# REPORT

OF THE

COMMITTEE OF VISITORS

OF THE

LUNATIC ASYLUM AT SNENTON, NOTTINGHAM.

---

*To the Court of Quarter Sessions for the County  
of Nottingham.*

Your Committee in making their report for the year 1887 are able to speak favourably of the condition of the Asylum and the welfare of the patients.

They regret that during the year two of its oldest members have been removed by death, whose loss will long be felt and deplored, the Rev. T. C. Cane had been a member of the Committee for 45 years and for 16 years was the Chairman, Mr. Henry Sherbrooke had taken a prominent part in the work of the Asylum for 47 years, both these gentlemen had striven zealously for the interests of the Asylum, and the welfare of the patients.

The number of patients continues to decrease, and there remained on December 31st, 1887, 312 patients whose chargeability is shewn in the following table.

	M.	F.	T.
To Unions in the County of Nottingham .. ..	129	135	264
„ County of Nottingham.. .. .	1	0	1
„ Borough of Nottingham.. .. .	0	14	14
„ Borough of Newark .. .. .	6	4	10
„ Out-County Unions .. .. .	11	2	13
„ Private Patients .. .. .	3	5	8
„ Criminal Patients .. .. .	2	0	2
	152	160	312

The weekly charge for County patients has been 8/6, this amount was fixed below the estimated weekly cost as there was a balance at the Bank, in this way the Nottinghamshire contributing Unions will reap the advantage.

The profit arising from Out-County patients amounts to £378 16s. 5d. which has been paid to the County Treasurer, and will go towards the liquidation of the expenses of the Fabric.

During the year considerable renewal of steam, gas and sanitary pipes have been necessary.

The General Rules of the Asylum have been revised by your Committee and received the approval and signature of the Home Secretary.

There has been no change in the staff of Officers during the last year, and the Committee conclude their report by expressing their satisfaction with the way in which the welfare of the patients and the interests of the Institution have been attended to by Dr. Aplin and the whole of the Staff.

*A. Heymann,*

CHAIRMAN.

19th JANUARY, 1888.

# REPORT

OF THE

## MEDICAL SUPERINTENDENT.

---

MR. CHAIRMAN, MY LORDS, AND GENTLEMEN,

I have the honour to submit to you the Medical Superintendent's Report for the year 1887,—and to append thereto the customary statistical tables.

On the 1st January, 1887, there were in the Asylum 321 patients, viz: 152 males and 169 females.

On the 31st December those numbers had been reduced to 312 viz: 152 males, and 160 females.

The admissions during the year, were 77; viz. 36 males and 41 females; the discharges were 38; viz. 17 males and 21 females: and the deaths numbered 48; viz. 19 males and 29 females.

The average number resident per diem during 1887 amounted to 319, viz. 152 males and 167 females.

The weekly cost of maintaining these patients was 9/5½d.

Of the *Admissions* it is noticeable that the men were in a better state of health as a group than the women; and as a consequence only one man died of the 19 males admitted; but six of the 29 women failed to survive the year of their admission. It is also noticeable that the age of the women who were received during the year very far exceeded that of the men. The number of women who were of a suicidal disposition amongst those admitted has been found to be very large; but fortunately none of these has been permitted to succeed in any suicidal attempt.

The *Causes* of Insanity in those admitted do not present any uncommon feature. In 31 of the 77 persons admitted a clear history of hereditary predisposition to insanity was traceable: this is a fact worthy of the gravest consideration and the utmost publicity.

Of the 38 patients *Discharged* 26 had recovered, and the proportion of recoveries to admissions, excluding transfers during the year was 34.66 per cent. Of the others seven were discharged "relieved" who had benefitted very much by asylum treatment, but could not be said to have thoroughly recovered.

The *Death-rate* during the year has been the heaviest since 1872, viz. 12.06 per cent. of the total number under treatment; and has been due mainly to an excessive mortality

in the female division. Last year the number of deaths on the female side was below the average, and this to some extent is a reason for a compensatory increase now.

None of the deaths are due to epidemic or ordinarily preventible diseases :—the majority of them are the result of disease of the brain and nervous system, either alone, or in combination with various forms of diseases of the heart, lungs and other chief viscera such as are usually met with in Asylums. The average age at death of the men exceeded 51 years, and of the women exceeded 55 years.

