ANNUAL REPORT

OF THE

COMMITTEE OF VISITING JUSTICES

COUNTY LUNATIC ASYLUMS,

FOR THE YEAR 1881.

HERE is a remarkable contrast between the past and the previous year, as regards the increase or decrease of Lunacy in the class of County pauper patients. In 1880 the number under this head had risen from 383 to 410, an increase in the year of 37; in 1881 it had fallen to 409-a reduction of one patient. The admissions were about the same-82 in the year just past, 83 in the year before; but the discharges have been much more numerous—46 as against 26; 37 being recovered and nine relieved. The deaths were 37 as against 30 in 1880. The per centage of recoveries on admissions is about 45, approaching to one-half-a satisfactory proportion. The per centage of deaths on the daily average number is about 8, or two below the usual number in County Asylums. There are 41 Out-County pauper patients in the two Asylums, 24 from Abergavenny and 17 from Poole; the increase under this head is ten.

The number of non-paupers has fallen from 28 to 26; four have been admitted, four have been discharged and two have died in the course of the year. The total number of patients is 476, December 31st, 1881; on the same day 1880 it was 469. The general health of the patients has been fairly good. There has been no epidemic or prevailing sickness of any kind; no serious accident; and no inquest has been found necessary.

The usual meetings of the Visitors have been held once a month, on which occasions both the Asylums have been inspected, and the Visitors have been thoroughly satisfied with the cleanli-

ness, quiet and good order prevailing throughout in both establishments. This can only be attributed to the constant and vigilant supervision of the Chief Medical Officer, guided by his long experience and great professional knowledge-aided too, as he is always the first to admit, and in which the Visitors entirely concur, by the very efficient and kindly attentive exertions of the two valuable Assistant Medical Officers, Mr. Gillespie and Mr. Peacock; the salary of the former who has been at Charminster nearly ten years, an unusual length of time for one in his position, has been raised from £180 to £200. The Matrons and head attendants, with those under them, have discharged their duties in a trustworthy and creditable manner-some exception must, perhaps, be made in regard to one or two of the ordinary male attendants; but the departure from duty was not such as to call for punishment. In the last annual report the office of Chaplain was mentioned as being vacant. It was shortly after filled by the appointment of the Rev. W. J. Kendle, whose testimonials were of a very high character, among them one from his old Schoolmaster at Sherborne, the Rev. Dr. Harper, and one from the Incumbent of a populous parish in the manufacturing districts, where he had laboured with acceptance for some time.

The Asylums were inspected on the 12th of September last, by two Commissioners in Lunacy. There is nothing in their minute requiring special reference from the Visitors, with the exception of their remarks on the night supervision of the epileptic patients. In pursuance of the urgent representations of the Commissioners, the epileptics on either side are now placed in adjoining dormitories and sleeping rooms, and two additional night attendants have been taken on whose sole business it is to pass frequently from one to another of these apartments during the night, besides which there are the hourly or more frequent visits of the regular night attendants—one on each side. The Commissioners are still of opinion that these arrangements are not satisfactory, but the Visitors think that the supervision carried out in this manner is quite as likely to be efficient and more for the comfort of the patients than if they were all brought into one large room fully lighted, with a stationary attendant always sitting in it. In a previous minute the Commissioners had animadverted on the absence of provision against Fire at Forston. This has been remedied by the purchase of a smaller Engine than the one provided before for the Charminster Asylum. The expense of both has been defrayed from the surplus fund. Some structural alterations have been made in the chief Asylum, by which alternative means of exit are provided for the patients who sleep in the large dormitories on the upper storeys on both sides; in case of Fire this may be found of much use.

The Maintenance Rate has been 1/2 per diem—the same as in the previous year.

The present state of	the Loan	n Ace	count is	£	s.	d.
Principal money bor	rowed			 41,000	0	0
Paid off				 34,400	0	0
Remai	ning due			 £6,600	0	0

The whole of this amount is due to the Police Superannuation Fund.

JOHN FLOYER,

Chairman.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

Dorset Asylums, Charminster and Forston, Sept. 12th, 1881.

N these Asylums are, to-day, 454 patients, and three others (whose names remain on the books), are absent on leave. In the Wards at Charminster are 142 males, 160 females; at Forston are 63 males, 89 females, all of whom we have seen, and to many we have spoken, with some we have freely talked. The general feeling of the patients is, as far as we can collect, satisfaction with their treatment here, and appeals for discharge were not more numerous than usual in County Asylums. There are 25 Abergavenny female paupers here for whom 14s. is the weekly charge for maintenance, per head, and at the same figure there are 11 male and 7 female paupers chargeable to Poole. Besides the pauper cases there are 14 men and 13 women of the private class: these pay from 10s. to 15s. each, per week. Since the Commissioners' last visit to this Asylum on the 28th February of last year, 69 males and 80 females have been admitted-10 of the latter were transfers from Abergavenny Asylum. Thirty-three male and 58 female patients have been discharged, 18 of the former and 32 of the latter sex were recovered. Two males and 10 females discharged were removed to Southampton Poor House, 11 males and 10 females were taken hence to Portsmouth Asylum. The deaths recorded are 32 in the male and 21 in the female The causes of death were natural, but two deaths division. were the subject of special correspondence with our Board, the patients (both men) having been found dead from suffocation in epileptic attacks. We are glad to report that the recurrence

