> Clerk and Steward. DAVID BRODIE.

Housekeeper and Head Nurse. MISS JEANNIE PHILIPPS MACLEOD.

Head Attendant. HERBERT FRANCIS STACEY.

# NEWCASTLE-UPON-TYNE CITY LUNATIC ASYLUM.

### REPORT, 1906.

16TH JANUARY, 1907.

The Committee of Visitors of the Newcastle-upon-Tyne Lunatic Asylum have, in pursuance of the provisions of the "Lunacy Act. 1890," to make the Forty-second Annual Report (and the Eighteenth Annual Report under the Local Government Act, 1888) to the Council of the condition and management of the Institution.

On the 31st day of December, 1905, the number of patients on the books was 792 (viz., 428 males and 364 females). The admissions during 1906 were 181 (viz., 101 males and 80 females).

The admissions were chargeable in the following manner:-

	MALES	s. F	EMAL	ES.	TOTAL.
As Private Patients	3		4		7
To the Newcastle Union	94		72		166
To the Commissioners of Prisons.	0		0		0
To the Tynemouth Union (Walk	er				
Parish)	4		4		8
As "Out-County" Patients	0		0		0
	101		80		181
					and the second

The discharges were 85 (viz., 38 males and 47 females), and the deaths were 81 (viz., 42 males and 39 females).

The average number daily resident was 795 (viz., 435 males and 360 females).

The number discharged recovered was 57 (22 males and 35 females).

The number remaining on the books on the 31st December, 1906, was 807 (viz., 449 males and 358 females). Of this number 20 are chargeable as private patients, as against 21 last year; 3 to "Out-Counties," against 6 last year; 1 is chargeable to the Commissioners of Prisons, against 2 last year; 28 to Tynemouth Union (Walker Parish); and 755 chargeable to the Union of Newcastleupon-Tyne, as against 737 last year, being an increase of 18 for the year 1906.

The Commissioners in Lunacy visited the Asylum on the 20th March, 1906.

The Committee have much pleasure in again expressing their entire satisfaction with the manner in which Dr. Callcott and the members of his Staff have discharged their onerous and responsible duties in connection with the Asylum.

(Signed) WM. H. STEPHENSON.

CHAIRMAN.

### REPORT

OF THE

# COMMISSIONERS IN LUNACY.

### NEWGASTLE CITY ASYLUM, 20TH MARCH, 1906.

Since the visit to this Asylum of two of our colleagues, in July, 1905, the following changes have occurred among the patients:—127 have been admitted; 78 have been discharged or removed, 35 of them on recovery; and 51 have died. There are now 800 names of patients on the statutory books of the Institution, of whom 431 are males and 369 females.

Nine men and 14 women are of the private class, who are received at charges ranging from 16/- to 21/per week; and 3 men and 2 women are out-county paupers, for whom 14/- per week is charged; 10/6 per week is charged for patients chargeable to Newcastle.

There are at the present time vacancies for 11 men and 26 women.

Among the improvements made since the last visit have been the introduction of an electric tell-tale clock to test the vigilance of the female night staff, the substitution of safe slide pulls to the cisterns in some more of the W.C.'s on both sides for those previously in use, and improvements in the ventilation of some of the single rooms on the female side. The laying out of the grounds round the new buildings is now practically complete. We think it would be better to asphalte the yards behind these buildings than to lay them down in grass as is proposed; so treated they would be drier and easier to keep tidy.

A commencement has not yet been made in the reconstruction of the female kitchen department, plans for which were approved by the Secretary of State in the course of last year. We understand that the Committee are awaiting the sanction of the Local Government Board for the necessary loan.

We found Female Ward 5 to-day in the hands of the plasterers and decorators, the patients belonging to it being temporarily distributed among the other Wards. The condition of the Wards throughout the Asylum was very satisfactory. They were clean and well kept, and the air in them was fresh. There appeared to be a plentiful supply of books and of other objects to interest and amuse the patients. The beds and bedding were good and clean. We think it would be wise to provide some protection for the tops of the wringers in the laundry when they are running.

