NORFOLK LUNATIC ASYLUM.

Medical Superintendent's Annual Report

FOR THE YEAR 1863.

TO THE COMMITTEE OF VISITORS.

It affords me much pleasure to lay before you my Second Annual Report, and also to be able to speak in satisfactory terms of the general condition of the Asylum.

In so large an Establishment, twelve months could not pass without casualties and changes; nor without the introduction of certain improvements and modifications demanded by the progress of science in all its branches. The usual statistical tables are appended to the Report. The average daily number resident was 377, being 11 above that of the previous year.

As usual, many patients were brought to us in a state which precluded all hope of their surviving more than a few months; and there were many aged persons as heretofore; this must be more or less the case, now that the cost of lunatics are distributed over the Unions, instead of, as formerly, over their several Parishes. We have a few Imbeciles, who were teased either in the Union, or the village street, and on retorting on their tormenters were deemed dangerous! and brought to the Asylum, where they help to swell the number of incurables,—they gave us little or no trouble, and in many cases became useful.

Regarding the aged, who are sent hither in their dotage, there can be no doubt they are much better off in an Asylum; so long as the Unions do not possess good nurses and appropriate rooms, necessary for their care and safety. Is it right however, that the rising generation of these decrepit persons, should be branded with the stigma of "hereditary taint," derived from parents, whose only malady was age and its attendant feebleness of intellect!

On referring to the table, it will be seen that the recoveries during the past year, exceed those of 1862—being 45·19 per cent. instead of 34·65—This increase, is in a great measure due to the favorable nature of the cases admitted, as well as to the early admission of the patients. If this were always attended to, we should meet with greater encouragement. In all diseases, the earlier patients are placed under medical care, the better; but in cases of Insanity, this rule is of vital importance, as the neglect of it, converts a curable condition into a chronic one requiring permanent residence. The average residence in the Asylum of those, who recovered, is about 5 months, the longest was 3 years. The patients *cured*, are those who were admitted during the year; the old residents are chronic and incurable. On reviewing the obituary, it will be seen, that the deaths are seven in excess of the previous year, this I am happy to state, is not attributable to any contagious disease. Five of the deaths were from Pulmonary Consumption, which is unusually high. One death resulted from suffocation during an Epileptic seizure—I consider it a casualty which it is impossible wholly to guard against; still, careful watching on the part of the night attendant is strictly enjoined, and the pillows are filled with well-curved horse-hair and covered with a gauze material, all which precautions, are undoubtedly the means of preventing deaths, which would otherwise be not uncommon.

Parturition occurred in an inmate at the full period of gestation. The child, a female was born with an imperforate anus, for which she was operated upon, with satisfactory results. The infant remained in the Asylum a month, and since her transference to the Union, (to which she is chargeable) I have learnt that she is doing well.

Out of 206 women, about 120 are daily employed in sewing, knitting

stockings, (of which enough are made to supply the Asylum) and counterpane knitting, bonnet making, washing, ironing, in the kitchen, and other domestic occupations. Out of 170 men about 80 are regularly engaged in general outdoor work, in the garden, farm, and grounds, and as artizans of various kinds viz: shoemakers, tailors, painters, blacksmiths, assisting in the office, engine-house, wards, &c.

It is to be regretted, that we do not possess more land, as an Asylum of this magnitude, would furnish an abundance of labour, and the application of our patients to agricultural pursuits, would vastly promote their chance of recovery.

Several of the patients have been taught shoemaking and tailoring,—we are able to make all the boots required for the use of the inmates of the Establishment, and I anticipate similar profitable results with regard to the men's clothing.

Many of the Wards have been repainted, and the work was executed by two patients and an attendant. Since the Forge has been set up, we have reaped commensurate advantages, as we were previously compelled to send the most trivial things to the village smith. This affords another means of making our Establishment, as independent and self-supporting as it is possible for an Asylum to be, without increasing its staff of tradesmen.

There have been a few escapes during the year. In nearly all, the patients were captured within a few hours. From the exposed character of the farm and grounds, it is a matter of surprise that these cases are so rare.

In the course of the year, many patients have been allowed to pass the day with their relatives and friends, and some were permitted to do so *en parôle*.