The average duration of residence in the Asylum prior to their death was, for the males,  $9\frac{1}{4}$  years ; females,  $6\frac{1}{2}$  years. One death unhappily was due to suicide. A woman in May last evaded the vigilance of her nurses, though they were fully aware of her propensity, and succeeded in drowning herself in a bath. The circumstances have been fully investigated at the coroner's inquest ; also by you, by the Commissioners in Lunacy, and by myself ; and such precautions as were deemed necessary have been adopted.

This is the only suicide which has occurred during the last fifteen years ; and I think it is desirable (while we regretfully deplore the occurrence of the one sad fatality) that we should not lose sight of the fact that considerable numbers of actively and cunningly suicidal patients are received into the Asylum every year ; that they are by careful watching and treatment prevented from cutting short their existence, and very frequently are, after a while, cured of their insane desire for self destruction, and restored to their homes and spheres of usefulness. The one suicide permitted should not make us forget the immense number prevented, nor lead the public to under-estimate the value of such an institution as the County Asylum.

No serious accident has occurred during the year which endangered life; but there have been two alarms of fire and slight damage done. These have had an influence for good, having proved that the monthly fire brigade drills are not useless formalities but a very necessary part of the Asylum discipline.

Advantage was taken of the very dry weather in July to thoroughly clean out the large soft water reservoirs, a work which had not been undertaken for a great many years previously.

The Religious Services have been performed regularly throughout the year except during the short time the Chapel was closed for alteration and repairs in the chancel and the laying down of the new heating apparatus.

A reference to the monetary statistics produced by the Clerk will shew that the affairs of the Asylum have been conducted during the year with due regard to economy as well as to efficiency.

As heretofore the patients are encouraged to employ themselves in a variety of useful occupations, and are provided with entertainments and opportunities of taking part in sports and pastimes. Newspapers, and other suitable literature are plentifully provided, and thanks to Mrs Barclay there is an annual distribution of Christmas Cards and letters to each patient and servant.

During the year the general conduct of the attendants and servants has been good, and their attention to their duties commendably attentive and intelligent.

Before concluding this report permit me to record my personal sense of the great loss sustained by the Committee of Visitors during the year by the deaths of two of its oldest members. It would ill become me to sound the praises of Messrs. Sherbrooke and Cane who are so well known to you, but I cannot refrain from saying how much I personally regret their absence from the directorate of the Asylum, and miss their kind words of instruction and advice in all that appertained to the management of this Institution with the affairs of which they had been for so many years familiar.

During my attack of rheumatic fever in the early summer and my subsequent leave of absence, which was rather longer than usual, Mr. Arthur Lofthouse very cordially and efficiently fulfilled my duties, for which I beg to tender him my thanks. I also beg to thank all those of the staff who have, with me, worked willingly and attentively in their respective departments aiming to promote the welfare of the patients and the good repute of the Asylum.

Permit me, in concluding this brief report, to thank you for your past kindness and goodwill, and to remain

Mr. Chairman, my Lords, and Gentlemen,

Your obedient Servant,

*Alfred Aplin.*

JANUARY 19th, 1888.

# REPORT

OF THE

## COMMISSIONERS IN LUNACY.

---

NOTTINGHAMSHIRE LUNATIC ASYLUM,

*May 17th, 1887.*

We have to-day inspected this Asylum, Mr. Aplin is we regret to find confined to his bed by a severe attack of rheumatism, and we have therefore been accompanied by his Assistant Mr. Lofthouse, who has readily afforded us the information we have required. The patients at present on the Asylum books are 147 males and 169 females, 316 in all, but one woman is absent on trial.

Chargeable to the County and County Unions, are 270 patients: to Notts Boro' 14; to Derby 15; to Newark 9, and six belong to the private, and two to the criminal class. The maintenance rate (which is however something less than the actual cost) has been reduced to 8/6 a week for Nottinghamshire patients; for Notts. Boro' patients it is 12/- and for all others 14/- per week.

Since our Colleagues' visit on April 19th last year, 33 male and 43 female patients have been admitted here : 26 males and 24 females discharged, 16 of the former and 15 of the latter having recovered, and 29 males and 17 females died. The rate of mortality in 1886 was 11.85 of the daily average number of patients. In the interval since the last visit the rate per annum was somewhat higher. Post mortem examination was made in 33 instances.

