OF

The Committee of Visitors

OF THE

County Lunatic Asylum,

AT THE

EPIPHANY SESSIONS, 1868.

Southampton, to wit.—AT the General Quarter Sessions of the Peace of Our
Sovereign Lady the Queen, holden at the CASTLE OF WINCHESTER
in and for the said COUNTY OF SOUTHAMPTON, on Monday,
the first Week after the twenty-eighth day of December, to wit,
the thirtieth day of December, in the thirty-first year of the Reign
of our Sovereign Lady Victoria, by the Grace of God of the United
Kingdom of Great Britain and Ireland Queen, Defender of the
Faith, and in the year of our Lord One Thousand Eight Hundred
and Sixty-seven, before MELVILLE PORTAL, ESQ., Chairman, SIR
WILLIAM HEATHCOTE, BART., M.P., JOHN BONHAM, ESQ., M.P., and
others their Fellows, Justices of our said Lady the Queen, assigned
to keep the Peace of our said Lady the Queen, in the County
aforesaid: and also to hear and determine divers Felonies,
Trespases, and other Misdeeds, committed in the same County:—

ORDERED, That the Report of the Committee of Visitors
of the County Lunatic Asylum, presented at this Court,
be printed, as soon as the Receipt and Expenditure
Accounts are duly received, and that Copies be trans-
mitted to the several acting Justices, and to the Board
of Guardians of the several Unions within the County.

By the Court,

T. H. EARLE,

Clerk of the Peace.

REPORT.

THE Visiting Justices of the Hants County Lunatic Asylum beg leave to present their annual Report to the Court of Quarter Sessions, in accordance with the provisions of the Pauper Lunatic Act.

At the last meeting of the Visitors, on December 28th, ^{Number of Patients} there were in the Asylum 610 Patients, being a decrease of eight, as compared with the numbers at the corresponding period of last year.

The per centage of deaths, which was remarked upon by ^{Reduction in Rate of Mortality} our Committee as very heavy two years ago, has been gradually diminishing. In the year 1865 the per centage of deaths was 16 per cent.; in 1866, 12 per cent.; and in 1867 it has fallen to 10 per cent. On the other hand, ^{Recoveries} the per centage of recoveries has been increasing during the same period. These were in 1865, 33.7 per cent.; in 1866, 32.3 per cent.; and in 1867, 44 per cent.

Amongst the deaths should, perhaps, be noticed the case ^{Death of Edward Davis, a Patient} of Edward Davis, upon whom an inquest was held in October last, his decease having resulted from a fall which occurred in a struggle with another Patient. The Coroner's

Jury returned a verdict of accidental death, and your Committee having made further and special enquiry into the circumstances, by desire of the Commissioners in Lunacy, were satisfied that the verdict was strictly in accordance with the facts of the case.

Removal of
Patients
chargeable to
Boroughs of
Portsmouth and
Southampton

It should be observed that the number of inmates has been kept down to the present level by the removal to other Asylums of forty Patients, half of whom were chargeable to the Borough of Portsmouth, and half to the Borough of Southampton. These removals have been effected in pursuance of the intention expressed by your Committee in their last annual Report.

There is now no contract subsisting between your Committee and the Municipal Authorities of these two Boroughs though there are still about one hundred of their Patients retained in the Asylum liable to be removed from time to time as additional space may be required for Patients chargeable to Unions within the County. Such further removal, however, will not be insisted on till circumstances render it unavoidable.

Erection of
Flour Mill

In accordance with the intention expressed in their last Report, your Committee have caused a flour mill to be erected for the use of the Asylum, at a cost of £540. The mill is worked by the existing steam engine, and, although it has only been completed ten months, there is every reason to be satisfied that a considerable saving in the cost of flour (not less than 3s. per sack on an annual consumption of say 700 sacks) will be the result.

Weekly Charge
for
Maintenance

Although a reduction in the price of articles supplied under contract has been effected this year, the enhanced value of

corn makes it impossible for your Committee to hold out any hope that the weekly charge for maintenance can be lowered at present. The sum now charged, however, namely 8s. 5½d., bears favourable comparison with that which is charged in other County Asylums, and is less than the average charge of the last thirteen years.

As far as can be ascertained, the receipts for the year, ^{Receipts and} exclusive of balances, have been £15001, and the expenditure ^{Expenditure} £15798. This excess of expenditure is mainly attributable to the cost of new boilers and alterations of the gas works, which, though incurred in 1866, was not defrayed till after the beginning of the present year.

