REPORT

OF THE

COMMITTEE OF VISITORS

OF THE

LUNATIC ASYLUM AT SNENTON NEAR NOTTINGHAM.

To the Court of Quarter Sessions for the County, and to the Town Council of the Borough of Nottingham.

In pursuance of the Statute 16 and 17 Vict. cap. 97, sec 62, the Committee report :--

That the number of Lunatics of all classes under care this day, the 31st December, 1871, consists of—

MALES.	FEMALES.	TOTAL.
173	200	373
That the beds unoccupi	ied will accommod	ate—
MALES,	FEMALES.	TOTAL.
13	14	27
Making altogether room	n for—	
MALES.	FEMALES.	TOTAL.
186	214	400

Col	npa	rea	with the pr	evious year	the change	s are as	10110WS :
			ADMISSIONS.	RECOVERIES.	REMOVED.	DEATHS.	REMAINING, DEC. 31.
1870				40	5	48	361
1871			119	45	9	53	373

There has been an increase of 9 in the number of admissions, and of 12 in the gross number remaining on the books at the close of the year.

Among the causes of Insanity in the cases admitted during 1871, 12 are ascribed to Intemperance alone,

1 is	,,	,,	and Hereditary Predisposition,
3 are	,,	,,	and Epilepsy,
1 is	,,	,,	and Relapse.

Six of the 12, left, recovered within 3 months of their admission, 9 others remain, 1 died, and 1 was removed. Last year the numbers admitted on account of Insanity caused by Intemperance were only 10 compared with 17 in 1871.

There are 20 Idiots in the Asylum, 10 of each sex, who ought to be placed in some special establishment having facilities for training and teaching them.

The Committee of Visitors, at a Special Meeting held on the 7th December, 1871, agreed (subject to the approval of the Secretary of State) to dissolve the existing union between the County and Borough as from the 31st December, 1871, upon the terms that the County should purchase the interest of the Borough in the entire property of the union, and pay the amount by the following instalments, bearing interest at 5 per cent. from the time when they become due, viz. : £5000 on the 30th June, 1872; £5000 on the 31st December, 1872; £5000 on the

The property of the union consists of the land, buildings, engineering works, fixtures, and furniture of the Asylum at Sneinton (which the Committee of Visitors agreed to be of the value of £42689 8s. 7d.). The clothing and consumable stores, the value of which was to be ascertained as on the 31st December, 1871, and the balances on the same day due from the Parishes and from the Treasurer, less debts owing up to that day.

It was further agreed that the Borough Patients be taken in by the County for two years, at the lowest rate for the time being charged to any parish, and for a third year at one shilling per week per patient in advance of such lowest rate, and that the superannuation allowances and claims of the medical Superintendent and Servants, should be adjusted between the County and Borough in proportion to the benefit the County will derive from their services after the dissolution, and so as to relieve the Borough from all claims not made within seven years.

The resolutions passed at the meeting were forwarded to the Secretary of State for approval, on the 9th December, but no communication has yet been received from him.

The Institution and the Patients have been regularly visited and the visits recorded in the Visitors' Book.

> J. C. Gane, CHAIBMAN.

ANNUAL REPORT

OF THE SUPERINTENDENT.

MR. CHAIRMAN, MY LORD, AND GENTLEMEN,-

I have the honour to present the Annual Report of the number of admissions, removals, and discharges, with other particulars relating to the state and management of the Asylum for the year 1871, being the sixteenth of the United Lunatic Asylum for the County and Borough of Nottingham, and the sixty-first of the original Institution. The foundation of the building was laid in 1810, and patients were first received herein on the 12th February, 1812. It now ranks as the oldest of all the English County Asylums.

The admissions are nine in excess of the previous year; this number corresponding very nearly with that of the patients, namely, eight, sent in from the Nottingham Union under a peremptory order of the Commissioners in Lunacy. Two of these cases were idiots, discharged from the Asylum on a former occasion in order to make room; but for this circumstance the admissions would have been one only in excess of 1870. The parochial authorities did not exercise their right of appeal against this procedure.

The accumulation of lunatics remaining over on December 31st, including the aforesaid admissions, amounts to twelve, and approximates very closely to the yearly average of eleven for the last sixteen years.

The 373 patients remaining are thus arranged according to their chargeability :- Town of Nottingham, 113; County of Nottingham, 247; Borough of Newark, 12; Out-County, 1. Total, 373. Compared with former returns this increase of 12 is distributed in a very exceptional manner, and is exclusively limited to cases belonging to the borough, which have risen in twelve months from 97 to 113, a difference of 16; whereas the county lunatics have been reduced by 3, and those of the Borough of Newark by 1. The ratio of increase for Nottingham ordinarily exceeds that for the county, and may be explained by other causes than an undue liability to insanity. Casual lunatics and strangers in distress generally drift towards the large towns, and it has also been found that distance from the Asylum has a direct influence in reducing the number of admissions. As the Asylum is situated contiguous to a densely populated suburb of the borough, it might be expected that the latter, with its numerous staff of officials, facilities for obtaining orders, and ready means of conveyance, would furnish more than its normal share of patients. This is seen by comparing the number of lunatics with the population, thus,-

Nottingham, with a population of 86,619, supplies 113 lunatics.

Newark Borough, with a population of 12,195, supplies 12 lunatics.

County of Nottingham, with a population of 256,569, supplies 247 lunatics.

The anomalous increase from the Borough of Nottingham in 1871 has slightly altered the former proportions of the ratios of increase. Out of the combined annual average of eleven patients for the last sixteen years, Nottingham has furnished 4 and 10-16ths, the County 6, and the Borough of Newark the fraction 6-16ths only.

Forty-five patients were discharged recovered, or 37.81 per cent. on the admissions.