In the previous year, two male patients went to the Exhibition, one of whom was away a week in the charge of the Steward; these privileges have been attended with the happiest results.

All the patients capable of appreciating the enjoyment of walking beyond the walls, do so two or three times a week. The usual entertainments have been given to the patients as in previous years. These now form objects of regular

and pleasurable anticipation, and it is evident they afford both general and considerable gratification. The two sexes have been allowed freely to commingle on these occasions, and hitherto there has been no reason to regret a concession, which has never been abused.

In conclusion, I am happy to report, that a good state of health has been experienced by the patients.

There has been an entire absence of Epidemic, Endemic, or other spreading disorder, and I believe the sanatory arrangements of our Asylum, are such that we may confidently predict a similar exemption for the time to come.

WILLIAM C. HILLS, M.D.

Medical Superintendent.

The Commissioners in Lunacy inspected the Asylum in May last, and made the following report.

“NORFOLK COUNTY ASYLUM,

“21st May, 1863.

“We have officially inspected this Asylum, and have personally examined
“all the patients who are now 371 in number, viz:—170 men, and 201
“women. There is one more woman on the books, but she is absent on trial.

“We found the patients in a very satisfactory state, they were generally
“tranquil and orderly, and clean in their person and dress. Every effort
“appears to be made to afford them the means of occupation and recreation;
“and the wards have a very cheerful and comfortable appearance. Straw
“bonnet making has been introduced in the women’s wards, and proves to
“be an interesting and profitable employment. From the weekly returns,
“it appears that about 110 women, and 90 men, are regularly employed.
“besides the men who work in the gardens and pleasure grounds. The North
“farm affords constant occupation for between 20 and 30 male patients; we
“have no doubt that if a larger amount of land were attached to the
“Asylum it might be advantageously cultivated, and we hope that the

“Visitors will not lose sight of any opportunity that may offer of adding
“to the present farm.

“Divine Service is performed as usual, the average attendance, being on
“Sundays 234, and on week days 207. The number of communicants is
“about 35.

“The walls of the Chapel require colouring, and it would be well if
“something could be done to give it a more ecclesiastical character. We
“observe that many of the rooms have been painted and papered, and we learn
“that others which now require it, will shortly be similarly improved.

“The ventilation of the bath rooms is now satisfactory. We learn that
“it is proposed to substitute earthenware baths for the copper ones now in
“use, and as the baths will be smaller and therefore require a less supply of
“water, we hope that it will be found practicable in future to give a fresh
“supply to each patient.

“There is still a very large proportion of straw beds, although the
“number of patients of faulty habits is very small. The return of wet beds
“last night being 8 on the male side, and 4 on the female side. We suggest
“that hair mattresses should be substituted as soon as possible, and that better
“pillows should at once be supplied in the place of those now in use.

“We saw 300 of the patients of both sexes at dinner in the hall; they
“were very orderly, and the dinner, which consisted of meat, bread, and
“potatoes and beer, was very good, and well served. Dr. Hills is of opinion
“that the practice of thus associating the patients in a general dining hall,
“is in every way advantageous.

“The number of admissions since our last visit on the 2nd of April,
“1862, have been 117, of whom 57 were males, and 60 were females.

“Within the same period 76 patients of both sexes have left the Asylum,
“32 of whom were reported as recovered. Of these patients who were
“discharged, 41 belonged to the city of Norwich, and were removed to the
“Infirmery Asylum.

“Forty three deaths have occurred. The alleged causes of death seem

"to call for no special remark. It was thought necessary to hold an inquest
 "in the case of a male patient, who had received an injury to the head two
 "months before his death, but it was ascertained by post mortem examination
 "not to have been the cause of his decease. The number of patients under
 "medical treatment for bodily illness is 9 males, and 6 females, and during
 "the past year no Epidemic has prevailed. The new wards for infectious
 "cases are finished but have not been occupied. The Asylum continues to
 "be in a very satisfactory state, and its condition is most creditable to the
 "management of Dr. and Mrs. Hills. The latter has succeeded Mrs. Owen
 "as matron.

Signed

"W. G. CAMPBELL, } *Commissioners*
 "JAMES WILKES, } *in Lunacy.*
