REPORT
OF THE
COMMITTEE OF VISITORS.

To the Justices of the County of Berks in Quarter Sessions : the Council of the Borough of Reading : and the Justices of the Borough of Newbury.

THE COMMITTEE of VISITORS of the MOULSFORD
ASYLUM

R E P O R T

That the state and condition of the Asylum are good, and it is sufficient for the proper accommodation of the number of Lunatics for whom it is necessary to provide accommodation in the County of Berks and the Boroughs of Reading and Newbury. There being an excess of room beyond this requirement, as well as that for the non-pauper lunatics already received, the Committee in August completed a contract to receive 30 pauper patients (20 males and 10 females) from the Brookwood Asylum on a weekly payment of 15s. The term of the agreement is for two years, to June, 1884, determinable during the last year by 3 months' notice. The Secretary of State for the Home Department and the Bodies in the Union have approved this contract,

and the stipulated number of patients were admitted under it on the 12th of September.

The management of the Asylum, the care of the patients therein, and the conduct of the Officers and of the Servants now in the Asylum, have merited the commendation of the Committee. An Attendant left during the year of whom a satisfactory report could not be given. The Committee, impressed with the necessity of retaining tried and approved attendants and servants, have decided to allow outer clothing, uniform in character to those (both men and women) who shall have continued to the satisfaction of the Superintendent three months in their places. This allowance will be in addition to wages.

In October the Committee was startled by a report from the Superintendent of a failure, to a certain extent, in the water supply of the Asylum, which is derived from two wells within the main building, 30 and 40 feet deep respectively, and from large tanks for the storing of rain-water. The deficiency was in the well supply. It was soon removed by the abundant rain-fall of the autumn, but the Committee has set on foot, and will carry on, the necessary enquiry on the subject.

The cost of "Repairs, Renewals and Improvements" for the year to the 1st October, 1882, amounted to £1,641 0s. 10d.

Lodging-money for the year to 1st October, has been earned from the Borough of Reading, to the amount of £3 15s. 0d.

The principal "Repairs, Renewals and Improvements," executed for the same period, have been :—

The Male Ward, No. 1, has been cleaned, whitened, and lime-whited throughout. The old parts of Male Wards, Nos. 4 and 5, have been similarly treated, and the new parts of the two last-named Wards have been painted also, in Dayrooms, Dormitories, Sculleries, Bathrooms, Lavatories, Lobbies, and Staircases. The Dayrooms, Corridors, Dormitories, Sculleries, Bathrooms, Lavatories, Lobbies and Staircases of Male Wards Nos. 6 and 7, have all been cleaned, whitened, lime-whited, painted, and all the wood work varnished throughout.

The Dormitories, Landings, and Staircases of Male Wards, Nos. 2 and 3, have been cleaned, whitened, lime-whited, and the wood work varnished and Staircases painted with two coats, 5 feet high above the floor levels, finished with a dark line on top.

The Corridors connecting the north and south blocks and covered way leading to the male extension, have been cleaned, whitened, and lime-whited, and the walls painted about 5 inches high above the floor to form a skirting.

A large new vegetable cooking-pan has been fixed in the large scullery in the place of a former one, which was found to be defective. An auxiliary steam pipe, from the large steam boilers in the basement, has been connected to Benham's cooking apparatus in the kitchen, and the cooking is done by it on all week-days.

The Wringing Machine in the new wash-house has been altered from being worked by steam cylinder, to being driven by a leather strap connected to the underground shafting.

The wood floor of the Bread-room in the kitchen having broken through, the space beneath the floor has been filled up with hard core, covered with six inches of concrete, and paved with nine-inch red and black paving tiles, jointed with cement to match the adjoining floors.

The wood floor of the Lavatory in the Male Ward, No. 1, having become much worn, it has been re-laid with new floor boards, jointed with marine glue.

The Airing Court walls have been repaired and pointed where requisite, except where covered with fruit-trees. Small brick piers have been built to form gateways into the Airing-courts on each side of the end of the Recreation Hall.

Gas Works.—One cast iron Retort has been fixed complete.

The Engineer's, Gardener's, and Gasman's cottages have all been cleaned, whitened, lime-whited, distemper-coloured, papered and painted throughout, except the living room of Engineer's cottage where re-papering was not requisite.

