## REPORT

OF THE

## COMMITTEE OF VISITORS

OF THE

#### COUNTY LUNATIC ASYLUM AT PRESTWICH,

FOR THE YEAR 1882.

The County Lunatic Asylum, Prestwich,

28th December, 1882.

The Committee of Visitors of the County Lunatic Asylum at Prestwich present their Report to the Court of Annual General Session, in accordance with the provisions of the Act 16 and 17 Victoria, Chapter 97, Section 62.

The land occupied by and in connection with the Asylum contains 136a. 3r. 29p. statute measure, 114a. Or. 27p. being freehold, and 22a. 3r. 2p. leasehold, for a term which will expire in February, 1896.

The condition of the Asylum buildings is satisfactory.

A roadway through the Asylum grounds, connecting the Annexe (which will be shortly opened) with the main buildings, has been constructed; and the necessary additional farm accommodation is being provided.

The general health of the patients has been good, and the death-rate low.

During the year 165 men and 213 women have been admitted; 128 men and 172 women have been discharged, of whom 64 men and 113 women were recovered; 64 men and 59 women have been transferred to workhouses, and to the care of their relatives and friends; and 37 men and 31 women have died.

There are now 534 men and 675 women on the books of the establishment.

The Asylum (intended to afford accommodation for 1,170 patients, namely, 525 males and 645 females) has continued to be crowded throughout the year.

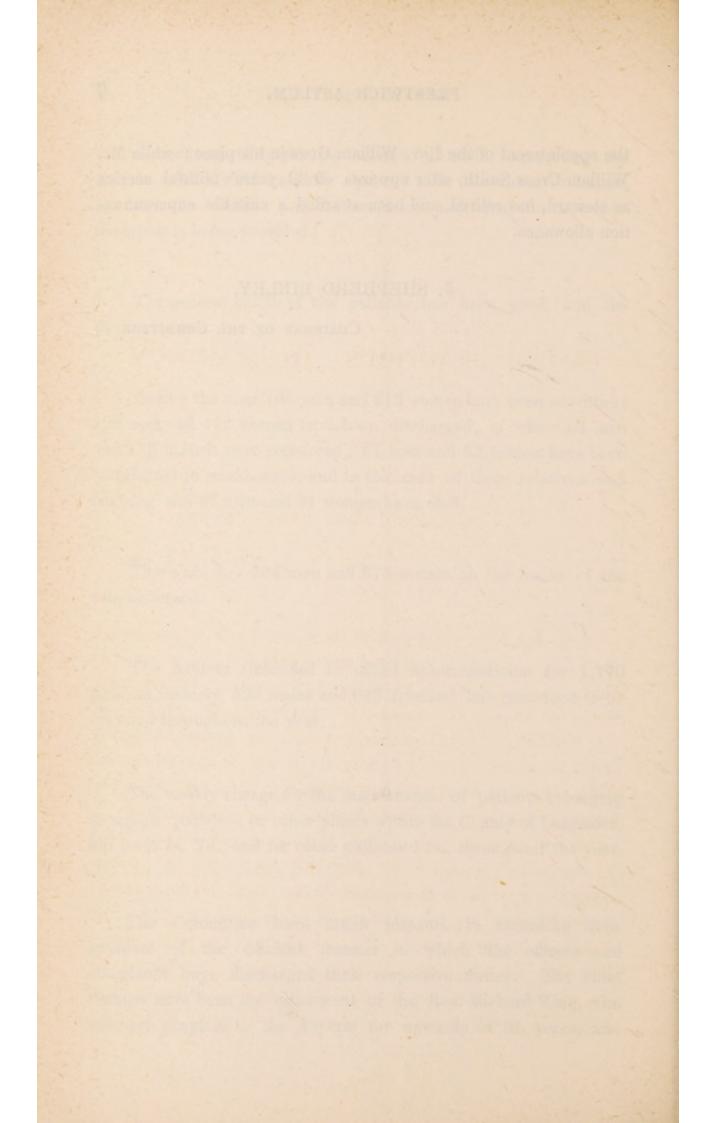

The weekly charge for the maintenance of patients belonging to unions, parishes, or other places within the County of Lancaster, has been 7s. 7d., and for other patients 14s., throughout the year.

