REPORT

OF

THE VISITING JUSTICES.

The following Report of the Visitors of the Lunatic Asylum at Wotton, in and for the County of Gloucester, made in accordance with the provisions of the "Lunatic Asylums Act, 1853," was laid before the Epiphany Court of Quarter Sessions, held at Gloucester, for the County of Gloucester:—

THE Visitors, in accordance with the provisions of the "Lunatic Asylums Act," report that the County Asylum contained, on the 31st of December last, 598 patients, of whom 295 were males, and 303 females. The numbers at the close of 1863 were 595, showing an increase of 3 only during the year. Thus far, therefore, the event has not realized the fears expressed by the Visitors, in their last Report, as to the prospect of the Asylum becoming almost immediately overcrowded with patients, obviously threatened by the number of inmates having increased, during the two previous years, at the rate of about 40 per year. It was at that time surmised that the late large increase might be attributed, in great measure, to the alteration of the law, which cast the charge of maintaining pauper Lunatics upon the Unions, instead of the Parishes to which they belong, who had been theretofore chargeable, and that the effect might not be continuous. The small addition to the numbers in the past year has not, however, arisen from any falling off in the admissions, which have amounted to 155, as against 151 in 1863; but the discharges have

increased to 155, against 108 in the previous year, thus nearly equalling the admissions. The cures amounted to no less than 77, and 11 more were discharged relieved; 4 were removed by their friends unrelieved; and 63 died. The result is highly satisfactory as to the treatment of patients, as the class of admissions, generally, were not of a promising character—indeed some cases were brought to the Asylum in such impaired health, and so weak and disabled, as to require rather the medical and surgical treatment of an Hospital than the care of a Lunatic Asylum.

As so large a proportion of cures cannot be calculated upon, it is feared that a continuous increase of patients must be prepared for, in case the admissions keep up to the present amount. The Visitors, however, were glad to avail themselves of the respite afforded by the numbers remaining for a time stationary, to postpone the taking immediate steps towards the provision of an additional Asylum, as contemplated in their last Report. The Visitors, therefore, believe that the increase of the next year or two may be met by some slight additions to the existing building, or, more probably, in the manner recommended by the Commissioners, in their Report made after visiting the Asylum on June 18th, 1861, wherein they say—“The cottage, which at our last visit had not been used, is now inhabited by 12 of the men who are habitually employed on the land, and all of them appear thoroughly to appreciate the privileges they enjoy. Should additional accommodation be hereafter required, it seems to us it would be best provided by the erection of some other cottages, much upon the same plan.” With the view to the possibility of adopting such recommendation, and for the general convenience and advantage of the Institution, the Visitors have entered into treaty for the purchase of 16 acres of land, immediately adjoining the last built male wing of the Asylum, which, if successful, will be brought before the next Court of Quarter Sessions, for its sanction. If, however, the number of Lunatics should again increase after the ratio of the years 1862 and 1863, the County must be prepared to provide an additional Asylum at no distant day. Time, however, will have been gained, and in the interim some more economical means of providing for quiet and chronic Lunatics may possibly be introduced.

The health of the patients has been, generally, very good; no epidemic or accident of a serious nature has occurred during the year.

The deaths have been 63, slightly exceeding those of last year, but still not a high average, being little more than 8 per cent. of the cases treated.

No large works have been carried on this year at the Asylum, but several slight improvements have been made. A new service of water pipes and hydrants, commenced last year, have been laid down, so as to command all the principal buildings in case of fire. About 15 acres of additional land have been rented since Michaelmas, which, being principally pasture, it is hoped will afford the means of keeping cows enough to supply the Institution with milk, now an expensive article of consumption. A large quantity of pork and bacon has been supplied by pigs fed on the farm; and an increased number of patients employed on the land.

Within the Institution much has been done for the employment and amusement of the inmates. A school has been opened on the male side, in which nearly 20 patients are daily instructed, and a patient often acts as a teacher. The tailors' and shoemakers' shops have been enlarged and refitted, and some patients have been taught these trades who were previously unacquainted with such work. A People's printing press has been added to the stock, by which a great portion of the printing required is done in the building. A band, consisting of 14 musicians, and comprising attendants and patients, has been organized, who practice two or three times a week, under the leading and direction of the Superintendent. They lend their assistance in amusing the patients at the Winter Evening Recreations, which take place at least twice a week, and may be considered as forming quite a part of the Asylum treatment.

Mr. F. Wilton, who had held the office of Assistant Medical Officer for nine years, much to the satisfaction of the Visitors and Superintendents, resigned in October, in consequence of his appointment as Medical Superintendent of the New Welsh Counties Asylum at Caermarthen. Mr. Simpson, late Assistant at the Kent County Asylum, has been selected to succeed him. Mr. J. Jones also resigned his office of Auditor, in consequence of his removal from Gloucester, and Mr. T. H. Pike has been appointed his successor.

The Lunacy Commissioners visited the Asylum on the 16th May, and made the following Report, which was read to the Trinity Court of County Quarter Sessions.

Gloucester County Asylum, 16th May, 1864.

