OF THE

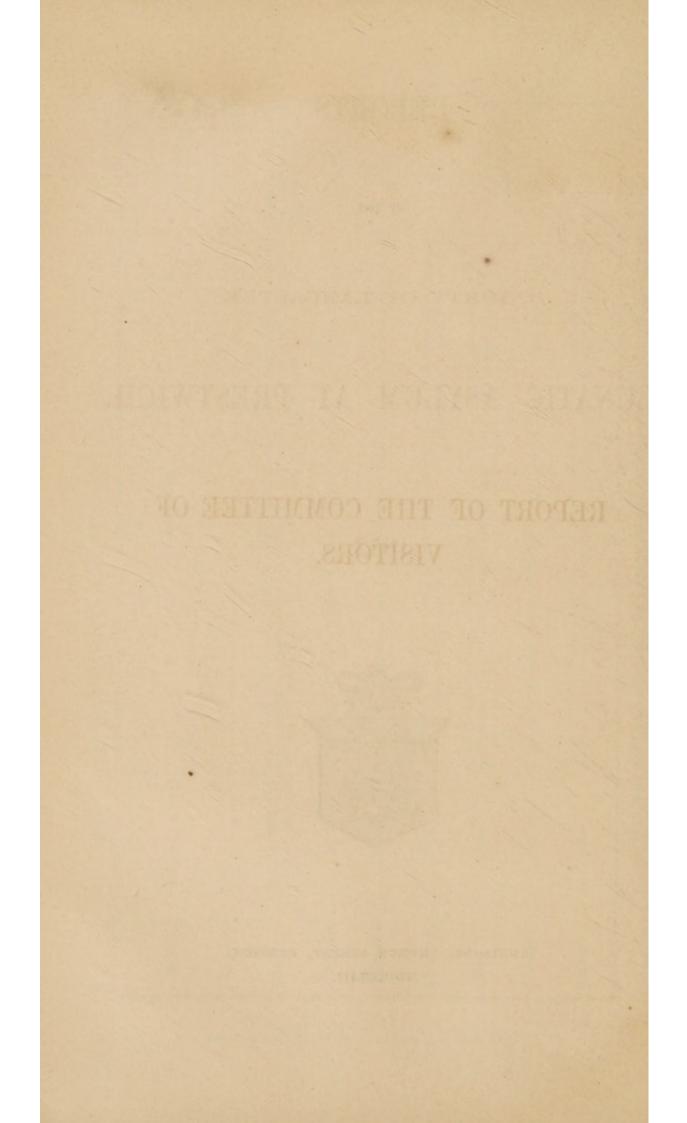

COUNTY OF LANCASTER

LUNATIC ASYLUM AT PRESTWICH.