With few exceptions the conduct of the Servants and attendants has been satisfactory. The Officers have been zealous and efficient in the discharge of their responsible duties, and in conclusion your Committee desire once more to place on record the high sense they entertain of the energy and skill which are constantly displayed by the Medical Superintendent, Dr. Manley, in the guidance and control of this large and hitherto constantly increasing establishment.

G. SCLATER-BOOTH,

Chairman.

WICKHAM,

December 28th, 1867.

MR. CHAIRMAN, MY LORD AND GENTLEMEN,

BEFORE touching upon the several topics of my Report, would express my thankfulness that, in the good providence of God, I have been permitted during another year, without interruption from any painful cause, to perform with many and varied indications of their usefulness the allotted serious duties of the Chaplaincy.

It will not be thought expedient in a Report, partaking to some extent of a public character, to particularize exactly the numerous experiences of the year, or to give prominence to every incident that has properly fallen under my cognizance, or been affected directly or indirectly by my ministrations ; they must all, however, be present to my mind and serve to fashion and point at least some remarks which might otherwise bear too much the semblance of generalities.

Without enumerating on this occasion the special duties devolving upon me, it may be enough to say that a reference to my Register will shew how in each particular the regulations sanctioned by the Committee have been carried out, both as to the more public Services and private visitations. As to the former there has been the same

encouraging evidence of their appreciation by a large proportion of both Patients and Attendants; unfortunately, circumstances beyond human control, (though we rejoice of a passing character,) have deprived us of much most valuable and effective aid in the conduct and direction of our sacred music and singing; still we have been spared the entire deprivation of these most desirable adjuncts in religious services, as there exist in some among the body of the Patients the capabilities for rendering material assistance in this respect, though necessarily with diminished effect and attractiveness.

Advancing experience again has demonstrated the importance of the duty, and enhanced the value I attach to the privilege of visiting systematically the Patients in their wards. By such regular intercourse opportunities are afforded of adapting to the peculiarities of the several cases the more general teaching of the chapel and pulpit. The varying phases of the mind and feelings are better noticed, and the word in season yet more seasonably spoken; from such visitations, too, more frequently arise occasions for the calling forth and expression of Christian sympathy; thus kindly feelings are excited and a confidence won, causing a kindlier reception of needed counsel, and giving additional efficacy to the words of one who becomes to be regarded not only as an official Christian minister but also a friend.

At the same time, amidst all these indications of the real usefulness of these private ministrations and the hopes and encouragement they naturally inspire, no one can be slow to believe that, where the cases of mental aberration are so numerous and so dire, there must be much—and how

much none but those who witness it can justly estimate—to chill the heart and damp the hopes of the most sanguine, much too to tax one's energies while endeavouring, wherever practicable, by spiritual instruction and consolations to ameliorate the sad condition of the sufferers; still, in spite of every difficulty and discouragement I can never feel too thankful for the happy issue in many a case to which I have been called upon to minister. It is no small privilege to be instrumental in strengthening the faith of the dying, in imparting comfort to the sorrowful, in keeping alive by words of Scripture truth the expiring hopes of the desponding, and to aid in calming the paroxysms of mental distress and restoring the balance of an unpoised mind.

Turning now to the general Staff of the Establishment, I fully appreciate the interest the Committee have always taken in their general moral and spiritual welfare, and their desire for their due pastoral supervision. They indeed form a numerous and interesting class. It is my earnest prayer and wish to do them good to the utmost extent of my opportunities, which are neither few nor rare. The posts they occupy, and the Regulations under which they act, insure their attendance on the ordinary means of grace, and I trust I am fully justified in speaking very favourably of them as a body. My anxiety is that they not only recognize the fact that on their proper Christian sense of their duties and responsibilities depends the due performance of those duties and the consequent comfort of the afflicted under their care, but that also by their personal character they may contribute to the good name of the Institution with which they are connected; considering its extent, occurrences must be expected sometimes to happen which may

well be employed for the more forcible inculcation of religious and moral precepts; family afflictions, bereavements and death know no distinctions, and the year just closing has been rife with speaking providences whose voice can scarcely yet have died upon the ears of any.

With reference to the Evening School, I find that more than forty names are on the books, and that the average attendance is about twenty-five. I can testify to the real interest still taken in it by the Mistress, and her desire to extend its influence beyond those afflicted ones on whom its varied occupations have so beneficial an effect. My custom is to superintend it once in the week. There are always some Attendants present, but I would gladly see their number increased; but it is difficult to impress all alike with the desirability of self-improvement, and still more difficult to insure regular attendance and steady perseverance, though in some cases the natural result of these means of improvement have been most marked.

