REPORT OF THE COMMITTEE OF VISITORS

OF THE

TO THE

General Council of the County of Lancaster

**THE COUNTY LUNATIC ASYLUM**

**AT LANCASTER.**

The Committee of Visitors of the County Lunatic Asylum at Lancaster, in accordance with the provisions of the Asylum Act of 1853, do hereby report to the General Council the annual report of the state and condition of the Asylum, and of such other matters connected with it as the Committee think it expedient the Council should be informed.

Of the general and economical management of the Asylum your Committee has again the satisfaction of making a most satisfactory report. The proper duties of the several officers have, during the past year, been diligently and faithfully performed, and with respect to the success and attendance upon which we have every reason to believe, beyond the personal care of the patients, in one instance only has a complaint been made to your Committee of any negligence or dereliction; on the contrary, your Committee is disposed to believe that they have by their exertions and attention contributed greatly to the comfort and welfare of the patients.

THE COUNTY LUNATIC ASYLUM

AT LANCASTER

# REPORT OF THE COMMITTEE OF VISITORS

OF THE

COUNTY LUNATIC ASYLUM AT LANCASTER,

TO THE

*Adjourned General Annual Session held January 2nd, 1856.*

---

*To Her Majesty's Justices of the Peace for the*

*County of Lancaster in General Session assembled.*

The Committee of the Lancaster County Lunatic Asylum beg leave, in accordance with the provisions of the Asylum Act of 1853, to submit to the General Sessions its annual report of the state and condition of the Asylum, and of such other matters connected with it as the Committee think it expedient the County should be informed.

Of the general condition and management of the Asylum your Committee has again the satisfaction of making a most favorable report. The proper duties of the superior officers have, during the past year, been diligently and faithfully performed; and with respect to the nurses and attendants, upon whom in a great measure must, of necessity, devolve the personal care of the patients, in one instance only has a complaint been made to your Committee of any negligence or ill-conduct; on the contrary, your Committee is disposed to believe that they have by their care and attention contributed greatly to the comfort and welfare of the patients.

In the case of Mr. Bailie, the chief attendant on the male side, your Committee thought it right to grant him (though unsolicited) a trifling increase of salary, as a mark of the sense it entertained of his general good conduct.

There has been one change only among the superior officers during the year. Mr. Wilson, the House Surgeon, resigned his situation in the autumn, and Mr. Stark has been appointed in his place at a salary of £80. per annum, with a yearly increase of £10. until it reaches £120.

The number of patients admitted during the year has been 184, viz.—96 males and 88 females; the average daily number being 681.

The number of deaths has been 79, viz.—53 males and 26 females. The recoveries 52, viz.—19 males and 33 females. The discharges upon the application of relations and guardians of the poor 26.

At no time of the year has the Asylum been overcrowded; and your Committee refers with much pleasure to the general good health and comfort enjoyed by the patients.

There has been no refusal of admission except in two instances, when the character of the patients was such as rendered them unfit for an Asylum.

Your Committee has received the following report from the Chaplain:—

“I have pleasure in recording another year’s experience of the beneficial influence of religious teaching on the minds of the insane poor under my charge. Divine service in our

chapel has been attended during the year by as many of the patients as could be comfortably seated, without a single instance of unquietness or disturbance having occurred. The devout demeanor and hearty joining in the peoples' part of our liturgy, has been not unfrequently remarked by visitors who have joined us in worship. That with respect to our present chapel accommodation for the patients, I am bold to express my decided conviction (not hastily impressed upon my mind, but growing day by day) that it is utterly inadequate to the accommodation of the patients. The chapel was opened in 1842, and intended to seat 270 persons. Not more than 216 can be seated with ease and comfort. In 1842 there were upwards of 100 patients less than we have now. The buildings have been enlarged greatly since then : the chapel remains the same. Many, especially amongst the women, have to be kept back, or can only be allowed to come at irregular intervals of time, who would come if there was room."

With respect to the weekly rate charged to parishes for the maintenance and care of patients, your Committee regrets to state that in consequence of the high price of provisions, no reduction could be made from the eight shillings and twopence as fixed at the commencement of the year. At the same time your Committee is not without hope that this weekly charge may shortly be reduced to seven shillings and seven pence.

The cemetery for the township of Lancaster being now completed and consecrated, your Committee was advised by the medical officers to close the burial ground attached to the Asylum. Your Committee concurred in the propriety of this advice, and all interments for the

future will now take place in the new cemetery ; and the disused burial ground of the Asylum, in which rest the bodies of more than 1,500 of our brethren, will be planted with evergreens and preserved in decent and befitting order.