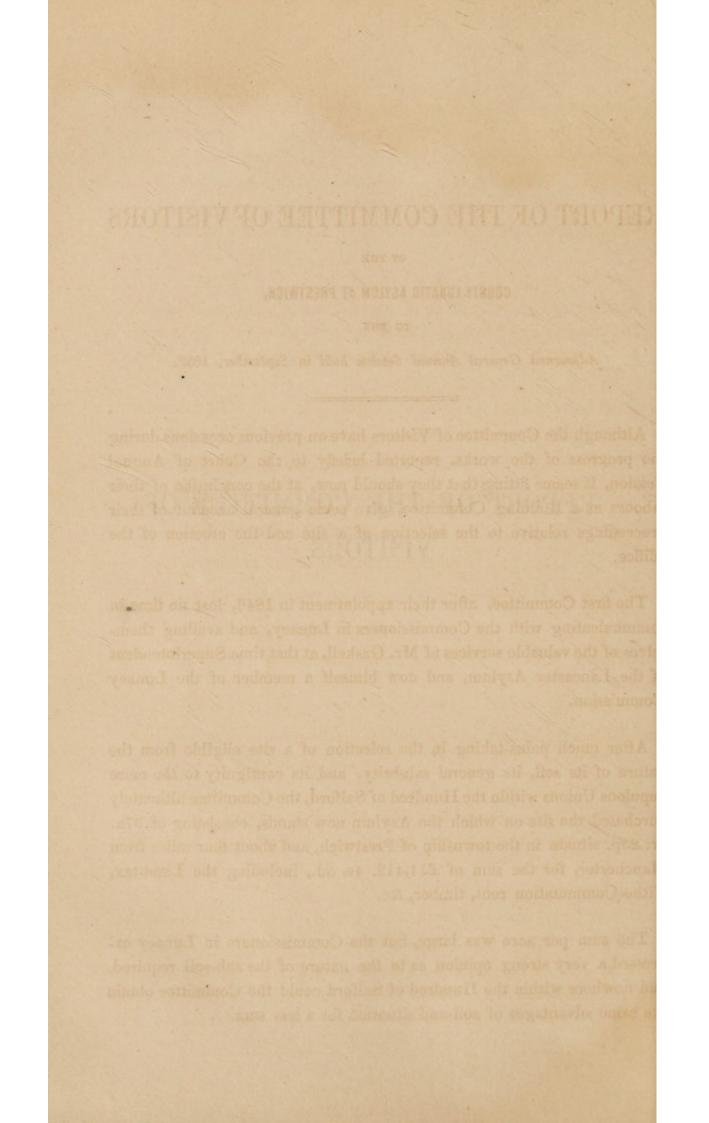

1852.

ADDISONS, CHURCH STREET, PRESTON. MDCCCLIII.

REPORT OF THE COMMITTEE OF VISITORS.

REPORT OF THE COMMITTEE OF VISITORS

OF THE

COUNTY LUNATIC ASYLUM AT PRESTWICH,

TO THE

Adjourned General Annual Session held in September, 1852.

Although the Committee of Visitors have on previous occasions during the progress of the works, reported briefly to the Court of Annual Session, it seems fitting that they should now, at the conclusion of their labours as a Building Committee, give some general account of their proceedings relative to the selection of a site and the erection of the edifice.

The first Committee, after their appointment in 1846, lost no time in communicating with the Commissioners in Lunacy, and availing themselves of the valuable services of Mr. Gaskell, at that time Superintendent of the Lancaster Asylum, and now himself a member of the Lunacy Commission.

After much pains-taking in the selection of a site eligible from the nature of its soil, its general salubrity, and its contiguity to the more populous Unions within the Hundred of Salford, the Committee ultimately purchased the site on which the Asylum now stands, consisting of 37a. Ir. 23p. situate in the township of Prestwich, and about four miles from Manchester, for the sum of £11,412. 4s. 5d., including the Land-tax, Tithe-Commutation rent, timber, &c.

The sum per acre was large, but the Commissioners in Lunacy expressed a very strong opinion as to the nature of the sub-soil required, and nowhere within the Hundred of Salford could the Committee obtain the same advantages of soil and situation for a less sum. At the same time that search was being made for a proper site, the Committee invited the competition of Architects of eminence, by offering a premium for the best design for a Lunatic Asylum adapted to the improved system of treating the insane. In the directions given to the Architects, and in selecting the plans which were ultimately agreed upon, the Committee received very important aid from Mr. Gaskell and the Commissioners in Lunacy.

The building, in its general design, is on the detached principle. Its consists of the following separate blocks of buildings, communicating; with each other by several passages or corridors.

- 1.—The domestic department, containing the kitchens, laundry, wash-houses, store-rooms, work-rooms, and other offices.
- 2.-Quiet and orderly wards for males.
- 3.—Infirmary and epileptic wards for males.
- 4.-Violent wards for males.
- 5.-Quiet and orderly wards for females.
- 6.—Infirmary and epileptic wards for females.
- 7.-Violent wards for females.
- 8.—Houses of Superintendent and Chaplain, and Magistrates' rooms.

The chapel is at some distance from all the buildings, and has the character of a small village church.

The farm buildings, stable, gas and engine house, joiners', plumbers', blacksmiths', and mechanics' shops are also at some distance from the main structure.

The whole building is of brick, with stone dressings.