of such, what we may almost call preventable, deaths is now somewhat less likely than it might have been, had not the better night supervision now introduced been arranged. On each side, there are now at Charminster (where are detained 23 male and 25 females epileptics) special dormitories with single rooms for that class of the insane. The arrangements cannot be described as perfect, but there are structural defects in the Asylum, which have to be taken into account in regard to continuous night supervision of any large number of patients. For the night accommodation of those suffering from fits, two floors communicating by a short staircase, are now set apart. On these floors (two on each side of the Asylum) are dormitories and single rooms, and they are patrolled through the night by a special attendant in each division, and near to them sits the general night attendant of the division, when not on his or her round of duty. The rooms are not lighted, as in other Asylums is the rule, but the attendant carries a lantern. Dr. Symes considers that this practice is better than lighting the There are also no tell-tale clocks in these dormitories. rooms. We do not consider these arrangements to be satisfactory, as they fail to provide for continuous night supervision. Something has indeed been done in that direction, but certainly not all At Forston there has been much, and at that is possible. Charminster some renovation of paint and papering in the Wards, and in both Asylums proper attention is given to cleanliness, ventilation, and comfort. Several single rooms and a gallery at Forston appears to have been improved since last visit by the substitution of boarded floor for tiles, and at Forston there is now a manual Fire Engine, and we understand, a drill of the Fire Brigade. The lighting by oil instead of by gas continues there. The Head Attendant at Forston is leaving, we are told that he has served 33 years and that he will have a pension of £45 per annum. The staff of attendants, male and female, is full, and having regard to the quiet character of the majority of the patients, it is perhaps numerically sufficient. The dietary is unaltered, and the complaints about food were few. We saw a very substantial dinner on table, hashed

meat, vegetables and beer. The clothing of the patients suggests no special remark beyond this, that the allowance of one shirt per week to the men for day and night wear is scarcely sufficient, we think, for reasonable cleanliness. In most Asylums two shirts weekly is the allowance. As to useful employment, the men's suits are still made outside--there being no tailor patients. The boots and shoes are made by patients' labour. The numbers employed on the land, in the shops, laundry, offices and wards, are nearly what they were at the last visit. For the amusement of the patients theatricals will be performed to-morrow, and there are occasional dances. We think that there is still rather a deficiency of books and papers in the Wards. No one was to-day restrained or secluded, and the behaviour of the patients during inspection was orderly. The Medical Superintendent is clearly liked and respected by the patients, and he and his Assistants seem to know well every The Medical Records inform us that case in the Wards. 23 males and 22 females are under treatment for bodily ailments. Four men and five women only were to-day in bed. Restraint has been found necessary in the case of one patient only, a man, for seven nights for surgical reasons, and one woman during six weeks for the same reasons. Four men have been restrained on 17 occasions in all and for a total period of 204 hours, and seven women have been so treated on 21 occasions for an aggregate of 218 hours.

> CHARLES PALMER PHILLIPS, Commissioners ROBERT NAIRNE, in Lunacy.

ANNUAL REPORT

OF THE

MEDICAL SUPERINTENDENT.

To the Chairman and Visitors of the Dorset County Asylums.

BEG to lay before you a short Report of the past year, with the usual Statistical Tables, and as you have in your own Annual Statement commented on almost every material point, there remains but little for me to remark upon.

On the 1st of January, 1881, there were resident in the two Asylums 469 patients, of whom 14 males and 14 females were non-paupers, and 198 males and 243 females were paupers, and of this latter class must be deducted 10 males and 7 females belonging to the town and county of Poole, and 24 females from Abergavenny, leaving the numbers belonging to our own county 188 males, 212 females; total, 400.

The admissions were of very much the same character as in years past; many were hopelessly incurable, many came only to be nursed till death, whilst others, not a few, were in such wretched and broken-down health as to require most careful and assiduous watching and feeding, to enable them to have a chance of recovery or alleviation of their mental condition. No less than thirteen were suffering from general paralysis and epilepsy, a class of cases always adding very greatly to our ordinary anxiety, without any hope of ultimate recovery.

The ages of those admitted were as follows:—20 were under 30 years of age, 20 between 30 and 40, 14 between 40 and 50, 18 between 50 and 60, 17 between 60 and 70, 2 between 70 and 80, and 1 was 85 years of age.

