THE Committee of Visitors to the County and Borough of Nottingham Lunatic Asylum at Sneinton, present the following Report of their proceedings for the year now drawing to a close, in conformity with the Act of Parliament under which they are appointed :—

On the 1st January, 1861, the number of patients remaining in the house was 274, namely, 147 males, and 127 females. Since then there have been admitted to the 18th of December, 1861, 116, namely, 65 males, and 51 females, making under treatment 390, viz., 212 males and 178 females during the year. The discharges and deaths have not kept pace with the admissions, so that there is an increase in the gross numbers.

The recoveries have been 31, relieved 2, not improved 19. These last were chiefly harmless chronic cases and transfers. There have been 37 deaths. These changes amount to 89. The excess in the admissions over the discharges has therefore raised the number of Lunatics in the Asylum, so that at the present time there are 301 persons, of whom 156 are males, and 145 females, is besides 6 males who are temporarily accommodated at the Lincolnshire Asylum. There is yet room for 10 male and 6 female Patients, which is somewhat beyond the number that the Asylum was estimated to hold, the room for which has been obtained by making use of all the available space in the corridors and dormitories.

The pressure for room on the men's side of the house became so inconvenient during the spring months that it was deemed desirable to make such efforts as would obviate the necessity of closing the Asylum to any new cases. Seven male Lunatics, who it was thought might with propriety be taken care of either at the Workhouse or by their friends, were discharged on May 15th. Three of these have already been returned as unmanageable.

Subsequently, the friends of four other Patients were allowed to have them at home, one of whom has been returned. An agreement has also been entered into with the Lincolnshire Asylum to receive six Patients belonging to the county of Nottingham, who were accordingly removed and now remain there.

During the last few years 83 Patients of the harmless class have been dismissed, and of these 31 have been re-admitted up to the present time.

The steady increase in the number of Lunatic cases has rendered it necessary that the Committee of Visitors should consider the desirability of providing permanently for the admission of a greater number of Patients. They have therefore directed their attention to the enlargement of the male side of the Building, and having given instructions to Mr. Jalland, their Surveyor, plans have been prepared by him to admit of 40 additional male Patients, at a cost, exclusive of Furniture and Fixtures, not to exceed £1,600. These plans are being submitted to the Commissioners in Lunacy, and if finally approved by them, and the estimates confirmed by the Secretary of State for the Home Department, such plans and estimates will be submitted to the Court of Quarter Sessions for the County, and to the Town Council of the Borough.

It must, however, be obvious that it will very soon be necessary to make a like provision for females. And it will be a question for grave consideration, looking to the increase of population, and with it the steady increase of insanity, whether the expenditure of any large sum of money in the enlargement of the present Building would be equally economical with that of looking to a new site and new arrangements altogether.

At the first quarterly meeting the weekly charge for the maintenance of Pauper Patients was fixed at 7s. 9d. per week for males and females equally; this rate was continued for the first six months in the year. This charge did not include the cost of articles comprised under the head of Furniture and Bedding. In June last a letter was received from the Town Clerk of the Borough, submitting that these items before mentioned could not be legally charged to the Repairs and Fabric Account.

It was then agreed that these expenses should be transferred to the Maintenance Account, and an addition made to the weekly rate of sixpence, thus raising the charge to the Parishes to 8s. 3d., at which it now stands.

The Asylum and the Patients have been regularly inspected every two months, in compliance with the Statute, by two or more Visitors, and have been reported by those Visitors as satisfactory.

The Commissioners in Lunacy, in their Report of September, 1860, having urged the desirability of appointing an Assistant Medical Officer, the Committee have, in conformity with that wish, appointed Dr. John Sutton, who they have reason to believe, renenders good service in the Medical Department of the Establishment.

The Office of Store-keeper having become vacant by the resigination of Mr. Tippet, Mr. T. C. Temple has been elected to that office, and is discharging the duties to the satisfaction of the Committee.

The want of harmony which had prevailed amongst the Officers of the Establishment for some time past led to the resignation of Miss Mathews, as Matron, and Miss E. Motson of the Hanwell Asylum, has been appointed in her place, to discharge the duties of Matron and Housekeeper, and which she is expected to enter upon early in January next.