The detached plan is considered to possess peculiar advantages which do not belong to buildings of more compact design, occupying a smaller area, or connected under one continuous roof. It allows of a more e circulation of air—it admits of enlargement at less expense—there ess danger of fire—it provides for a more decided and distant separan of the different classes of patients—and affords facility for more ivenient airing or recreation grounds.

As the structure approached its completion, it was deemed advisable at the Committee should be assisted in their deliberations by some one actically acquainted with all the detail of internal arrangement in ablishments of this kind. Accordingly, at the suggestion of the mmissioners in Lunacy, the Committee proceeded to the appointment the Superintendent of the Asylum in January 1850.

Mr. Holland, who for upwards of three years previously had been Superintendent of the male department in the New County Lunatic sylum for Surrey, was elected out of about thirty competitors. From n the Committee received many most valuable suggestions.

The following sums had been expended in the building and furnishing counts up to the 31st of May last, a fuller and more detailed statement which is appended to this report,

ļ	uildings, including brewhouse, farm, roads, and formations
I	of reservoirs, sewers, &c 61543 18 10
ŝ	rchitect's commission, law charges, stamps, salaries of
I	officers and servants, office account, maintenance, coal,
I	gas, fire-insurance, taxes, and other charges before the
1	Asylum was opened, and the expenses attendant on
I	Messrs. Drinkwater's claim 6118 0 1
	urnishing and clothing 6070 13 1
	£73732 12 0

On the 31st of May last there was a balance of $\pounds 2878$. 19s. 5d, in the unds of the Committee. This sum will enable the Committee to comete their arrangements.

The Asylum, as it now stands, is capable, in the opinion of the Supertendent, of containing 514 patients. The domestic department is of a size and capacity to meet, without further alteration, all the requirementss of a greater number of inmates, should it be found needful at a future period to increase the accommodation in other parts of the building, by an enlargement of or an addition to the present number of wards.

The Asylum was opened for the reception of patients on the 1st of January, 1851: since that time there has been a gradual increase in the number of admissions. The number of patients in the Asylum on the 31st of August was 370.

The Committee have finally to report, that they entertain the most favourable opinion as to the eligibility of the site, and the principles upon which the buildings have been constructed.

And they take this opportunity of expressing their approbation of the zeal and assiduity with which the officers of the establishment have discharged their several duties.

(Signed)

THOS S. MILLS,

Chairman.

J. B. PAUL CHAPPE,

Treasurer and Clerk.

REPORT OF SUPERINTENDENT.

County of Lancaster Lunatic Asylum, Prestwich, March 1853.

GENTLEMEN,

I have the honour of submitting to you the following report of the progress of this Asylum during the past year, being the second since its establishment.

On the 1st of January 1852, the Institution contained 302 patients; 272 have been admitted during the year (137 men and 135 women); 107 have been discharged recovered, 5 relieved, 15 unimproved; 2 have escaped and 57 have died; leaving 388 in the asylum on the 1st of January 1853.

The proportion of cures (39.34 per cent. on the admissions, and 18.64on the total number under treatment) as compared with those of the previous year is greater by one-fourth, the mortality having diminished in the same ratio. In 24 instances death took place in persons who had been admitted with incurable disease of the brain and membranes, combined with general paralysis and epilepsy; in 11 from disease of the heart and lungs; in 5 from natural decay in old age; in 9 from exhaustion after mania; and in the remaining 8 from various causes named in the annexed tables. It is gratifying to be able to say that out of the 107 discharged recovered, 5 only, after an absence of several months, were re-admitted before the expiration of the year; the cause of relapse, in three instances, being a return to habits of intemperance.

The general health of the patients has been remarkably good throughout the year, and the hearty appearance of the inmates gives the best assurance of the sufficiency both of diet and clothing. Of the 388 patients left in the Asylum at the commencement of the year, 99 (or one-fourth of the number) were the subjects of epilepsy and general paralysis; and, in addition to these, 159 were cases of many years' standing, with little or no chance of recovery. The asylum is, therefore, already burthened with patients, to the amount of at least 258, (or two-thirds of the whole) whose maladies are of a hopeless character.

