NEWCASTLE-UPON-TYNE CITY LUNATIC ASYLUM.

REPORT, 1894.

JANUARY 21ST, 1895.

The Committee of Visitors of the Newcastle-upon-Tyne Lunatic Asylum have, in pursuance of the provisions of the "Lunacy Act, 1890," to make the Thirtieth Annual Report (and the Sixth Annual Report under the "Local Government Act, 1888"), to the City Council, of the condition and management of the Institution.

On the 31st day of December, 1893, the number of patients on the books was 449 (viz., 215 males and 234 females). The admissions during 1894 were 116 (viz., 52 males and 64 females).

The admissions were chargeable in the following manner:—

	MALE.		FEMALE.		TOTAL.
As Private Patients	2	0	2
To the Newcastle Union.....	50	64	114
To the Commissioners of Prisons.....	0	0	0
As "Out County" Cases.....	0	0	0
	—		—		—
	52		64		116
	<u>52</u>		<u>64</u>		<u>116</u>

The discharges were 54 (viz., 19 males and 35 females), and the deaths were 41 (viz., 29 males and 12 females).

The average number daily resident was 463 (viz., 218 males and 245 females).

The number of discharges recovered was 39, or at the rate of 33·6 per cent. of the admissions.

The percentage of deaths of the average numbers daily resident was 8·8, and of the total number under treatment 7·2.

The number remaining on the books on the 31st December, 1894, was 470 (viz., 219 males and 251 females), being an increase of 21 as compared with last year. Of this number 12 are chargeable as private patients, as against 12 last year, and 457 are chargeable to the Union of Newcastle-upon-Tyne, as against 437 last year, and one is chargeable to an "Out County" Union.

The Commissioners in Lunacy visited the Asylum on the 16th day of July, 1894.

The House Committee have regularly visited the Asylum monthly during the year, and have always found it in good order, and the patients, who have an opportunity every visitation of making any statement to individual members of the Committee, have invariably appeared comfortable and clean. The Committee have much pleasure in continuing to record their entire satisfaction with the management of the Asylum by Dr. Callcott and his staff, with the care and attention shown to the patients, and the good and orderly condition of the establishment.

Satisfactory progress has been made with the buildings for the extension of the Asylum. The foundation works, that is, the works below the floor line, are completed for the principal buildings.

The diversion of the sewer from Coxlodge Village which runs through the estate has also been carried out, together with part of the diversion of the sewer from the present Asylum.

The Architect and the Quantity Surveyor are proceeding as rapidly as they can in preparing for the contract for the superstructure and the auxiliary buildings, and the Committee will shortly advertise for tenders for the works.

The Committee will shortly receive the Annual Medical Report from Dr. Callcott, which, with the Statistical Tables and Statement of the receipts and expenditure under the Maintenance Fund and a copy of the Report of the Lunacy Commissioners, shall be printed with this report, and circulated amongst the members of the City Council and the Board of Guardians.

W. H. STEPHENSON, CHAIRMAN.

JOHN ATKINSON,

Clerk to the Visiting Committee.

REPORT OF THE COMMISSIONERS IN LUNACY.

NEWCASTLE CITY LUNATIC ASYLUM,

JULY 16TH, 1894.

The patients to-day on the books of this Asylum are 466 in number, 218 being males and 248 females. The total is 20 more than at the visit of our colleagues on October 13th, 1893, and although, according to an estimate which does not, we think, allow full minimum of space, there are vacancies for two more males, the women are nine in excess.

Since the date of the last visit 79 patients have been admitted ; 31 discharged, of whom 22 had recovered, and 28 have died. The private patients at present here are three males and nine females. No patients properly receivable here are boarded out elsewhere, and all on the books are chargeable to Newcastle. One patient, a woman, is out on trial.

Twenty-four of the 28 deaths were followed by autopsy ; 13 of them, or nearly 50 per cent., were due to general paralysis ; one was the subject of inquest, and the cause was declared to be "failure of the heart's action during an epileptic fit." The remaining deaths were from ordinary and natural causes. Eight of the bodies examined *post-mortem* had bed-sores. None of the patients seen to-day in bed, six males and 12 females, suffer at present, we are assured, from this cause.

The mortality in 1893 was high, being 13·5 per cent. of the average number of patients resident. The recoveries were 33·6 per cent. of the number of admissions in the year.

The serious but non-fatal casualties have not been many since the last visit, only one resulting in fracture, two in dislocations, and one in a sprained wrist.

No mechanical restraint has since then been recorded, and seclusion only in the case of a man on five occasions, and for 44 hours in all.

The only zymotic or infectious disease since the last visit has been facial erysipelas, which attacked two female patients. The latest list of patients under medical treatment includes the names of 19 males and 11 females; but the health of the Asylum is on the whole good.

The present number of epileptics is 47, and of general paralytics 35; but there is no patient deemed to be actively suicidal, for whom special supervision is requisite. Dr. Callcott employs a special notice and form of instruction to the attendant in such cases.

We have seen the patients in their wards, and many at the dinner in the dining hall, which was well filled. Their demeanour has been very good, all being extremely quiet and well-behaved; and the only complaints were of detention. We are well satisfied with the dress of both sexes, and with the personal neatness of the patients, and in neither division did we find a patient wearing an exceptional dress.