The insufficient accommodation afforded by the two hospitals has been before reported upon, both by the Commissioners in Lunacy and the medical officers of the Asylum ; and in June last an application was made at the General Session for a grant of £746., to enable your Committee to carry out the plan of enlargement proposed by the architects, Messrs. Sharpe and Paley. The grant having been made, contracts were immediately entered into, and your Committee expects that early in the ensuing year the buildings will be completed and fit for the reception of patients. Your Committee has pleasure in stating that in addition to this much needed enlargement of the hospitals, an increase of accommodation for 12 patients, as well as a convenient dining room and domestic offices, will now be obtained, at a cost of about £65. per head.

It is scarcely necessary to remark that in Lunatic Asylums many of its inmates have, previous to their admission, attempted self-destruction ; and that every precaution becomes necessary to guard against this tendency, as well by vigilance on the part of the attendants, as by removing every source of temptation within the boundary of the establishment.

The large reservoir which supplies the Asylum with water is situated within the grounds, at the distance of about 200 yards from the back entrance, and has a depth of water when full of 10 feet. It is now too late to discuss the propriety of such an arrangement ; but the necessity of some protection pressed itself upon the attention of your Committee

in consequence of a successful attempt at suicide on the part of a male patient in January last. There had also been a fatal case in the same place only two years before. At the urgent request of the medical officers, who represented the impossibility of preventing such occurrences, your Committee determined to erect a wire fence seven feet six inches high entirely round the reservoir, and it is hoped that occurrences of a similar distressing kind will now for the future be prevented.

In consequence of the low situation in which the Lancaster Asylum is placed, your Committee have long thought it important that attention should be paid to the grounds near and around it, with a view of giving them a more airy and cheerful aspect. For this purpose various improvements have lately been made under the able direction of Mr. Mc. Pherson. The west wing of the building has been thrown open by the removal of a large quantity of earth; the high gloomy looking walls that surrounded the airing yards have been lowered, and the sloping banks sown with lawn grass and planted. These have added much to the cheerful appearance of the building, and tended greatly to improve its ventilation. The noble terrace walk, to which your Committee alluded in its last year's report, is now finished. It extends the whole length of the grounds on the western side, and is upwards of 700 yards long by 12 feet wide. A walk leading over the heights, and connecting with this terrace, gives a further addition in extent of 1,400 yards, which, with a branch walk 8 feet wide in front of the Asylum, make together a beautiful continuous walk of more than a mile and a half for the healthful exercise of the patients.

The buildings of the Asylum have recently been examined, and the architect, Mr. Sharpe, reports that they are all in a state of good repair.

He confirms also the opinion of your Committee previously expressed, that the hospitals will be ready for occupation probably in February next.

Your Committee has again to express its deep regret that no suitable accommodation has yet been provided for the separate confinement of Criminal Lunatics, but that all the inconveniences and evils of their association with the ordinary inmates of our Asylums are still suffered to exist.

THOS. MACKRETH,

Chairman.

*Lancaster County Lunatic Asylum,*

*1st January, 1856.*

LANCASTER ASYLUM

We have to day seen the patients who were generally tranquil; and have inspected their wards, which are clean, well-ventilated and comfortable.

## REPORT OF THE COMMISSIONERS IN LUNACY.

---

---

*Lancaster Asylum,*  
*March 17th, 1855.*

Since the last visit of the Commissioners on the 24th October last, 48 patients have been admitted, 20 have been discharged, (of whom 14 were recovered,) and 40, namely 25 males and 15 females, have died; 9 of the deaths being ascribed to diseases of the chest and lungs, 14 to general paralysis, and the rest to various other causes, including one case of suicide, upon which an inquest was held.

There are now 653 patients in the Asylum, of whom 322 are males, and 331 (including two who are out on leave) are females. 90 patients are registered as being at present under medical treatment, and 4 as having been secluded during the last week. It appears that 299 males and 252 females (altogether 551 patients) are employed in various ways, and about 270 attend church on Sundays, when the Church Service is regularly performed.

In reference to the points noticed in the entry of the last Visiting Commissioners, we find that the trough bedsteads are less used. The other points remain as before.

We have to day seen the patients, who were generally tranquil ; and have inspected their wards, which are clean, well-ventilated and and comfortable.

Upon the whole the Establishment appears to be in good condition, and to be under very careful and judicious management.

(Signed)

B. W. PROCTER.

J. R. HUME.

Commissioners in Lunacy.

## MEDICAL REPORT.

During the year ending on the 31st of December, there have been admitted 184 patients—96 men, and 88 women. Of this number about an equal proportion has been sent from the Northern Hundreds, and the Hundred of West Derby; and about twenty admissions have been from the Salford Hundred.

It has been the subject of remark in the reports of former years, that of the cases admitted, many have had their insanity complicated with epilepsy or paralysis; and, during the year, a large addition has been made to the permanent residents of the Asylum from the above causes; doubtless in most, if not all the cases, there has been sufficient reason to render removal from the Workhouse a matter of necessity, therefore no attempt at selection has been made, and it is believed that no difficulty has been experienced in the prompt removal of a patient wherever it has been deemed desirable by the parish authorities.

