#### OF THE

# **COMMITTEE OF VISITORS**

OF THE

COUNTY LUNATIC ASYLUM AT PRESTWICH,

FOR THE YEAR 1881.

THE COUNTY LUNATIC ASYLUM, PRESTWICH, 28th December, 1881.

The Committee of Visitors of the County Lunatic Asylum at Prestwich present their Report to the Court of Annual General Session, in accordance with the provisions of the Act 16 and 17 Victoria, chapter 97, section 62.

The land occupied by, and in connection with, the Asylum contains 136a. 3r. 29p., statute measure, 114a. Or. 27p. being freehold, and 22a. 3r. 2p. leasehold, for a term which will expire in February, 1896.

The condition of the Asylum buildings is satisfactory.

Wards Nos. 2 and 3 on each side have been greatly improved by the addition of light and airy work-rooms. The improvements were carried out by the Patients, under the superintendence of the Staff.

The Annexe Buildings are in an advanced stage, and, in all probability, will be finished and fit for occupation in about half a year. Accommodation will be afforded for 840 patients, chiefly of the epileptic class.

The new Gas Works, to meet the requirements of the Asylum and Annexe, are completed, and, as regards the Asylum, are in full operation.

The contract for the purchase from Lord Derby of four acres of land on the northern boundary of the Asylum grounds was completed in March last, and the road from the Bury New Road to the Asylum is in course of formation. The lodge at the entrance gate is in a forward state.

The general health of the patients has been good and the death-rate low.

During the year 184 men and 227 women have been admitted; 153 men and 211 women have been discharged, of whom 71 men and 118 women were recovered; 82 men and 93 women have been transferred to workhouses, and to the care of their relatives and friends; and 26 men and 33 women have died.

There are now 582 men and 665 women on the books of the establishment.

The Asylum, intended to afford accommodation for 1,170 patients, viz.: 525 males and 645 females, has been crowded throughout the year, and to meet the pressing demand for urgent cases, many quiet chronic patients have been removed to the Workhouses of their respective Unions.