The circulation of books, papers, and periodicals has been continued on the old system. A goodly number of volumes has been added to the library by binding many of the more attractive and interesting serials.

It only remains for me to say that the Holy Communion has been administered four times in the course of the year to about thirty communicants on each occasion.

The number of interments in the Cemetery has not exceeded forty-six; and one of these was of the remains of the Head Attendant in the Laundry, who for eleven years

faithfully and well performed the duties of her station, and by her kindness endeared herself to the Patients under her charge.

Devoutly praying that an increased blessing may accompany my labours for the temporal and spiritual good of those to whom I minister,

I remain,

MY LORD AND GENTLEMEN,

Your very faithful and obedient Servant,

G. H. MASON,

Chaplain.

G. Sclater-Booth, Esq., M.P.,

Chairman of Committee,

Hants County Lunatic Asylum

HANTS COUNTY ASYLUM,

28th December, 1867.

R. CHAIRMAN, MY LORDS AND GENTLEMEN,

WHEN I presented my last annual Report there were in the House 285 Male and 335 Female Patients, and in the twelve months now ended 78 Males and 93 Females have been admitted; thus there have been under treatment a total of 791 Patients, of whom 363 were Males and 428 were Females.

The daily average number of Patients in the House, for the year, has been 614, of whom 275 were Males and 339 were Females. During the month of October the average was 630, of whom 280 were Males and 350 were Females.

The largest number of Patients at any one time in the House was 636.

In compliance with your directions, as indicated in your last Report, 15 Males and 5 Females, chargeable to the Borough of Portsmouth, were in January last transferred to Shertton Asylum, and during the present month 10 Males and 10 Females, chargeable to the Borough of Southampton, were removed to the same Asylum. Nevertheless, there are now in the House 274 Males and 335 Females, or 609

Patients, whilst the total accommodation, including the five beds at the Wickham Lodge, is sufficient only for 61 Patients.

The number of recoveries has been large, amounting to 44 per cent. of the admissions, viz:—34.5 for the Males and 53.5 for the Females; whilst the mortality has been small, or 10 per cent. on the daily average number resident viz:—about 12.5 for the Males and 7.5 for the Females.

The other discharges comprehend those who have been transferred to other Asylums, or have been removed at the request of friends, as also one Male Patient who, when nearly recovered, effected his escape and was not retaken.

During the past year several accidents have happened but, as far as I could ascertain, on minute investigation of each at the time, not one was the result either of negligence or violence on the part of any Attendant. They have all been mentioned to you in my periodical written Report but I must mention them again briefly here.

An old woman, who had many years ago lost the use of one side from an attack of Apoplexy, fell, in going from one room to another, and fractured the neck of her thigh bone.

A middle-aged woman fell and broke one of the bones of her forearm.

Lastly, a Male Patient, who attacked another violently jumping on his back whilst he was in a kneeling posture was thrown off with so great violence as to cause such serious injury to his chest that death resulted, and a Coroner

inquest was held on the body. The particulars were investigated by yourselves, and notice of the event was also furnished in detail to the Commissioners in Lunacy. I may add that the Chairman of the Board of Guardians of the Union to which the Patient belonged was present at the inquest, and before he left the Asylum made an entry in the Strangers' book that he fully concurred with the Jury in the belief that the injuries were the result of a simple accident.

A Female Patient, a married woman, admitted in an advanced state of pregnancy, gave birth to a child a few days after she was brought here. The mother made a good recovery, but the child lived only a few hours.

It is with regret I have to inform you of the loss of an old and faithful servant of the Establishment. The Head Laundress, who had been here for more than twelve years, died recently from disease of the heart and dropsy.

There is yet one point in the history of the past year to which I would specially direct attention, and allude to the powers given to the Secretary of State by the "Criminal Lunatics' Act, 1867." Under this Act three Patients have been already transferred from the Criminal Lunatic Asylum at Broadmoor to this Institution. Two of them had been previously removed from here on application of our Visitors as not being fit subjects for detention in a County Asylum, and the third had been tried at Aldershot four years ago, by Court Martial, for shooting at his officer and desertion. Becoming insane he was sent to the State Asylum, but his sentence having now expired he has been made chargeable

as an ordinary Lunatic to this County. Neither of the men had a settlement in Hampshire.

Having recorded the chief occurrences of the year, I propose to complete my Report by examining some statistics of the Asylum since its opening, fifteen years ago; and I shall divide the time into three periods of five years each, that I may compare them with each other, and trace the history and progress of the Establishment.

