CORNWALL COUNTY LUNATIC ASYLUM.

ANNUAL REPORT OF VISITORS.

THE Report of the Visitors of the Asylum, which was presented at this time last year, drew the attention of the Court to the overcrowded condition of the Dormitories, the insufficient appliances and size of the Laundry and Wash-house, and the necessity of building a Reservoir for the purpose of storing the water during the dry summer months.

In compliance with the Report the Visitors have, during the past year, been engaged in the consideration of these three objects, and have prepared plans, (which they lay before you to-day,) for a New Building to accommodate 128 Pauper Patients, the estimated cost of which amounts to £7,285. These plans have received the approbation of the Commissioners in Lunacy, and the Secretary of State of the Home Department, and have been deposited at the Office of the Clerk of the Peace for a month, as prescribed by the Standing Orders of the Court.

The Visitors also submit to you a plan for the enlargement of the Laundry and Wash-house, which it is estimated will cost £600.

The question of the Reservoir has also engaged their attention, and the experience of the past dry summer has confirmed their opinion of the necessity of providing one without delay, so as to preserve the water which runs to waste during the night, and to secure always a large supply to meet the requirements of dry seasons, and to protect the establishment against the accident of fire.

A plan and estimate has been prepared of the Reservoir and its connection with the Asylum; and negotiations have been entered into for the purchase of a quarter of an acre of land, on which to

construct the Reservoir, at such an elevation above the Asylum as to give a service of water to the top of all the buildings. It is believed that this most necessary work can be carried out at a cost to the County of £830.

During the past year new Bath Rooms and Closets have been erected in the Men's New Pauper Building: and it was found necessary to replace upwards of 40 of the old Iron Casements, with new ones made of wood. A large quantity of new Furniture has also been required during the year; and the exterior woodwork of the buildings has received a thorough painting. All these expenses were inevitable, and are the reason that the order upon the County Treasurer is £100. in excess of the order of last year. The condition of the buildings is sound and good.

The conduct of the Officers and Servants of the Establishment, and their care of, and attention to the Patients, have been most satisfactory.

The average weekly cost throughout the year has been 9s. 2 $\frac{3}{4}$ d. per patient.

The average weekly charge to the Unions has been 8s. 9 $\frac{3}{4}$ d.

The Visitors beg to remind the Court that their time of office has expired, and that it will be necessary, to day, to appoint their successors.

Signed,

J. TREMAYNE, *Chairman*,

Dated January 3, 1871.

REPORT OF THE MEDICAL SUPERINTENDENT.

MR. CHAIRMAN, MY LORDS, AND GENTLEMEN :

	<i>Males.</i>	<i>Females.</i>	<i>Total.</i>
There remained in the Asylum, December 31, 1869,	206	255	461
Admitted during 1870,	56	39	95
	<hr/> 262	<hr/> 294	<hr/> 556
Discharged,	23	30	53
Died,	39	19	58
	<hr/> 200	<hr/> 245	<hr/> 445

Of whom 20 Males and 21 Females are Private Patients.

The total number of Patients under treatment during the year has been 556; the lowest resident at one time 445, the highest 469, and the average 460.

The admissions during the year have not been so numerous by 18 as those of the preceding year: of those admitted, 32 were from the first deemed to be incurable, either from long continuance of the disease, advanced age, or the existence of serious organic disease; in 37 cases only was any exciting cause assigned for the attack; of these, 23 were attributed to physical, and 14 to moral influences. In 17 cases, hereditary predisposition to insanity was stated to have existed, and 27 had suffered previous attacks.

Thirty-nine men and 19 women have died. The mortality for the year has been at the rate of 10·43 per cent. on the total number of Patients treated, and is nearly 4 per cent. above that of last year. It is satisfactory to be able to report that this increased rate of mortality has not been the result of any epidemic, but is to be attributed to the large number of deaths that have taken place among

the very aged, and those suffering from active disease of the cerebro-spinal system : 11 Patients have died whose average age exceeded 77 years, and 10 others who were more than 65 years of age : among them many old inhabitants of the Asylum ; one had been here nearly 33 years. Of the deaths, 21 were due to General Paralysis, Epilepsy, or other diseases of the Nervous centres ; 16 to Phthisis Pulmonalis and affections of the Lungs ; 4 to Senile decay ; and the remainder to various causes. In 4 cases, where death took place suddenly, Inquests were held.

Fifty-three Patients have been discharged, of whom 2 are on trial : of those discharged, 16 men and 25 women were recovered. The recoveries for the year have been at the rate of 46.30 per cent. on the admissions, nearly 10 per cent. above last year's : the average proportion of the recoveries to the admissions throughout England and Wales for the last 10 years has been 33.93 per cent.

