REPORT
OF
THE VISITING JUSTICES.

The following Report of the Visitors of the Lunatic Asylum at Wotton, in and for the County of Gloucester, made in accordance with the provisions of the Lunatic Asylums' Act, 1853, was laid before the Epiphany Court of Quarter Sessions, held at Gloucester, for the County of Gloucester:—

The Visitors of the County Lunatic Asylum report, that it contains at this time 517 patients, of whom 230 males and 265 females are paupers belonging to this county, and 13 males and 9 females, private patients, or paupers belonging to other counties or boroughs not contributing to the county rate.

The number of patients at the close of 1859 was 489; and during the present year there have been 123 admitted, of whom 7 males and 23 females have been discharged recovered, 4 males and 4 females discharged relieved, and 1 female discharged not relieved.

The state of those admitted in the present year has been of the most unfavourable character; 72 of them having been

hopelessly incurable ; and, of the remainder, some affording the chance of amendment only, with no prospect of ultimate recovery.

The Visitors feel compelled to revert to the continued practice of not sending patients at the commencement of their attack, as forming the most discouraging feature in the present position of the County Asylum. It had been reasonably anticipated that when the means were afforded to parishes of sending their lunatics for treatment immediately upon decided symptoms of the malady shewing themselves, such patients would have been sent at once to the Asylum instead of being held back, as is now too often the case until the last moment, when a long series of neglect or mismanagement has rendered them hopeless chronic lunatics, who must be detained for life. For many years there was some excuse for such a course of proceeding, in the difficulty which existed in procuring admission to well regulated institutions ; but since this difficulty has been removed, the retaining of lunatics in the incipient stages of insanity is most unjustifiable, as entailing a melancholy and quite unnecessary amount of suffering on unhappy fellow-creatures, and most unwise, as creating a permanent, instead of, probably, a very temporary charge on parishes.

The patients remaining in the Asylum, at the date of the last report, deemed curable, were only 20, and there have been 51 admissions of such cases during the year, of whom 30 have been discharged recovered : and 8 discharged materially relieved ; 28 also are still in the Asylum, whose cases afford some prospect of cure or improvement.

Notwithstanding the feeble condition of a large number of the inmates, very little sickness has prevailed, and the deaths

in the year have been few, viz.—27 males and 29 females, making a total of 56, being a per centage of 9 only on the whole number treated—a low rate considering that more than 30 of these deaths have been consequent on general paralysis, epilepsy, and old age. Several patients have also been admitted in an extremely debilitated condition, 5 of whom survived only a few days. Several patients have been admitted with strong suicidal propensities, some bearing on their persons the marks of self-inflicted wounds, but no serious accident of any kind has occurred during the year, which must reflect credit on the care and vigilance of the Asylum staff.

A large proportion of the male patients have been employed in out-of-door occupations; and, besides the ordinary cultivation of the farm and garden, have performed a great amount of work in laying out the airing yards and clearing them of immense accumulations of soil and debris, left from the late building operations.

The airing grounds now approach completion, but still a good deal remains to be done in clearing and laying out the grounds around them, and removing old walls and superseded buildings; after which some suitable arrangement for farm buildings must be made.

The cottage, which with a portion of land was purchased a few years ago, has this year been economically, though comfortably and cheerfully fitted up, and now accommodates eight of the quieter patients, who reside there with an attendant.

The occupation of the field of pasture land referred to in our last report, as agreed to be rented, has proved a great convenience, and afforded increased means for out-of-door recreation to the patients.

The principal want of the Institution still continues to be

a good supply of water, which the visitors trust may be afforded by the Gloucester Board of Health making suitable arrangements for them as soon as the works at Witcomb are in an effective state.

The usual out-of-door and home amusements have been continued to the patients as far as the weather and circumstances have permitted: and the system of granting short periods of absence, which has now been tried for three years, has been continued, it is believed, with good effect to the patients, and satisfaction to their friends.

Two of the Commissioners in Lunacy made a lengthened visit to the Asylum in the month of January, and closed their report with the following remarks:—

“We have to record our satisfaction at the general excellent condition of the Asylum, and the cheerful and contented aspect of the patients, indicating, as they do, the judicious and careful management of the Superintendent.”

J. CURTIS HAYWARD, *Chairman.*