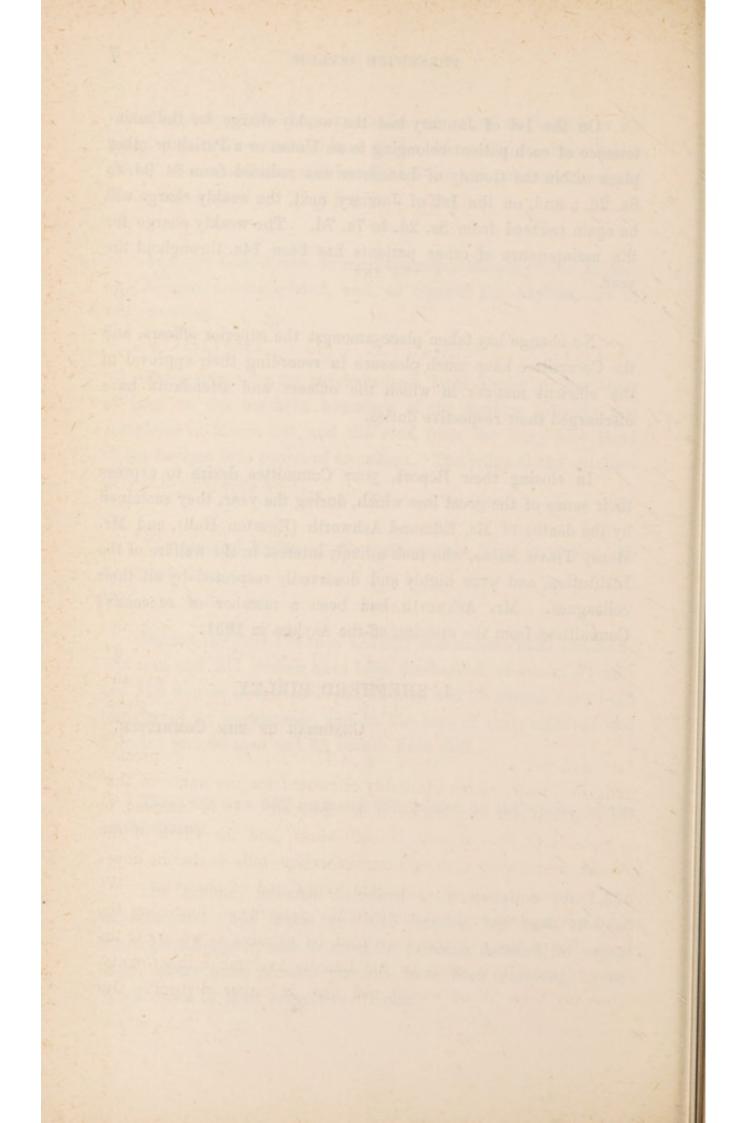

On the 1st of January last the weekly charge for the maintenance of each patient belonging to an Union or a Parish or other place within the County of Lancaster was reduced from 8s. 9d. to 8s. 2d.; and, on the 1st of January next, the weekly charge will be again reduced from Ss. 2d. to 7s. 7d. The weekly charge for the maintenance of other patients has been 14s. throughout the year.

No change has taken place amongst the superior officers, and the Committee have much pleasure in recording their approval of the efficient manner in which the officers and attendants have discharged their respective duties.

In closing their Report, your Committee desire to express their sense of the great loss which, during the year, they sustained by the deaths of Mr. Edmund Ashworth (Egerton Hall), and Mr. Henry Travis Milne, who took a lively interest in the welfare of the Institution, and were highly and deservedly respected by all their colleagues. Mr. Ashworth had been a member of successive Committees from the opening of the Asylum in 1851.

#### J. SHEPHERD BIRLEY,

CHAIRMAN OF THE COMMITTEE.

# REPORT

OF THE

# Commissioners in Lunacy.

LANCASHIRE LUNATIC ASYLUM, PRESTWICH,

Максн 25тн, 1881.

On the books of this Asylum we find the names of 1,192 patients-531 males and 661 females, all of whom, with the exception of 37 males, are living in the main building. The 37 men not residing here are boarded and lodged at the Farm and Farm Cottage, 30 being at the former and 7 at the latter place. The Farm Cottage is close to the new Annexe, which we have this day inspected, and, as far as we could judge of it in its present unfinished state, seems admirably calculated for the wants of that class of patients for which it is designed. It is intended to accommodate 840 patients of both sexes, and the Clerk of the Works, whom we met during our inspection, tells us that he hopes and believes it will be completed by the end of next year. We need not urge upon the Committee the necessity of hastening the work, for we feel sure that they must be as alive as we are to the want of room that exists in the Lunatic Asylums in this County. This day there is no vacant bed here in either division. Our

colleagues completed their last official inspection of this Asylum on July 14th, 1880, since which time the following changes have to be recorded :---

	м.	F.	TOTAL.
Admitted	115	 127	242
Discharged-Recovered	43	 67	110
Relieved	27	 61	88
Not Improved	1	 0	1
Died	29	 24	53

We learn that out of the 88 patients who have been discharged "relieved," 71 have been sent to their respective workhouses as fit cases to be received in them, but we are not. astonished to learn that many have to be sent back again, having become unmanageable in the workhouse. A greater change can hardly be conceived than to the ordinary workhouse day-room from these wards. In the one the rule being whitewashed bare walls, stone floors, a hard bench to sit upon, with only at the best a pauper help to look after their wants, and in the other well warmed, clean, bright, cheerful wards, filled with flowers, plants, and ferns, the walls hung with pictures, stuffed benches and chairs for their use, with attendants accustomed to deal with insane patients, and able to understand their peculiarities. These remarks, of course, apply to those workhouses which have no insane wards, and we fear till marked improvement takes place in the arrangements for the care of the insane of the chronic class in workhouses, so long will they be found impossible to be dealt with out of an Asylum, and remain at an increased expense to the ratepavers. The wards and dormitories here were in the best order, bright and cheerful, and No. 1 Ward on each side has been completed since the last visit, and bears more the appearance of the hall in a large country house than the ward of a Lunatic Asylum. We are glad to observe attendants and patients