The patients now (29th December, 1882) on the Books of the Asylum are :

			M.	F.	TOTAL.
From Unions in Berkshire	141	195	336
„ the County of Berks	3	0	3
„ Parishes in the Boro' of Reading	33	53	86
„ „ Newbury	20	17	37
„ Unions not in the County of Berks	23	10	33
„ Prison Commissioners	1	0	1
Private Patients	1	3	4
TOTALS	222	278	500

Since the 2nd January, 1882 (the date of the last report), there have been admitted Pauper Patients 67 Males and 66 Females, total 133; and Non-Pauper Patients 3 Males and 2 Females, total 5.

Of the Pauper Patients, 21 Males and 10 Females were received under contract from the Surrey County Asylum at Brookwood.

The discharges have been :—

		M.	F.	TOTAL.
Of Patients recovered...	...	13	17	30
" " relieved	1	2	3
" " not improved	1	1	2
TOTAL	...	15	20	35

Of these 1 Male was removed to another Asylum. 29 Males and 26 Females have died, total 55.

Upon the aggregate number of Pauper Patients under the care of the Visitors, there has been an increase of 25 Males and 21 Females, total 46.

The Establishment consists of:—

	M.	F.	TOTAL.
† A Medical Superintendent	5	1	6
A Chaplain			
* An Assistant Medical Officer			
A Clerk to the Visitors			
A Steward and Clerk of the Asylum	10	0	10
* A Housekeeper

* Attendants	23	20	43
* In-door Servants	1	9	10
Out-door ditto	9	0	9
TOTAL	48	30	78

* Resident, with board.

† Resident only.

The weekly charge for Paupers has been :—

March Quarter, 1882	0	10	6
June Quarter, 1882	0	10	3
September Quarter, 1882	0	9	9
December Quarter, 1882	0	9	6
						<u>£2 0 0</u>		
Average						<u>£0 10 0</u>		

A final and accurate statement of the outlay, and of the apportionment thereof, in connection with the extensions, inclusive of the cottages purchased in 1876, is appended. It is supplementary to, and in some degree corrects, the expense account stated last year. The Committee have applied the Balance in hand [£181 7s. 4d.] to the erection of a small greenhouse. This appropriation, and a further expenditure in the same way of £50 or £60 will, it is hoped, meet the approval of the Bodies in Union. It is intended thereby to secure at a moderate cost a supply of common flowers for making Wards and grounds bright and cheerful, a recognised efficient help in Asylum management.

For the Committee of Visitors,

GEORGE C. CHERRY,

CHAIRMAN.

December 29th, 1882.

Examined December 29th, 1882.

J. T. MORLAND,
Clerk to the Visitors.

REPORT

OF THE

RESIDENT PHYSICIAN AND MEDICAL SUPERINTENDENT.

*To the Committee of Visitors of the Berks, Reading,
and Newbury Lunatic Asylum.*

GENTLEMEN,

The Medical Superintendent respectfully submits his Twelfth Annual Report on the condition and management of the Asylum, which will comprise some account of the admissions, discharges, and deaths that have occurred during the year 1882, and to it will be appended the customary series of Medical Statistical Tables.

On the 1st of January, 1882, the number of patients resident was 452, of whom 196 were males and 256 females; during the year 138 patients were admitted, 30 discharged recovered, 3 relieved, 2 not improved, and 55 died, so that on the 31st of December the number of inmates had reached 500, of whom 222 were males and 278 females: being an increase of 48 since the beginning of the year, chiefly due to the admission of 30 out-county patients from Brookwood Asylum. As regards chargeability, there is an increase of 13 patients chargeable to the Berkshire Unions and Boroughs, the number at the end of the year being 458, and of the remainder 3 are chargeable to the county of Berks, 30 to Brookwood, 3 to out-counties, 2 to the Prison Commissioners, and 4 are private patients. Four only of the latter class were admitted, of whom one has been discharged recovered,

one transferred to the pauper register, and two remain. Three of the patients admitted were criminal lunatics, two of whom had been sentenced to three month's hard labour, one for bigamy, and the other for desertion from the Militia, and the third to nine months for indecent assault. The number of patients who, prior to admission, had been inmates of workhouses, amounting altogether to 36, exceeds by fully one-half the number for the previous year, so that there now seems to be a growing tendency to send cases from the workhouse to the asylum, and amongst those there were several which it was believed might well have been retained without much difficulty. It is, however, so far satisfactory to observe, that fully one-third of the number were only detained in the Union for a few days, and removed to the asylum within a week of their reception.