The Committee have much pleasure in recording their approval of the efficient manner in which the officers and attendants have discharged their respective duties. The chief changes have been the retirement of the Rev. Richard King, who had been chaplain to the Asylum for upwards of 31 years, and

the appointment of the Rev. William Goss in his place; while Mr. William Cross Smith, after upwards of 30 years' faithful service as steward, has retired, and been awarded a suitable superannuation allowance.

### J. SHEPHERD BIRLEY,

CHAIRMAN OF THE COMMITTEE.

## REPORT

OF THE

## Commissioners in Lunacy.

Lancashire Lunatic Asylum, Prestwich,

March 16th, 1882.

We may begin our Report of the result of our Annual Inspection of this Asylum, commenced on the 14th inst., by expressing a highly favourable opinion of its present condition and officering. We have remarked improvement in many wards, the comfort and cheerfulness of which have been enhanced by further decoration and additional objects of interest; while the neatness and cleanliness of all leave nothing to desire. This Asylum is probably, in the way of ward decoration and embellishment, in advance of most, if not all, other English asylums. The outlay on this has been moderate, for much has been done by patients' labour; and we can bear testimony to the value of the work as a remedial agent, and as a means of tranquilizing even the most violent among the inmates. We have had the opportunity, too, of observing the soothing and reassuring effect of cheerful and pleasant surroundings on the patients newly admitted, of whom there were several during our inspection.

The patients, almost universally, were quiet and orderly during our visit. Very little discontent was manifested, except at the continual detention in the Asylum, and we did not detect any legitimate ground of complaint.

We are satisfied with the state of the patients' dress, and with the personal condition of most. Some men were untidy, and possibly an improvement in this respect might be effected. No patient was wearing an exceptionally strong dress. We saw, on each of the two preceding days, the dining halls of either Division filled with patients at dinner. The fare seemed to give satisfaction, and the conduct of the patients was good.

Turning now to the usual statistics, we find that the present number of patients on the books is 1,219; 542 being males, and 677 being females. There is an increase, therefore, of 27 patients over the number at the visit paid by our colleagues on the 25th of March of last year, and a considerable excess of the number who can be properly accommodated. The consequent overcrowding cannot, we fear, be sensibly diminished before the completion of the Annexe, to which we shall presently refer. It would be greater, were it not that here, as at the other Asylums of this County, epileptic and general paralytic patients are, for the time, refused admission.

Since the last visit 180 males and 233 females, making a total of 413 patients, have been admitted; 67 males and 109 females have been discharged; and 22 males and 29 females have died. Of the patients discharged 176 are recorded as "recovered," 158 as "relieved," and one as "not improved," and 135 of the two latter classes were discharged to workhouses.

The deaths were few in proportion to the number of patients treated, and were due to ordinary causes, which in 41 instances were verified or ascertained by *post mortem* examination. The Asylum has been free from epidemics. A few isolated cases of erysipelas and one of measles (which the patient had on admission) occurred; and one patient was received with fractured ribs.

The ratio of recoveries to admissions in 1881 was 45.25 per cent. for both sexes, and the death-rate 5.1 per cent. of the average number resident; but these rates have doubtless been seriously affected by the refusal to receive patients suffering from epilepsy and general paralysis. The present weekly charge per head is 7s. 7d.; the weekly cost, 8s. 63d. The difference is paid out of a present balance felt to be unnecessarily large. The bodily health of the patients is, at present, satisfactory on the whole. Under medical treatment are 19 males and 27 females. The number of patients confined to bed is not large. We find no record of the use of mechanical restraint, and but 7 patients, 1 male and 6 females, have been secluded, the male on two and the females on 11 occasions, and for a total duration, in all, of  $81\frac{1}{2}$  hours. We have not omitted the usual inquiries into the general system of treatment and management followed here. The useful employment of the patients is largely promoted, and we learn from the records that about 75 per cent. of each sex are daily occupied in some description of useful work. In addition to keeping up the stock for the existing Asylum, we find that all the necessary clothing and shoes, and much of the furniture for the Annexe, have been made here. The attendance at divine service, Church of England and Roman Catholic, is much the same as reported in the last entry, as is also that at the associated entertainments, which are of the usual frequency.