The Thirty-fifth Report of the Commissioners in Lunacy says "that it is an established fact that the legislation of 1874 has tended to encourage the removal of pauper lunatics from workhouses into asylums, and thus helping to swell the total admissions;" and yet "the ratio of yearly increase of the admission to the pauper population has been but slight, and not constant, showing that the large increase in the total number of the insane under care in asylums during the twelve years 1869 to 1880, to which the table refers (where the calculation is made), is mainly due to accumulation, and not to a greater annual production of insanity."

There can be no doubt that the pauper lunatics above referred to are, in the main, greatly benefitted by the removal; but whether ultimately it will tend to lessen the number of the recoveries of those supposed to be more legitimately the proper objects of an asylum, must remain to be proved. Of this there can be no doubt, that should the accumulation still go on, county asylums must be increased or enlarged. The whole subject as to the proper care and treatment of these semi-workhouse cases is one well worthy of serious and deep consideration —how best to provide for them at the smallest cost.

In every asylum there are many cases, harmless and comparatively easily managed, yet requiring supervision and care; and I believe that in many instances the relatives would gladly take them, care for them well, and make them contented and comfortable had they the means. If, therefore, the Government grant of 4s. could thus be appropriated, and supplemented by a little ordinary out-door relief from the various unions, it would doubtless tend to relieve the pressure now felt in many asylums, and stave off, for a time at least, the necessity of more buildings.

The number of discharges has been higher than usual. The recoveries being rather over 40 per cent. on the number admitted—and deducting those patients not belonging to our County, who were Chronic cases of long duration, the per centage would be 46.

The deaths too have been higher than for several years past, being 8 per cent. on the daily average number resident, yet this is about 2 per cent. below the general rate for County Asylums. For the last thirty-six years our average death rate has been not quite seven. "According to the Commissioners' Blue Book, published in August, the mortality of the year was only 9.50, and it is worth notice that so low a death rate (for both sexes together) has never been shown in their tables, which date back to 1859."

The ages of those who died here were 8 under 40 years, 6 from 40 to 50, 5 from 50 to 60, 9 between 60 and 70, 8 between 70 and 80, and 1 was 85. One women aged 65 had been resident here over thirty years! a proof that living in an Asylum does not necessarily shorten life.

The general work and labour of the year, and its various amusements, and occupations, vary so slightly as to give little to comment or remark upon. I must not omit thanking the Proprietors of the Sherborne Journal, Dorset County Chronicle, Dorset Express and Telegram, Poole Herald, and the Yeovil Gazette, for still regularly sending a copy of their publications gratuitously as for many years past; they are always a great source of amusement to our inmates.

The Rev. W. J. Kendle was elected Chaplain in January last, and has now been on duty for a year,—with sincere pleasure I record the comfort and satisfaction with which his ministrations are received—his report is appended.

The changes amongst our Officers, Attendants, Servants, &c., have been few and most immaterial—and therefore as in my last report I expressed a hope "that at the close of the next year, I may be able to rejoice with the same good friends around me," so it has been ordered, and it is with grateful appreciation of all the kindness they still show me, and the help they invariably give I now record the fact.

Before concluding I cannot refrain from expressing my great sorrow in having lost from the Committee of Visitors the Rev. C. W. Bingham. I have had the great pleasure of his friendship for 39 years, and the many acts of kindness shown and in several instances the solid and disinterested advice most generously given, compel me to offer this slight tribute of affectionate respect and esteem.

Without the constant and continued counsel always received from you, and the great kindness, and consideration ever shown me, it would be impossible to carry on the necessary work and labour of the Asylums, I would beg therefore to again tender you most sincerely my gratitude and thanks, and with much respect, remain,

Your faithful and obliged servant,

J. GUSTAVUS SYMES,

Medical Superintendent.

THE CHAPLAIN'S REPORT.

To the Chairman and Committee of Visitors of the Dorset County Asylums, at Charminster and Forston.

GENTLEMEN,

I have the honour to submit my first Annual Report of the Chaplain's department for the year 1881.

Services.—The Chapel Services have been regularly conducted, viz.: Two on Sundays, and two on Week-days, besides the usual Services on Christmas Day, Good Friday, and Ascension Day; and daily Morning Prayer at 8.35. On a Saint's Day I have had a shortened Service for the day (at Forston) at 8.35. a.m.

The average number of Patients attending the Services has been :---

	Sunday.	Wednesday.
At Charminster, about	м. F. 63 43	м. F. 63 43
	Sunday.	Thursday.
At Forston, about	$\frac{1}{20}$ 15	19 15
At Forston, (daily) about		M. F. 20 15

The behaviour of the Patients at both Asylums during Divine Service has been admirable. The north wall of the Chapel, at Charminster, has been decorated with texts—a great improvement.

