REPORT

OF

THE VISITING JUSTICES.

The following Report of the Visitors of the Lunatic Asylum at Wotton, in and for the County of Gloucester, made in accordance with the provisions of the "Lunatic Asylums Act, 1853," was laid before the Epiphany Court of Quarter Sessions, held at Gloucester, for the County of Gloucester :—

THE Visitors of the County Lunatic Asylum are happy to be enabled to make to the Court of Quarter Sessions, a favourable report of that Institution.

The encouraging features noticed in the two last annual reports of a pause in the increase of pauper lunatics in this county which had been for some previous years alarmingly rapid, have continued. The number of inmates of the Asylum, though slightly in advance of the previous year, is still below that of December, 1863, and the number of admissions has diminished.

The admissions of the year have been 75 males and 64 females, total, 139.

Discharged cured	...	...	...	57
Relieved or removed by friends	...	...	...	16
Unimproved	...	...	...	2
Escaped	...	...	...	2
Died	...	...	...	57
On trial	...	...	...	2

Total 136

leaving an excess over the admissions of three December 31st, 1866, and in the house, 593; numbers having been at the close of

1865	...	...	590
1864	...	...	598
1863	...	...	598
1862	...	...	566

The character of the cases admitted has been, however, of the most unfavourable description, not more than one third presenting any reasonable prospect of cure, or material amendment. In fact, the Institution has never contained a larger proportion of hopeless, imbecile, and decrepid cases. While this is a most

discouraging feature as to cure, it may perhaps be held to indicate that the spread of lunacy in the county is not extending so rapidly as when a large proportion of more youthful and recent cases were seeking admission, though the treatment of these offered the prospect of much more favourable results. The proportions of re-admissions has been exceptionally large, amounting to about a quarter of the whole number of admissions. This result was in some measure to be expected from the greater facility which has of late been afforded to friends who were able and willing to take care of patients, to remove to their homes many such as were not dangerous, but who were neither recovered nor likely to improve materially. The Visitors would be very unwilling upon this account to place much greater restrictions upon a practice which has afforded much satisfaction to the friends, and relief to the Institution without very serious injury to the patients themselves, but in the class of cases which experience now shows will speedily return in much worse condition, it may be desirable for the future to be less compliant. The deaths have been fewer than in ordinary years, only 57, which is reasonable, considering the large number of old and feeble cases under treatment.

The health of the establishment has been generally good, no serious accident has occurred, nor epidemic, except a slight outbreak of small-pox in the spring, which did not extend beyond four or five cases, and was soon subdued.

A fire occurred in the Drying Room from a flue becoming over-heated, which destroyed a quantity of linen and wearing apparel, and might have extended to the rest of the building, had it not been rapidly extinguished by a volume of water thrown upon it by the hose hastily attached to one of the hydrants near at hand, proving thus early the practical value and efficiency of these appliances, which have been lately provided all round the buildings.

No new building has been erected during the past year, and the alterations and repairs have been of a trifling nature. But the Visitors consider that the provision of some further accommodation in case of the outbreak of an epidemic, or any sudden influx of patients, cannot with prudence be much longer delayed. They expect, therefore, to ask the consent of the Court to some kind of extension at an early period. They have already found it advisable to close their doors to the reception of patients transferred from other asylums, considering that this class of cases, being already provided for, may well be excluded, to make room for recent and urgent cases, which might suffer if the very small margin which remains available was much further infringed upon.

The Visitors entered at Michaelmas into possession of 15 acres of land, adjoining the new male wing of the Asylum, purchased the previous year, which is likely to prove a valuable acquisition.

They are required by the terms of the contract to erect a high wall, to form a boundary along that portion which abuts on the mansion and gardens of the vendors. It may be found advisable to extend this wall further in the direction of Gloucester as a boundary fence.

The state of the brook into which the drain which receives the sewage from the Asylum and many other houses, opens in the suburbs of Gloucester, having been complained of, the Visitors have entered into an agreement with the Local Board of Health to take the drain in question into the new main sewer for the district of Kingsholme, and to make the connections at their own cost, the County paying a rent of £15 a-year to the Board as long as the drainage is kept in an effective state.

The usual modes of employing the largest practicable number of the patients have been in full operation during the year, the schools have been well attended by both sexes, and the customary number of musical and other entertainments have been given to the patients, and the whole has been kept in a progressive state.

J. CURTIS HAYWARD, CHAIRMAN.

REPORT OF THE COMMISSIONERS IN LUNACY.

Gloucester County Asylum,

November 1st, 1866.

