OF

The Committee of Visitors

OF THE

County Lunatic Asylum,

AT THE

EPIPHANY SESSIONS, 1869.

Southampton, to wit.-AT the General Quarter Sessions of the Peace of Our Sovereign Lady the Queen, holden at the CASTLE OF WINCHESTER, in and for the said COUNTY OF SOUTHAMPTON, on Monday, in the first Week after the twenty-eighth day of December, 1868, to wit, the fourth day of January, in the thirty-second year of the Reign of our Sovereign Lady Victoria, by the Grace of God of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, and in the year of our Lord One Thousand Eight Hundred and Sixty-nine, before THE RIGHT HONORABLE CHARLES VISCOUNT EVERSLEY, Chairman, THE RIGHT HONOURABLE HENRY HOWARD MOLYNEUX, EARL OF CARNARVON, JOHN BONHAM CARTER, Esq., M.P., and others their Fellows, Justices of our said Lady the Queen, assigned to keep the Peace of our said Lady the Queen, in the County aforesaid: and also to hear and determine divers Felonies, Trespasses, and other Misdeeds, committed in the same County :--

ORDERED, That the Report of the Committee of Visitors of the County Lunatic Asylum, presented at this Court, be printed, as soon as the Receipt and Expenditure Accounts are duly received, and that copies be transmitted to the several acting Justices, and to the Boards of Guardians of the several Unions within the County.

By the Court,

T. H. EARLE,

Clerk of the Peace.

REPORT.

THE Visiting Justices of the Hants County Asylum have to report to the Court of Quarter Sessions that, at their last Meeting on the 26th December, there were in the Number of Patients Asylum 619 Patients, being an increase of ten, as compared with the numbers at the corresponding period of last year.

The per centage of recoveries has been rather lower than Recoveries and Increase in usual, and that of deaths rather higher, chiefly from a large Rate of Mortality mortality amongst the older inmates.

The proportion of Epileptic Patients has been and continues Epileptic Patients very large, but no accident as the result of Epilepsy has occurred among them, a fact which speaks well for the careful supervision of the Nurses and Attendants.

The pressure for accommodation has increased beyond Pressure for the expectation of your Committee, and it has been necessary for Patients still further to reduce the number of Borough Patients in order to make room for those chargeable to Unions within the County. There are now in the Asylum 50 inmates belonging to Portsmouth and 28 belonging to Southampton, and it will be obvious to the Court that, in process of time, other removals of this class of inmates must, in all probability,

Accommodation

take place, the effect of which must be to diminish, if not to render inadequate the fund out of which the ordinary repairs of the Building as well as the large additions and new Works, which from time to time have been found necessary, have hitherto been defrayed.

Conduct of Attendants There have been some instances of misconduct amongst the Attendants, which have been punished by dismissal, but their places have been filled without difficulty, and the Establishment continues to be in all respects satisfactorily conducted.

Receipts and Expenditure So far as can be ascertained, the income and expenditure of the year have been as follows :—

Balance of Receipts over Expend	iture			609	.0	0
Ditto on Account of Building				14797	0	0
Payments on Account of Main- tenance		0	0	15406	0	0
Receipts for Maintenance Ditto for Building Account			0 0			-

In conclusion, your Committee beg to call attention to the full and interesting details given by the Medical Superintendent and Chaplain, in their annual Reports, which will be found in the appendix.

G. SCLATER-BOOTH,

Chairman.

WICKHAM,

December 28th, 1868.

MR. CHAIRMAN, MY LORD AND GENTLEMEN,

IN reporting on matters connected with my Chaplaincy, I beg to say, in the first place, that my allotted duties have been regularly and duly performed during the past year. This my Register will clearly indicate.

The attendance at Chapel has varied little from that of former years, nor has there been any noticeable difference in the interested attention and general decorum that have always been so conspicuous at the Services. The maximum number of Patients attending Chapel at any one time is under 250, while the maximum of those attending at all is under 300. Should these numbers appear unsatisfactorily small, considering the actual number of inmates, it should be borne in mind, that attendance at Chapel enters into the curative system of the Institution, and one great object aimed at is the maintenance of that calmness and solemnity which should mark any congregation assembled for Divine Worship; none more appreciate this than the Patients themselves; those only, therefore, in general, can be permitted to attend who give evidence by their demeanor that they are capable of exercising over themselves such restraint as will insure the desired behaviour. Again, there is a

considerable number of Imbecile Patients, and unhappily also a large body of Epileptics. These last, from due regard to the comfort of others, can rarely come to Chapel, and to these I minister privately, and for such is held that short intermediate service in one of the Day rooms, on either side the House, on alternate Sundays, at which as many as fifty Males are present.