As regards the exercise of the patients, we think there is room for improvement. Eighty men, or thereabouts, take walks beyond the Asylum estate weekly; and the patients (exclusive of men employed on the land) who daily walk beyond the airing courts are

about 50 men and 120 women. We should hope that when the roads and walks in connection with the Annexe are formed, these numbers will be considerably increased.

The present staff of attendants appears to be respectable and efficient, and to be of adequate strength. We give the rates of wages :—Male attendants enter at £30 a-year; at the end of six months receive £35 a-year, with an annual increase of £1 up to £50. Female nurses begin at £18 10s. a-year wages, which at the end of six months are increased to £20, and advance by £1 a-year to £30. Charge attendants on the male side have £10, on the female side £5, per annum extra. The night attendants have additions of £5 and £3 respectively. These attendants are six for the male and eight for the female division, with, in each case, a superintendent night-watch.

The structural improvements and additions which we have to mention include new New Gasworks; additions to the Day-rooms of Wards 2 and 3 in each Division, which greatly add to the comfort of those wards; a new Boiler-house; a new Entrance Lodge near the Prestwich road; an addition to the day space of No. 1 Ward on the male side, which was occupied by women, will be useful as a place to smoke in; and the asphalting of walks in the grounds.

Works requiring early attention are the removal of the Piggeries, the entire reconstruction of the Workshops, and the improvement of the Laundry, which is now too small. The acquisition of the land between the Asylum and the Prestwich road will allow of an important addition to the male airing grounds.

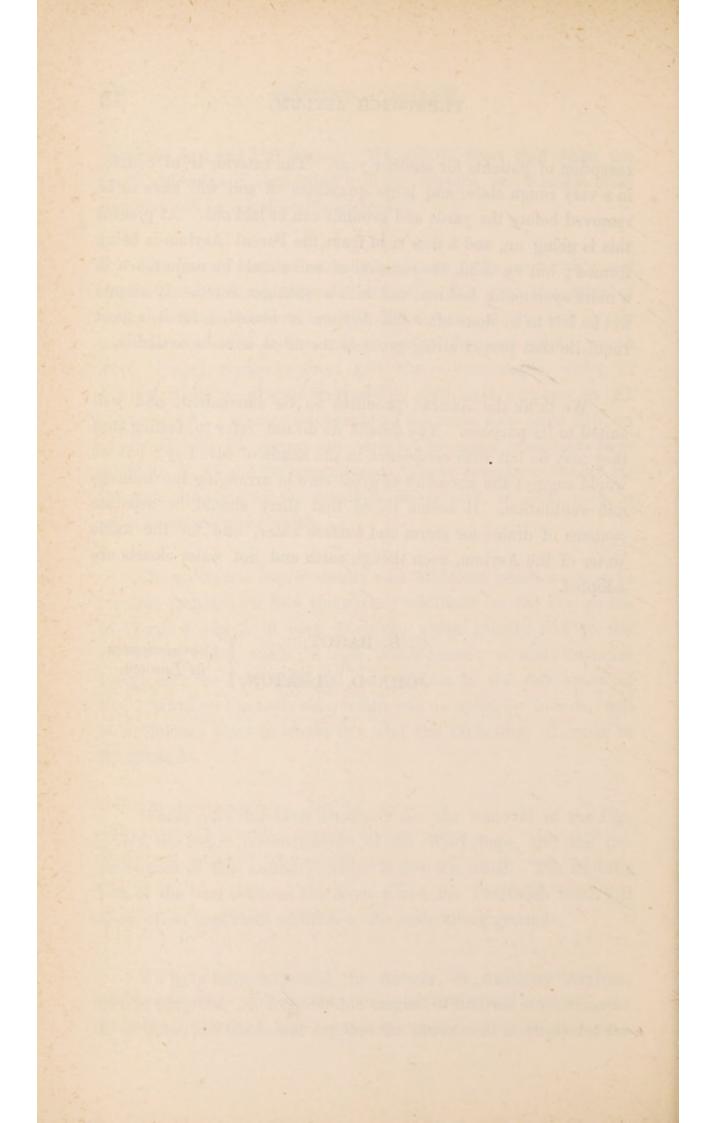

We have fully inspected the Annexe, or Auxiliary Asylum, now in progress. A considerable amount of internal work remains to be done, and we do not suppose the wards will be ready for the

reception of patients for another year. The exterior is, of course, in a very rough state, and large quantities of soil will have to be removed before the yards and grounds can be laid out. At present this is going on, and a new road from the Parent Asylum is being formed; but we think the removal of soil should be undertaken in a more systematic fashion, and with a stronger force. It should not be left to be done after the Asylum is occupied, for it is most requisite that proper airing grounds should at once be available.

