REPORT

OF THE

COMMITTEE OF VISITORS

OF THE

LUNATIC ASYLUM AT SNENTON, NOTTINGHAM.

To the Court of Quarter Sessions for the County of Nottingham.

The Committee of Visitors of the County Lunatic Asylum report that the number of lunatics detained under care on 31st December, 1879, was 398—namely, 185 men and 213 women.

Compared with the preceding year, the returns are as follows:—

Year	Admissions Recoveries Relieved Not Improve		Not Improved	Deaths	Remaining	
1878	85	29	5	2	52	390
1879	99	30	7	4	50	398

The increase in the admissions is due to the transfer to this Asylum of all Nottinghamshire lunatics who were maintained in Out-county Asylums. The several unions have thus been relieved of the extra charge for their lodging, and the patients brought under treatment nearer home. The Asylum has been crowded in several of the wards during the year, and the recognized number of 400 occasionally exceeded. The sanitary condition of the inmates has, nevertheless, been satisfactory; and no suicide, serious act of violence, or escape has occurred.

All patients chargeable to the unions in the county have been received, as also those from the parishes recently annexed to the borough. The pressure for accommodation will, however, soon cease, as the Borough Asylum is nearly ready for occupation; and there will be left ample room here, not only for pauper lunatics within the jurisdiction of the Visitors, but for the reception of a considerable number of cases from other counties or boroughs as may hereafter be agreed upon.

The Visitors have voted an annuity of £34 per annum (being two-thirds of her wages and other allowances) to Jane Dowers, for her life, who is 73 years of age, and has been a night-nurse for 21 years, and is incapacitated from following her employment. They ask the Court to confirm this vote, upon the understanding that one-seventh of the amount will be repaid by the Borough of Nottingham, under the terms of the agreement of 1874.

I. G. Gane,
CHAIRMAN.

J. J. Edge.

A. Heymann.

JANUARY 1st, 1880.

ANNUAL REPORT

OF THE SUPERINTENDENT.

Mr. CHAIRMAN, MY LORD, AND GENTLEMEN,

The present annual report of the Lunatic Asylum, at Snenton, is the fifth since the dissolution of the union with the Borough of Nottingham, the twenty-fourth since the severance of the connexion with the voluntary subscribers, and the sixty-ninth from its foundation as an institution for the reception of the insane population of this county. The changes that have taken place during 1879 are set forth in the following table:—

TABLE I.

Showing the admissions, discharges, and deaths during the year 1879:—

				м	P	T

Remaining in the Asylum, 31st Dece	ember	, 187	9	185	213	398
Average number resident during the	year			187	206	393

The increase in the admissions from 85 in 1878, to 99 in 1879, results from the recal of those Nottinghamshire lunatics who had been sent to Asylums at a distance during the crowded state of this establishment dating from 1873, and of those who had fallen chargeable in other counties. The vacancies created in the number of the patients from the Nottingham Union by death or removal after the determination of the contract with the borough, have been filled up as early as possible by those having a legal claim to admission. Five were brought in from Northampton County, four from Leicester Borough, and one each from South Yorkshire, Hanwell, Mickleover, and Gloucester Asylums.

As far as is known, the transfer hither of all lunatics boarded out has been effected, and the necessity for sending persons elsewhere belonging to unions in this county is not likely to recur for many years. The proximate removal of the borough patients to the new Asylum on Mapperley Plains will then enable the Visitors to accommodate more than a hundred persons, after utilising rooms that may be required for other than their present purposes, and increasing the proportion of cubic space for the remaining occupants.

Fifteen of those admitted were afflicted with epilepsy, and ten were from 70 to 80 years of age. The practice of sending from the Union Workhouses patients of the latter class, being imbecile, but harmless, and who merely require the attention of a nurse for the sick, is still resorted to, though contrary to the intention of the Legislature.

The most instructive feature in the history of insanity is a knowledge of its causes, and the *data* of this year show again to how great an extent the disease must be considered preventible. Excluding the relapses, of which there were 23, no fewer than 26 per cent. of the new cases were traceable to intemperance in drink, either singly or combined with certain

predispositions; 4 to accident or injury; 14 to trouble and anxiety; and in as many as 32 hereditary influence was ascertained.

It cannot be too frequently impressed upon the class that fills this Asylum with lunatics and idiots that every act of drunkenness occasions a disorder of the functions of the brain, and its reckless repetition produces permanent disease.

Thirty persons left recovered, that is 30 per cent. on the admissions, including the transfers; or 34 per cent. without them.

The deaths were at the rate of 12 per cent., calculated on the estimated daily average number resident. This is the method adopted by statisticians, but it is liable to this marked imperfection, that the same estimate of the duration of life is taken of the child who dies prematurely of disease, as of the centenarian from natural decay. I therefore append the mean age at death of the inmates of this Asylum, which is 51 years, or the same as in 53 of the healthiest districts in England; and nearly twice as great as in the Liverpool district, where it is 26 years only.

One of the women who died had been an inmate 40 years and 10 months continuously; another 40 years, with an interval of a few months. A county male vagrant, name unknown, died after a residence of 26 years, and four others after 25, 25, 23, and 20 respectively.

The deaths were from ordinary causes, with the exception of a man who succumbed to the combined effects of disease of the ankle-joint, amputation of the limb, and administration of chloroform.

No suicide occurred, and the Asylum has been happily free from such calamity for seven years. Perhaps no more

striking example of the value of preventive measures could be adduced than immunities of this sort. The number of persons who committed suicide in the Nottinghamshire district during the last year recorded by the Registrar-General, was 36.

Having thus spoken of the care of the persons detained, it may not be out of place, in view of the changes that are imminent, to refer to the expenses of management and maintenance as shown in the returns respecting this and all other English County and Borough Asylums, published annually by the authority of Parliament.

