# REPORT

OF THE

COMMITTEE OF VISITORS

OF THE

LUNATIC ASYLUM AT SNENTON, NOTTINGHAM.

*To the Court of Quarter Sessions for the County  
of Nottingham.*

In compliance with the requirements of the Statute, the Committee present their report of the condition of the Asylum for 1886, and are pleased to be able to state that the general management has been satisfactory, and the financial position remains good.

The number of patients at the end of the year was 321 being 9 less than at its commencement.

The 321 patients are chargeable as follows:—

	M.	F.	T.
To Unions in the County of Nottingham .. ..	126	140	266
„ County of Nottingham.. .. .	1	0	1
„ Borough of Nottingham.. .. .	0	16	16
„ Borough of Newark .. .. .	6	5	11
„ Out-County Unions .. .. .	13	5	18
„ Private Patients .. .. .	3	2	5
„ Criminal Patients .. .. .	3	1	4
	152	169	321

The weekly charge for the year has been 9/- for County patients; Private and Out-County patients are charged 14/-

Much attention has been paid to the Fabric and to the Steam and Water supply pipes, but the expenses will be less than last year, and will be partly covered by the profit made upon the Out-County patients and non-contributing boroughs which amounts to £452 10s. 1d.

The Lady Middleton Fund had a balance in the current account slightly exceeding £100, which has been transferred to the capital of the fund thus raising the annual income to about £20—thus charity is found to be of the greatest benefit to convalescent patients.

The general rules of the Asylum have been revised and approved by your Committee, these rules will be submitted to the Home Secretary for his approval.

During the year the Members of the Committee have frequently visited the Wards of the Asylum, and have found the condition of the patients satisfactory.

The Committee conclude their report by expressing their satisfaction with the way in which the welfare of the patients and the interests of the Institution have been attended to by Dr. Aplin and the whole of the Staff.

*A. Heymann,*

CHAIRMAN.

20th JANUARY, 1887.

# REPORT

OF THE

## MEDICAL SUPERINTENDENT.

---

MR. CHAIRMAN, MY LORDS, AND GENTLEMEN,

I beg to submit a brief report of the Nottinghamshire Asylum for the year 1886 and to append thereto the usual statistical tables.

The patients at the commencement of the year numbered 330; viz., 159 males and 171 females, and at its close 321—viz., 152 males and 169 females. These changes of population were caused as follows:—Admitted 37—34—71, Discharged 19—22—41, Died 25—14—39.

The average number of patients daily resident in the Asylum was, for the year, 161—168. Total 329.

Of the *Admissions* it is necessary to report that they were more equally divided as to sex than last year, and numbered 37—34—71. The bodily health (and probable duration of life) was very poor amongst the males admitted, but of the average character amongst the females.

The *Discharges* comprised 12—15—27 “Recovered,” 6—5—11 “Relieved,” and 1—2—3 “Not Improved.” The recoveries are a little below the average for the males; but this was to be expected from the hopeless nature of the disease in so many of the males admitted. Amongst the females the rate has been just about the average for the females throughout the County and Borough Asylums of England. The number of cases remaining which are “deemed curable” is very small indeed.

The *Deaths* numbered 25—14—39 and show a remarkable disparity between the sexes:—the rate being very high amongst the males and below the average for the women. This disparity is not due to any difference between the condition of life or surroundings of the two sexes whilst in the Asylum, nor to any difference in the amount of care and attention bestowed upon either sex; but appears to be entirely due to the hopeless condition in which so many of the men were admitted. A considerable proportion of these were obviously when examined on admission beyond hope of amendment, and their probable duration of life evidently was very short. Of the twenty-five men who died nine lived less than a year after admission and their average duration of residence amounted to only  $4\frac{1}{2}$  months. The duration of residence in the Asylum of the remaining 16 men exceeded seven years. Amongst the women only one failed to live a year in the Asylum after admission and she was over 81 years of age: the remaining thirteen women’s average length of residence in the Asylum exceeded eleven years. The average age at death of all the males exceeded 52 years and of all the females 55 years: these averages include and are reduced by the deaths of two male and one female epileptic children who died aged 10, 14 and 12 respectively. One

man and four women died after having resided here for periods exceeding 29, 20, 20, 26 and 28 years respectively. Of the causes of death nothing need be said except that they were such as one would expect to find amongst an insane population and comprised a variety of forms of Disease of Brain and Nervous System, and some of the common forms of heart and lung disease.

No death resulted from acute specific fever nor has there been any illness from such diseases as scarlet fever, smallpox, typhoid, &c., during the year. This is a matter for much gratitude as the "spreading" fevers are extremely difficult to deal with in an Asylum, and cause great anxiety and expense as well as a troublesome disturbance of the routine of the establishment.

