OF

The Committee of Visitors

OF THE

County Lunatic Asylum,

AT THE

EPIPHANY SESSIONS, 1864.

Southampton, to wit.—At the General Quarter Sessions of the Peace of Our Sovereign Lady the Queen, holden at the CASTLE OF WINCHESTER, in and for the said COUNTY OF SOUTHAMPTON, on Monday, in the first Week after the twenty-eighth day of December, 1863, to wit, the fourth day of January, in the twenty-seventh year of the Reign of our Sovereign Lady Victoria, by the Grace of God of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, and in the year of our Lord One Thousand Eight Hundred and Sixty-four, before THE RIGHT HONORABLE CHARLES VISCOUNT EVERSLEY, Chairman, THE RIGHT HONORABLE HENRY HOWARD MOLYNEUX EARL OF CARNARVON, SIR WILLIAM HEATHCOTE, BARONET, and others their Fellows, Justices of our Lady the Queen, assigned to keep the Peace of our said Lady the Queen, in the County aforesaid: and also to hear and determine divers Felonies, Trespasses, and other Misdeeds, committed in the same County:—

By the Court.

ORDERED, That the Report of the Committee of Visitors of the County Lunatic Asylum, presented to this Court, be printed, as soon as the Receipt and Expenditure Accounts are duly received, and that Copies be transmitted to the several acting Justices, and to the Boards of Guardians of the several Unions within the County.

FARR.

R E P O R T .

THE Committee of Visitors of the County Lunatic Asylum in presenting their annual statement are enabled to report favourably of the Institution under their superintendence during the past year.

At the last Meeting of Visitors on the 26th December, the number of Patients in the Asylum was 549: namely, 250 Males and 299 Females, being a reduction of 34, as compared with the previous year. This reduction has been principally caused by the removal of a portion of the Patients belonging to the Borough of Portsmouth; for it appears that the daily average number during the past year is in excess of that of the previous year.

Number of
Patients

The deaths during the year have amounted to 67, or about 11 per cent. on the daily average, and the number of Patients discharged as cured to 66.

Deaths and
Discharges

In the Report of last year, your Committee informed the Court that, in consequence of the crowded state of the Asylum, they had given notice to the Authorities of Portsmouth of their intention to determine, at Michaelmas last, the existing contract for the reception of Pauper Lunatics of that Borough into the County Asylum at Knowle.

Termination of
Contract with
Portsmouth

Before the termination of the contract, your Committee took an opportunity of expressing to the Board of Guardians

of the Portsea Island Union their willingness to consult, as far as practicable, the convenience of the Authorities, and to keep in the Asylum as many Borough Patients as could conveniently be received, after retaining a sufficient number of empty beds to meet the requirements of the County. After conferring with their Medical Superintendent, your Committee determined that 80 Pauper Lunatics should be retained in the Asylum, and, after some correspondence on the subject, the Guardians of Portsea undertook to remove all their Patients beyond the prescribed number, and 29 Borough Lunatics have now been placed, with the consent of the Commissioners in Lunacy, in the Fisherton Asylum, near Salisbury.

If required, a still larger reduction can be made in the number of these Borough Patients; but your Committee consider that, for the next two or three years at least, such further diminution will not be necessary.

Alterations and
Additions

During the past year, the alterations and additions to the Asylum have been but trifling.

A Folding-room has been added to the Laundry, and an addition has been made in the Baths and Closets of several of the Wards, at a total expense of about £280; but your Committee consider that during the next Summer a considerable alteration will be required in the Store-rooms and Domestic Offices, to which no additions have ever been made, notwithstanding the great increase in the number of inmates and of the Wards appropriated for their use.

Health of
Patients

Although the health of the Patients has been generally good, your Committee regret to report that in the month of

May a recently admitted Patient was seized with small-pox, and although all possible precautions were taken by the Superintendent to prevent the spread of the disease, no fewer than 23 Male Patients were attacked, and in five cases the malady proved fatal.

One case of suicide, (the first since the opening of the Asylum,) has taken place; but no blame whatever appears to attach to the Attendants under whose care the Patient had been placed.

