NORFOLK LUNATIC ASYLUM

Medical Officers' Annual Report

FOR THE YEAR, 1861.

TO THE COMMITTEE OF VISITORS.

The events of the past year have been so varied as affecting the conduct and management of the Establishment, that it is almost impossible for those who, at the close of the twelve months, find themselves comparative strangers in office, to attempt the same careful retrospect which has hitherto been the annual custom.

Subjoined are the usual statistical Tables having reference to the number of admissions, discharges, and deaths during the year.

One hundred and forty nine patients have been admitted, of whom 81 were men, and 68 women. On the 31st of December, 1861, there were resident in this Institution 372 patients, of whom 176 were men, and 196 women. The total number under treatment during the year has been 489 of whom 233 were men and 256 women. The daily average of those resident was 368.

Among the discharges, 61 were considered as recovered, viz. 28 men and 33 women; 6 women as relieved; and 5 men were removed to the Cambridgeshire Asylum not improved.

There have been 45 deaths, 24 on the male and 21 on the female side.

The death of one patient alone involved the necessity of a Coroner's Inquest. A man aged 72, was admitted in a state of extreme exhaustion and only survived his removal here a few hours.

It is a matter of regret that such cases should be sent to an Asylum when so near dissolution, as the patient then only needs such nursing as can easily be secured elsewhere.

The Tables exhibit a larger number of admissions during this than any previous year, but the excess is explained by the fact that in May last, 34 patients, viz. 23 men and 11 women, chargeable to the City of Norwich, were transferred to this Institution from the Infirmary Asylum where they had until then been collected.

It is a source of pain and regret to observe how very many of the cases maintained in this Asylum are incurable.

Restraint has been employed in one instance during the year. This much canvassed method of treatment was found necessary in the case of a male patient, admitted in November, suffering from severe maniacal excitement. The attempts of this patient to injure himself were of so determined and dangerous a character, that, when medicines, careful watching, and the "soothing influence" of the padded room, had failed to allay the excitement, the ordinary strait waistcoat was applied for twelve hours, and with the happiest result.

The Commissioners in Lunacy visited the Asylum in April last, and made the following Report :—

"1861, April 20, Norfolk County Asylum. There are now in this Asylum 343 patients, of whom 156 are males and 187 are females. The admissions since the last Commissioners' visit have been 108; 55 men and 53 women. The discharges have been 46; 20 men and 26 women. The deaths have been 47; 23 men and 24 women. The principal causes of deaths have been General Paralysis, Phthisis, Epilepsy, some few cases of Apoplexy, and gradual decay from debility and age.

"Thirty nine patients are now registered as under medical treatment; 17 men and 22 women. Of these we saw to-day in bed, 9 men and 6 women. Another patient whom we saw in bed was then under seclusion, for an attack which he had made on two attendants. There has been only one case of restraint (that of a patient who had attempted suicide) since the last Commissioners' visit, and 27 of seclusion, ten men and seventeen women.

"The number of patients in the Asylum now employed in lucrative work, are 80 men and 156 women. Of these upwards of 40 men are daily engaged in field and garden labour, and on the female side, besides those employed in the Laundry, the Kitchen, and as helpers in the Wards and Corridors, 72 occupy themselves with needlework, 18 with stocking knitting, and 19 with fancy work. Great pains are taken to render as efficient as possible these arrangements for the profitable employment of the patients, and we saw everywhere satisfactory indications of the good effect which is thereby produced.

“ We saw all the patients of both sexes, and found them with the few exceptions above referred to, in good bodily condition, and for the most part very quiet, cheerful, and free from all excitement. Mr. Casson accompanied us through the Wards and rooms, and we pointed out to him the cases of such patients as appeared to us to be improving, and in which there is reasonable hope of early discharge. All the arrangements noticed in recent entries of our Colleagues to add to cheerfulness of the Wards, Day rooms, Bedrooms, and associated Dormitories, by paintings on the walls, engravings in frames, looking glasses, and matters of ornament, have been continued and carried out in the new rooms; and the greenhouses in immediate connection with Wards No. 1 on each side of the Asylum, together with Aviaries, Vivarium, plants and flowers, contribute to the enjoyment of the patients, and afford a relief and variety which they appear to appreciate.

“ The recommendations for better ventilation made by our Colleagues have been carried out, and the state of the Infirmary Wards is now perfectly satisfactory. In the new rooms over the Laundry the upper portions of the windows have no protection from the sun, and we strongly recommend that blinds should be placed there. The provision for washing in the single rooms and associated dormitories is excellent, all that was wanted in this respect having been supplied; but we found upon enquiry that on both sides of the Asylum, two patients are occasionally placed in the same bath at the same time, and Mr. Casson has promised us that this practice shall no longer be continued.

“ We saw 316 patients (147 males 169 females) dining at the same time in the great dining Hall, and nothing could be better than the arrangements, or more orderly than the conduct of all the patients. The dinner consisted of beef dumplings, rice, and potatoes, with half a pint of beer to each patient; all of which was tasted and found extremely good. There are no soup days here. Meat pies and beef dumplings are the allowance on four days of the week, and on the remaining three days four ounces to each of cooked meat.

“ The number of straw beds continue to be slowly diminished, and we agree with our Colleagues in what has been said at various times on this subject, and also as to the expediency of changing the body linen oftener than once a week, and the propriety if possible of establishing schools or readings. A dance is at present given once a fortnight, and other entertainments are also occasionally provided. The supply of books, too, and of entertaining periodicals is abundant. The average attendance at Chapel on Sundays is 262, and on week days 231.

“ The impression generally derived from our visit has been very favourable, and it is only just to the Matron to mention, particularly, the highly creditable state

"of the female side of the Asylum. The dresses are all very neat and good, and
 "cleanliness, order, and comfort are everywhere apparent. Some suggestions have
 "been made by us for further improvement, and among other things we have
 "recommended the use of sponge baths, and have pointed out the advisability of
 "planting the Airing Courts with shady trees, and of providing, at intervals, a
 "succession of Lectures and Concerts.

"There are at present vacancies for 64 men and 33 women. On enquiry we find
 "that there is not sufficient regularity or attention on the part of the Clerks of the
 "Boards of Guardians in making the Quarterly Returns, and we think that some steps
 "should be taken to ensure in this respect a more strict compliance with the law."

(Signed)

JOHN FORSTER,

S. GASKELL.

As regards the suggestion that the Asylum should be furnished with "*sponge baths*," it is only needful to observe, that, to furnish such an article was considered to be a measure superfluous in the case of *paupers* already provided with accommodation amply sufficient for the purposes of health and cleanliness.

Mr. Firth, who, till the middle of October, acted as Visiting Surgeon, has most courteously afforded us all the information and assistance in his power, and we are enabled to state that the general health and condition of the patients throughout the year has been good, and that no casualty has occurred among them to mar the ordinarily smooth course of events.

WILLIAM C. HILLS, M.D.,

G. MACKENZIE BACON.