The *Causes* of the Insanity in those admitted do not differ greatly from those commented on in previous years. Of the 71 patients admitted 22 had previously suffered one or more attacks of Insanity, although not all of these had been previously in an asylum. In thirty-two of the cases Hereditary predisposition was traced; in sixteen intemperance in Drink was regarded as a sole or combined cause; and in other cases drinking habits although discovered were believed to be the result rather than the cause of the insanity. Of the moral causes Mental Worry, Adverse Circumstances, and Domestic Trouble are the most active and are often found in combination with Physical Causes. Bodily disease is very generally found to be present either as sole or part cause of the insanity or a troublesome complication.

As I predicted in my last report the cost of Water has very largely increased during the present financial year; but

a still larger increase would have occurred had not a special apparatus been devised by which the rain water from the cistern in the Basement of No. 1, on the male side, could be largely utilized for sanitary and cleansing purposes before having recourse to the town supply. This alteration affects the accounts of the latter half of the financial year.

A good deal of attention and labour has been requisite to keep the water, steam and gas supply pipes in repair; and much old and worn piping has been replaced by new. Boarded floors in M. 5 and M. 2 have been laid, in place of the old plaster flooring; and a new drain has been laid under F. 1. A new fire alarm bell has been added. New roofing provided for the Joiner's shop and Gardener's tool house. In the spring the Annual Whitewashing throughout the Asylum was effected. The monthly fire drills are continued.

One child has been born in the Asylum during the year. Her mother was pregnant on admission. The infant was sent when about 5 weeks old to the Basford Workhouse and the mother remains in the Asylum.

Attendant William Smith, who was granted a retiring pension on 4th June last year, died on the 14th May in this; he did not live to receive a complete year's payment.

Having regard to our present pecuniary position, with a large balance in hand (the result of economical administration), I think the Committee will be quite able to reduce the weekly charge for County paupers to 8/6 per week. This will not cover the cost of the maintenance, but the deficiency would cause a reduction in the unnecessarily ample, although

very pleasing, balance at the Bankers. The reduction to 8/6 will be welcomed by the contributing Unions at the present time when there is so much depression in Agriculture and other forms of commercial industry.

Both indoor and outdoor work and recreation continue to be encouraged amongst patients of both sexes. My thanks are due to the Police Band, the St. Mary's Minstrels, and others for musical and dramatic entertainments; also to the Rev. A. P. Woodhouse for gifts of flowers from his "flower services," and to Mrs. Barclay for her annual contribution of Christmas cards and letters which are given one to each patient and servant on Christmas Day.

There has been no change in the staff of officers; and very few indeed on the Male side amongst the attendant and servants;—only one man employed in the Asylum counts less than 12 months' service now. On the Female side the changes have been more frequent, but this is not unusual in Asylums.

With very few exceptions the conduct of the attendants and servants has been good, and their attention to their duties commendably intelligent and assiduous. I think a practical evidence of this is seen in the fact that there has been no death by suicide nor any serious accident although the number of suicidal and dangerous patients is considerable; and in many cases these unhappy propensities have attained to an unusually determined and persistent degree. No coroner's enquiry has been requisite.

My thanks are due to my Medical colleague and to all others who have willingly, cordially and honestly done the work of their respective departments and have thereby successfully promoted the welfare of the Asylum, and the comfort, health and safety of the patients.

In conclusion I beg to thank the Committee for their continued confidence and goodwill; and I have the honour to be

Mr. Chairman, my Lords, and Gentlemen,

Your obedient Servant,

*Alfred Aplin.*

JANUARY 20TH, 1887.

# REPORT

OF THE

## COMMISSIONERS IN LUNACY.

---

NOTTINGHAM COUNTY ASYLUM,

April 19, 1886.

The patients on the books this day are 336 in all, 169 of these being males. Since our colleagues were here about 10 months ago 45 men and 25 women have been admitted, 7 men and 15 women have been discharged on recovery, and 3 men and 5 women "relieved" or "not improved." Of the patients on the books 278 belong to the County and County Unions, 17 to Nottingham, 14 to Newark, 19 to Derby, 5 are Private Patients, 2 Criminals, and one is an out County patient. The charge for County patients is 9/6, for Nottingham Borough 12/-, and for the remainder 14/- weekly. One patient, a female private patient, is absent on trial, the remainder have all been seen by us. We went over the whole of the buildings occupied by patients and visited the Laundry, Kitchen, Stores, Offices, Workshops, &c., where we saw the patients usefully employed, and can report favourably of their behaviour, dress, and general health. The wards were clean and in proper order. The majority of the dormitories were free from unpleasant smells, but in 6 and 7 female dormitories, attention is required to the closets, sinks, &c., which, we were told, were always offensive. The general Sanitary arrangements are not such as would be found in a more modern Asylum, and the difficulty of guarding against the escape of sewer gas is enhanced by the great number of rats investing the Asylum, which eat through the leaden pipes placed inside the building, and thus allow the noxious vapours to escape. We commend