Your Committee regret to be unable to report favourably of all the Attendants of the Establishment. One of the female nurses was detected in fraudulently removing the property of the County, and the offence appeared to your Committee to be of too serious a character to be lightly passed over, and a prosecution was therefore instituted, and at the last Quarter Sessions the offender was found guilty, and sentenced to an imprisonment of eight months.

Your Committee have long felt the great evils arising from the admission into the County Asylum of Criminal Lunatics, several of whom do not belong to any Union in the County. Many of these Patients are violent and dangerous both to the Attendants and to the other inmates, and the Asylum does not afford the means for their separation from the other Lunatics, or even for their safe custody.

Criminal
Lunatics

At the present time there are no fewer than 18 Criminal Lunatics in the Asylum, of whom four are dangerous, and require increasing vigilance on the part of the Attendants. Your Committee would therefore rejoice to hear that steps

had been taken for the removal of this intolerable and increasing evil.

Accounts with
Bank of
England

The arrangements for transferring the Asylum accounts to the Bank of England were alluded to in the last Report, and in the opinion of your Committee the system has worked without inconvenience or difficulty.

Payment of
£1000 to
County
Treasurer

Having received from Portsmouth and from other places a considerable amount of arrears, your Committee have had the satisfaction of paying over to the County Treasurer the sum of £1000, to be applied towards the liquidation of the original County debt.

Receipts and
Payments

As far as can be now ascertained the receipts during the past year have amounted, exclusive of balances, to £14,188, and the expenditure to £14,212; in which latter amount is included the sum of £1000 paid over, as before mentioned, to the Treasurer of the County.

Resignation of
Matron

The Matron of the Asylum has given notice of her intention to resign her situation at Lady-day; but the Visitors have not yet taken steps for the election of a successor.

In conclusion, your Committee again desire to record their opinion of the continued activity and good management of Dr. Manley, in the discharge of his arduous duties as Superintendent of so large an Asylum.

HENRY CHOLMONDELEY,

Chairman.

WICKHAM,

December 26, 1863.

MY LORD AND GENTLEMEN,

On their recent visit of inspection the Commissioners in Lunacy, I am informed, concerned themselves particularly about the duties of the Chaplain, and the facilities afforded the Patients for their religious instruction and welfare.

Their remarks and suggestions, as embodied in their Report, will no doubt engage your serious consideration. I cannot however help thinking that the Commissioners were under some misapprehension as to the arrangements at present in force for the desired object, and did not fully comprehend the extent of their efficacy.

As I am presenting my Annual Report, it may be as well if I remark somewhat at large upon the existing state of things as connected with this subject.

First, with regard to the ordinary Sunday Services in the Chapel. They are well and regularly attended. The congregation comprises the Convalescents, and the more

intelligent, quiet, and orderly Patients from every Ward; and while the Chronic Cases form, what may be called, the permanent part of this congregation, there is a considerable fluctuating element, which is affected by the number of discharges, the admissions, and the rate of progress towards recovery of the inmates generally.

We must bear in mind that one great object hitherto aimed at and attained is, to cause attendance at Chapel to be regarded as a privilege, and not a mere routine duty; to cause the hours of service to be anticipated, not only as hours of religious worship and edification, but of real quiet also, undisturbed by distracting sights and sounds inseparable more or less from the various Wards.

The substance of the remark has often been repeated, but it will bear the repetition, that the atmosphere, so to speak, which surrounds these services, is one of serious, calm, and interested attention.

At the two short Services, held on alternate Sundays in a Ward on the Male and Female sides of the house, it is required that all attend—not from that particular Ward only, but from the others also, who may have to see the Chaplain—all to whom a longer Service would be injurious—together with those who, in consequence of being subject to very sudden fits, might seriously disturb the Chapel congregation.

In so large an Asylum there must be many beyond, it is to be feared, all hope of benefit from human instruction; but my belief is, that all in any degree capable of profiting

by my ministrations are, in one way or another, brought within their reach.