The Wednesday Evening Service is well attended, and much valued; as its duration is short, some even of those subject to fits can be allowed to come to it.

The interest I take in the visitation of the Wards is rather increased than diminished,—so numerous are the indications of its usefulness, so thankfully are my ministrations received, so gratifying the grateful remembrance of them by many who have been restored to their friends. To enter further into details on this very interesting subject would perhaps be thought undesirable.

With regard to the general Staff of the Establishment, I cannot refrain from testifying, from personal observation, to the temper, kindness, and forbearance, displayed by those in immediate attendance upon the insane, in the midst of their very trying duties; many are the expressions of gratitude I hear from the Patients for kind treatment received from this quarter.

The Evening School continues, under the same judicious management, an agent for effecting real good, though we may not have been able to extend its sphere of usefulness so as to embrace all whom we could wish. The number of names upon the books is fifty-one. The number generally present is twenty-five or thirty. Besides Patients, there are always some of the Attendants willing to avail themselves of this means, so conveniently within their reach, of selfimprovement, and making up for acknowledged educational deficiencies.

The papers and publications, which systematically circulate through the wards, have been largely increased. The library also is larger by the addition of further bound volumes of periodicals. The literary wants of the Asylum are thus fairly supplied. The number of persons changing books is upwards of seventy.

At this stage reference may not unsuitably be made to the beneficial results accruing from the numerous entertainments, so kindly provided for the diversion of the Patients, and the keeping up a cheerful, healthy tone throughout the general Establishment. The kindness which furnishes them is highly appreciated, and, judging chiefly from their effects, they seem to answer well the purpose of their introduction.

The Burials, during the past twelve months, have amounted to sixty.

The Holy Communion has been administered once in each quarter, the communicants numbering about thirty. Some of the convalescents, though accustomed to partake of this holy rite when at home, show a reluctance to do so at the Asylum.

Before concluding, I would express my warmest acknowledgements for the valued moral support so considerately accorded me, from all official quarters, in the performance of my serious duties; and faulty indeed would be my conclusion, unless I gave utterance to the thankfulness I feel for the blessing that has hitherto accompanied my unworthy labours, and did I not say how devoutly I pray that they may administer more and more, not only to the consolation of the afflicted, but also to the spiritual welfare of all to whom I have been appointed to minister.

I remain,

MR. CHAIRMAN, MY LORD AND GENTLEMEN, Your very faithful and obedient Servant,

G. H. MASON,

Chaplain.

G. Sclater-Booth, Esq., M.P., Chairman of Committee, Hants County Lunatic Asylum.

HANTS COUNTY ASYLUM,

26th December, 1868.

MR. CHAIRMAN, MY LORDS AND GENTLEMEN,

THERE were in the House, on the 25th December, 1867, 609 Patients, of whom 274 were Males and 335 were Females, and there have been admitted 71 Males and 85 Females. Thus there have been under treatment 765 persons, of whom 345 were Males and 420 were Females.

Of these, 16 men and 29 women have been discharged recovered, or a total of 45, which represents a per centage of Recoveries of about 29 on the year's admissions.

The other discharges consisted of 1 Male and 1 Female, who were removed at the request of their friends, being much improved. Another Male was removed contrary to my advice, and it was necessary, two days after he left here, to place him in another Asylum. A third Male, who was found to have property sufficient to support him, was, after a Commission in Lunacy, transferred to a private Asylum. One Male private Patient, whose means of subsistence had been exhausted was made a Pauper. A Female, who had been sent here by the parish was, on its being discovered that her husband was a well-to-do tradesman, transferred from the pauper to the private list, and a harmless Male Imbecile has been removed to his Union Workhouse. Besides these, 9 Males and 7 Females (of whom 5 of each sex belonged to the Borough of Southampton) have been transferred to other Asylums, in consequence of their settlement being out of the County, and 28 Males and 50 Females have died, or a per centage which rather exceeds 12 on the daily average number resident.

