.

Meat pies consist of 4 ozs. meat without bone, 7 ozs. mixed dough, and 8 ozs. vegetables, for males;  $3\frac{1}{2}$  ozs. meat without bone, 6 ozs. mixed dough, and 8 ozs. vegetables, for females.

Suet pudding consists of flour 50 lbs. and suet  $12\frac{1}{2}$  lbs., to make 100 lbs. when cooked.

---

" 15 "	"	20	"	-	15	1	16
" 20 "	-	-	-	-	19	4	23
Total					84	30	114

One of the chief reasons why fewer changes occur amongst the men than amongst the women is that the men are retained in the service after their marriage, provided they obtain leave to marry, whilst marriage usually, although not always, leads to the retirement of women from the service. It will be seen by the foregoing figures, that over 70 per cent. of the male attendants have been in the service more than five years, whilst over 51 per cent. have been in the service for periods above ten years. Of the female attendants 50 per cent. count above five years' service, whilst over 23 per cent. count above ten years.

Leave of absence for the day is granted every ninth day; and, in addition, every attendant has a holiday of ten days annually.