Should some change be thought desirable, whereby my usefulness might be increased, my experience of eight years and a half would lead me, with all proper deference, to suggest that it be in the way of visiting, still without detriment to the integrity of the Medical control. While however an earnest endeavour to soothe, comfort, and instruct the afflicted inmates of the Asylum ever brings with it its measure of reward, it will readily be believed that to minister thus closely to minds diseased, must constitute also the most trying part of a Chaplain's duties.

I am deeply thankful that my ministrations have been blessed to many. It is most cheering amid so much that is naturally depressing.

During a portion of the past year, the usual order of my duties was interrupted and changed. On the appearance of the small-pox, it was thought expedient that no Male Patient should come to Chapel. The subject was maturely weighed, and after a Sunday or two there was one full Service for all the Males who could assemble in the long dining room. We cannot but be thankful that so few were carried off by this fearful epidemic, and that after four months, we were permitted to meet altogether as usual on Sunday.

The Midsummer administration of the Holy Communion was of necessity postponed, so that there has been but three administrations, instead of four, during the year.

Since my last Report, I have been called upon to read the Burial Service fifty-four times at the Cemetery.

I may also remark that there seems a growing appetite among the Patients, which may be well indulged, for such useful publications as *The British Workmen*, &c. The introduction too of a new set of beautiful Hymn Tunes at our Services is adding much to their usual cheerfulness.

Thus far my observations have had reference necessarily to the afflicted Inmates of the Institution; but my interest of former years in its large class of responsible members is by no means diminished; and my earnest prayer is, that I may be the instrument of ever increasing good.

I remain,

My Lord and Gentlemen,

Your very faithful and obedient Servant,

G. H. MASON,

Chaplain.

The Lord Henry Cholmondeley,

Chairman of Committee,

Hants County Lunatic Asylum.

HANTS COUNTY ASYLUM,

26th December, 1863.

MY LORDS AND GENTLEMEN,

During the past year your Superintendent has had unusual anxiety in consequence of the prevalence of small-pox, which was epidemic in the Asylum for nearly four months. Without entering further than appears to him necessary to the explanation of the subject, into the medical history of the disease, he may report, that on the 2nd of May, a congenital imbecile, chargeable to the Basingstoke Union, was admitted, and that, on the 6th of the same month, the characteristic eruption of small-pox appeared upon him.

During the intervening period, in consequence of his excitement, he was isolated from all the other Patients, and after his malady was recognized, the most stringent precautions were taken to prevent his communicating the disease to others. The next person attacked was the House Porter, who asserted most positively that he had never seen the Basingstoke Patient; and after him a bedridden General Paralytic in the Infirmary took the disease, which in his case proved fatal. Whether this man had or had not been

previously vaccinated is uncertain, but it may be here stated, that in all the other instances in which the disease occurred, previous vaccination or inoculation had been performed. The disorder having now (May 23rd) assumed an epidemic form, and it being evident that its course could not with any probability be controlled, a portion of the Male Infirmary was partitioned off as a separate Ward, and into it all the Patients who were attacked with the malady were removed on its first manifestation. Subsequently the course the disease ran was most fitful, appearing sometimes on the inmate of a distant Ward, sometimes in a Patient in the Infirmary, and again even amongst the men employed on the farm, and occupying a detached part of the building.

For four months, as I have said, we were never free from the disease, and in that time 23 persons suffered from it. Of these five died: one of them a being General Paralytic, one of them a Demented person, and the other three Idiots; two of whom were also Epileptic.

It may be well imagined that under such a visitation the general routine of the Establishment was much interfered with, and a serious complication of matters arose from the circumstance, that just before the outbreak of the disease, the alterations connected with the increase of the closet accommodation in the Wards had been commenced.

The ordinary amusements of the Patients were necessarily omitted. Divine Service was performed in the Chapel only before the Female Patients; the walks beyond the boundary gates were discontinued, and as a consequence, there was among the Patients an unusual amount of excitement, whilst

there was at the same time, not only a sensation of depression about the place, but a lack of the cheering influences of our usual social gatherings, and of that frequent change of scene which the ordinary country walks, and the sea-side, and other pic-nics so frequently afforded.