We think the Annexe promises to be convenient, and well suited to its purpose. The details we do not refer to, feeling that they may be left with confidence in the hands of Mr. Ley; but we would suggest the necessity of great care in arranging the drainage and ventilation. It seems to us that there should be separate systems of drains for storm and surface water, and for the waste water of the Asylum, even though earth and not water closets are adopted.

> C. S. BAGOT, JOHN D. CLEATON,

Commissioners in Lunacy.

## REPORT

#### OF THE

## MEDICAL SUPERINTENDENT.

GENTLEMEN,

I have the honour to lay before you my Report of the condition of the Asylum and its management during the year recently come to a close. Adjoined to this Report is the Treasurer's statement of the accounts during that period, and the usual statistical Tables detailing the movements of the inmates and the general results of treatment.

There were in the Asylum at the commencement of 1882 1,199 patients, 534 men and 665 women; during the year 385 have been admitted, 165 men and 220 women; making the whole number under treatment 1,584. The total number of discharges amount to 301, 128 men and 173 women, leaving, therefore, at the end of the year 533 men and 680 women, or a total of 1,213.

The year closed with 14 more patients than at its commencement, and the daily average number resident (1,209) exceeded by

11 that of the previous year. The highest number in the house at any time has been 1,225, and the lowest 1,190. It will, therefore, be seen that we have never had any vacancies, and that throughout the year our accommodation has been overtaxed, and the house at times inconveniently crowded. As far as possible, all have been received who were likely to suffer from want of proper treatment; but, as in former years, many applications, numbering in all about 180, had to be refused admission. I trust this will be the last time I shall have to report that, owing to want of room, cases have been compelled to seek relief elsewhere. The progress made towards the completion of the Annexe leads me to hope that before the close of the present year we shall be prepared to admit all applicants as they arise. As it happened, the opening of the Whittingham Annexe relieved the pressure by providing accommodation for the majority of those cases that failed to find room here.

The admissions, which amount to 385,—fewer by 29 than the number of the previous year—were limited almost entirely to cases chargeable to the various Unions of this County. Two were transferred from Broadmoor, nine came from the various gaols of the district, 66 were brought under charge of the police, and two were removed from Netley Hospital under the warrant of the Secretary of State for the disposal of soldiers who become insane.

Of the total number of admissions 82, or about 20 per cent., had had previous attacks of insanity, and these re-admissions comprise 70 who had left the Asylum recovered, five who had previously been sent out to the care of friends, and seven who were re-admitted from workhouses. Fifty-five of these re-admissions had been away from the Asylum able to follow their usual avocations for periods varying from one to 25 years. Twelve patients discharged during the temporary remission of their insanity relapsed soon after discharge, after exposure to the cares and excitement of life, and two relapsed cases were admitted twice during the year. About 130 patients, or over 36 per cent. of the total admissions, suffered from forms of insanity practically incurable from the outset. Of these 42 per cent. were suffering from general paralysis and other forms of progressive disease of the brain or nervous centres, and 78 of the admissions had been insane for such a length of time that no reasonable hope of recovery could be anticipated.

The discharges amount to 301, and include 123 cases which were either entrusted to the care of their friends or transferred to the workhouses of their respective Unions. The total recoveries amount to 178, which number, calculated upon the admissions, gives a recovery rate of over 46 per cent., or 1 per cent. higher than the rate of last year. The average recovery rate for the preceding ten years has been 46 per cent.