With a view to relieve the tendency to overcrowding which exists in this Asylum, as well as in the other two in the County, a ready acquiescence has been given to all applications for the removal of chronic cases to a Workhouse, and during the year, 14 patients have been so disposed of, without being attended in any instance with an unfavorable result.

The daily average number has been 681, upon this there has been a mortality amounting to  $11\frac{1}{2}$  per cent; the causes of death do not differ materially from those met with in former years. The number of deaths amongst the women has been unusually small, being only 26, whilst the mortality on the men's side has been above the average. The recoveries have been 52, being somewhat below the return of the preceding year, and it is a gratification to state that one patient was discharged recovered, after a residence in the Asylum of six years.

During the autumn and winter months the alterations and extensions of the hospitals have been in progress, and it is confidently expected that the men's hospital will be fit for the reception of patients before the 1st of February. The women's hospital is not so far advanced, and will most probably not be finished for a month or two later. Happily, during the progress of the works, the Institution has been quite free from any disease of an epidemic character, hence the amount of inconvenience has not been so great as otherwise might have arisen.

The proposed alterations will afford more suitable accommodation than has hitherto existed; a dining-room was much needed, and the more complete arrangements in connection with the bath-rooms and lavatories, as well as the separate rooms now for the first time supplied, will make the hospitals much more convenient, and better adapted for the sick and the infirm.

The new wings of the hospitals, on both sides of the Institution, have so far encroached upon the already limited space intervening between the old building and the boundary wall, as to render it necessary to extend the area behind. The removal of the high walls now existing, will give an extensive view of the country, as well as improve the ventilation, and afford extended accommodation in the airing courts.

The steam chests, and warming pipes are being conveyed through the main galleries on the men's side of the Institution, and will shortly be available for warmth and ventilation. No doubt is entertained of the value of this measure, as the full benefit of this system of warming the galleries has now been experienced for some time on the women's side of the building.

Mr. Wilson the House-Surgeon tendered his resignation in the month of September last, after a residence of two years and a half. It is due to Mr. Wilson to state that during that time he gained the full confidence of the Medical Officers, and that he laboured assiduously and faithfully in the discharge of his professional duties. Mr. Stark was appointed to succeed him, and from his high medical testimonials, and excellent moral recommendations, there is reason to believe that his appointment will give every satisfaction.

The general conduct of the Asylum does not call for any special remark, but it is a gratification to add that there has been every disposition evinced by the officers and servants to promote the best interests of the Institution.

E. D. DE VITRÉ,  
Visiting Physician.

JOHN BROADHURST,  
Surgeon and Superintendent.

*County Lunatic Asylum,  
Lancaster, Feb. 1856.*

The main object of the present paper is to describe the  
 main features of the system of ventilation and  
 available for research and ventilation. The main object of the  
 value of the measure, as the full benefit of this system of  
 galleries has not been experienced for some time at the  
 the building is to be erected and which will be  
 Mr. Wilson the House Surgeon tendered his resignation in the month

REPORT OF THE COMMITTEE OF VISITORS

WEST MIDDLESEX COUNTY ASYLUM

1880-1881

**THE COUNTY LUNATIC ASYLUM  
AT PRESTWICH.**

Presented to the County Council at their meeting on the 16th and 17th January, 1882.

The Asylum is an institution for the reception and treatment of the insane and the feeble-minded of the County of West Middlesex.

Some necessary alterations have been made to the Asylum, by which a great portion of the accommodation has been added for the reception of patients, a greater number of day-patients and other arrangements have been effected.

The buildings have been improved, and the furniture and other articles required by the staff and patients, and the necessary arrangements for the greater part of the work in the Asylum.

THE COUNTY LUNATIC ASYLUM

AT PRESTWICH

REPORT OF THE

COMMISSIONERS

FOR THE YEAR 1881

LONDON

# REPORT OF THE COMMITTEE OF VISITORS

OF THE

COUNTY LUNATIC ASYLUM AT PRESTWICH,

TO THE

*Adjourned General Annual Session held January 2nd, 1856.*

---

*County Lunatic Asylum,*

*Prestwich, 1st January, 1856.*

The Committee of Visitors of the County Lunatic Asylum at Prestwich present the following report for the past year, to the Court of General Annual Session, in accordance with the provisions of the Act 16 and 17 Victoria, cap. 97.

The Asylum is in all respects in a satisfactory condition. Its eligibility continues to receive confirmation from the health of the patients, and the freedom of the institution from contagious diseases.

Some necessary alterations have been made in the Asylum, by which, in that portion of the establishment not originally intended for the reception of patients, a greater number of day-rooms and other conveniences have been obtained.

The buildings have been whitewashed, externally painted, and generally repaired by the attendants and patients, who have also performed the greater part of the work in the recent alterations.

The grounds continue to improve in order, and the gardens and farm to be productive and profitable.