at work beginning alterations of a similar character in Wards 2 and 3 on the female side, and when these are finished the corresponding wards on the male side will be altered in like manner. It is satisfactory to add that all these great improvements are executed solely by patients' labour, superintended by skilled artizan attendants, whilst all the furniture, fern cases, &c., are obtained by the same means, as well as the busts and pottery which adorn the walls. We cannot too highly express our gratification at the appearance the wards, even those occupied by the destructive patients, presented, and we must add that we are astonished to find that all this is done at a cost of no more than 8s. 2d. per week per head. We doubt if any other Asylum in the country has anything approaching to the comfort and even luxury provided here at such a rate. No patient was absent on leave, and we, during yesterday and this day, have seen every patient on the books, and given them an opportunity of telling to us their grievances and wishes, but no one made complaint of any sort, excepting a few considered that they were improperly detained here. In almost every instance the charge was made by general paralytics, and in no case could we question the wisdom of the present detention of the complainants. In bed we found 8 men and 9 women, and under medical treatment last week the names of 29 men and 27 women have been recorded, so the general health of the Asylum is to be considered good. The death-rate has been since the last visit very low, viz. : about 6 per cent. on the average number resident, or 4 per cent. lower than the usual rate in County Asylums. With regard to the causes of the 53 deaths, only one is attributable to causes other than what are termed "ordinary," and that was a suicide of a woman who hung herself at night, during the nurse's absence from the dormitory. This death was the subject of correspondence between our Board and the acting Superintendent of the Asylum, and need not be again commented upon in this report. In this case alone did the Coroner hold an inquest. Post-mortem examinations verified the assigned cause of death in 39 instances, and in every other case leave to make the

examination was asked for but refused. The general paralytics in the Asylum are 45 men and 9 women, 47 of the former and 46 of the latter sex are epileptics, and no less than 49 and 113 respectively are considered to be actively suicidal. There are, excluding a head attendant in each division, 6 men and 8 women on night duty, 4 of the men and 6 of the women have charge of only one ward each, with strict orders that under no circumstances are they to leave their wards. One of the remaining men has charge of three and the other of two wards, and the like arrangement obtains on the female side. There are no electric clocks, but the nurses' wakefulness is ensured by the head night attendants, whose only duty is that of supervision. The staff of attendants for day duty on the male side is as follows: 2 head attendants, 50 day attendants, with 4 artizans, who are reckoned as attendants. In addition to these, 4 women are employed on the male side. On the female sile the staff consists of 1 matron, with 2 assistant matrons, 53 nurses, and 5 laundry maids. We were satisfied with the general appearance of both male and female attendants, who seemed fitted to perform their duties, and to act with a good deal of tact and judgment in the management of the patients. We may here notice that out of 147 attendants, nearly two-thirds have been here for over a twelvemonth, whilst 63 have been for some considerable time in the Asylum service. The demeanour of the patients was quiet and orderly, but few in either division became noisy when we visited the wards, and no one showed any disposition to be aggressive. We saw the patients at dinner in their dininghalls, to the number of over 300 in each hall, both yesterday and this day. Their conduct there was good, and no excitement was evinced by them either day. The food furnished at the table was good and sufficient, though the potatoes did not appear to be quite satisfactory. The meat dinner of yesterday is more generally approved than the fish provided for this day's meal, though with regard to the quality there is no ground for complaint. One man and four women have been secluded-the man once for five hours, the women on eleven occasions, for a total of forty-four and a half hours. One epileptic woman accounts for six of these occasions. There are several melancholic patients in both divisions, and we learn from Mr. Ley that, in his opinion, the Turkish bath is a valuable remedial agent in these cases, and he hopes soon to be able to establish one here, and in this hope we cordially join. We have visited nearly the whole of the offices and places in which the patients are employed, and would call the early attention of the Committee to the necessity of building new workshops. We learn that this subject has not escaped their notice, and we would urge upon them the advantage of proceeding at once with this important work, and not waiting until the Annexe is finished before undertaking the new workshops. The returns furnished us show that 98 men and 230 women assist in cleaning the wards, 25 men and 43 women work in the laundry and washhouse, 24 men and 12 women help in the kitchen, and 4 men and 25 women work for the upholsterers. Employment is given to 160 women at knitting or One hundred and seventeen men are of use on the needlework. farm or land, and at various trades are engaged 62 men-15 shoemakers, 9 tailors, 11 carpenters, 9 plumbers and painters, and 18 engineers, &c. We have enquired into the attendance at Divine Service here, and find that about 700 attend the Church of England service in the morning, and a few less are present at the evening service. We were pleased to learn that the Roman Catholics, of whom there are about 300 in the Asylum, receive the ministrations of a priest every Sunday, and that about half the number of Roman Catholic inmates are able to profit by his services. At the associated entertainments about 700 meet to join in various forms of amusement, and during the summer months nearly 600 go for walks daily in the grounds. Rather over 200 patients, of which the women are in the majority, are confined to the airing courts for exercise. This number shows those who are not trusted beyond the airing courts, and excludes those who, from old age and infirmity, are unable to go far. The foregoing report shows how satisfied we are with what has already been done to promote the care and comfort of the insane poor here, feeling satisfied that the more that is done to ameliorate their condition and to humanize them, so much the greater is the ultimate chance of their recovery. Mr. Ley is evidently most active and energetic in this matter, and we only add that the present condition of the Asylum is in the highest degree creditable to him.