The decayed portions of the basement of the Building have been removed, and such decayed parts replaced, and the rest pointed and repaired. The roof of the Large Room of the Laundry has been well torched and ceiled, and fitted with ventilators, at an expense of £34. This room now serves the double purpose of Ironing-room and Recreation Hall, being used with great advantage for Concerts and other amusements for the Patients. This arrangement has rendered unnecessary the providing another Recreation Room, as suggested by the Commissioners in Lunacy.

The Lunacy Commissioners have visited the Asylum, and made their Annual Report, which will be appended to the statistical and other documents usually printed before the month of March.

In conclusion the Committee have every reason to be satisfied with the general management of the Asylum, as well as with its actual condition and resources.

#### WILLIAM VICKERS,

CHAIRMAN.

DECEMBER 30TH, 1861.

## Annual Report of the Superintendent.

#### MR. CHAIRMAN, MY LORD, AND GENTLEMEN,

In accordance with the usual practice, it becomes my duty to present the Annual Statement for the year 1861; the general results of which are found in the subjoined Table :---

and strangers of many	white			м.	F.	т.
Patients remaining December 3 Ditto admitted during 1861	31st, 1	860		$\begin{array}{c}147\\69\end{array}$	$\begin{array}{c}127\\52\end{array}$	274 121
Total under Treatment				216	179	395
	м.	F.	т.			
Discharged recovered ,, relieved ,, not improved Died	16 0 19 21	$ \begin{array}{r} 15\\2\\0\\18\end{array} $	$31 \\ 2 \\ 19 \\ 39$			
and a second share the salidan	56	35	91	56	35	91
Remaining December 31st, 18	160	144	304			

The admissions, 121, are 23 in excess of last year; and the increase may be attributed to a combination of causes: first, to the increase of the general population supplying a larger proportion of cases; secondly, to the pressure of the times producing a greater amount of poverty and disease; and lastly, to the circumstance that the admission of Lunatics into the Asylum is facilitated by the more frequent adoption of that clause in the Act of Parliament which empowers the Clergyman and the Relieving Officer to act in the place of a Justice of the Peace. The gross increase in the number of Patients at the close of the year amounts to 30; and, as I remarked in a former Report, the accumulation of Patients is augmented by the lengthened term of residence which the permanent and incurable character of the majority of the cases admitted demands. The latest Parliamentary Returns show that the mean term of treatment, or, in other words, the average duration of confinement in an Asylum, Hospital, or Licensed House, is 2.68 years for males, and 3 years exactly for females. These figures include private Patients in Hospitals and Licensed Houses; but if the calculation had been limited to Paupers in County Asylums, the average duration would have been found still greater.

More men have been sent into the Asylum than women, although there is a greater number of female Lunatics existing in the county than male. This is explained on the grounds that the form of insanity is more severe in the male sex; and also that women can be usefully occupied in domestic duties amongst their friends or in Workhouses, whilst there is a greater difficulty in providing employment for men out of an Asylum.

The recoveries are 31, or 25.61 per cent. on the admissions. The deaths 39, or 13.31 per cent. on the daily average resident, and 9.87 per cent. on the total number under treatment.

The causes which tend to the production of the malady are always a subject of interest to the public. These were, in the order of their frequency, the Hereditary Disposition, Epilepsy, Chronic Diseases of the Brain, Intemperance, &c. Of all the causes of insanity the last named is the most preventable. The temporary stimulating effects of alcoholic beverages upon the nervous system are well known; but the permanent morbid changes in the organism less so. Pathology demonstrates that the long continued abuse of this agent produces atheromatous disease of the arteries; fatty and other degenerations of the heart, liver, and kidneys; and, as might be expected, affects with special severity, a vascular organ like the brain, which has no excretory duct to eliminate the poison. The recoveries, with one exception, took place in those cases in which the alleged duration of insanity before admission was less than one year; and, with a single exception, the discharges of those recovered took place within a year of their admission into the Asylum. From this we may infer that the shorter the period of the Patient's insanity before he is brought under treatment, the greater the probability of his cure: and that the cures are few after the tirst year of treatment.