During the first five years, 433 men and 491 women, total 924 Patients, were admitted. Of the men only 2 per cent. were re-admissions; of the women 4 per cent. were re-admissions. Of the men 19 per cent., and of the women, 25 per cent. were discharged recovered in the same period. The daily average was 322 or 153 Males and 169 Females, and the per centage of death was about 12—or 14 for the men and 10 for the women. The men who were re-admitted were absent about eleven months each, and the women about twelve months.

During the second five years, 760 Patients were admitted, of whom 326 were men and 434 were women; of the men 9, and of the women 13 per cent. were re-admissions; of the men 31 per cent. and of the women 41 per cent. recovered. The daily average was 532, viz:—237 Males and 295 Females. The per centage of deaths was about 11.5—or 13 per cent for the men and 10 per cent. for the women. The men who were re-admitted averaged an absence from the Asylum of about two years and four months, and the women of about two years.

During the third five years, 497 men and 422 women were admitted, total 919. Of the men 12 per cent. were

re-admissions; of the women 22 per cent. were re-admissions; of the men 26 per cent. and of the women 46 per cent. were discharged recovered. The daily average was 586, viz:—270 men and 316 women. The per centage of deaths was 13 or 16 per cent. for the men, and 10 per cent. for the women. The men re-admitted had been absent from the Asylum on an average about three years and nine months, and the women re-admitted had been absent on an average about three years and six months.

Of the Patients discharged in the first period about 12 per cent. were re-admitted.

Of the Patients discharged in the second period about 4 per cent. were re-admitted.

Of the Patients discharged in the third period about 28 per cent. were re-admitted.

Of the 924 Patients admitted in the first period, 202 were chargeable to the Boroughs of Poole, Chichester, Southampton, and Portsmouth, and 28 were private Patients, leaving only 694 chargeable to the County, Unions, and small Boroughs in the County.

Of the 760 Patients admitted in the second period, 213 were chargeable to the same Boroughs, leaving only 547 chargeable to the County, Unions, and small Boroughs in the County.

Of the 919 Patients admitted in the third period, 175 were chargeable to the Boroughs of Southampton and Portsmouth, the remaining 744 being chargeable to the County, Unions, and small Boroughs in the County.

Of the 87 Male re-admissions in the fifteen years, there have been again discharged recovered 34, relieved 5, have died 16, and remain 32. These 87 re-admissions are distributed over 77 Patients, 11 of whom have been re-admitted twice each.

Of the 143 Female re-admissions in the fifteen years, there have been again discharged recovered 72, relieved 8, not improved 1, have died 24, and remain 38. These 143 re-admissions are distributed over 107 Patients, 15 of whom have been re-admitted twice each, two on three occasions each, three four-times each, and two five-times each.

Of the men re-admitted 13 were discharged as not recovered, having been removed to other Asylums, Work houses, or at the request of friends.

Of the women re-admitted 10 were discharged under similar circumstances.

In 23 of the Males re-admitted there existed an hereditary predisposition to insanity; in 22 the relapse was attributed to intemperance; in 17 to domestic trouble and difficulties and in 8 to some physical cause.

In 31 of the women re-admitted there existed an hereditary predisposition to insanity; in 3 the relapse was attributed to intemperance; in 54 to domestic trouble and difficulties; and in 22 to some physical cause.

Thus it appears that the number of Females in this Asylum has always been, and is likely to continue, considerably in excess of the Males; that the number of Patients

chargeable to the County (for whom the Asylum was built) has been gradually increasing, and is likely still to increase; that whilst there has been comparatively little change in the rate of mortality, the per centage of recoveries has steadily increased, and with it, of necessity, the number of re-admissions, for it must be remembered that no disease is more prone than insanity to reappear in a person who has once suffered from an attack; that the mortality is greater and the recoveries are fewer amongst men than amongst women, but that women are more subject to relapses than men, and that the great causes of relapse are Hereditary Predisposition, Intemperance, and Domestic Trouble, to which must be added, in the case of women, the condition of pregnancy and the puerperal state.

Tables similar to those published in previous years are appended to my present Report.

It remains for me but to say that the duties of the various officers have been efficiently performed, and, that with few exceptions, the conduct of the Attendants and Servants has been very satisfactory.

Thanking you for the personal consideration and assistance have received from you in the performance of my varied and arduous duties,

I am,

MR. CHAIRMAN, MY LORDS AND GENTLEMEN,

Your obedient faithful Servant,

JOHN MANLEY.

the Committee of Visitors of the
Hants County Asylum.

TABLE, No. 1.

Showing the Admissions, Re-admissions, Discharges, and Deaths, from the Opening of the Asylum to the present Date, December 25th, 1867.