The mortality amounts to 70, which gives a death-rate, calculated upon the average number resident, of 5.8, and of 4.4 on the total number under treatment. The mortality in 1881 was very slightly lower, but the average rate for the previous ten years was 7.9 on the average number resident, and 5.8 on the total number under treatment. The only death in which a coroner's inquest was held was in that of a patient who died from the effects of a blow received from another patient. All the details of this unfortunate accident were fully reported to the Committee at the time of the occurrence, and therefore need no further comment. With this exception, there was nothing special in the causes of death. The death-rate of the males proves to be nearly twice as large as that of the females. Thirteen of the male mortality resulted from general paralysis, nine from apoplexy, convulsions, and other forms of brain disease. Among the females the chief cause of death has been maniacal exhaustion, eight patients having succumbed to it; general paralysis was fatal in six instances.

Throughout the year there has been complete immunity from infectious disorders, and the general health of the inmates has been fairly good. I think that the low death-rate of the last and of the preceding ten years may be accepted as an indication that a fair average state of health has been maintained, and that the sanitary condition of the Asylum has been satisfactory. Forty-five *post mortem* examinations were made during the year; in every instance, in fact, when permission was not refused by the friends.

In Table 10 are detailed, as correctly as they can be ascertained, the causes of the insanity among the admissions. Information regarding their antecedent history has been carefully gathered from all reliable sources, and arranged upon the plan now issued by the Commissioners in Lunacy. It will be found that, as in previous years, a large number of cases owed their insanity to the predisposition to the disease inherited from progenitors, or acquired from the occurrence of previous attacks, in combination with various exciting causes, such as intemperance in drink, immorality, domestic and business troubles, anxiety, poverty, and overwork. In about 21 per cent. of the admissions there was direct evidence of a constitutional tendency to the disease through inherited defective nervous organisation. Drink was clearly traced as a powerful contributing factor in about 19 per cent. of the total admissions, and the puerperal state was productive of insanity in 16 per cent. of the female admissions. The other prominent causes were injuries to the head, ill-health, and the decay and degeneration of old age.

The moral treatment of the patients has been conducted on the same general principles as detailed in previous reports. Occupation continues, as heretofore, to form a prominent feature in the administration of this Asylum, the daily records showing that a large number of patients—more than 70 per cent. of both sexes—have been usefully and profitably employed, the men on the

farm and grounds, or in the various workshops; the women in the kitchen, laundry, sewing-room, or in general house work. The almost incessant rains of the summer and autumn interfered considerably with outdoor occupation, and with farming and gardening operations; but, notwithstanding the unusually unfavourable season, the profits from the land in cultivation have been fairly satisfactory. Owing to the severe storms and frosts of the preceding winters, considerable repairs were needed to the roofs, chimneys, and other parts of the building. In addition to these repairs, much work has been done by the patients and the staff in painting and whitewashing the interior of the wards and offices, and in other works of a sanitary character. The improvements effected during the year have been important, and will add considerably to the comfort and efficiency of the institution. They principally consist in the enlargement of the female reception ward by the addition of a day-room, and a dormitory to contain 20 beds; the enlargement of the boilerhouse, and the addition of a new boiler: and the erection of coal and coke sheds for the storage of fuel for winter consumption. There has been no falling off in the various amusements and recreations. In the winter two, and sometimes three, evenings a week, are devoted to associated entertainments, such as dancing, exhibitions of magic lantern, concerts, &c. During the summer months, weather permitting, there are frequent games, and matches at cricket and lawn tennis, and other outdoor amusements.

The average weekly cost of each patient has been only 8s.  $0\frac{1}{2}d$ . throughout the year, a rate which will be found to be much below the maintenance rate of similar institutions. But, as the cost of many of the chief articles of consumption, notably that of meat and potatoes, has reached a much higher price of late than has been the case for many years, it is highly improbable that this low charge will be maintained. As the charge to the various Unions has continued for more than twelve months at the rate of 7s. 7d. per head per week, a very considerable reduction has been made in the balance on the maintenance account.

The Commissioners in Lunacy visited the Asylum on the 14th, 15th, and 16th of March last. Their Report is printed along with this.

