TO THE
COURT OF QUARTER SESSIONS
FOR THE COUNTY,
AND TO THE
TOWN COUNCIL OF THE BOROUGH OF NOTTINGHAM.

THE Committee of Visitors of the Lunatic Asylum at Sneinton, for the County and Borough of Nottingham, in presenting their Annual Report in accordance with the 62nd sect. of the 16th and 17th Vic., c. 97, have to express their entire satisfaction with the state and condition of the Asylum, under the management of the medical superintendent, Dr. W. P. Stiff.

The number of patients at present under care, consists of

MALES.	FEMALES.	TOTAL.
160	157	317

The space left unoccupied is sufficient for 62 patients, viz :

MALES.	FEMALES.
47	15

The Asylum, therefore, can accommodate 379 patients, viz :

MALES.	FEMALES.
207	172

On the 31st December, 1862, the number of patients in the house was

	MALES.	FEMALES.	TOTAL.
	160	154	314
Admitted in 1863	50	37	87
Discharged recovered	24	12	36
„ relieved	5	3	8
„ not improved	1	1	2
Died	20	18	38

Compared with the previous year the changes are as follows :

	ADMISSIONS.	RECOVERIES.	REMOVED.	DEATHS.	PATIENTS ON DEC. 31.
1862	91	40	4	37	314
1863	87	36	10	38	317

The weekly charge to the various Unions has been 7s. 9d.—this sum includes provisions, clothing, medical attendance and medicines, wages, fuel, washing, bedding, and other establishment expenses. The Committee regard this as a moderate charge, as there are a number of aged, feeble, and paralysed cases, requiring more continued nursing, and a greater amount of comforts than those who are liable to periodical attacks of insanity unaccompanied by bodily illness.

The new wing referred to in the last report has been completed and paid for.

New policies of insurance have been taken out so as to include the new and old buildings.

Forty-six blank windows in the main front have been cut down and replaced by cast iron window frames, glazed, and guarded at night by shutters from within, thus doing away with the prison-like appearance of the building, and affording more light and air to the apartments.

The paved floor of a room used as a lavatory in the female ward No. 5 has been taken up, and replaced by a boarded floor, the room supplied with a fire-place, and furnished as a sick chamber.

The adjoining bath room is now used as a lavatory.

A similar improvement has been effected on the men's side.

The land adjoining Walker-street, purchased in 1862, has been paid for out of the general balance in hand.

The Commissioners in Lunacy made their annual inspection of the Asylum in March last. Their report will be printed and distributed as usual, together with the abstracts of the accounts and other statistical papers shortly after the audit, which will take place previous to the month of March, in accordance with sec. 60, 16 and 17 Vic., c. 97.

J. C. Cane,

CHAIRMAN.

JANUARY 6TH, 1864.

ANNUAL REPORT OF THE SUPERINTENDENT.

MR. CHAIRMAN, MY LORD, AND GENTLEMEN,

THE following table comprises a summary of the various changes which have taken place in the numbers of the insane patients in the Asylum during the year 1863 :—

				M.	F.	T.
Patients remaining December 31st, 1862	160	154	314
Ditto admitted during 1863	50	37	87
Total under Treatment	210	191	401
				M.	F.	T.
Discharged recovered	..	24	12	36		
„ relieved	..	5	3	8		
„ not improved	..	1	1	2		
Died	..	20	18	38		
		50	34	84	50	34
Remaining December 31st, 1863	160	157	317

The admissions, 87, are 4 below those of the previous year, and are the fewest that have been recorded during a period of six years. The effect of legislation since 1845, has been to stimulate parochial officers to consign to the Asylum numerous cases of unsoundness of mind previously disregarded or not considered as requiring confinement. Shortly after the passing of the Act 8 and 9 Vic., c. 126, the admissions rose to 124, and occasionally have exceeded 100 annually, but the registers of the last two years show a decline. It

may, therefore, be inferred that the artificial increase in the numbers received into the Asylum occasioned by various statutory enactments has already reached the maximum, or at least been checked; and it seems probable that the accumulation of lunatics in the establishment will in future take place at a slower rate, and that the number of new cases brought for treatment will not be so relatively disproportionate to the increase of the general population as it has been hitherto.

The recoveries amount to 36, or 41.37 per cent. on the admissions. The deaths are 38, or 9.47 on the number under treatment, and 11.8 on the mean resident population.

The deaths and discharges have not kept pace with the admissions, and there is consequently an excess of three patients remaining at the end of the year.

The death rate is below the average of the preceding five years, but upon the whole has risen since the Asylum ceased to receive patients of the middle class. This is in accordance with the experience of other institutions. The indigent poor are sent in for treatment in a far more exhausted state of bodily health than the classes above them, and many, owing to the distressed circumstances of the friends who are unable to provide for them are brought in to be nursed and to die. The increasing practice of confining aged persons, who from imbecility of mind have become troublesome to manage, and others suffering from the effects of acute diseases of the brain, such as delirium tremens, phrenitis, and the delirium of fever, has also contributed to raise the death rate.

There have been no epidemics or disorders that could be considered preventable. There are, however, many aged and paralysed cases which have accumulated during the long series of years that the Asylum has been in operation. Some individuals have been inmates upwards of thirty years.

No suicide or fatal accident has taken place in the Asylum, but one man died from the effect of a cut throat inflicted before his

admission. He was also suffering from consumption at the time. One man escaped and reached home after the term had elapsed for re-capturing him. His friends have made no objection to his remaining with them.