In my last report I had to draw your attention to the fact that there were then only 4 vacant beds in the Buildings occupied by women Patients, and that the Dormitories were all more or less overcrowded. In consequence of this report, in January of the present year you directed notice to be given to the Union authorities that only urgent cases should be sent to the Asylum, and that no female Patient was to be sent until application had been made to know whether such Patient could be received : these applications were further directed to be accompanied by answers to a printed list of questions as to the duration, &c. of the Insanity in the case for which admission was sought ; similar regulations were not at first required with regard to the admission of men Patients, but in summer the wards occupied by them, becoming full, it became necessary to enforce like restrictions on their admissions : although, owing to the vacancies which have occurred during the year, no application for the admission of a Patient has been refused, the effect of these restrictions has been to reduce the numbers admitted from the Unions to 74, which as compared with 100 admissions in 1869, 94 in 1868, and 113 in 1867, shews this year a reduction of very nearly 30 per cent. on the average admissions of the three previous years. There is no reason for supposing that this reduction in the number of Patients admitted for the past year is any indication that Insanity is less prevalent in the County ; it must, I fear, be regarded as alone due to the deterrent measures regarding admissions which you have been compelled to enforce, and which if necessitated for any considerable period, can only tend to increase the number of Chronic Insane in the County ; for while you are obliged to place limits on those who can be admitted, it is to be feared that those suffering from Insanity, in which the earlier symptoms are not marked by excitement or dangerous propensities, will be allowed to remain without treat-

ment, and will only be sent to the Asylum when the disease has become thoroughly engrafted in the constitution, and when little hope of recovery can reasonably be entertained.

Of the total number of Pauper Lunatics in the County, about 70 per cent. are in the Asylum; 16 per cent. in the various Workhouses; and 14 per cent. with relatives, or boarded out. Reference to the Reports of the Commissioners in Lunacy shews that the average proportion of Pauper Lunatics in Asylums is 61.83 per cent.; in Workhouses, 23.50 per cent.; with relatives, or boarded out, 14.66 per cent. From these statistics it appears that in this County the proportion of Pauper Lunatics in the Asylum is rather above the average, in the Workhouses rather below the average: this difference, however, is to be accounted for by the fact, that in many of the most populous Counties, as Middlesex and Lancashire, the Asylum accommodation for the Insane Poor is so much less than what is required, that in connection with their Workhouses special provision has been made for Lunatics,—in short Supplemental Asylums have been created, some of which contain upwards of 300 Patients.

Of the Insane, the proportion fit to be dealt with in the general wards of a Workhouse is very small indeed; from time to time you have sanctioned the removal from here of those who it was thought might be so managed, but the experience gained has not been encouraging, for it has frequently happened that those who for years have been quiet and tractable in the Asylum, on being sent to the Workhouses have speedily relapsed, and have had to be returned to the Asylum.

By the Lunatics' Amendment Act of 1862, power was given to the Visitors of Asylums to make arrangements with Guardians of Parishes or Unions for the Transfer of Chronic Lunatics to Workhouses; such arrangements can however only be carried out subject to the approval of the Poor Law Board and Commissioners in Lunacy, who require such provision as to accommodation, attendants, means for occupation, diet, &c. that to no Union in this County could a sufficient number of Chronic Lunatics belonging to such Union be transferred without greater expenses being entailed than if they remained in the Asylum.

With regard to the Boarding out of Lunatics, I cannot think it can ever be had recourse to so as to relieve overcrowding in Asylums, except to the most trifling extent; it has been tried in some parts of Scotland, but the reports on the system are not favourable, and great difficulties are experienced in getting suitable persons willing to receive Patients into their houses; and save in some few instances, where, from affection, relatives are desirous of taking the charge of their afflicted relations, and are able to do so by assistance from the

Parish Authorities, I imagine that there are but few suitable who would be willing to accept such responsibilities as the care of Lunatics involves; and after all, of the demented and fatuous, (the only Class fit,) there are very few indeed who could be so managed without annoyance and possible risk resulting to the public.

I have the honour to remain,

Mr. Chairman, My Lords, and Gentlemen,

Your very obedient Servant,

RICHARD ADAMS,

Medical Superintendent.

REPORT OF THE CHAPLAIN.

CORNWALL ASYLUM, BODMIN,

December 31, 1870.

MR CHAIRMAN, MY LORDS, AND GENTLEMEN :

The Religious Services in the Wards and Chapel of the Asylum have been continued as usual during the year.

The additional Chapel accommodation, (provided by the Subscribers,) has been found very beneficial, and conducive to the comfort of those attending the Church Services.

Inconvenient crowding is no longer experienced, though the Chapel, in its enlarged state, is well filled. The Organ and its Fittings, (presented at the same time,) have likewise proved very helpful and effective. The New Vestry has been made use of, as a retiring room for Fit-Patients, for which purpose it is well suited.