> W. E. FRERE, Commissioners ROBERT NAIRNE, in Lunacy.

# REPORT

#### OF THE

# MEDICAL SUPERINTENDENT.

#### GENTLEMEN,

I have the honour to submit to you my Annual Report for the year 1881, to which are appended the usual Statistical Tables, showing the changes that have taken place in the inmates of the Asylum in the course of the year, together with the results of treatment.

The Financial Statement is likewise submitted.

At the close of the year 1880 there were on the roll of the Asylum 1,211 patients, of whom 528 were males and 683 were females. Since that period there were admitted 187 men and 227 women, making a total of 1,625 patients under care and treatment. Of this number 154 males and 211 females were discharged, and 27 males and 34 females died; accordingly there remained in the Asylum at the end of the past year 534 males and 665 females, or a total of 1,199.

It will thus be seen that the number of residents at the end of the year was fewer by 12 than at the beginning, but this result was entirely due to an excess of discharges and transfers, which happened to occur about the latter period. The Asylum will conveniently afford room for 1,170 inmates, but during the whole of the past year the patients greatly exceeded the ordinary available accommodation. The average daily number was 1,197, and on several occasions no less than 1,215 patients were crowded into the Institution, so great was the demand for accommodation, and so great was the difficulty in refusing cases when brought for treatment.

Notwithstanding the crowded condition of the Asylum the ratio of admission (414) is found to be much above that of the previous three years. The number of cases which had to be refused for want of room is also in excess of the average, having numbered no less than 67 males and 98 females, making a total of 579 patients for whom accommodation was sought during the past year.

Of the whole number admitted, 348 were admitted for the first time, 54 for the second time, and 12 for the third time. Of these re-admissions, 45 had previously been discharged recovered, and 11 were patients who had at various times been transferred to the Unions to make room for more recent cases, but becoming unmanageable in the Workhouse, were returned to the Asylum.

The general character of the admissions was of the acute type, and comprised a large proportion of excited, turbulent, and destructive patients. The number of recent cases, regarding all as recent who have been insane less than one year, was below the average, and as few recover whose insanity is of an older date than one year, it follows that a fair proportion of the admissions, about

26 per cent of the whole number, were of an unfavourable character as regards their prospect of recovery. Among the males the prevalence of general paralysis and other progressive brain diseases was so marked that nearly 22 per cent. of the admissions were from the first hopelessly incurable.

The admissions were principally from the various Unions of the Salford Hundred, 7 were transfers from other Asylums, 2 were removed from Broadmoor, and 61 were police cases or brought from the various gaols of the district. The presence of suicidal and homicidal tendencies among the admissions was more marked than in previous years. In view of this fact, and the crowded condition of the wards, it is a cause for much thankfulness that the year has passed without any outbreak of those diseases which are likely to result from overcrowding, and without any casualty or serious accident. The sanitary condition of the Institution has been good, no epidemic disorder has made its appearance, if we except a case of measles, which occurred in a female patient two days after admission, and the general health of the household has been uniformly satisfactory. Although a large proportion of the inmates are old and feeble, and the winter was unusually long and severe, the death-rate is exceedingly low, in fact the lowest on record since the opening of the Asylum, amounting to 46 men and 20 women, which, calculated on the daily average number resident, yields a per centage of 5.1, and of 3.75 on the total number under treatment. All the deaths of the year resulted from ordinary and natural causes, general paralysis and other forms of brain disease having been the chief factors of mortality. Post-mortem examinations have been made in 49 out of the 62 deaths ; in fact, in every case where permission from the relatives could be obtained.