this subject to the early attention of the Committee. Should the trade of Nottingham improve, it might then be possible for the Asylum land to be sold for building sites, and the Asylum removed into the County, and then it would be easy to remedy many defects now existing, such as insufficient w.c. accommodation, inadequate Store rooms, unsuitable flooring, and ensure the night supervision of the epileptic and suicidal patients being absolutely continuous. Amongst matters referred to by our Colleagues at their last visit, we have to report that the women now have 2 changes of linen every week, and that a supply of Millar's tell tale clocks have been ordered to prove the due performance of the patrolling the buildings which is done by one night attendant on either side. As the matter is at present, it is possible for the night nurse never to go into the infirmary and yet escape detection. We saw 2 patients of each sex in bed, and under medical treatment are recorded the names of 67 patients. The Deaths have been 35.21 in the male division. The rate of mortality continues higher than the average in County Asylums. In 1885 it was 12.20 per cent. upon the daily number resident, and about this rate per annum has been maintained since the Commissioners last visit. The principal causes of death have been General Paralysis, other forms of Brain disease, and diseases of the lungs and heart. There has been no death from exceptional disorder, and no fatal casualty or suicide. The Coroner held no inquest. We regret to find post mortem examinations were made in 18 instances only. The Medical Journal contains no entry of mechanical restraint, but one man and 4 women are recorded as having been secluded, the man on 9 occasions for a total of 88 hours, one woman 28 times for 273 hours, another woman 9 times for 95 hours, and the other women, once each for short periods. All in residence had opportunity of telling

us their grievances, but nothing worthy of mention was brought to our notice. A good dinner was supplied in either division, which was neatly served and much liked. The attendants are 21 in each division by day and 2 by night. The average duration of service of the male attendants is remarkable, only 4 having had less than 2 years experience, whilst on the female side no less than 14 have not yet attained that length of service. Artizans still visit the female wards with keys served out to them on application to the head female attendant, but we have pointed out to Mr. Aplin what we consider the safer course to pursue, and advised him to adopt it in future. The epileptics are 51 and the actively suicidal are 27, the whole of the former class and all but two of the latter sleep in the dormitories of their respective side where an attendant sits up throughout the night. About 130 patients attended Divine Service yesterday, and over 140 were present at the associated entertainment last week. A fair number of patients are taken weekly beyond the grounds, and with few exceptions all go frequently for exercise in the grounds in front of the Asylum. The proportion of patients employed is good, and the Gardener informs us that if he had more land he could employ more patients, but that, with the limited area 40 men are all he can usefully set to spade labour—45 are ward cleaners only, the remaining 16 being engaged at trades &c. Twenty-six women work in the Laundry, 30 assist in the wards, 3 are employed in the Kitchen, and 24 do needlework. Many small improvements tending to promote the comfort of the patients in the sanitary condition of the Asylum have been completed since the last visit, but we must specially mention the wood flooring laid down in Male 6 and 3. We hope this may be done in many more of the wards, and on both sides. The general arrangements are creditable to Mr. Aplin as Medical Superintendent.

<i>W. E. Frere,</i>	}	COMMISSIONERS IN LUNACY.
<i>John D. Cleaton,</i>		

## APPENDIX.

TABLE XI.

GENERAL STATEMENT OF ADMISSIONS, DISCHARGES, &c.  
COMMENCING AT THE TIME OF THE UNION BETWEEN  
THE COUNTY AND THE BOROUGH,  
ON 31st DECEMBER, 1855.

(For the Statistics from the Opening of the Asylum on February 12th,  
1812, up to 31st December, 1855, see former Reports.)

*Note.*—For 1879 and succeeding years the recoveries are calculated upon the  
admissions, exclusive of transfers from other Asylums.

Year	Number of Admissions	Recovered	Relieved and Removed	Died	Remaining December 31st	Total under Treatment	Daily Average Resident	Per Centage of Recoveries on Admissions	Per Centage of Deaths on Daily Average	Per Centage of Deaths on Total Number under Treatment
1856	89	30	49	17	223	319	216.17	33.70	7.86	5.32
