REPORT

OF THE

COMMITTEE OF VISITORS

OF THE

LUNATIC ASYLUM AT SNENTON, NOTTINGHAM.

To the Court of Quarter Sessions for the County of Nottingham.

The Committee of Visitors of the Lunatic Asylum for the County of Nottingham, in presenting their seventy-fourth annual report, are glad to state that the condition of the Asylum is satisfactory. The number of patients in the Asylum on December 31st, 1884, was 344, and they were chargeable as below:—

	м.	F.	т.
To Unions in County of Nottingham ,, County of Nottingham ,, Borough of Nottingham ,, Borough of Newark ,, Out-County Unions ,, Private Patients	121 1 11 11 18 0	146 0 21 6 6 3	$267 \\ 1 \\ 32 \\ 17 \\ 24 \\ 3$
	162	182	344

The weekly charge for 1884 has been reduced for Unions in the County to 9s. 6d. for each patient, instead of 10s. as formerly.

On June 19th, the Assistant Medical Officer, Mr. Jackson, resigned, and was permitted to leave immediately in order that he might commence a practice for himself; Dr. Aplin worked alone until the beginning of August, when Mr. Arthur Lofthouse having been elected Assistant Medical Officer commenced his duties, which he has fulfilled to the satisfaction of the Committee.

A resident Plumber, Painter, and Glazier, has been appointed, and it will be found that after the first cost, caused by the erection of the Workshop, &c., a saving of expense as well as a greater convenience to the Institution has thereby been effected.

A new staircase of stone and brick has been erected as a special provision for escape in case of fire. The bill for the paving of Walker Street has also proved an exceptional addition to the Fabric Account, but the sum of £691 16s. 8d., profit realised by the reception of out-county patients, will go very far to defray the expenses. The Committee are happy to say that no serious accidents, nor any suicide, has occurred during the year.

Several deputations from the Boards of Guardians have inspected the Asylum during the year, and have placed on record their entire approval of the attention given to the patients, and to the general state of the Asylum.

The Asylum and all the inmates have been regularly inspected by the Committee, and to this, combined with the valuable services of the Medical Seperintendent and other Officers, the present satisfactory state of the Asylum is due.

A. Heymann,

CHAIRMAN.

1st JANUARY, 1885.

ANNUAL REPORT

OF THE

SUPERINTENDENT.

MR. CHAIRMAN, MY LORDS, AND GENTLEMEN,

I have pleasure in presenting to you to-day my fourth annual report as Medical Superintendent. The year just past has been unproductive of any event requiring special notice; and my report shall be brief.

On the First of January, 1884, the Asylum contained 359 patients; on the 31st December, 344.—During the year 441 patients have been under treatment. The changes in the population during 1884 have been as follows:—admitted 38 males, 44 females; discharged 21 males, 31 females; died 27 males, 18 females. The daily average resident during the year has been 355; viz. 168 males, and 187 females.

Although numerically fewer than for many years the admissions have comprised the usual class of patients; and a large number of these were suffering from much bodily as well as mental disease. In my last report I had to remark upon the very hopelessly incurable, indeed almost moribund condition in which many of the patients were sent to this Asylum: and it gives me pleasure to report that during 1884 some amendment in this matter has been noticeable; the consequence has been that the death rate is less than last year, and the duration of residence in the Asylum has increased, thus greater opportunities for medical and moral treatment were afforded, and a greater proportion of recoveries resulted. The proportion per cent. of recoveries to admissions is 46.34 (viz. for males 42.10; females 50.0) for the year.

The obituary record presents no feature of special interest : there has been no death from epidemic disease, nor any from suicide or accident. It has not been necessary to hold any coroner's inquest during the year. The proportion of deaths to the total number under treatment has been 10.20; to the daily average number resident 12.67. A large number died of softening of the brain. Only two surgical emergencies of any importance have to be reported. The first was preventable, and should have been prevented. A determined attempt at suicide was made in March by a patient who was well known to be suicidal; she cut her throat deeply, severing the wind pipe, with a sharp carving knife which she had concealed and taken to bed with her. The nurse, by whose wilful disobedience of rules and gross neglect of duties this attempt was permitted, was summarily dismissed. The patient made a good though tedious recovery from the effects of her wound, and has since been transferred to another asylum.

The second case was one of fracture and dislocation of the upper end of the arm bone near the shoulder joint. This was caused by falling heavily in an epileptic fit; no blame attaches to any one for this mishap, which was apparently quite unavoidable.

One birth occurred in the Asylum during the year—an epileptic patient was admitted on 27th May, and a few hours after was delivered of a seven-months child, who only lived about 24 hours. The mother remains here in a state of epileptic dementia.

In the summer the Engineer, who has thoroughly performed the duties of his post for $37\frac{1}{2}$ years, was attacked with rheumatic fever of severe type, although able soon to resume his duties he was not so well able to undertake the *heavy* work; and I found it necessary to recommend that an assistant be appointed. This you sanctioned in December, and with the best results.

The new staircase from the Male Dormitory No. 7 will be quite adequate, as an additional exit in case of fire, to the requirements of the building; in addition to existing appliances two fire extincteurs and a smoke respirator have been purchased. The fire brigade has been drilled at intervals during the year, and each member is familiar with his particular duty. Every official and servant in the Asylum has been supplied with a copy of the "Instructions" in case of fire.

The Commissioners in Lunacy made their usual inspection of the Asylum on the 8th of April, and left a report which has already had your careful attention, and their recommendations have been as far as possible accepted and acted upon.