The Committee desire again to bring before the notice of the Court the extreme difficulty which is often felt in reserving a suitable amount of accommodation for urgent cases.

During the past year 108 males and 106 females have been admitted ; 57 males and 88 females have been discharged (43 males and 75 females being cured) ; and 37 males and 21 females have died.

The Asylum is capable of containing 512 patients, and there are now 250 males and 252 females on the books of the establishment.

In conclusion, the Visitors desire to express their approbation of the conduct of the officers and servants of the institution, and of the mode in which they continue to discharge their respective duties.

THOS. S. MILLS,

Chairman of the Committee of Visitors.

## REPORT OF SUPERINTENDENT.

---

*County of Lancaster Asylum,*

*Prestwich, 17th Jan. 1856.*

Gentlemen,

I have the honour of presenting to you my fifth annual report, to which are annexed the usual statistical tables.

The number of patients remaining in the Asylum on the 1st of January 1855, was 490, viz.—236 men and 254 women. The number admitted in the year was 214, (108 men and 106 women,) making a total of 704 under care and treatment during that period. The removals and deaths have been as follow :—

118 have been discharged, recovered ;

3 ditto relieved ;

20 ditto unimproved ;

4 (3 of whom were criminals) have escaped ; and

58 have died :

leaving 502 in the Asylum on the 1st of January 1856.

It is worthy of notice that the proportion of deaths is considerably less than that of any previous year, the proportion of recoveries being greater.

As usual, general paralysis has been the chief cause of the mortality, more than half of the deaths being the result of that disease.

I have again the gratification of reporting that no casualties of any kind have occurred to cause anxiety to those entrusted with the management of the institution, and that the general health of the patients, throughout the year, has been remarkably good.

Those important adjuncts to medical treatment, employment and recreation, although not particularized, have been studiously attended to as in former years.

In compliance with your request that I should report particularly upon the capabilities of the Asylum as to its accommodation, I can only say that what I attempted two years since to bring forcibly under your notice, viz. — the insufficiency of the Asylum for the requirements of the district—still more strongly claims your consideration. Each year the difficulties in receiving patients have increased, and numerous applications for admission have been consequently refused.

The admissions during the year 1853 amounted to 323, in 1854 to 248, and in 1855 to only 214. These facts alone, to my mind, show the desirableness of increased accommodation; as, to the crowded state

of the Asylum, and not to any decline in the unfortunate malady, is to be ascribed the diminution in the numbers admitted.

Table No. XIII. will shew in what proportions the admissions from different localities have decreased. It will be seen that from Salford (a Union of considerable importance) not one patient has been admitted during the past year.

The following report was left by the Commissioners in Lunacy at their last visit :—

*“Prestwich Asylum,*

*“March 9th, 1855.*

“Since the last visit of the Commissioners, on the 16th of October last, 77 patients have been admitted, 42 have been discharged, and 28 have died: 17 dying from general paralysis, 3 from exhaustion after mania, and the others mainly from disease of the heart and lungs.

“There are now 494 patients in the Asylum, viz.—235 males and 259 females. Of these about 22 are under medical treatment; and 3 male and 4 female patients appear to have been secluded during the last week.

“We have to day inspected the Asylum, which is clean,

well-ventilated, and in good order throughout its various bed-rooms, sitting-rooms and galleries. These are generally furnished with many convenient articles, manufactured principally by the patients, and numerous engravings decorate the walls. The bedding, which we opened and examined in several of the wards, is clean and sufficient, and the establishment is generally comfortable. We noticed some of the patients as being apparently convalescent or in an improving state, and we learn that 16 patients are about to be recommended to the Committee of Visitors (as being fit for discharge) this day.

“We learn that about 180 males and 190 females are employed in various ways, 50 of the males being employed out of doors.

“About 300 patients of both sexes join in the religious exercises which take place regularly here, and which it is said are attended with a beneficial effect.

“The dietary remains the same as before, and the same amusements are provided for the patients as have been before noticed in the preceding entries of the Visiting Commissioners.

“Upon the whole the institution appears to be in a very

satisfactory state, and to be under careful and judicious management.

Signed,

“ J. R. HUME.

“ B. W. PROCTER.

“ Commissioners in Lunacy.”

The average weekly cost per patient during the year was 7s. 6d.69.

I remain, Gentlemen,

Your obedient humble Servant,

J. HOLLAND, F.R.C.S.

Superintendent,

*To the Committee of Visitors  
of the County of Lancaster Asylum,  
Prestwich.*

RESOLUTIONS

Resolved, That the following resolutions be adopted, to-wit:

Resolved, That the sum of \$1000 be appropriated for the purchase of books for the library.

Resolved, That the sum of \$500 be appropriated for the purchase of furniture for the library.

Resolved, That the sum of \$250 be appropriated for the purchase of maps for the library.

Resolved, That the sum of \$125 be appropriated for the purchase of globes for the library.