Among the general characteristics of the patients admitted the two most salient features to notice are the small proportion of curable cases, and the large number of patients by whom the manifestation of suicidal impulse had been one of the prominent symptoms of mental disease. Thus, out of the 138 admissions, only 32 were considered curable when admitted, 23 doubtful, and 83 incurable. The anticipation of recovery in regard to the hopeful cases has only been realised in the case of 13 up to the end of the year. As regards suicidal tendencies developed prior to admission, 38 patients were reported as having either threatened or attempted suicide, and of these actual attempts had been made by 22, the means used being in the following order of frequency: strangulation, drowning, and cutting the throat. Two female patients likewise made attempts at strangulation in the asylum, and one young woman recently admitted has been a constant source of anxiety and apprehension on

account of her persistent efforts to obtain means to commit suicide in a similar method. Considering the amount of vigilance required by such cases, it is a matter of congratulation that there has been immunity from any fatal casualty of this kind during the year. With a suicidal motive, or as the result of delusion, 27 of the patients admitted so persistently refused sustenance that they required to be artificially fed. Two of those who had undergone this process have subsequently been discharged recovered, and it may be added that artificial alimentation has been had recourse to in the case of 35 patients, and altogether on 404 occasions during the year. In regard to faulty habits on the part of the admissions, it was found that rather more than one-half were either wet, filthy, or destructive, and in the majority all these characteristics were combined.

The health and bodily condition of the admissions were in general even worse than those of the previous year, and many of those admitted were in a very feeble and precarious state when brought to the asylum. Only 38 were found to be in good bodily health, 39 were in indifferent health, 46 in feeble health, and 15 in very feeble health and in reduced bodily condition. Of the latter 8 died, one 3 days after admission, one 6 days, and one 10 days, while the remainder all succumbed within a few weeks. In regard to the physical diseases noted on admission, by far the most frequent was disease of the heart, with which 27 were found to be affected. Several cases of phthisis, in an early stage of the disease, and two of asthma were also admitted. A few cases of hernia, syphilis, scabies, goitre, and one of dropsy, were likewise noted. Three of the patients admitted were in a state of almost total blindness, and one male patient was discovered to have a large suppurating sac located in his

right buttock. The common forms of cerebro-spinal disease were represented by 20 cases of paralysis, 11 of general paralysis, and twelve of epilepsy. There was also one case of chorea, and seven of the admissions, whose ages ranged from 70 to 80 and over 80, were more or less debilitated through the natural decay of advanced life.

As regards the form, cause, and duration of insanity present on admission, it may be observed that 38 were affected with Mania, 19 with Melancholia, 20 with Monomania, 52 with Dementia, and 9 with Amentia; the latter comprising 6 cases of Idiocy and 3 of Congenital Imbecility. The proportion of those affected with dementia and monomania is unusually high, and due chiefly to the influx of an unusual number of chronic cases. Out of the whole admissions only 36 were cases of first attack and admitted within three months of the commencement of insanity, while in 48 the duration of the disease had exceeded twelve months, and in the case of 8 was congenital. With respect to the causes of insanity 15 are noted as moral and 66 as physical in character, while in regard to 57 the nature of the cause has not been ascertained. Amongst the former the most prolific cause has been religious excitement, while intemperance and hereditary predisposition head the list in the physical group. In regard to the prevalence of the latter amongst the whole admissions 30 cases were stated to be hereditary, 39 not hereditary, and, as regards 69, the fact was unascertained. In regard to the general result at the end of the year, of the 138 admissions 13 were discharged recovered, 2 relieved, 2 not improved, 17 died, and 104 remained.