Efficient aid has been rendered by the Choir of Male and Female Attendants, and the devotional character of the Services has not been interrupted by any excitement on the part of the Patients.

The deaths have occurred of 58 Patients, and 3 Officers connected with the Establishment.

The bodies of 7 Patients have been removed by their friends, and 1 remains for burial, so that my number of Funerals has been 53.

Throughout the Asylum sincere regret was felt at the deaths of the Matron, (Miss H. E. P. Garstin,) the Storekeeper, (Mr. W. Toleman,) and a Nurse, superannuated a short time previously, (M. A. Coleman.)

The Matron and Storekeeper died in the active discharge of their duties. All three were deservedly respected and esteemed, on account of the great influence for good which they exercised.

They had zealously laboured to promote the comfort of the Patients, often at much self-sacrifice; and were evidently actuated in their unostentatious endeavours by the highest and most conscientious principle.

The Patients highly value the supply of Newspapers and Books,—many of them take considerable interest in the events which happen in the outer world.

I have had great pleasure in co-operating with Dr. Adams and the Matrons in their efforts to entertain the Patients, and I have received every assistance from them in the discharge of my daily duties.

I have the honour to remain,

Mr. Chairman, My Lords, and Gentlemen,

Yours very obediently,

WILLIAM IAGO, B. A.

Chaplain.

*To the Committee of Visitors of the
Cornwall Asylum.*

REPORT OF THE COMMISSIONERS IN LUNACY.

CORNWALL COUNTY ASYLUM,

Wednesday, 8th June, 1870.

SINCE this Asylum was visited on the 13th July, 1869, there have been 104 admissions, 50 discharges, and 45 deaths: the Private Patients under the first head being 19, 11 males and 8 females, and the Paupers 85, 38 males and 47 females; under the second head, the Private class being 9, 5 males and 4 females, and the Pauper class 41, 17 males and 24 females; and under the third head, 6 Private Patients, 4 males and 2 females, and 39 Pauper Patients, 24 males and 15 females, being included. Excepting 11, all those discharged were recovered; and there seems to have been nothing unusual in the deaths, the only two Inquests held having been upon Patients found dead from natural causes. The principal causes of these and the other deaths were phthisis, bronchitis, and pneumonia; epilepsy and other forms of brain disease; maniacal exhaustion, and senile decay. Of the health of the Asylum at present no unfavourable report is to be made: the majority of those seen by us in bed, as we passed through the wards yesterday and to day, 4 in the Private buildings, and 8 of each sex in the Pauper wards, being sufferers principally from old age.

The numbers on the books of the Asylum are altogether 472, and excepting one Private Patient (a female) and two Pauper Patients (males,) who are now absent on trial, all these were seen by us: in the Private building 52, 29 males and 23 females; and in the Pauper wards 417, 212 males and 257 females. Of the condition generally of both classes and both sexes, we may say at once that very favourable report is to be made. With very few exceptions we thought the dress and clothing good; while the state of it, and the personal appearance otherwise of these

Patients, as well as the prevailing absence of excitement, showed that on the whole they must be well attended to. The proportion of Attendants to Patients on the male side, (we are speaking now of the Pauper inmates, and are including such of the working Attendants as do ward-duty morning and evening, as well as help at dinner,) is about 1 to 10; and that of Nurses on the female side, (excluding the laundry and kitchen maids,) is about 1 to 12; in connection with which we should add, that, comparing those of the respective sexes assembled in their airing grounds as the majority were yesterday,) the satisfactory indications above mentioned were observable in a more marked degree among the men than among the women.

The wards in the main building of both divisions were in very good order; the atmosphere untainted everywhere, notwithstanding an excess of beds to the number of 30 at least; and the bedding, which is extremely good, was in a clean and proper state in all the dormitories. On the womens' side two new baths have been placed since the last visit, another rough-pointed wall has been plastered, and more of the iron-framed dull windows have been replaced by cheerful wooden ones. On the mens' side, in the same interval the improvements of the same description have been on a more extended scale; including excellent adaptation to the use of the Pauper inmates of the old Private wards Nos. 8 and 9, by new furniture and painting, by judicious enlargement of the dayrooms, and by supplying both corridors and dayrooms with new windows. Other changes, which will remedy still further the deplorable mistakes committed in the original construction of the Asylum, are in progress or contemplation; and much praise is due to the steady exertions of Mr. Adams in this direction, and to the liberality with which they have been supported by the Committee.

We are sorry to find that the necessary enlargement of the washhouse and laundry is to be made only concurrently with the proposed new Pauper buildings; and in connection with the latter we desire to express very strongly our sense of the expediency, in calculating the numbers to be accommodated therein, of sacrificing some seven or eight of the single sleeping-rooms now in the old building for the purpose, which we hold to be absolutely essential, of enlarging the most inconvenient and inadequate rooms at present occupied by a majority of the Attendants.