The assigned causes of the insanity of those admitted have been based upon information obtained from the relatives and others best acquainted with the antecedents of the patients. This Table shows that a large number, about 7 per cent., presented well marked evidences of physical disease, and 84, or 20 per cent. of the whole admissions, were found to have inherited insanity directly from immediate ancestors. As in previous years, intemperance in drink is prominent among the exciting influences tending to the development of insanity, particularly in those cases where a predisposition to the disease existed, either from inherited taint or from previous mental attacks. Of the moral influences, anxiety, worry, and domestic troubles are important causative factors, and the puerperal state is credited as the exciting cause in no less than 16 per cent. of the female admissions.

The total number of discharges during the year amount to 154 males and 211 females. Of these 72 males and 118 females were discharged recovered, and 82 males and 93 females were discharged relieved. Of these latter 66 males and 86 females were transferred to their respective Union Workhouses; 8 males and 7 females were placed under the care of their friends. The ratio of recoveries in proportion to those admitted is a little more than 46 per cent., the proportionate rate for the women being most satisfactory, viz., 52 per cent., whilst that for the men is less satisfactory, being only 39 per cent. The gross rate, however, is 1 per cent. higher than that of last year.

With reference to the general management of the Institution, the treatment of the patients, and the various provision made for their employment and relaxation, the same general methods have been followed, as detailed in my reports of former years. No patient has been restrained, and very few have been secluded, and every endeavour has been made to modify as much as possible the irksomeness of confinement, and to give to all as much personal freedom as is reasonably consistent with their safety and well-being. Employment has been persistently encouraged, and a large number of patients have been occupied in favourable weather in out-door labour on the farm, garden, and grounds. Our carpenters, shoemakers, tailors, and mechanics' shops have also afforded suitable employment for a fair proportion of artizans. Among the females, household work, the kitchen, the laundry, and sewingroom, have given employment to more than two-thirds of the female patients. The whole of the clothing required for the Annexe, and nearly the whole of the bedding, have been completed. The weekly dances and other amusements, both in-door and out-door, have been continued throughout the year. These entertainments have promoted the general good conduct and happiness of the inmates, and in several cases have materially aided their recovery.

The changes among the attendants and servants, many of whom have been in the service of the Institution for lengthened periods, have been few and unimportant.

The Annexe, so far as the building is concerned, is now approaching completion, and will, in all probability, be ready for occupation early next year. As the Annexe is built to accommodate 840 patients, this Institution will, when full, contain 2,000 insane persons, more than a third of whom will be of the epileptic As all patients will pass through and spend a probationary class. period in the parent Asylum, I venture to draw your attention to certain additions and alterations which will be required to enable the Institution to grapple with the great influx of new cases which it will have to accommodate. Our reception wards on both sides will require enlarging. A new meat store and slaughter-house, farm buildings, and a new general store will be needed. A larger mortuary, more conveniently situated, is much wanted, and, above all, the enlargement and re-arrangement of the workshops, sanctioned by the Committee last year, ought no longer to be delayed. Few Asylums of this magnitude are so scantily provided with means of occupation for the patients. Our workshops are

small, inconveniently placed, and not sufficiently numerous to accommodate all who ought to be employed, or to afford the necessary diversity of occupation, the want of which is so keenly felt during the long winter months, when the weather precludes the possibility of ordinary out-door labour. These and some other minor requirements, such as the detached accommodation for the night attendants, the re-arrangement of the earth closets in several of the wards, are subjects of such importance that I feel it unnecessary to make any apology for again bringing them under your notice.

I have the honour to remain, Gentlemen,

Your most obedient Servant,

H. ROOKE LEY.