During each of the five years noted below the weekly cost of the maintenance of lunatics in this Asylum was below the general average of the counties and boroughs, and notably compared with the latter. The saving thus effected annually on the number of patients detained here being as follows:—

Compared with Bo	rough A	sylu	ms.	With	h Cour	nty A	sylum	s.
	£	8.	d.		£	s.	d.	
1874	2,266	0	0		521	0	0	
1875	2,217	0	0		507	0	0	
1876	2,505	10	6		520	4	4	
1877	2,272	16	8		320	0	4	
1878	1,969	1	10		329	19	1	

All which is respectfully submitted.

Wm. P. Phillimore, M.B.,

SUPERINTENDENT.

SNENTON, JANUARY 15TH, 1880.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

Nottingham County Asylum, August 9, 1879.

We have to-day inspected all parts of this Asylum, and have seen all the patients at present under treatment in it. These are 399 in number, 190 being males, and 209 females. They are thus chargeable:—

	Di.	F.	T.
1.—To County and County Unions	101	103	204
2.—To Old Borough of Nottingham	44	63	107
3.—To Extended ditto	42	43	85
4.—To Borough of Newark	3	0	3

The rate charged for the maintenance of Classes 1 and 3 is 10s. a week; for Class 2, 11s.; and for Class 4, 14s. All the patients chargeable to the County and County Unions are now accommodated in the Asylum, which at present has but one vacant bed. The removal of the borough patients on the completion of the new Borough Asylum will leave a large number of vacancies here.

We proceed to give the usual statistics of the changes which have occurred since the Asylum was last visited by members of our Board, namely on July 22nd, 1878.

	M.	F.	T.
Admitted for first time	44	45	89
Re-admitted	8	8	16
Total admissions			105
Discharged or Removed—	100	144	223
Recovered	15	16	31
Relieved	1	2	3
Not Improved	3	1	4
Total discharges			38
Died	29	29	58

General Paralysis was fatal to 10 males and 4 females, and one male died under the operation of removing the ankle joint, and the effect of chloroform, which was administered by a skilled person. The other deaths were due to causes not calling for special notice.

We observe that the rate of mortality during the period under review was again high, amounting to something over 13.23 per cent. per annum* on the average daily numbers resident, which was, as appears from the Annual Report of this Asylum, the rate for the year 1878. Thirty of the 58 patients who died were of the age of 50 years and upwards, and about one-half of those who were below 50 died of General Paralysis. It is right to mention these circumstances as accounting in some degree for the fact that the rate of mortality is nearly 3 per cent. in excess of that usual in County Asylums.

Only two *post-mortem* examinations have been made, and one inquest held; the latter being on the body of the patient who died under operation.

We regret that *post-mortem* examinations, the value of which in the case of the insane, is now so generally recognized, should not be more frequently made here. No suicide has taken place since the last visit, and there has been no epidemic disease in the Asylum.

All the patients of both sexes were very quiet and well-behaved during our visit, and in a fairly satisfactory condition as regarded neatness of clothing and person. The bodily health of the patients is at present good, and we to-day found only four, all of them women, confined to bed. Under medical treatment there are 14 males and 23 females.

As regards the usual subjects of inquiry, we find that the numbers of the patients usually attending Divine Service and the associated amusements do not vary much from those given last year; nor do the numbers usefully employed. There is, however, a slight increase in the number of women so employed. We must again express the opinion that the patients usefully employed here are too small in proportion to the number under treatment, and we think that well-directed efforts to increase the proportion would meet with success. In connection with this subject, we must again notice the absence of a Head Attendant on the male side.

The staff is of the same strength as at the last visit. We are glad that changes are not very frequent. Thus we find that one male attendant only, and three females, have seen less than twelve months service in the Asylum, and that nine male and nine female attendants (including the Head Nurse) have been over two years. This satisfactory state of things is, we have no doubt, in a large measure due to a liberal scale of wages. The male attendants enter the service at £30. 10s. 6d. per annum, and rise by £1. 4s. 0d. per annum to £42. 10s. 6d.; and the females at £15. 12s. 0d., rising by £1. 4s. 0d. per annum to £24.

The dietary of the patients remains unaltered. We think the addition of some bread and cheese to the dinner on the second pudding day, as recommended last year, would be desirable.

The Medical Journal contains no record of the use of mechanical restraint, but we find recorded a large amount of seclusion. It appears that 19 men were secluded on 36 occasions, and for an aggregate of 300 hours; and that 17 women were so treated on 180 occasions, for a total of 1,200 hours. Four of the women were the subject of seclusion on 123 of the occasions, and during 870 of the hours.

We can report most favourably of the cleanliness and

neatness of the various wards, and of the condition of the beds and bedding.

With the exception of the addition of a better warming apparatus to the Chapel, little has been done in the way of structural improvement since the last visit. No arrangement for the continuous night supervision of male epileptics has yet been brought into operation, nor do we learn that any such improvement, though much required, is in immediate contemplation. We trust that this matter will not be lost sight of, nor those other matters which last year were pointed out as necessary to render more complete the provision made for the care of the epileptics of the female sex. There are at present 29 patients of each sex affected by epilepsy.

Several additions and improvements have from time to time been pointed out as requisite to bring this Asylum to the level of other similar establishments; such as a proper Recreation Room, a larger Chapel, &c. If on this occasion, and in view of the possibly altered state of circumstances which will result from the early removal of the borough patients, we do not press these matters on the attention of the Visitors, it is not that we fail to appreciate their importance.

G. S. Bagot,

John D. Gleaton,

COMMISSIONERS IN LUNACY.

APPENDIX.