The proportion of recoveries to the admissions into all the English County Asylums for ten years as stated in the latest Bluebook upon the subject, is 35.61 per cent.

Several patients were removed by their friends under the 81st section, which permits the visitors to discharge them upon the signing of a guarantee, that they shall be properly taken care of.

The deaths were fifty-three, and the causes are set forth in the appendix to this report.—Table ∇ .

The death-rate 11.04 per cent., calculated upon the numbers under treatment is above the average, 8.44 per cent. in the English Asylums for ten years previously, as given in the Blue-book.

This higher mortality did not depend upon epidemics which have been so fatal amongst the general population outside, but may be attributed in part to the circumstance that there exists in this Asylum an unusual number of aged persons, the residuum of the admissions extending over the two generations that the institution has been in use. Five patients have been inmates upwards of 30 years, and one upwards of 43 years. At the Census taken on April 3rd, there were no fewer than 77 patients who were upwards of 60 years of age.

Three inquests were held during the year: one upon a man who died of rupture of a bloodvessel of the lungs; a second upon a man who committed suicide by hanging himself from an iron bedstead; and the third upon a man who died from injuries accidentally received, complicated with inflammation of the brain and gangrenous erysipelas.

That Asylums should ever be entirely free from accidents is more than can be hoped for, when it is considered that in establishments of this magnitude there are always to be found some lunatics under care whom it is dangerous to approach when suffering from paroxysms of frenzy.

Of patients deemed curable, there are 10 of each sex in the Asylum.

The staff who assist me in the management consists at the present time of five officers, without whose cordial co-operation, the duties would have been far more onerous. There are also forty-one servants under supervision. Their conduct in general has been such as to deserve the continued approbation of the committee of visitors.

All which is respectfully submitted.

W. Phillimore Stiff, M.B.,

SUPERINTENDENT.

SNENTON, JANUARY 18th, 1872.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

NOTTINGHAM AND COUNTY BOROUGH ASYLUM, 27th September, 1871.

Since our colleagues visited this Asylum on the 25th of August last year, the numbers have somewhat increased-7 in the male and 2 in the female division-and there are now on the books the names of 170 men, and 194 women. The changes comprise 124 admissions, of whom 61 were men, and 63 were women; 29 patients of each sex have been discharged, of whom 51 were recovered, and and 25 men, and 32 women have died. This high rate of mortality does not appear to have been occasioned by any special disease. There were 12 deaths from phthisis, 12 from apoplexy and other brain diseases, 6 from dementia and old age, and the rest from various ordinary causes. One epileptic was found dead in bed, and no inquest was thought necessary in this case; but on a male patient who died from rupture of a bloodvessel of the lungs, there was an enquiry by the Coroner, and a verdict of natural death returned. Post-mortem examinations appear to have been made in two or three cases only.

There were two men and three women in bed to-day, and some very feeble and demented cases in the infirmaries and also in the ordinary wards. Last week, 14 males and 24 females were reported as under medical treatment. As regards other statutory enquiries, we find that 70 men and 100 women attended chapel on Sunday, and about 65 of each sex are present at the week-day services.

Mechanical restraint has not been employed, but seclusion has been resorted to in the cases of 9 men on 29 occasions, and 14 women on 91 occasions. About 85 men and 95 women appear to be usefully employed, and we are glad to find that all the clothing and the shoes are made in the Asylum, with the aid of **a** paid shoemaker and a tailor.

There has been no alteration in the dietary which seems on the whole to be satisfactory, although we had some complaints to-day regarding the pea soup which is given once in the week, and if a solid dinner could be substituted it would no doubt be appreciated, and probably tend to the improvement of the general health.

There was one patient recently received, in seclusion in the padded room, who was very restless and excited, but in general the inmates were most quiet and orderly, and personally in a proper state. The bedding was very clean, and sufficient, except as regards under blankets, which were wanting almost without exception on beds having mackintosh sheets. Steps should, we think, be taken at once to supply this deficiency, and secure the use of under blankets in future.

We were struck with the great want of books, games, and means of amusements in the wards, and where such means existed none were in use, although, owing to heavy rain, all the patients were in the house. Associated entertainments are given once a month, and about 140 patients of both sexes are usually present. Of course the want of a proper room for this purpose acts as a drawback to the efficiency of these meetings. Small parties of men go for walks beyond the premises, and we think this privilege should be extended to the women.

Of the recommendations made by our colleagues at their last visit—all but two have been adopted and carried out. Very great improvements have been effected by the adaptation of large rooms in both divisions to the purposes of infirmaries, and by the changes effected in day rooms Nos. 2 and 3 on the female side. As regards the hospitals, we have suggested that they should be lighted with burners near the ceiling, communicating with ventilators—and in the Nos. 2 and 3 day rooms, that fireplaces should, if possible, be constructed, and more efficient gas lighting be provided.

We further suggest that additional means for personal washing should be provided in connexion with No. 7 female dormitory, where for between 50 and 60 patients there are now only seven basins.

That a nurse should be placed to sleep in the room overlooking No. 1 dormitory. That the beds should be removed from the passage in the male infirmary, and that the single rooms should be painted to the height of about four feet from the ground.

The question of making provision elsewhere for the insane poor of the County and Borough has, we are glad to hear, continued to employ the attention of the joint Committee. We therefore refrain under present circumstances, from making any suggestions regarding structural additions and alterations. We should otherwise strongly have advocated the erection of a suitable dining and recreation room, and the substitution of wood for the plaster and stone floors throughout the building as the improvements most obviously and urgently needed.

In conclusion, we again have the pleasure of recording our opinion of the energy and kindness displayed by Dr. Stiff, in the management of this Asylum and the treatment of its inmates.

> W. G. Campbell, James Wilkes,