The recoveries of the year, 30 in number, are 5 under that for the preceding year, and yield a percentage of

21·7 upon the admissions and 5·08 on the total number under treatment, which are considerably under the average of previous years. The paucity of recoveries is due to the unfavourable nature of the cases admitted, and to the large proportion of chronic cases amongst the admissions. In calculating the percentage of recoveries upon the admissions, if the 31 chronic patients received from Brookwood are omitted, the percentage would be 28, which is still below the previous average of this asylum. About one-half of those discharged recovered were discharged within six months of admission, and of the remainder one-half from six to twelve months, and the other from one to two years. In regard to the three patients discharged relieved, one male was removed to the asylum at Gloucester on account of becoming chargeable to Cheltenham Union, a female admitted as a private patient through the inability of her husband to maintain her as such was transferred to the pauper register, and another female was allowed to go home at the urgent request of her husband, although she had a fixed delusion that a clergyman in the town in which she resided was her proper husband. Two patients were discharged not improved, one a male private patient, who, contrary to medical advice, was removed by his friends, and soon passing out of their control was readmitted within a fortnight of his removal. The other was a female admitted as a pauper, who, on account of the circumstances of her relatives, was transferred to the private register.

The deaths that occurred during the year amounted to 55, being 15 in excess of the previous year, and considerably higher than the number recorded during any former year since the opening of the asylum, but the ratio of mortality on the average number resident has been

greater in two former years during an early period of the history of the asylum. For the past year the percentage of deaths on the average number resident was 11·8 and 9·32 on the total number under treatment. This ratio of mortality somewhat exceeds the average of previous years, and the excess in the percentage is due to the large proportion of cases affected with incurable brain lesion that succumbed during the year. In regard to the causes of death, fully two-thirds are comprised under cerebro-spinal disease, among which there are 7 cases of Epilepsy, 9 of Paralysis, 10 of General Paralysis, and two of Apoplexy. Under thoracic disease one-fifth are grouped, including 3 of Heart Disease and 4 of Phthisis, and of abdominal disease only three are recorded, 2 of Cirrhosis and one of Hepatic Abscess. There was also a solitary instance of Cynanche Tonsillaris, which, for the first time, appears in the death list.

Two of the cases of death became the subject of a Coroner's inquest. One was that of a female, who, though apparently in good health, died suddenly from heart disease, and the other was a male epileptic, who died from epilepsy in presence of the night attendant. A verdict of death from a natural cause was returned in both instances.

The general health of the asylum inmates throughout the year has been, on the whole, good, with the exception of the occasional occurrence of erysipelas, but the cases have not been numerous, and only two of a severe type.

In addition to the usual crop of minor casualties, three fractures occurred from falls, two of them occurring in the case of one patient at different times, from falling into the ha-ha while at exercise in the airing court; the first was a fracture of the upper arm bone, and the second of the lower jaw; both were treated in the usual manner

and made good recoveries. Another male patient fell in a single room during the night, and fractured one of the bones of his left forearm. Fortunately, this fracture united satisfactorily under very adverse circumstances, as the patient being in a state of extreme fatuity, great trouble was experienced in the treatment of the case, owing to his persistent attempts to remove the surgical appliances and the impossibility of making him comprehend the necessity of their retention. A male patient, under the hallucination that he saw or heard his wife outside, rushed at the window to join her and inflicted numerous wounds on both his hands.

As regards the general treatment of the patients there is nothing notable to mention, excepting that industrial occupation has been more extensively developed, and that in consequence the relative proportion and the average number of those industrially employed have never been so large; thus, out of an average resident number of 465, the average number usefully employed has closely approached 300 during the year. With the aid of patient's labour great improvement has been effected in the principal male airing court by reforming the terrace, widening the paths, and covering the whole with fresh gravel. New paths have likewise been formed in the laundry drying-ground and adjoining the recreation hall. The small male airing court has been finished, and the large new female airing court, the levelling of which entailed a great amount of excavation, has now been laid out. Large parties have been regularly employed in the garden or on the grounds and at farm work; while during harvest very efficient assistance was given, the whole crop, with the exception of a few acres, having been cut and harvested by the labouring staff with the help of the numerous inmates who took part in the harvest work.

In regard to the amusements provided for the patients, the customary fortnightly dance and musical entertainment has been continued during the year and has been agreeably diversified by occasional excellent theatrical performances, got up by members of the asylum staff, which have been invariably greatly appreciated by those inmates who have been capable of enjoying the entertainment.

The most notable events of the year, so far as regards the history of the asylum, were the reception of thirty patients, belonging to the county of Surrey, from Brookwood Asylum on the 12th of September, for the purpose of occupying the surplus accommodation resulting from the recent extension; and the failure of the water supply which first began to be noticed about mid-summer and gradually increased until the beginning of October, when it became quite inadequate for the requirements of the asylum. As soon, however, as the autumn rains set in the supply began to augment, and by the middle of November was sufficiently ample for the needs of the institution.