Several important changes have occurred amongst the officers during the year. By the failing health and resignation, in March last, of Mr. Smith, the Asylum was deprived of the services of a very trustworthy officer. Mr. Smith had filled the post of steward for nearly thirty years, and he carried with him on his retirement the best wishes of all. His long and meritorious services were fittingly rewarded by a retiring allowance of £180 per annum. Mr. Smith was succeeded by Mr. R. Redman, who brought with him a varied experience of the duties gathered from several years' connection with similar institutions. In July last Dr. Sankey resigned the post of assistant medical officer, which he had ably filled for nearly four years, and was succeeded by Dr. Murray, whose steady co-operation in all things relating to the welfare and success of the institution merits my best thanks. In September last the Rev. R. King, who had held the office of chaplain from the opening of the Asylum, was obliged, in consequence of failing health, to tender his resignation, and a retiring allowance of £320 per annum was granted to him at the Quarter Sessions in December. Mr. King's departure was much regretted by the inmates. He has been succeeded by the Rev. R. Goss, who has actively taken ap the duties of the chaplaincy. The vacant post of assistant medical officer has been filled by the appointment of Dr. H. R. Clunn, who formerly occupied a similar position, and who, consequently, was familiar with the duties of the office.

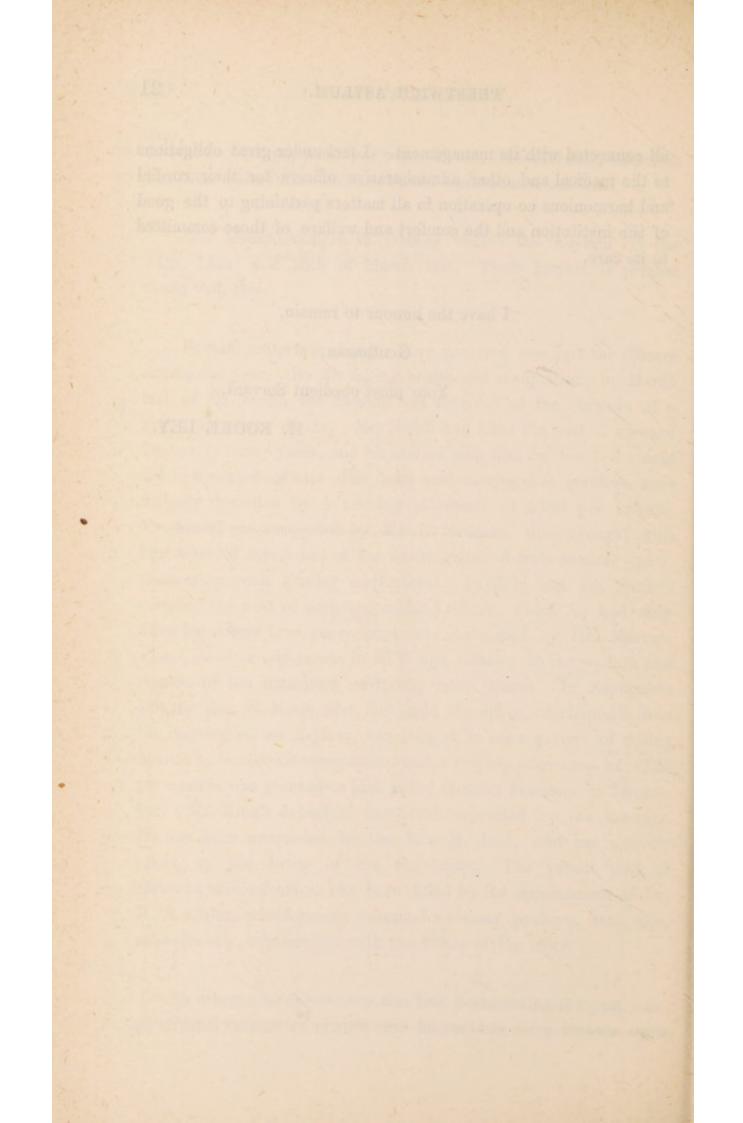

In a house so crowded as this has been during the past year, an unusual amount of anxiety and labour has been thrown upon all connected with its management. I feel under great obligations to the medical and other administrative officers for their cordial and harmonious co-operation in all matters pertaining to the good of the institution and the comfort and welfare of those committed to its care.

I have the honour to remain,

Gentlemen,

Your most obedient Servant,

H. ROOKE LEY.