The usefully employed of the patients represent proportions of 60 per cent. of the males and 71 per cent. of the females; but one-half of the numbers in each case are assistants in the wards only. We are informed that all the patients who are able have daily walking exercise outside the airing courts, and about 60 men go weekly beyond the Asylum estate. The attendance at entertainments includes about 200 patients, and a like number attend the Church of England service, and some 40 that of the Roman Catholic Church, both of which are celebrated in the temporary iron chapel, which has been provided in lieu of the old chapel converted into dormitories.

We can report very favourably of the condition of the wards, which we find very clean and comfortable. The new wards, numbered five in each division, and for which the divisions of

the old chapel mainly serve as dormitories, are very pleasant. We should like to see a better supply of plants in the day rooms, especially in the male division; and we recommend the provision of some low bedsteads for single rooms, so as to avoid having mattresses on the floor.

We understand that the question of providing means of communication between the Infirmarys and epileptic dormitories and the Medical Officers' quarters is under consideration. We do not hesitate to recommend telephones in preference to mere electric bells.

In view of the present overcrowding and deficiency of accommodation for additional cases, it is satisfactory to find that the foundations of the extensions for 361 male patients are being laid, and we hope the work will be rapidly proceeded with. We understand that it is proposed temporarily to occupy some existing accommodation at the Farm Buildings for 30 or so male patients. The accommodation seems quite suitable, and its use would free the new Male Ward No. 5 and chapel dormitory for female patients. There seems, therefore, to be no objection to this course. We are glad to find that alternative staircases for the two north dormitories are being built.

The staff of attendants is maintained at about the same strength as at the last visit. There are 20 of each sex for day duty, which gives one to 11 patients in the male, and one to $12\frac{1}{2}$ in the female division; and there are three men and three women for night duty. Ten out of the total number have not yet completed a year's service.

The Medical Staff is as before. The case books, and medical records generally, are well kept.

C. S. BAGOT, } Commissioners
JOHN A. WALLIS, } in Lunacy.

THE MEDICAL SUPERINTENDENT'S REPORT

TO THE COMMITTEE OF VISITORS.

FEBRUARY 20TH, 1895.

MR. MAYOR AND GENTLEMEN,

I have the honour to submit the Thirtieth Annual Report with the Statistical Tables for the year 1894.

On the 1st of January, 1894, there were 449 patients (215 men and 234 women) on the books of the Asylum; and on the 31st of December there were 470 patients (viz., 219 men and 251 women). The average daily number resident in 1894 was 463 (viz., 218 men and 245 women), and the total number under treatment was 565 (viz., 267 men and 298 women), as against 445 and 567 respectively in 1893.

The admissions were 116 (viz., 52 men and 64 women).

The discharges were 54, of which number 39 were "recovered," 9 were "relieved," and 6 were "not improved."

The percentage of recoveries as calculated on the admissions was 33·6 (viz., 19·2 men and 45·3 women). The "relieved" and "not improved" comprise cases which were transferred to other Asylums, and such cases as were sufficiently restored or considered fit to be sent to the care of their relatives.

The deaths were 41 (viz., 29 men and 12 women), and represent a percentage of 8·8 (viz., 13·3 men and 4·9 women) of the average number daily resident, and 7·2 (viz., 10·8 men and 4·0 women) of the total number under treatment.

The General Statistics of the Asylum are as follows:—Since it was opened in June, 1865, there have been 2,715 admissions (viz., 1,436 men and 1,279 women), of whom 341 (viz., 140 men and 201 women) were re-admissions, having been certified as insane at least once previously and sent to this Asylum. Of the 2,715 admissions, 895 (viz., 407 men and 488 women), or a percentage of 33·0 (viz., 28·3 men and 38·2 women) have been discharged "recovered"; 579 (viz., 310 men and 269 women)

have been discharged "relieved" or "not improved;" and 771 (viz., 500 men and 271 women) have died, leaving, as has been stated, 470 on the books of the Asylum on the 31st day of December, 1894, being an increase of 21 patients for the previous year.

The additional accommodation provided by the conversion of the Chapel into dormitories is by this increase nearly fully occupied, and shortly further accommodation will be required, more especially for the female patients.

Of the admissions, it will be seen by reference to Table XI. that 17 cases (viz., 13 men and 4 women) were suffering from general paralysis, and 5 men and 4 women were epileptic.

The recovery rate remains the same as during 1893—that is, 33·6 per cent., as calculated on the admissions.

The deaths, which during 1893 showed an increase of nearly 50 per cent., have not maintained this increase, and the rate for the past year was similar to that for 1892. By reference to Table V., it will be seen that 16 patients—viz., 14 men and 2 women—died from general paralysis, and 4 patients of each sex from consumption. The Coroner held an inquest in one instance only, and the jury returned a verdict of death from natural causes.

The Asylum has been free from any infectious or zymotic diseases.

The causes of the insanity in the admissions, as stated in Table X., show that domestic trouble, adverse circumstances, and mental anxiety have contributed as causes in 36 instances, hereditary predisposition in 26 instances, and intemperance in drink in 26 instances.

The conduct of the attendants, nurses, and servants during the past year has been good, and I continue to receive great help from my fellow officers in the management of the Asylum.

I beg to thank the Committee for their kindness and courtesy to me at all times, and have the honour to be,

Mr. Mayor and gentlemen,

Your obedient servant,

JAMES THOMAS CALLCOTT.

APPENDIX I.

TABLE I,

Showing the Admissions, Re-Admissions, Discharges, and Deaths during the Year 1894.

				M.	F.	Total.