Resolved, That the sum of \$62.50 be appropriated for the purchase of a clock for the library.

Resolved, That

REPORT OF THE COMMITTEE OF VISITORS

**THE COUNTY LUNATIC ASYLUM  
AT RAINHILL.**

THE COUNTY LUNATIC ASYLUM

AT RAINHILL

# REPORT OF THE COMMITTEE OF VISITORS

OF THE

COUNTY LUNATIC ASYLUM AT RAINHILL,

TO THE

*Adjourned Annual Sessions held January 2nd, 1856.*

It is with respectful regret your Committee refer to the death of their Chairman, the Venerable Archdeacon Brooks, to whose courtesy, consideration, and punctuality in the discharge of the duties of Chairman, they were so much indebted for the unanimity and harmony of their proceedings.

The admissions have been lower than for several years past. The Asylum has been full throughout the year, and patients have only been received as vacancies occurred by deaths and discharges. Numerous applications for admission had consequently to be refused, the patients being, as far as practicable, sent on to the Lancaster Asylum.

Great improvements have been effected in the comfort and cheerfulness of the wards, during the last twelve months, by the addition of much useful furniture, such as tables, sofas, easy chairs, and pictures; the whole of the Joiner's and Cabinetmaker's work, comprised therein, has been done by the patients, assisted by their artisan superintendents, and the outlay has thus been greatly diminished.

The sums expended during the year, under the heads of repairs, alterations, and improvements, have been considerably above the average ; this has been due to the following circumstances :—

It has been found necessary to point a large proportion of the main building and boundary wall.

The steam engine boilers and main water pipes have required extensive repair.

Certain additions, alterations and improvements, in the kitchen offices, which were much needed, were determined upon, and have been completed.

The Asylum clock, formerly placed in front of the old Chapel, has had another illuminated dial added, and it has been fixed in a more convenient situation, namely, in one of the central towers, which has been altered and elevated to receive it.

A main outlet sewer, 500 yards in length, has been constructed for carrying away the overflow from the Asylum liquid manure tanks, to a distant stream, without danger or annoyance to the public.

Besides the sources of expenditure above enumerated, the Committee have thought it desirable not to postpone any longer the erection of the new Chapel. In the early part of the present year they therefore entered into a contract for building it, in accordance with plans submitted to the Annual Adjourned Sessions in Jan. 1854. The work is progressing satisfactorily and the Chapel will, it is expected, be fit for use in March next.

The produce of the farm and garden has been greater than in any preceeding year, and the institution has been proportionably benefitted in a pecuniary as well as a sanitary point of view, and the Committee have the satisfaction of stating that notwithstanding the high price of provisions the cost of maintenance is less than it was this time last year.

The planting and laying out the grounds is gradually progressing, and the removal of rock, and substitution of soil in the kitchen garden, is is being proceeded with, affording ample out door occupation for the men patients.

In the last month a fire broke out in the Tailor's shop, during the dinner hour of the patients, and destroyed some clothing, fittings, and part of the roof, it was however happily extinguished by the meritorious exertions of the attendants and patients, before any great amount of damage was done.

The Commissioners in Lunacy visited the Asylum in March last, and left the following report:—

*“Rainhill Asylum,*

*March 12th, 1855.*

“Since the last visit of the Commissioners on the 25th of March, 1854, 143 patients have been admitted, 89 have been discharged, (69 of whom were recovered,) and 55 have died, 10 dying from disease of the brain, 13 from general paralysis, 8 from consumption, and the rest from various other causes.

“ There are now 400 patients (184 men and 216 women) in the Asylum, 41 of whom are registered as being under medical treatment. No one was secluded at the time of our visit, but two patients appear to have been secluded during the last week.

“ We have to day seen the patients of both sexes, all of whom (with the exception of one or two females) were tranquil at the time of our visit. We have also inspected the various wards used by them which are clean and in good order.

“ In reference to the points noticed in the last entry of the Commissioners we find—

“ Firstly—That easy chairs and settees have been added.

“ Secondly—The additional washing accommodation, necessary, has been provided.

“ Thirdly—That the old Chapel is being pulled down, and a commencement has been made to erect a new one.

“ Fourthly—That the well has been deepened, and that there is now a sufficiency of water.

“ We learn that about three-fourths of the patients are employed in various ways, and that about 110 attend the prayers, which are regularly read to them.

“ We beg to suggest for the consideration of the Visitors, whether it will not be advantageous to the patients that the open corridors, communicating with the different wards, should have the means of being closed whenever necessary.”

“ Upon the whole we consider the condition of the Asylum to be very satisfactory, and to be under good management.

(Signed) “ B. W. PROCTOR,

“ J. R. HUME,

“ Commissioners in Lunacy.”

In consequence of the continued high price of provisions the Committee have as yet been unable to reduce the weekly charge to the parishes.

The general statistics will be published with the report of the Medical Superintendent.