I am glad to report that the expenses of the Asylum have been low during 1884; the actual weekly cost per capita has been 9s. 3d. only. The saving has been mainly in the item of provisions. The result is due to no stinting or parsimony in the commissariat; the dietary scale has not been reduced; but prices have been less in many instances, and the kitchen garden has been very productive.

I am glad to be able to report that the conduct of the large majority of the attendants and servants has been entirely such as to merit your approbation; very few instances of carelessness or irregularity have been found to mar the general good conduct; however, it has been my painful duty to dismiss two nurses, one for breach of rules and neglect of duty already alluded to; the other for harsh treatment of those patients committed to her care. The usual entertainments have taken place during the year: the fornightly dances being supplemented by musical, dramatic, and "variety" entertainments. Cricket and football matches have been played with local clubs. The employment, as well as entertainment of the patients, is encouraged as much as possible, and all who can be are usefully engaged in gardening and in the several workshops, as well as in the wards, laundry, and kitchen.

Since he commenced his duties in August, Mr. Arthur Lofthouse has rendered me willing and efficient help, and has fully justified your selection of him from a large number of candidates. To him my thanks are due for his cordial co-operation and assistance. I desire also to express my thanks to the staff of officers, and to the head attendant and head nurse, for their conscientious and cordial co-operation, without which the work of the Superintendent would be mostly labour in vain.

In conclusion, permit to thank you for your continued confidence and support, and to assure you of my earnest desire that both may be accorded to me in the furture.

I am,

Mr. Chairman, My Lords, and Gentlemen,

Your faithful and obedient Servant,

Alfred Aplin.

SNENTON, 15th JANUARY, 1885.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

NOTTINGHAM COUNTY LUNATIC ASYLUM,

April 8, 1884.

We have this day inspected this Asylum, with the result of enabling us to say that it is generally in a satisfactory condition. Its capability is not great, but it appears to us that all is done that can be done to make it cheerful and comfortable. The wards are clean, and were to-day sweet and free from bad smells. The position of the closets in some wards, however, as before pointed out, is objectionable and even dangerous, having no external ventilation. This is particularly the case in No. 2 Female Ward. Too many of the floors are still composed of concrete, and the work of laying down instead boarded floors does not seem to progress.

The Committee are probably, and not unnaturally averse from doing much to improve the Asylum, the removal of which to a more country site would seem to be inevitable. Every year it is more and more surrounded by buildings, and becomes more and more unsuitable, by its position, for its purpose. We should hope, indeed, that the question of removal may soon be taken into serious consideration.

As regards the personal condition of the patients, it is fairly good, though among the women we thought that some might have been tidier. We learnt that the women still are ordinarily allowed only one under garment a week, and no night gown, and certainly think that a second, or a night gown, should be supplied. We think, too, that the supply of towels is inadequate. Though clean ones are given daily, there appear not to be more than four or five for each ward.

Nothing important in the way of structural alteration has been done since the last visit; but a plan has been prepared, and will at once be carried out, for an additional staircase to the male detached block. We have seen the plan and approve of it. With this addition the provision, generally, of exits in the event of fire will be very good.

There are a good many feeble patients here, but not many confined to bed. A considerable number, however, are recorded as being under medical treatment The deaths since the visit of our colleagues on 30th October last have been 19, but none from any other than ordinary causes. In 17 instances post-mortem examination was made. No Coroner's Inquest has been necessary. The rate of mortality last year was abnormally high, especially on the male side, reaching 23.97 per cent. on the average daily number resident; and for both sexes it was 16.15 per cent. No epidemic or contagious disease prevailed except the outbreak of smallpox noticed by our colleagues. However as many as 22 men died within six months of their admission into the Asylum, shewing that their previous condition of health must have been bad. The proportion of general paralytics among both male and female patients is still large; 32 men and 13 women are stated to be suffering from that disease. The epileptics are 28 males and 20 females.

An attempt at suicide, fortunately not successful, was made by a woman. There are besides, a good number of minor casualties, such as bruises, cuts from falls, &c., recorded in the Medical Journal.

From the same source we learn that 1 male, on one occasion, and for 10 hours, and 9 females, on 19 occasions, and for a total duration of 117 hours, were secluded: and that a female was restrained for surgical reasons from the 2nd to the 10th March.

Only about 10 patients of each sex go beyond the Asylum Grounds. The patients at Chapel last Sunday were 86 males and 60 females; and about 140 of both sexes attend the associated entertainments which are still given in the ironing room of the laundry.

The proportion of patients employed is about the same as at last visit. Mr. Aplin informs us that only those whose employment is regular are included in the returns.

We find that since the last visit, 22 males and 16 females have been admitted, and 13 males and 14 females discharged, all but two of the latter having recovered. There are at present on the books the number of 176 males and 187 females, 363 in all, one female being absent on trial.

To the County and County Unions 270 patients are chargeable; 36 to Nottingham Borough; 28 to Derby; 17 to Newark; 8 are of the private patient class, and the remainder are variously chargeable. There are vacancies for 4 of each sex. The rates of charge for maintenance are as stated in the last entry.

We should mention that our colleagues' recommendation of the employment of an additional attendant for No. 5 male ward has been adopted.

There are now 11 male and 13 female attendants for day duty, being in the proportion of one to 16 patients in the male, and one to 14 in the female division.

G. S. Bagot, Reginald Southey,

COMMISSIONERS IN LUNACY.