The admissions during this year have been numerically smaller than in the preceding one, but as only 7 Patients have been received from the Borough of Portsmouth, and none from the Borough of Southampton, the admissions from Unions and the County, (including the smaller non-contributing Boroughs,) have really exceeded those of the year 1867.

The daily average number of Patients resident has been 620, or 6 more than in 1867; and this, notwithstanding the fact before stated, that 10 Patients chargeable to Southampton have been transferred to Fisherton, and, as recorded in my last Report, that 20 others belonging to the same Borough had been sent away from here in December of last year.

The number of Patients now in the House is 619, or 287 Men and 332 Women, a number slightly in excess of that for which there is proper accommodation; but in July there were as many as 631 Patients on the books, and our dormitories were consequently over-crowded. The ventilation of the Asylum is excellent, or the numbers in excess must have been prejudicial to the health of the inmates. There has been no epidemic during the past year, and the health of the Patients has been good as a whole; but when I say good, I must be understood to speak with reservation, I mean that it has been as good as could possibly be expected amongst those, where so many are very feeble and aged, and where there are so many Epileptics and Paralytics, and that there has been a marked absence of acute disease. Nevertheless, the mortality has been higher than usual, a large number of old Patients having died during the year. As many as 11 deaths occurred in Patients who had been residents here for more than 10 years, and 12 others amongst those who had been here between 5 and 10 years; or, to look at it from another point of view, of the 78 patients who died 44 were over 50 years of age, and of these 44, 25 exceeded 60 and 7 exceeded 70 years of age.

If we regard the causes of death, we find that Pulmonary Consumption has been fatal in 16 instances, that in 15 other cases death depended on disease either of the heart or brain, and that the unusual number of 16 Patients succumbed to exhaustion produced by Epilepsy, whilst in 18 instances leath resulted solely from nervous exhaustion, or from a general decay of the powers of life.

Only one accident of any moment has happened during he year, and such an one seems scarcely preventible, because o wholly unanticipated. A Female Patient, who had been or years almost entirely confined to her bed from debility, ne morning got out of her room immediately the doors ere opened, and walked to the other end of the gallery to ne Attendants' sitting room, which had just been left by ne Night Nurse, who had gone off duty. She had put on er dress over her chemise, and then raised her dress and et fire to her under garment, dropping the dress over it. he garment only smouldered, and was almost immediately tinguished by one of the Nurses, who perceived the accident; the woman was burnt about the legs, but suffere no shock, and the wounds put on a healthy appearance an nearly healed themselves, but ten weeks afterwards shdied of disease of the heart.

Considering that there have been so many feeble Patient and that there are now 105 Epileptics here, and 143 with suicidal propensity, the fact speaks for itself of the care an attention the Patients have received from the Attendant and Nurses.

During the year, 4 Male and 4 Female Patients have been sent here from the County Prison, under the usual order of the Secretary of State, and one has been transferred from the Criminal Asylum at Broadmoor, his sentence having expired before his recovery.

With respect to the internal arrangement of the Asylun matters have gone on in much their usual way. By you sanction, fish dinners are frequently provided for portior of the Patients when they can be procured at a reasonabl cost, and are much enjoyed. The services in the Chape the School, the parties and amusements of various kind have been continued, and we had the usual pic-nic to th Sea-side, at Hill Head, in the Summer, at which abou 100 Patients of each Sex were present.

The post of Head Attendant, long held by Henry Bailey whose health unfortunately gave way, has been filled by th appointment of Mr. George, who performs the duties in very efficient manner, and evinces, in many ways, the interehe takes in his employment. Henry Mulvaney, the Tailor Attendant, who had been here for 15 years, died recently of Pulmonary Consumption; although he had left the Asylum some time, his place was not filled up, and he was allowed to receive his wages to the last.

To the Officers who have worked with me, I am much indebted for the readiness with which they have always fallen into my plans and assisted me in their different departments, but I would specially notice the help I have received from Mr. Pater, the Assistant Medical Officer, whose kindness and attention are also much appreciated by the Patients under our charge.

Thanking you for the support I continue to receive from you in the discharge of my varied duties,

I remain,

MR CHAIRMAN, MY LORDS AND GENTLEMEN, Your obedient faithful Servant,

JOHN MANLEY.