We saw all the patients, except two women who were absent on trial, and found them neat and tidy in their persons and dress. Good order prevailed throughout, even in the refractory wards. We gave to all the opportunity of speaking to us, but heard no complaints calling for mention here. Many patients spoke warmly of the kindness with which they were treated.

A good and plentiful dinner of Irish stew, with draught lemonade, was served during our visit in the dining halls; it was hot and well served, and the conduct of the patients who partook of it was most orderly.

The use of mechanical restraint since the last visit has been recorded with respect to one female patient, restrained with a camisole for surgical reasons on seven occasions for an aggregate of 116 hours; two patients have been secluded on three occasions for three hours in all.

The 51 deaths were all the results of natural causes, which in the large and creditable proportion of 92 per cent. were verified by *post-mortem* examination. No inquest was held. Nearly 25.5 per cent. of the deaths were due to general paralysis.

The serious casualties have been seven in number, and were all fractures of bones which united more or less satisfactorily. Four of these injuries were occasioned by accidental falls; the fifth by a patient coming in contact with a cart wheel; the sixth by a fall during a tussle with a nurse, who was not to blame; and the seventh by a blow from a fellow-patient.

With the exception of dysentery, which has attacked a male and seven female patients (the former and four of the latter fatally), the Asylum has been free from disease of a zymotic character. Three of the women who have suffered from this disease are to-day convalescing in the Isolation Hospital.

Altogether we saw 29 men and 28 women in bed, most of them being feeble aged persons or cases of general paralysis. Apart from these the patients generally presented a healthy, well-nourished appearance.

The returns furnished to our Board for 1905 show a very good average attendance at the weekly religious services and at the weekly entertainments—namely, 71 per cent. and 65 per cent. respectively. Two Church of England services are held in the Chapel on Sundays; and for the 147 Roman Catholic patients one service a week is given, also in the Chapel, by a priest who receives £20 per annum for this duty; Mass is also celebrated once a month.

The satisfactory proportion of 54 per cent. of the patients on the average were taken weekly for walks on the estate, which has a boundary walk of about a mileand-a-quarter in length. In consequence of the proximity of the town, it is seldom possible to take any of the patients out beyond the estate. The average daily number confined to the airing courts for exercise was only 16 per cent. The very good proportion of 81 per per cent. of the men and 75 per cent. of the women were usefully employed on the average daily during the year.

The staff of attendants is adequate, those employed

on day duty numbering 1 to 9.7 on the male side and 1 to 10.7 on the female side. Only 28 per cent. of the men and 13 per cent. of the women have been over five years in the Asylum service. We think that an additional supply of cottages on the estate might be found a means of increasing the length of service among the male attendants. As regards the nurses, we learn that their wages have been raised, beginning now at £18, with the possibility of rising to £35 a year.

Dr. Callcott, who has a thorough knowledge of his cases and continues to administer the Asylum with ability, is aided by Dr. Rattray and Dr. Heslop, as Assistant Medical Officers, by whom the case books and other medical records are admirably kept.

(Signed)

L. L. SHADWELL, E. MARRIOT COOKE, COMMISSIONERS IN LUNACY.

### MEDICAL SUPERINTENDENT'S REPORT.

CITY ASYLUM, GOSFORTH,

NEWCASTLE-ON-TYNE,

17th April, 1907.

MR. CHAIRMAN AND GENTLEMEN,

I have the honour to submit the Forty-second Annual Report, together with the Statistical Tables, for the year 1906.

On the 1st of January, 1906, there were 792 patients (viz., 428 males and 364 females) on the books of the Asylum; and on the 31st December there were 807 patients (viz., 449 males and 358 females) residing in the Asylum.

The average daily number resident in 1906 was 795 (viz., 435 males and 360 females); and the total number under treatment was 973 (viz., 529 males and 444 females). The admissions were 101 males and 80 females, total 181.

The discharges were 38 males and 47 females, total 85; of this number 57 were *recovered* and 19 *relieved*.