As the value of the reports of your Committee depends upon the full information they convey, and their fidelity, they feel it necessary to refer to the fact that in the month of November last certain grave charges were brought against the Chaplain, General and Medical Superintendents, and one of the former male ward Attendants, by a late officer of the Asylum.

Your Committee entered upon a prompt and close enquiry into these charges, in presence of all the parties concerned, who are now connected with the Asylum, and came unanimously to the conclusion that the

charges were not proved, and that the result justified them in retaining their confidence in those of their present officers whose conduct had been impeached.

The Committee feel that this enquiry will prove valuable as a pledge to the public, a guarantee to the patients, (several of whom were examined before them) and a useful admonition to all connected with the Institution, that no alleged abuses will be brought under the notice of the Committee without receiving a prompt and searching investigation.

The Committee have the satisfaction of confirming their former report of the zeal and ability of the Matron.

WILLIAM RATHBONE,

*27th December, 1855.*

Chairman.

REPORT OF THE RESIDENT  
MEDICAL OFFICER & SUPERINTENDENT.

---

---

*County Lunatic Asylum,  
Rainhill, March, 1856.*

Gentlemen,

In compliance with the regulations, I have the honor to submit to you the fifth annual report of the progress of the Institution. The general results are, as usual, comprised in the statistical tables which are appended, and to the chief features of interest in which I beg to draw your attention.

Table No. I, shews that the admissions during the past year have been 104, against 122 for the year 1854. This number does not however represent the whole of the fresh cases of Insanity which have occurred in the district during that period. The various Unions and Parishes comprised within the West Derby Hundred have, during the year 1855, sent 197 patients to Asylums, of which number 161 have proceeded from the Parish of Liverpool and Union of West Derby. Applications for admission at Rainhill were made in most of the above cases, and such as could not be received were sent to Lancaster, and in a few instances to the Private Asylum at Haydock Lodge.

The house has been quite full throughout the year ; the average daily number resident has been 400, which is higher than for any year since the opening of the Institution.

In the anxiety which has been felt not to reject any urgent case, all available space in the building has been brought into use, and indeed, many of the rooms have been more crowded with beds than is desirable as a permanent arrangement, or than would be justifiable but for the very pressing necessity for accommodation which exists. From the accumulation of chronic cases, which annually takes place in this as well as the other County Asylums, we may anticipate a yearly diminution in the accommodation available for fresh admissions, and, as there are no grounds for hoping that there will be a reduction in the amount of insanity which is being annually developed, it will be a subject for the earnest consideration and determination of the Magistrates of the County, with as little delay as possible, in what way the future wants of the district are to be provided for.

Twenty men and twenty-five women have been discharged recovered during the year. Of these, six men and three women were out on trial for a month before they were finally released from supervision, and in the instance of one patient, a man who had been twice before insane, it was deemed advisable to extend the period of probation to two months.

The beneficial operation of the clause in the last Lunacy Act, which sanctions leave of absence to convalescent patients, has been much felt in promoting and establishing their recovery, and in turning the Asylum accommodation to the greatest possible account, by facilitating their departure from it at the earliest justifiable period.

The number of recoveries has, as might be anticipated from the reduced admission list, been below that of the previous year. In insanity the cures are usually found to bear a tolerably uniform relation to the annual admissions, and in the large County Asylums the proportion varies from about 30 to 55 per cent. At this Institution, during the past year, it has been 43·26 per cent. The recoveries, as compared with the admissions since the opening of the Asylum, have been as follows:—  
\* 1851, 10 per cent. ; 1852, 32 per cent. ; 1853, 35 per cent. ; 1854, 50 per cent. ; 1855, 43 per cent.

One woman who was discharged in the early part of the year, was re-admitted after an absence of five months.

It is well known that when any important organ has once been inflamed or otherwise diseased, or has had its functions seriously deranged, there is a predisposition to a return of the affection from slight causes. This is especially the case with regard to insanity, in which, although the brain itself may not invariably be perceptibly diseased, the functions of that organ are always greatly disordered. If in addition we remember that after recovery and a return to the world, the causes which originally produced the derangement are, in a large proportion of instances, still in operation, it will not be a matter of surprise that relapses are found to be comparatively frequent. It appears that out of the 104 patients admitted during the past year, 14 had previously been in lunatic asylums during some period of their lives varying from one to twelve years ago. Of these, 4 had been formerly patients in this institution, 6 at the Lancaster asylum, and the remaining 4 at other public or private asylums.

\* This being the first year of the opening of the Institution, many chronic and incurable cases were probably admitted from Workhouses and Private Asylums.

The whole of those who are described as having been discharged "unimproved" have been, with one exception, transferred to other asylums, as being the institutions for the districts in which the parishes were situated to which the patients were respectively chargeable.