Five Criminal Lunatics remained at the close of 1860; of these, one has died, and two have been removed to Bethlem Hospital. These last were found to be a source of expense to the Institution, on account of their destructive habits, and of danger to the more orderly Patients, owing to their homicidal tendencies. The remaining two are comparatively harmless, and will not require removal.

The number of cases considered curable is 42; (17 males, 25 females;) and of incurable, 262.

The use of mechanical restraint has been entirely avoided, but rest with seclusion, has been found beneficial. The advantages of rest are of equal importance in medical as in surgical practice.

No Patients have been refused admission during the year for a want of room; provision having been made to relieve the crowded astate of this Institution, by sending six to the Lincolnshire (Asylum.

The general health of the Patients has been good. I have no suicide, serious accident, or escape to report: and there has obeen no occasion to hold an inquest during the year.

It will be seen by reference to the published Annual Accounts, and to the Abstract presented to-day, that the financial position of the Institution is sound. There has been a continuous increase in the amount of Cash in hand since December 31st, 1857, concurrently with several reductions in the weekly charges to the parishes, as shown in the following comparative statement :---

	£ 805	8. 10	d	8.	d.	8.	d.
39 39	221 925 964	9 17 8 5	$7\frac{1}{2}$ 1 4 $2\frac{1}{2}\frac{1}{2}$ 8		0 0 6 3	9 8 7 7	00633
	39	3925 3964 3925	3964 8	3964 8 21	3964 8 21 8	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$	3964 8 21 8 3 7

In July an additional charge of sixpence per week was made to the equalised weekly rate of 7s. 9d. This alteration is due to the transfer of certain items from the Fabric to the Maintenance Account; and not to any increase of expenditure.

The various changes and improvements which have been effected in the Establishment during the year 1861, are given in detail in the Chairman's and the Commissioners' Reports.

> I have the honour to be, Mr. Chairman, my Lord, and Gentlemen, Your obedient Servant,

WM. PHILLIMORE STIFF, M.B., LOND., SUPERINTENDENT.

County and Borough Lunatic Asylum, Sneinton, near Nottingham, January 15th, 1862.

## Report of the Commissioners in Lunacy.

Nottingham County and Borough Asylum, 22nd August, 1861.

SINCE the 12th September, 1860, the date of our last visit, the changes in the Patients have been as follows :---

			M.	F.	т.
Admitted			67	46	113
Discharged	*		22	13	35
,, of whom recovered			13	11	24
Died			24	19	43

The Deaths were all from causes ordinary in Asylums; although the mortality has been at the rate of 15 per cent. per annum upon the average numbers resident.

The Patients on the books are now 306 in number, viz., 167 of the male and 139 of the female sex.

With the exception of two women, absent on trial, we have seen all the Patients.

One man, received on the 19th instant, in a state of Acute Mania, destructive and dangerous, violent and impulsive, was, at the time of our visit, confined in a padded room. The remaining Patients, generally, were free from excitement, and orderly in their demeanour. Their personal condition as to cleanliness, clothing, and otherwise, was satisfactory. The numbers last registered as under medical treatment, either for bodily disorders or their mental malady, were 17 in the male and 29 in the female division.

We have here to report, with satisfaction, the appointment, as Assistant Medical Officer, of Dr. Sutton, who entered upon his duties about six months ago. In the absence of Dr. Stiff, he accompanied us during our inspection, and afforded us the fullest information, in reference as well to the arrangements generally as to individual cases. In keeping the Case Book, a duty which chiefly devolves upon him, it is his undeviating practice to record the state of every Patient, at intervals not exceeding two months, in addition to special entries as to injuries or particular occurrences. Mechanical restraint is never employed, and the instances of seclusion are few.

On the Sunday prior to our visit the Patients who attended Chapel were 168 in number, viz., 99 men and 69 women, the extreme numbers which, at present, the Chapel will conveniently accommodate. Divine Service continues to be performed by the Chaplain also on Thursdays.