Holy Communion.—The Holy Communion has been celebrated 14 times during the past year, including a celebration at Forston on Christmas Day, at 8.45 a.m., and at Charminster, at 11.45 a.m.

uring the year ,,	there have be ,,	en at	Char Forst	minster	rations. 7 7	Com	nunican 100 61
				Total	14 £	8.	161 <i>d</i> .
Offertory at	Charminster				3	7	6
"	Forston				2	4	8
				Total	5	12	2

In future, there will be—with your leave—a celebration at each Asylum, once a month.

Shortly after coming into residence, in March last, I found that Church principles were, I regret to say, at a very low ebb; the natural result being a very small attendance at the Holy Communion. I sincerely hope that such a state of things will be remedied before long.

Hymn Book.—Considering the few musical advantages possessed by the Attendants and Patients, the singing at both Asylums has been fair; but I would suggest that the present Hymn Book be changed for one of the *recognised* Church Hymn Books. The change to a carefully arranged Book, besides making the Services more hearty and attractive, would be, on account of its sound Church Teaching, a great spiritual benefit to all.

Harvest Festival. -- A special thanksgiving Service was held at Charminster on Sunday evening, October 23rd; and at Forston on Sunday evening, October 30th, when special Psalms and Lessons were read, suitable Sermons preached, and Harvest Hymns sung. I hope that another year we may see the Chapels decorated, and special preachers invited.

Burials.—There have been, during the past year, 18 Funerals at the Asylum Cemetery. The reverent demeanour of the Attendants on these occasions deserves special mention.

Library.—Fifty new Books to the value of $\pounds 5$, have been kindly granted by the Committee during the past year, and seem to give general satisfaction. Tracts on the Festivals, by the Bishop of Bedford (Dr. Walsham How), have been distributed at the special seasons.

Visitation.—I have visited the Wards at stated times, as well as on other occasions, and have always been treated by everyone with courtesy and respect. The Attendants and Patients were invariably most attentive, and seemed pleased with any instruction imparted to them.

I cannot conclude without thanking all those who have supported me in my efforts to make the Services, at both Asylums, worthy of the Church of God.

I have the honour to remain,

Gentlemen,

Faithfully yours,

WILLIAM JAMES KENDLE, M.A.

Christmas Day, 1881.

Forston,

Chaplain.

DIETARY.

- 0----

BREAKFAST.

MALES.—60zs. bread, 1 quart gruel—daily. FEMALES.—50zs. bread, 1¹/₂ pint gruel—daily.

SUPPER.

MALES.--Sozs. bread, 2ozs. cheese, or $\frac{1}{2}$ oz. butter; beer, $\frac{1}{2}$ pint; or 1 pint tea or coffee—daily.

FEMALES.—60zs. bread, 20zs. cheese, or $\frac{1}{2}$ oz. butter; 1 pint tea or coffee—daily.

DINNER.

SUNDAY.—16 to 18ozs. suet pudding, with treacle sauce, and the addition of fruit in summer, and dried fruit in winter— Males and Females.

MONDAY.—302S. meat, vegetables not less than 11b.—Males and Females.

TUESDAY.-50zs. meat, vegetables as on Monday.

WEDNESDAY.—2 pints soup, 20zs. meat, 50zs. bread—Males. $1\frac{1}{2}$ pint soup, 40zs. bread—Females.

THURSDAY. — Meat pie, 12ozs.—Males; 10ozs. — Females. Vegetables as on Monday.

FRIDAY.--- 5ozs. meat, vegetables as on Monday.

SATURDAY .- As on Monday.

Half-pint of ale daily for dinner, except on Wednesday, both Males and Females.

Women working in laundry have tea and bread and butter twice a day extra on three washing days, and once a day on three ironing days; also bread and cheese and $\frac{1}{2}$ pint of ale for lunch.

Women scrubbing in wards have bread and cheese daily for lunch, with $\frac{1}{2}$ pint of ale. Men the same.

Men working in the shops or on the farm have $\frac{1}{2}$ pint ale extra at eleven and four o'clock.

Sick Diet as considered necessary by the Medical Superintendent.

Tobacco and Snuff distributed as directed.

Attendants and Nurses are all allowed 7lb. bread, $\frac{1}{2}$ lb. butter, $2\frac{1}{2}$ ozs. tea, and 8ozs. sugar weekly—in addition they dine in the Servants' Hall, without restriction as to quantity of meat, vegetables, &c.; and for supper bread and cheese, *ad libitum*. Males—2 pints ale. Females—1 pint daily.

N.B.—"All meat is weighed after being cooked, and free from bone."

The Milk Gruel is made with the best oatmeal and milk. Meat Pie contains 3ozs. of meat without bone. Soup is made from liquor of boiled meat, thickened with Pearl Barley, Rice, Pea Meal, to which are added Vegetables, Herbs, &c. Fish for Dinner once a fortnight.