No patients have been refused admission for want of room. I was compelled, however, to decline receiving a poor woman of industrious habits, who came of her own accord to the Asylum asking to be placed under treatment as a patient. She was in a state of acute melancholia and apparently suicidal. She alleged that she was unable to take care of herself on account of distress of mind, and that the Asylum was the best place for her. She brought her Savings Bank book with her as a guarantee for the payment of the cost of her maintenance, showing funds sufficient to last for about three months. She was allowed to remain a few hours till her friends could be communicated with, and upon their arrival she departed under their care.

The following improvements have been effected :—

1. The removal of the blank windows in the front of the main building already referred to by the Chairman.
2. The enlargement of some others in the detached wing for male patients.
3. The substitution of several cast iron baths for the slate ones formerly in use.
4. A sick chamber has been provided for those galleries not previously possessing one. Every gallery is now complete in itself, and each the counterpart of the others in arrangements. Sick patients can now be treated in their usual apartments without disturbing them by removal to other parts of the house, or placing them under charge of persons unacquainted with their habits and delusions.

The number of patients estimated as curable is 51, as incurable 266. The daily average of lunatics resident is 320.4, namely, males 167.07, females 153.33.

The number of re-admissions 10, 7 males, and 3 females.

In conclusion, I beg to add that the attendants and nurses generally have performed their duties in a satisfactory manner towards the patients, and have conformed duly to the regulations of the house.

I have the honour to be,

Mr. Chairman, my Lord, and Gentlemen,

Your obedient Servant,

Wm. Phillimore Stiff, M.B., Lond.,

SUPERINTENDENT.

COUNTY AND BOROUGH LUNATIC ASYLUM,
SNEINTON, NEAR NOTTINGHAM,
JANUARY 20, 1864.

REPORT OF THE COMMISSIONERS IN LUNACY.

NOTTINGHAM COUNTY AND BOROUGH ASYLUM,

MARCH 5TH, 1863.

SINCE our visit on the 20th of February, 1862, the following changes have taken place among the patients :—

	M.	F.	T.
Admitted	55	45	100
Discharged	23	20	43
Died	24	12	36

Of the patients who were discharged, 38 are reported to have been recovered.

The deaths have been from ordinary causes, but general paralysis has proved fatal in 10 out of the 36 cases of death.

An inquest was held on the body of one man who died of epilepsy.

There is a somewhat large proportion of feeble cases, but the general health is good, and no disease of an epidemic character has prevailed.

Twenty-three of the patients were last week under medical treatment.

We have seen and spoken to every patient in the house, of whom there are 166 men, and 154 women.

There was very little excitement, and the personal condition of the inmates was satisfactory.

We were glad to hear many of them speak very favourably of the treatment they received, and they made no complaints against the nurses and attendants who seem to be of a respectable class.

The general arrangements for the employment of the patients are the same as before reported.

The return for yesterday shows that of the men, 22 were occupied in the garden, 4 in the kitchen, 9 in the workshops at different trades, and 54 assisting in the galleries.

Of the women, 21 found employment in needlework, 26 assisted in the galleries, 28 worked in the laundry, and 5 in the kitchen.

The average attendance at chapel is 80 men, and 72 women, divine service is performed on Sunday and Thursday.

We found all the wards in a clean state, and the bedding was good and comfortable.

The additions on the male side are completed, and some of the rooms are occupied, but much remains to be done in the way of painting, decoration, and furniture, to render them suitable for their purpose.

The new wards will provide 60 additional beds, and day rooms capable of accommodating 40 patients.

So soon as these wards are fully occupied, some rooms in the centre building now used by male patients, will be thrown into the women's wards, which seem to us to be somewhat overcrowded.

We notice that new windows have been broken out in some of the day and sleeping rooms, and that some baths of improved construction have been provided.

It is proposed to improve the majority of the other baths which are of faulty construction, and we recommend that in every case the hot water tap should be protected.

The visitors have lately completed the purchase of $\frac{3}{4}$ of an acre of land to the south of the Asylum property, which although of little value for agricultural purposes, will prevent the erection of buildings overlooking the airing courts.

The new building on the men's side will provide some rooms for tailors and shoemakers, &c., and we hope that efforts will be made to employ a larger number of the patients in those trades.

We recommend that handrails should be placed in the staircases.

That blinds be put up in the dormitories.

That more of the rooms should be painted, papered, and coloured.

That the fire guards should be cut down.

That there should be more variety in the women's dresses, that a woollen material should be supplied.

That the men should have light shoes for use indoors, and that a proper shoe room be provided for the use of the patients who work on the land.

We also suggest that arrangements should be made for giving some of the women opportunities of taking exercise beyond the precincts of the Asylum premises, as is already done on the male side of the house.

The return of the number of patients found wet or dirty during the night previous to our visit showed ten of each sex, and the Medical Superintendent states that the system of night watching and attendance, works in a most satisfactory manner.

We learn that mechanical restraint is never employed in this Asylum, and the records show that seclusion is rarely resorted to, and principally in the cases of two or three very troublesome and destructive patients.

We are glad to be able again to express our approval of the general state and management of this Asylum.

<i>W. G. Campbell,</i>	}	COMMISSIONERS IN LUNACY.
<i>James Wilkes,</i>