Other changes made since the last visit in the Pauper buildings have comprised a padded-room and new bath-room on the male side, and we shall hope to find shortly that, by means of new bathing arrangements, the water, now changed for every two persons only, will be changed for each Patient. The artizans' shops in progress when our Colleagues were here, have all been com-

pleted since, except the blacksmith's; and we saw manifest additions lately made to the useful articles of domestic furniture in the several wards, such as chairs, settees, and tables. With pleasure we observed at the same time, that the supply in the various dayrooms and corridors of illustrated periodicals, and other light amusing reading, to which the Chaplain gives evidently very careful attention, is various and sufficient; and here we may also notice the opening of the enlarged Chapel in October last, the south aisle and nave having been lengthened to admit of 80 more sittings, and a vestry room having been built to the north; and the residue of the private subscription by which these works were paid for enabling Mr. Iago to purchase an Organ, and a small hydraulic engine to supply it with wind. There is now an attendance of more than 200 at each Chapel Service.

In the Private buildings the improvements have also been very considerable since our Colleagues visited, all the rooms having been papered and painted throughout, (or in immediate preparation with that view,) additional furniture of a suitable and superior kind placed in them, and both airing grounds planted with trees and shrubs. The Patients are not clased here with any strictness, the accommodation being enjoyed in almost equal degree by all; and, considering that only 8 persons out of the 52 pay more than a guinea a week, we know nothing so good, or indeed comparable to this made available for such small payments. There is a general dining-room accessible to both divisions, but only a party of gentlemen dine there at present; and we are of opinion that the table might be enlarged with advantage, so as to admit of the party being joined by a certain number selected from the ladies' division.

We saw the dinner served in the male Pauper "mess-room" to-day. It was very good, but we think that the allowance of beer should be made to all, and not left to depend on the doctor's order. Only two-thirds of the whole number, it would seem, at present receive it. As to other matters of statutory enquiry we have the usual report to make. The records of employment show that, excluding the 33 men and 55 women who do what is called gallery or ward work, there are 110 women and 100 men usefully employed; 15 of the latter at trades, and 85 on farm and grounds, while of the former 29 are in the laundry, 6 in the kitchen, and 75 at needlework.

For recreation, sea-side picnics and other associated parties are given; and while as many as 350 attend the out-door summer entertainments, the place for such in-door meetings will not accommodate more than 150: a fact which ought not to be lost sight of in the new proposed additions and alterations in the Asylum.

The instances of seclusion since the last visit have been very

inconsiderable, being not more than 14, applied to about 9 Patients, and amounting altogether to not more than 23 hours. The restraint has been wholly for surgical purposes, and has comprised three cases. The numbers under medical treatment to-day are about 20 of each sex.

A female Patient, G. A., complained to us of violence, which she alleged to have been employed against herself by two of the female Attendants, stating also that she had witnessed very brutal conduct on the part of Nurses to a Patient named T. who died in the Asylum a year ago. Into these allegations we made what enquiry we could, and were unable to satisfy ourselves that any sufficient ground for them existed. In reference to a further statement by the same Patient, however, that she had been more than once, by order of Mr. Adams, placed on bread and water for several days, we found upon enquiry that this was substantially correct. Mr. Adams informed us that the woman, A. who has been in the Asylum since 1861, was two years ago, during his absence, placed for five days on bread and water, by his Assistant Medical Officer; and that he has himself, on two occasions more recently, ordered her to be similarly placed on bread and water for two days and for three days. No record of any of these instances was made at the time, or is now to be found in the medical records. Mr. Adams, nevertheless, states it to have been "treatment," and justifies it on that ground. He describes it as having been resorted to in consequence of its being found that all the modes ordinary in Asylums for subduing excitement were inapplicable to this particular case, which he says is one of "moral insanity." Never having been able to discover what "moral insanity" means, if it does not mean the merely vicious nature which impels to wickedness or crime, and not thinking that Asylums can with any advantage (even if it were allowable to make the attempt) be turned into prisons or reformatories, we do not approve of the "treatment" adopted to this woman, who ought in our opinion to be discharged at once, if the ordinary methods of dealing with the insane are found to be inapplicable to her: and we desire thus to bring the matter under notice of the Committee of Visitors, as well as of our own Board.

Making the inquiry imposed by the statute as to the visitation and management of this Asylum, we find that there are monthly meetings for general business at which Patients are discharged being allowed to make any complaints, and that the special duty of visiting the wards, and seeing all the patients therein, is discharged once in two months, by two Magistrates appointed by the general body of such special Visitors.

There is a vacancy of the Assistant Medical Officer at present, which will be filled next week; and we continue to have the

highest opinion of the care and attention given by the Chief Superintendent to the discharge of the very arduous duties that devolve to him.

JOHN FOSTER, } Commissioners in
ROBERT NAIRNE, } Lunacy.