The percentage of recoveries as calculated on the admissions, excluding 4 cases transferred from other asylums, was 35.00 (viz., 26.00 males and 45.45 females). The relieved comprised cases which were transferred to

other asylums in an improved condition and such other cases as were sufficiently restored and considered fit to be sent to the care of their relatives.

The deaths were 81 (viz., 42 males and 39 females), and represent a percentage of 10.19 (viz., 9.65 males and 10.83 females) of the average daily number resident and a percentage of 8.32 (viz., 7.94 males and 8.77 females) of the total number under treatment.

The General Statistics of the Asylum are as follows:— Since it was opened in June, 1865, there have been 4,930 admissions (viz., 2,653 males and 2,277 females) of whom 623 (viz., 270 males and 353 females) were re-admissions, having been certified as insane at least once previously and sent to this Asylum.

Of the 4,930 admissions, 1,444 (viz., 633 males and 811 females), or a percentage of 29<sup>.3</sup> (viz., 23<sup>.9</sup> males and 35<sup>.6</sup> females), have been discharged recovered; 1,023 (viz., 564 males and 459 females) have been discharged relieved or not improved, and 1,656 (viz., 1,007 males and 649 females) have died, leaving, as has been stated, 807 patients on the books of the Asylum on the 31st December, 1906, as compared with 792 on a similar date of the previous year, 1905.

Of these 807 patients there are 20 private cases—one is chargeable to the Commissioners of Prisons and there are 3 out-county cases. The actual number of patients chargeable to the Newcastle Union was 755 as against 737 in the previous year, being an increase of 18 patients for the year 1906. The admissions during the past year of both male and female cases have decreased, the discharges have also been less in each sex, and there have been fewer deaths.

The decrease in the discharges and deaths is accountable for the increase of 18 patients in the year by accumulation.

By reference to Table XI., it will be observed that there have been 32 cases (25 men and 7 women) of general paralysis admitted, 4 males and 7 females were epileptic, there were 13 congenital imbeciles, and 15 cases of secondary senile or organic dementia.

Table X. shows the ascertained or ascribed causes of the insanity in the admissions, discharges, and deaths.

In the admissions, *domestic troubles, adverse circum*stances, and mental anxiety have contributed as moral causes in 37 instances, intemperance in drink in 46 instances, and hereditary predisposition in 41 cases. Previous attacks had occurred in 29 instances and 15 cases suffered from congenital mental defect.

Table V. shows a decreased number of deaths in both sexes (20 males and 11 females—in all 31), the total number being lower than it has been for the past six years.

Sixteen men and 10 women have died from general paralysis, there have been 2 deaths from tubercular disease in the male side and 12 on the female side, and in 2 other female cases tubercular disease contributed towards the deaths. One female and two males (one of whom suffered from advanced general paralysis) died from colitis. There have been no inquests and the cause of death was verified by *post-mortem* examination in 93 per cent. of the 81 deaths.

There has been no epidemic or contagious disease during the year, with the exception of a few mild cases of influenza, and the general health of the Asylum has been fairly good, excluding the increasing number of cases of tubercular diseases.

It is with regret that I record the resignation of Dr. Heslop, who had been Assistant Medical Officer with us for nearly three years; he was a reliable and trustworthy colleague, much liked and respected by both staff and patients. He left us on the 9th June to enter the Army Medical Service. You appointed Dr. Colin F. F. McDowall to fill the vacancy, and he entered on his duties on the 14th June.

I am glad to report that the general conduct of the attendants and nurses has been satisfactory, and I have much pleasure in again thanking my fellow Officers for their loyal help in the management of the Asylum.

To the Committee I beg to express my gratitude for their continued kindness and courtesy to myself at all times.

I am, Gentlemen,

Your obedient servant, JAMES THOMAS CALLCOTT.

### APPENDIX I.

### TABLE I.,

Showing the Admissions, Re-Admissions, Discharges, and Deaths during the Year 1906.