On reference to Table XIV, it will be seen that the deaths during the past year have been 42, or 8.38 per cent. of the total number treated, a lower rate of mortality than has hitherto occurred in the experience of the institution. In 1851 the deaths, as compared with the total number treated, were 9.73 per cent., in 1852 10.27 per cent., 1853, 11.30 per cent. ; 1854, 10.18 per cent. The preponderance of general paralysis and pulmonary consumption as causes of death, is observed in the returns of most public asylums, the former disease being chiefly confined to the men, and the latter being more prevalent among the women patients. Of 16 individuals affected with general paralysis who have died during the past year, 6 were women, an unusually large proportion considering the comparative infrequency of the disease among females. The other prevailing cause of death has been pulmonary consumption, of which there have been 7 cases, all women.

From Tables V., VI. and VII., showing the Countries, Religious Profession, and Physical Condition of the patients admitted during the year, it appears that 25 per cent. were Irish ; and that 50 per cent of the whole number are recorded as being, at the time of their reception into the asylum, in a reduced and exhausted state of health. It has been observed for several years past, that the patients admitted from the town of Liverpool are, as a class, much more seriously shattered in bodily health and condition, from poverty, dissipation, and other noxious influences incidental to large towns, than those who come from rural and agricultural districts ; and it has been found at this institution as

well as, I believe, at the large asylum at Lancaster, that perfect mental restoration is less general and persistent, and that the mortality is higher among the class referred to than among the insane derivable from an agricultural population.

Table VIII enumerates the alleged or probable Causes of Insanity. It will be observed that intemperance continues to hold the foremost rank among the influences which are believed to have produced the malady. Twenty-seven cases (26 per cent. of the total admissions in the year) are more or less clearly traceable to drunkenness and dissipation, and it is very probable that these causes have exercised a predisposing influence in other instances, the history of which has been less clearly made out.

Two men (one being a criminal patient) have made their escape during the year, and remain at large. The attempts at escape have, however, been comparatively few, notwithstanding the lowness of the walls and the great amount of personal liberty enjoyed by the patients. The disposition to get away from the institution in this manner, appears to have been much less since a practice, always to a certain extent in use, has been made more general, namely, allowing all who are able and willing to take walks into the neighbouring country frequently, instead of being restricted for exercise to the grounds of the institution.

The health of the patients generally has been good throughout the year, and the institution has been free from epidemic diseases of all kinds. Several of the patients and female attendants, however, suffered during the severe weather of the early part of last year, from exposure to the cold in passing to and fro from the heated wards along the open colonnades which connect the different blocks of buildings: it is there-

fore very satisfactory that the Committee have determined to glaze in these openings so as to give us the means of closing them in severe weather, as suggested by the Commissioners in Lunacy. The proposed alteration will also give us another advantage not hitherto possessed, namely, the opportunity of securing all the outer doors at night with the master key, a very essential precaution in maintaining the discipline of the institution, where the lowness of the walls offers such temptations to the attendants and servants to evade the regulations of the establishment.

The excellent supply of vegetables obtained from the kitchen garden, the whole of which, to the extent of several acres, is now in cultivation, has afforded the means of varying the dietary of the patients during the summer and autumn to a greater extent than is generally found in institutions of this kind. Peas, beans, salads, celery, and rhubarb are now brought into requisition, as well as potatoes, cabbage, and turnips, and thus a grateful as well as salutary variety is easily made in the vegetables at dinner, without increase of cost, and with benefit and gratification to the patients. It has been especially remarked that obstinate diarrhoea and dysentery have been much less frequent since salads have been introduced into the dietary. This is accounted for by the fact that the soluble salts of the plant, which are essential constituents of the blood of healthy human beings, are not filtered away and lost by boiling or cooking, but are retained and assimilated; and it is unquestionably better occasionally to run some risk of even a slight attack of indigestion from eating uncooked vegetables, than to deprive the system of the safeguards against those more formidable and intractable disorders, chronic diarrhoea, dysentery and scurvy.

In the month of April last, the old Chapel, which was much too small

for the wants of the institution, was pulled down, and a new one has since been erected at the south-eastern extremity of the grounds, about 120 yards from the Asylum. The excavation for the foundations, and much of the laborers' work, has been done by the patients, by which means the cost of the new building has been considerably diminished. The accomodation will now be ample, and it will soon be fit for use. Since the removal of the old Chapel, morning and evening Sunday service has been held in the Recreation Hall; and as, on account of the smallness of the room, only a comparatively small proportion of the patients could attend, the Chaplain has established short services in the different wards on the Sunday afternoons, at which three-fourths of the entire number of the patients in the Asylum have usually been present. The Chaplain expresses himself strongly in favor of the value of these services which occupy a portion of a long afternoon in a manner both agreeable and, it is to be hoped, profitable to the patients.