The following repairs, alterations and improvements effected during the year may be mentioned. In the new male wards the painting of the walls of the dormitories to the height of five feet, and of those of the corridors and day-rooms from floor to ceiling. At the gas-works, one cast-iron and three fire-clay retorts have been introduced and fixed to replace those previously in use that had become defective. An auxiliary steam supply to the kitchen cooking apparatus from the large boilers in the basement, which enables a fire to be dispensed with in Benham's range on every day of the week except Sunday. The new hydro-extractor or wringing machine, which as originally constructed was worked by a steam cylinder,

is now driven by a leather belt in connection with the underground shafting, and this alteration has resulted in more efficient working of the machine with less liability to get out of repair.

The annual inspectorial visit was made by two of the Commissioners in Lunacy on the 11th of December, who, in their report, state that much credit was due to the management for the excellent state of the asylum, and that the personal condition of the patients as regards cleanliness and tidiness of apparel gave them much satisfaction.

In concluding this report the Medical Superintendent desires to tender his respectful thanks to the Committee of Visitors, and to express his appreciation of the efficient services which have been rendered by his fellow officers, amongst whom it is incumbent upon him to mention his colleague, Dr Barron, from whom he has received valuable assistance, and whose zeal and ability in the performance of his duty are deserving of his strongest approbation.

I have the honour to be,

Gentlemen,

Your obedient servant,

ROBERT BRYCE GILLAND, M.D.,

Medical Superintendent.

CHAPLAIN'S REPORT.

To the Committee of Visitors of the Moultsford Lunatic Asylum.

GENTLEMEN,

In accordance with your regulations, I have the pleasure of laying before you my Fourth Annual Report as Chaplain of this Institution.

My Daily Journal will show that the Services in the Morning during the week, and those in the Morning and Evening on Sundays, have been duly performed during the past year. These Services are, as I know from experience, greatly appreciated and looked forward to by a large majority of the patients; their conduct therefore, when present at them, is generally most devout and reverent.

On Sunday the largest attendance at Service has been 298 in the Morning, and 296 in the Evening, as compared with 281 and 279 of the previous year.

The Holy Communion has been administered once every month, the number of Communicants being about 23 or 24. This may seem small as compared with the number of inmates of the Asylum; but, for reasons which I have stated in previous reports, I do not deem it right to press the patients to attend, and receive only those who themselves express the wish to be Communicants.

At Christmas, Easter, and on our Harvest Festival, the Chapel was very nicely decorated, several of the attendants and patients giving glad and willing assistance.

Fifty-four deaths have been reported to me during the past year, of which 36, as compared with 24 in 1881, have been buried in Cholsey Churchyard.

May I suggest that a simple Cross, with the name of the patient, should mark the graves of those who are

buried from this Asylum. At present, except where friends have put up some memorial, there is nothing by which one patient's grave may be distinguished from another.

The new Pall, which is now used at all the Asylum Funerals, has added greatly to the reverent performance of the Burial Service.

Except during the time of my leave of absence, the Wards have been regularly visited by me. The nature of the work does not present any great variety, though it is oftentimes full of interest to me.

I can only repeat, what I have with so much pleasure said in former years, that, although some few are indifferent, yet in every Ward there are many by whom I am always gladly and warmly received, and thus I trust I may say that the Patients generally look upon me as their friend.

Our Harmonium is getting into a very bad condition. May I venture once more to ask you to grant a small Organ for the Chapel; the patients are so fond of Music, and join so heartily in the singing, that I hope you will now be able to accede to my request. A better Instrument in the Chapel than our present Harmonium would, I think, lead many to take a greater interest in the musical portion of the Services than at present.

The Rev. T. J. M. Townsend is now assistant-Curate of Cholsey in the place of the Rev. R. H. Dickens, who left in May last.

To all with whom I am connected in my work here, for their uniform kindness and courtesy, I tender my sincere and hearty thanks. Trusting that, during the past year, I have been of some spiritual help and comfort to those whom you have committed to my charge,

I am, Gentlemen,

Your obedient servant,

R. W. PERRY CIRCUITT, *Chaplain.*