Since this Asylum was visited by the Commissioners between eighteen and nineteen months ago, on the 13th of April in last year, there have been 232 admissions, 149 discharges, and 86 deaths: the proportions of male and female patients being, under the first head 113 and 119, under the second 64 and 85, and under the third 50 and 36. There were 113 recoveries among the discharges. Among the deaths there was nothing unusual, and no inquest has been found necessary: the principal causes having been general palsy and epilepsy; diseases of the heart, lungs, and brain; exhaustion after mania, and senile decay. Small-pox broke out in one ward some little time ago, but the cases were promptly removed into an upper ward; and, notwithstanding the absence of any means of thorough isolation here, the disease being of a mild form, did not extend beyond the first seven patients attacked. As many as 95, 35 males and 60 females, are entered as under treatment to-day, and there appears to be some serious cases; but the majority are for slight disorders. There is an unusual number of old and troublesome patients, among the women especially.

The number now on the books are 608, of whom 9 are absent on leave; the inmates of the male division whom we have seen to-day being 289, and of the female division 310. Upon the whole they were in a satisfactory state. The exceptions were chiefly in the lower wards on the female side, especially Nos. 14 and 15. Something has been done since the last visit to make these wards more comfortable, but a great deal more remains to do; the day rooms are still extremely defective, "Lower 14" particularly so; the clothing of the inmates should be better, and better attended to, and we should recommend the experiment of distributing some of the cases over other parts of the house. The corresponding wards on the male side are by no means so marked a contrast to the general character of the rest of the Asylum. The efforts to render them more cheerful in spite of their structural defects, have been much more successful; and no excitement was observable in any part of this division. With the exceptions named, and a few in the other wards, the clothing on both sides was very good; and generally on the male side we thought the supply of books, and other means of indoor amusement, better than usual.

In some matters named at the last visit, and others bearing on the comforts of the patients, additions and improvements have been made since that date. What was then in progress in corridors 4 and 14 has been completed; the stone floors having been replaced by wooden ones, and the sides

painted. A new skittle-ground has been built. A theatre has been erected in the ball-room, where a performance (of which the dress rehearsal takes place to night) will be given early next week. Much new matting and carpeting has been laid in various places; the latter with very good effect in some of the single sleeping rooms. Some of the female wards have been supplied with aviaries and flower stands. In several of the airing courts trees have been planted, and there is a new terrace in No. 8. Earthenware utensils in place of gutta percha are a change for the better; and by the substitution of ordinary mugs for tin cans, and steel knives and forks for those of bone in use in some of the wards, dinner is everywhere more comfortably served. Such as we saw to-day consisted of beef and mutton, with vegetables and beer, of excellent quality.

Another change since the last visit cannot but contribute to the still more efficient performance of the duties, which in difficult circumstances here, the medical superintendent has hitherto discharged with great zeal and ability. A permanent second assistant officer has been appointed; and by the relief thus afforded to the principal medical assistant, we were glad to find to-day that all the numerous blanks in the case book, observed upon in the last entry, have been carefully and fully entered up by Mr. Simpson. With satisfaction we observed also that the wages of the female attendants have been increased, beginning now at £12 instead of £9 a-year.

The number of patients regularly occupied are 382, or 175 men and 207 women: 108 of the former being engaged upon the farm and garden, or in the workshops, and 125 of the latter in needle-work, or in the laundry and kitchen.

The size of the chapel restricts the number of those attending the religious services to 230. We were very glad to find that the schools in both divisions still continued; forty-one persons of both sexes attending them.

The provisions of out-door and associated amusements, during the past year, judging by the record duly kept, has been liberal, as many as 350 at a time taking part in them; and in connection with this subject should be mentioned the excellence of the musical band, which is formed of attendants, assisted by one patient, and for which several new instruments have been lately purchased.

The same arrangements as formerly are made for exercise beyond the Asylum grounds; and the praiseworthy practice is continued and encouraged of permitting patients capable of the enjoyment of such privileges, to pay visits of a few days or weeks to their relatives: as many as 100 having during the last twelve months paid visits to friends. In the same interval also, between £30 and £40 have been given from the Adelaide Fund to patients discharged on trial: and it would be very desirable, we think, to increase such allowances to convalescent patients, under the authority given by the statute.

Two women were secluded to-day ; and the entire number of instances of seclusion since the last visit, all of them for brief periods, appears to have been about 100, and applies to nine male, and 19 female patients.

Among the improvements recently made we omitted to mention the supply of indicators to the baths, and in some of the wards a better supply of hot water by means of new tanks ; but we avail ourselves of this omission very strongly to recommend such change in the bathing arrangements as will admit of fewer than four patients being placed in the same water. We repeat the suggestion also that the body-linen of the patients should be changed twice instead of once a week.

In conclusion, we direct attention to the fact, that, there being now 608 patients on the books, it could only be by complete occupation of every available corner of space that room for seventeen more beds could be obtained.

(Signed)

JOHN FORSTER,	} Commissioners in
ROBERT NAIRNE.