A short series of elementary lectures on popular astronomy, followed by a repetition of a part of his former course on the Holy Land, has been given during the year by the Chaplain, and, as both courses were illustrated by diagrams and dissolving views shewn by the aid of the magic lantern, (the management of which was undertaken by Mr. Adams, the assistant surgeon)—the lectures were intelligible and interesting to a good many of the patients. The recreation and the employment of the patients continue indeed, as heretofore, to be followed by the most beneficial consequences, and every attempt is made not to curtail their freedom or their pleasures farther than is deemed essential for their safety and recovery.

The assemblies for music and dancing have now been continued weekly for two years and a half with excellent effect, and it is often a

subject of regret that the limited size of the Recreation Hall does not allow these useful privileges to be extended to all those patients who are capable of being beneficially influenced by them. During the summer, parties of 250 meet for dancing and games of various kinds upon the bowling green, and most of these patients would be able to attend the weekly evening parties if there was accommodation for them. As it is however, the number is obliged to be limited to about 100. An enlargement of the Recreation Hall would, in addition, render it available for assembling together a large proportion of the patients of both sexes for daily morning prayers to be read by the Chaplain, a regulation which is adopted at the sister Asylum at Prestwich, and which has many advantages over the plan of the attendants reading a form of family prayer in their respective wards.

The laying out, planting, and levelling of the land is carried on with the utmost activity. The removal of the Chapel, and the alteration which it necessitates in the disposition and the level of the road and walks in front of the main building, have retarded the completion of this part of the grounds. The whole of the space between and the north lodge, is however now laid out, including a bowling green, cricket and quoiting grounds, and a skittle alley, all of which are near to each other, and in a convenient situation for use by the patients after workhours in the evenings, and at such other times as these recreations are permitted.

Many of the alterations and additions to the furniture and fittings during the past year have tended greatly to increase the comfort and cheerfulness of the wards, the appearance of which has also been much improved by the addition of upwards of 200 prints, which have been framed and glazed by the patients during this period. An extract from

the Daily Register of the state of the patients, their work lists, and a table of the estimated value of their labor are appended at the end of this report, from which it will be seen what proportion of patients are employed, and with what apparent advantage to the institution.

Most of the Committee are aware that in the month of November last a fire unfortunately broke out in the tailor's shop, during the dinner hour, while the attendant and the patients were absent in the ward. It was impossible to ascertain with accuracy how the fire originated, but it commenced in some straw mattresses, which probably became accidentally ignited, either by a spark from the stove, or possibly by a piece of burning rag dropped by a patient who may have been attempting to get a light for his pipe, unperceived by the attendant, on leaving the shop. The whole of the clothing and fittings in the shop were destroyed, as well as a portion of the roof, the timber in which had been ignited by burning straw carried up the ventilating flue. By extraordinary exertion on the part of the attendants, and of several patients who were permitted to assist them, the fire was subdued in about an hour, a short time before the arrival of the fire-engine, for which a messenger had been despatched to the town of St. Helens immediately on the alarm being given. The greater part of the water was obtained from a small ornamental pond adjacent, which fortunately happened to be full, and the whole had to be carried *by hand* both on to the roof, as well as to the lower part of the building.

This, it is needless to say, is a very imperfect arrangement for extinguishing a fire, and had it in the present instance occurred in the night, disastrous consequences might have ensued. At a Lunatic Asylum, where there are so many individuals who cannot protect or help them-

selves, and whose lives would therefore be proportionably endangered in the event of a fire occurring, especially if it should happen at night, it is of all places, most important that effectual means should exist for putting out a fire. The only thoroughly satisfactory arrangement appears to be that of a high level cistern or reservoir holding 10,000 gallons of water, from which pipes should be laid down in the different airing courts, and water plugs placed so that by connecting thereto hose, a stream of water could be brought to bear at any moment upon any part of the buildings. As no such arrangement, nor any efficient substitute, exists at this institution, I have felt it my duty to press the matter on the notice of the Committee, and I am glad to find that a motion will be brought before the April Sessions for a grant of money to provide the requisite pipes, water plugs, and hose. This is a step in the right direction; for by these means the steam pump can be made to force water to the desired height. In order, however, to provide against the dreadful contingency of a fire at night, when there is no steam, and when consequently the pump would not be available until the fire had probably become uncontrollable, the idea of a high level cistern ought not to be abandoned, and I hope the Committee will make it an essential part of the first plan for the enlargement of the Asylum.

In closing this report, I beg to be allowed to express on behalf of myself and colleagues a sincere feeling of sorrow and regret at the death of our late lamented Chairman, The Venerable Archdeacon Brooks. In him the institution has lost a warm and earnest supporter, the patients a humane and liberal protector, and the officers a kind and considerate adviser.

My grateful acknowledgements are offered to the Committee of Visitors

for their continued support in the arduous and responsible duties of the management of the institution; and to the Assistant Surgeon, the Chaplain, the Steward, and the Matron, for their cordial co-operation and assistance.

I have the honor to be,

Gentlemen,

Your obedient humble Servant,

JOHN D. CLEATON,

Resident Medical Officer and Superintendent.