These facts will at once set aside the supposition that this Asylum is too be appropriated chiefly as a curative establishment, and I fear that before very long it will be so full of incurables that very few of the more urgent: cases will gain admission.

The employment of the patients, which was very considerable the first year, has been carried on during the past to a much greater extent, and has helped much to keep down the expenditure. The whole of the interior of the Asylum has been painted and whitewashed by the men under the management of the chief male-attendant, and in like manner the apartments of the House-Surgeon, Steward, and Matron have been painted and papered: the walls of the entrance-hall, staircases and various offices have also been painted by the same hands.

Through the industry of the patients many comforts, at a comparatively trifling expense, have been added to the wards, and many defects remedied which have presented themselves in the working of the establishment. A large quantity of furniture and clothing has also been made by them, and I would here draw your attention to the great amount of work done in the shoemakers' shop, where nine-tenths of the patients employed there have been taught shoemaking and mending by the attendant, several of them having been instructed and rendered competent to make a pair of shoes whilst under treatment for a recent attack of insanity.

All the airing-grounds (one of which has been laid out as a bowlinggreen) are on the point of completion, and the carriage-drive and road connecting the farm buildings with the meadows are also finished, the latter having been a work of great magnitude, in consequence of its having been, for the sake of convenience, carried across a deep ravine. This, with the cultivation of the garden-land, hay-making, and other farming operations, has afforded plenty of out-door occupation. In addition to the annual lists of in-door work, I have subjoined, by your desire, so far as is practicable, another of work done by the patients in the capacity of joiners, plumbers, painters, stonemasons, and smiths, under the superintendence of the respective attendants, although very much more has been accomplished than has been recorded or can be described.

Hitherto the labour has contributed chiefly to diminish the County expenditure, but in future years it is hoped that the maintenance account (which is already very moderate) will be lessened; the average weekly cost per head having been during the first year no more than 8s. 3d., and in the second year only 6s. $8\frac{1}{2}$ d.

Statements having been made reflecting upon the wisdom of those connected with the management of Asylums where labour is much pursued, and hinting that the mortality is thereby increased, I think it will not be out of place on my part, to remark that, upon carefully examining the lists of those who have died in this establishment since its opening, I find that not more than *one-fifth*, during their residence here, ever attempted to employ themselves, and with even more than one-half of these, the occupation was of the slightest possible description; and the results of the general treatment adopted here, as regards the proportion of recoveries, the health of the patients, and the usual quietude of the place, will, I believe, bear a not unfavourable comparison with the generality of County Asylums.

If employment has been studiously urged, recreation has not been forgotten, but advantage has been taken of every means of amusing the inmates. During the summer months, besides the out-door games of cricket, quoits, &c., we have had weekly, through the kind permission of Mr. R. N. Philips, a neighbouring Magistrate, the use of his juvenile band, to the music of which many of the patients, both male and female, danced in the meadows from early in the afternoon till twilight, whilst others, although not joining in the dances, evidently enjoyed the scene as spectators. In the winter months, they have met weekly, after tea, in the large recreation hall, and danced until nine or ten o'clock, to the music of our own brass band, which, through your kind grant and other contributions, we have been enabled to establish. We number fourteen in the band, and this, with the help of some violins and glee-singing, seems to afford great pleasure to the inmates of the establishment.

The church services are continued in full, as usual, two-thirds of the patients, on an average, being present both morning and afternoon;; and the same remarkably quiet manner distinguishes them as heretofore.

It gives me again great pleasure to say that no suicide has taken places since the opening of the Institution, and that no injury of any moments has occurred from the use of tools on the part of the patients. Recourses to mechanical restraint has not been found necessary in any instances during the year.

I purposely abstain from entering into details of the medical means resorted to in the treatment of the insane, looking upon a report of this kind as addressed solely to Magistrates, the great majority of whom would not feel any interest therein. To those who do interest themselves in the purely medical department, the books are always open, in which a full record of each case is kept.