The causes of the deaths, with one exception to be presently noticed, were such as are common in Asylums,—General Paralysis, to which 10 deaths were due, being the most fatal.

The death we have specially to notice was the suicide of a female patient, (S.A.S.) which occurred on the 10th inst. The circumstances attending it have been reported to our Board. We have made some further inquiries, and the following observations occur to us upon the case.

In the first place the patient should we think, from the statements in the certificate of her admission, and from her subsequent history in the Asylum, have been more distinctly recognised and treated as suicidal, and have been more carefully watched. It does not appear that beyond some general verbal instructions to the nurses of her ward to keep an eye on the patient, any special warning was given. It is not the practice here to give to the charge attendant, with a suicidal patient, written directions as to the nature and amount of supervision to be exercised, and we recommend that in future this be done, a form being prepared, in duplicate, one first being given to the attendant, the other, an exact copy, being retained as a counterfoil. We find that in the Bathroom in which S.A.S. drowned herself there is a W.C. used by patients so that the Bathroom door is left open. Also that the tap-

keys were usually carried loose by the nurses, each nurse having a key, and that there was in the ward by some means a spare key, of which it is supposed S.A.S. possessed herself. Now, however, the nurses and attendants have their keys attached to their key rings. A W.C. in a Bath-room is not a satisfactory arrangement, but unfortunately it is one which in several instances prevails here. We have learnt that the actively suicidal patients, though they sleep in the supervision dormitory are not by day placed together in the same ward, as is frequently if not generally done. We think this the safer practice as the attendants of the selected ward have thereby their attention quickened, and are, when properly chosen, more careful and watchful. This suicide, is, it appears the first that has happened for more than 14 years.

We have seen all the patients in residence. They were quiet and well behaved, and fairly tidy in dress and person. In many cases, however, there is room for improvement in this particular. One man complained of rough handling by an attendant, but upon inquiry we considered that his story was much exaggerated. Another complained that he had been subjected to a Shower bath on being brought back from an attempt to escape. It is said this bath was given for cleansing purposes; but we think an ordinary bath should have been used, as the shower bath suggests the idea of punishment.

The arrangements for the night supervision of the epileptic and suicidal classes, remain unaltered. They are not quite satisfactory. Of epileptics there are about 23 of each sex; of actively suicidal, 7 males and 8 females; and of general paralytics 12 males and 6 females.

Returns made to us shew that the patients usefully employed are 94 men and 91 women ; representing proportions of 64 and 55 per cent. of the totals of the sexes. These having regard to the position of this Asylum are not unsatisfactory.

It is not possible to afford the majority of the patients more than very restricted exercise, but all that is possible in this respect appears to be done.

The Structural improvements since the last visit have chiefly been in the direction of repairs so constantly needed in an old building like this, but in two male wards the cement floors have been replaced by boards. There are still left several floors of the objectionable material. A new fire alarm bell has been put up ; and just now spring cleaning, whitewashing, etc., are in progress.

We trust that the question of removing the Asylum into the country is not wholly lost sight of, for we feel that, with the best intentions it is impossible to make it satisfactory in its present position ; and we do not wonder that the Committee should be reluctant to propose expenditure on remedying or supplying the many defects which exist.

<i>C. S. Bagot,</i>	}	COMMISSIONERS IN LUNACY.
<i>W. Rhys Williams,</i>

TABLE XI.

GENERAL STATEMENT OF ADMISSIONS, DISCHARGES, &c.  
 COMMENCING AT THE TIME OF THE UNION BETWEEN  
 THE COUNTY AND THE BOROUGH,  
 ON 31st DECEMBER, 1855.

(For the Statistics from the Opening of the Asylum on February 12th,  
 1812, up to 31st December, 1855, see former Reports.)

*Note.*—For 1879 and succeeding years the recoveries are calculated upon the  
 admissions, exclusive of transfers from other Asylums.

Year	Number of Admissions	Recovered	Relieved and Removed	Died	Remaining December 31st	Total under Treatment	Daily Average Resident	Per Centage of Recoveries on Admissions	Per Centage of Deaths on Daily Average	Per Centage of Deaths on Total Number under Treatment