In reference to the present Chapel, we cannot avoid observing that, constructed as it has been within a few years, it is still inadequate, and otherwise unsuited to the wants of the Asylum, with its augmented and increasing numbers; and we avail ourselves of this occasion to record our opinion that the most desirable arrangement would be to erect a detached Chapel on the front ground, and to convert the existing Chapel into a general Dining and Recreation Hall.

According to the Ward Returns, the Patients employed in various ways, on the day before our visit, was as follows :---

Kitchen and elsewhere Workshops and in Trades	$20 \\ 3 \\ 8 \\ 50$	Females. Needlework and Mending Kitchen and elsewhere Laundry Assisting in Galleries	21 3 28 11
	81 86	Total	$\begin{array}{c} 63\\74\end{array}$

The system of Night Attendance continues, as reported, to work most beneficially; and the experience of this Asylum, as in others where the arrangement is carried out, is, that the rest of the Patients whom it is necessary to arouse, is practically unbroken.

The Patients wet or dirty during the night of the 20th instant were only 11 in number, viz., 8 in the male and 3 in the Female Division, one only of each sex being dirty.

We have to report, amongst other alterations and improvements since our last visit, the following :---

- 1. The large Ironing Room, at the Laundry, has been ceiled, and otherwise rendered more suitable for the purposes of recreation, such as Concerts, Dances, and Readings, which take place monthly.
- 2. New Ward Store Rooms have been provided in two Galleries in each Division.
- The upper Corridors, formerly occupied as Day Rooms by the Private Patients, have been converted into Dormitories, containing each 14 Beds.
- More Light has been obtained in several parts of the Main Building, by the insertion of Glass Panels in the Doors of Bed Rooms and Passages.
- Considerable additions have been made to the objects of interest in the Galleries and Day Rooms, such as Birds, Fish Globes, Flowering Plants, also to Articles of Furniture of a comfortable kind.

As respects comfortable Furniture, and objects of interest, we a recommend that more attention be given to the Lower Ward (No. 1) on the female side, and that it be assimilated to the Wards above.

We further submit, for the consideration of the Committee of Visitors, the expediency of providing more means of employment for the Patients of both sexes. All the Clothing is, we are informed, made in the Asylum: the Shoes, however, are stated to be all purchased.

The present Weekly Charge for the Pauper Patients of the County and Borough of Nottingham, male and female alike, is 8s. 3d. Down to the end of June last, the charge was only 7s. 9d., whilst the cost of Furniture and Bedding, estimated at 6d. per week, was charged to the Fabric Account.

The question of the legality of this arrangement having been raised on the part of the Borough Authorities, the alteration was made by transferring the 6d. to the Maintenance Account.

We have, in conclusion, to advert to the present state of the Asylum, as to numbers and accommodation. By using all the available space for Beds, the Asylum is calculated to accommodate 166 men, and 151 women, total, 317.

It appears, therefore, that the male Patients are now one in excess of their proper number, and that there are only 14 vacant Beds in the Female Division.

Three of the present female Patients belong to Parishes in other Counties, and for them 14s. per week is charged. All the remaining Patients are from the County or Borough of Nottingham. Such is the existing state of things—although several harmless, chronic Lunatics have, of late, been returned to Workhouses, or to the care of Friends. We have to add that, in several of the Dormitories, the numbers of Beds are too large, not allowing more than 450 cubic feet per Bed.

In these circumstances, and pending the consideration of the question of providing additional accommodation by an extension of the Asylum, an arrangement was, at the end of July last, entered into with the Visitors of the Lincoln County Asylum, for the reception into that Asylum of 6 male Patients from the Nottingham Asylum, at 9s. 11d. per week each; and that number of male Patients is accordingly about to be transferred to the Lincolnshire Asylum.

We have satisfaction in adding that the Medical Records are carefully kept; and that the state of the Asylum in its several Departments, and its general condition and management, continue to be creditable to Dr. Stiff and the other Officers.

C

R. W. S. LUTWIDGE, COMMISSIONERS IN S. GASKELL, LUNACY.