The following report was made by the Commissioners in Lunacy, as too the condition of the Asylum, at their last visit, which, amongst other things, shows the rapid increase of patients since the commencement of the year.

"County of Lancaster Asylum, Prestwich, "March 17th, 1853.

"There are at present in this Asylum 435 patients, of whom 220 are males and 215 are females. 17 patients are registered as being under medical treatment, and 7 males and 5 females as having been secluded during the last week. No one, however, was in seclusion at the time of our visit.

"We learn, on enquiry, that 368 patients (179 men and 186 women) are employed in various ways, a considerable number of the males out of doors; and that 230 patients attend the church services. "Since the last visit of the Commissioners, on the 21st of October 1851, 402 patients have been admitted, 163 have been discharged and 88 have died, many of them from general paralysis.

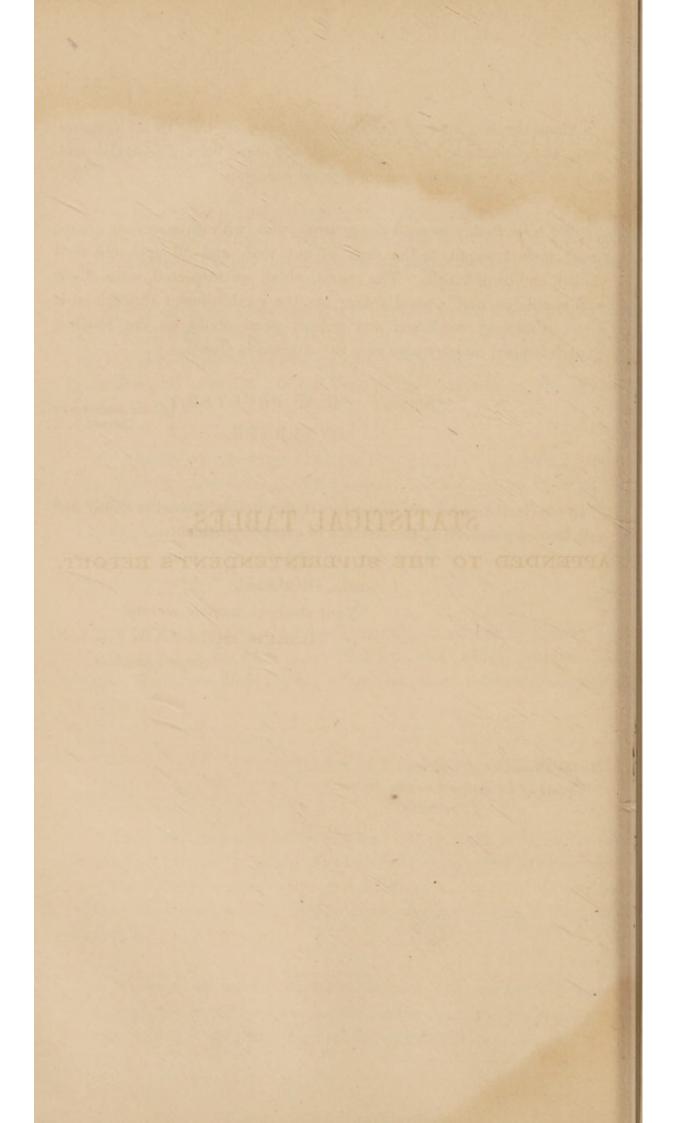

"We have to-day seen all the patients, who (with three or four exceptions) were tranquil at the time of our visit, and all appeared well clothed and comfortable. The rooms, which we inspected, were clean, well-ventilated, and in good order; and the establishment throughout is in a satisfactory condition, and reflects great credit on the Medical Superintendent under whose care the Asylum is placed.

> (Signed) "B. W. PROCTER, Commissioners in "T. TURNER, Lunacy."

In conclusion, I believe I can report favourably upon the steady and satisfactory progress of the Asylum in every department.

> I remain, Gentlemen, Your obedient, humble servant, JOSEPH HOLLAND, F.R.C.S. Superintendent.

To the Committee of Visitors, County of Lancaster Lunatic Asylum, Prestwich.