The following tabular statement shows the changes in the patients since the 27th February, 1863, the date of the last visit, and their present numbers :

	Males.	Females.	Total.
Admitted	91	85	176
Discharged	36	34	70
" of whom recovered...	25	25	50
Died (all from ordinary causes)...	42	34	76
Present Numbers :			
Private	3	4	7
Pauper	281	310	591
Total	284	314	598

Of the pauper patients 9 (2 men and 7 women) were absent on trial at the time of our visit, and 2 men were out for the day. The assigned causes of death since the last visit call for no special observation. There does not appear to have been any disorder of an epidemic character. It will be seen, however, that the mortality has been at the rate of about 12 per cent. upon the average number resident, whereas, during the interval between the last and previous visits, it was only about 7 per cent. The ordinary weekly charge for pauper patients is the same as last reported—viz., 9s. ; and that for out-county and private patients 12s. We are glad to report, as heretofore, the quiet and orderly demeanour of the patients generally, and their satisfactory personal condition as to clothing and otherwise. Two patients only, both in the female division, and cases of acute mania, with destructive propensities, wore dresses of a specially strong, but not unsightly, material. The instances of seclusion since the last visit appear to have been rare. The present sanitary state of the Asylum is satisfactory. The patients last registered as under medical treatment were 77 in number—viz., 30 in the male, and 47 in the female division. The attendance of Divine service on Sundays averages 220—viz., 120 males and 100 female patients, the greatest number which the present chapel will accommodate. Of the male patients, from 60 to 70 work upon the land, and about 35 as artizans. All the clothes and a large proportion of the shoes of the patients are made in the Asylum. In reference to this subject, we had satisfaction in learning that many of the male patients are, by instruction, enabled to work

at handicraft trades. Of the female patients, about 150 are generally occupied at needlework and knitting, &c., and from 40 to 50 in the laundry department. Twelve of the male patients continue to reside in the cottage, which has been materially improved in comfort and aspect, amongst other things by the removal of the division wall, and formation into one, of the two lower day-rooms, and the papering, painting, and decoration of the large room so formed, and of the dormitories above. We found the Asylum, in its several departments, in a creditable state. The rooms and beds throughout were clean and in proper order, and the ventilation generally was good. We noticed especially the improved condition and aspect of the lower wards, No. 4 on the male side, and No. 14 on the female. The corridors, at present flagged, are about to be boarded. The comfort of the inmates of the wards last referred to (those of the worst class of patients) has also been materially promoted by the addition to each of two small rooms, previously occupied by attendants, which have been useful in respect to classification and employment.

Amongst other material improvements, we have to report the following:—1. The erection of a conservatory, for the propagation of flowering and other plants for the wards. 2. The general repair of the laundry yard, and fitting up of the new portion of the drying-ground with oak posts. 3. A new air shaft to the boiling-house, and an opening in the external wall, for the admission of a new boiler, which has been ordered, and convenient for access for repairs. 4. The construction of a lavatory and urinal in connection with the tailors' and shoemakers' shops. 5. Direct hot water supply to the male wards, Nos. 7, 8 and 15. 6. A good privy and urinal in the airing court of Nos. 7 and 8 male wards. 7. The appropriation of a room in the male crescent as a daily school-room for patients of that sex, and also for instruction of attendants. 8. The removal of the *post mortem* room in the male crescent to the dead-house; and the addition of a good room, suitably furnished, as a reception-room for the friends of deceased patients. 9. Hand rails are in course of being fixed to all staircases requiring them. The gas pipes and burners, throughout, are in progress of being put in a proper state of repair, having been found defective. Blinds are wanting to the kitchen windows.

We have learnt with satisfaction that the establishment of attendants has been put on an improved footing, as to the scales and

periodical advance of wages, and otherwise. The head attendants, male and female respectively, receive £42 and £20 per annum. The ordinary male attendants commence at £24 wages, with an annual rise of £1 up to £27. Every attendant in charge of a ward receives at once £27, and advances by £1 annually to £32. The ordinary female attendants commence at £9, and advance £1 annually to £12. Every nurse in charge of a ward receives at once £12, and rises, by an annual advance of £1, to £17.

Entertainments are very frequent. They were given three times a week during the winter months. We may mention, as an arrangement conducing materially to the comfort of the patients, that, during the past winter, fires were lighted daily, from 2 to 8 p.m., in all the upper corridors and dormitories, altogether between 30 and 40 fires. In reference to accommodation, we have to report that the vacant beds, in the male and female divisions respectively, are, at present, 16 and 26 in number. As respects the female division, Mr. Toller is of opinion that the day-room accommodation is not more than sufficient for the actual number of patients. The *ordinary daily* exercise of the patients is confined to their airing courts; but parties of about 40 men and 35 women, are taken out for country walks twice a week, and many patients, in special cases, with attendants daily, including, on the male side, Sundays. We suggest for the consideration of the Visitors the construction of a walk round the boundary of the estate, which is found of great advantage in other large Asylums.

The land, the property of the Asylum, is, as we are informed, 17½ acres in extent, and 30 acres are rented by the year. As respects 5 acres of the latter, the only pasture land, we are given to understand that notice to quit has been received. Mr. Toller stated to us, as the result of his experience, that he could, by the labour of the male patients, cultivate twice as much land as at present.

We have to draw attention to the 44th section of the "Lunacy Act Amendment Act," 1862, (25 & 26 Vict., c. 111) which, although, by an error, the marginal note mentions only "single patients," requires notices to the coroner of the deaths of all patients in *Asylums*, as in hospitals and licensed houses.