It will not be surprising then when I assert that the events of the year have been unfavourable to the recovery of Patients, especially of those with a tendency to melancholy; and the deaths of five Patients from a disease not originating in the Asylum must necessarily materially effect the number entered in the Obituary Table for the year.

My report on this subject would be imperfect were I not to record, that providentially the disease was confined to the Male side of the House, and that, throughout its prevalence, our Chaplain met the men each Sunday in their Dining room, and performed the ordinary service before them.

I ought, too, perhaps to mention that I employed in two instances the then highly-praised *Saracenia purpurea* without the least success, either as to the improvement in the condition of the Patient, or the diminution of the subsequent disfiguration from pitting.

It should be generally known to Boards of Guardians and their Officers, that the Committee of Visitors of County Asylums have the power of excluding all persons afflicted with any disease or malady which such Committee may deem contagious or infectious, and persons coming from any district or place in which any such disease or malady may be prevalent (16, 17, Vict., cap. 97, sec. 53.) And further,

that the Committee of Visitors of the Hants County Asylum have given directions to the Superintendent to carry out the powers mentioned in this clause; but it would be far more satisfactory were the Boards of Guardians throughout the County to instruct their Medical and Relieving Officers that Lunatics, from infected districts, should not be sent to the Asylum until a previous communication of the particulars of the case had been forwarded to the Medical Superintendent of the Asylum, and his sanction to the admission obtained.

During the early part of the past year one of those exceptional cases requiring mechanical restraint was under treatment in the Female Wards.

The Patient had so strong a tendency, and was so constant in her attempts to destroy her eye-sight, that it was necessary to fasten her hands in such a manner as to prevent her being able to reach her face. During the period this inclination was so strong on her, she was watched at night by two attendants, specially engaged for the purpose, and by day by two of our own staff; she is now much better, employs herself a little, and there appears no reason why she should not eventually recover.

The attempts at suicide have this year been both numerous and determined, and in one instance, that of a Male Patient, suffering from gastritis, proved successful. An Inquest was held by the County Coroner, who made the following entry in the minute book:—"Having fully investigated the circumstances the Jury have determined, and I perfectly concur in the opinion, that there has been no lack of attention on the part of any of the Officers of the Establishment." This is

the first suicide that has taken place in the Asylum, which has now been open for a period of 11 years.

Two Male Patients have escaped from the Asylum without being retaken within the allotted period; they were consequently discharged off the books: one of them was a removal from the Devon Asylum, the man being chargeable to an Union in this County, but having a home in Devenport, where he was in business, and had resided with his wife for many years. He had some exaggerated ideas on religious subjects, but otherwise appeared sane. Subsequently to his escape, he returned his clothes to the Asylum, fearing, as he said, that he might be prosecuted for theft. The other man who had been several times previously in this Asylum made use of the liberty allowed him about the grounds to effect his escape.

It remains for me only to notice particularly the results to be drawn from the usual Tabular Appendix.

There were then twelve months ago in the Asylum 266 Male and 317 Female Patients, and 63 Males and 79 Females have been admitted during the past year. Thus there have been under treatment 725 persons. Of these 66 have been discharged recovered, and one is now out on trial. One Patient with her friends last Christmas, and not reckoned in last year's recoveries, has since been discharged off the books. Thus we have, calculated on the daily average, namely 582, a per centage of Recoveries exceeding 11, or calculated on the admissions (142) of 48 per cent.

The Deaths also are just 11 per cent. on the daily average, or 8 per cent. on the total number under treatment.

There are in the House this day, December 26, 1863, Males, 250—Females, 299—or a total of 549 persons.

It gives me pleasure to report that the duties of Medical Assistant, Clerk, and Storekeeper have been very efficiently performed during the past year by the Officers holding the respective appointments.

In conclusion, I would thank the Committee for their continued assistance in the discharge of my duties as Superintendent.

I am,

MY LORDS AND GENTLEMEN,

Your obedient faithful Servant,

JOHN MANLEY, M.D.,

Superintendent.

TABLE, No. 1,

Shows the number of Patients in the Asylum, December 25th, 1862, the number of Patients admitted and discharged during the year, and the number remaining in the House, on the 26th December, 1863.
