# NORFOLK LUNATIC ASYLUM.

## Medical Superintendent's Annual Report.

FOR THE YEAR, 1872.

### TO THE COMMITTEE OF VISITORS.

I have the pleasure of placing before you my Annual Report and Statistics of this Asylum.—On the 1st January, 1872, we numbered 179 men and 261 women, making a total of 440 patients; in the course of the year we received as *new* cases, 37 men and 62 women, and re-admitted 8 men and 14 women, making the total of admissions 121; of which 45 were males and 76 females. The number of patients under treatment was 561; of which 224 were men and 337 women; we discharged 20 men, of whom 12 were cured, 3 relieved, and 5 transferred (not improved) to other Asylums. Of women, we discharged 51 of whom 38 were cured, 6 relieved, and 7 transferred (not improved) to other Asylums: the latter of both sexes left us in much the same condition as when admitted, all being chronic cases of some standing. Death removed 19 men and 20 women, so that by deaths and dismissals, 110 left the Asylum; 39 of these being men and 71 women, leaving on our books at the end of the year, 451, viz:

185 males and 266 females. The admissions were almost the same as in the past 3 or 4 years, but on comparing the numbers in the Asylum with those of the preceding year, they shew an increase of 6 men and 5 women. The mean daily number of inmates for the year, was 180 men and 271 women; the highest number on any one day was 187 men and 278 women; our limit of sleeping accommodation being only sufficient for 194 men and 273 women.

The recoveries were on the Male side 26.6 per cent. of those admitted, on the Female 50; this exceptionally small per centage on the Male side, was due to the badness of our *new* cases, which as a rule yield us the largest number of recoveries. The deaths were in the proportion of 8.6 per cent. of our average daily number of inmates, the lowest annual death rate ever recorded for this Asylum. Paralysis caused 1 death, Epilepsy 3, General Paralysis 6, &c., &c. (*vide Table 3.*)

In February the House Keeper was attacked with Small Pox, in a virulent and suppressed form, and having but feeble vital powers she soon succumbed; a female patient, who was seized at the same time, and in a similar way, recovered because she had youth and stamina on her side; fortunately the disease extended no further, although there were other cases in our immediate neighbourhood; re-vaccination was obstinately refused by the House Keeper, and was impossible in that of the patient, on account of our difficulty in getting the necessary lymph; that which was supplied (some months previous to this outbreak) by the Privy Council, proved entirely in-effectual. All the Servants and Inmates were however re-vaccinated with primary lymph; which we were at last compelled to purchase from a Public Vaccinator at Worcester; the majority presented the vesicle more or less perfect; with the exception of these 2 cases of Small Pox, and 2 of mild Scarlet Fever, we may congratulate ourselves upon an almost clean bill of health.

No inquest was held during the year, and we had but two Surgical cases of any importance; one being a fracture of the femur, the other of the tibia. One Woman was delivered in January last, she recovered from her insanity, and has left the Asylum.

One Male Patient very cleverly effected his escape, and was not heard of until several months afterwards, when strange to add, he was steadily pursuing his original business, that of rag merchant; although very eccentric and irascible he was harmless.

Australian Meat has been used, cold, for dinner on Sundays during the last 12 months, and we have proved it to be a perfectly satisfactory and satisfying form of Animal Food; two other days in the week, it is also given to 160 imbecile, idiotic and demented patients. I have in these latter cases, without any detriment to health, substituted milk and water for beer. You are aware this class constitutes a large proportion of our chronic and permanent patients; the change has been effected with scarcely any remark on their part, and with very little alteration in their standard weight, whilst some appear more quiet and cleanly for it. I think we may fairly regard this class of patients, as having an inferior type of life and nervous organization; they lead a torpid existence, and are not subject to that nervous waste of wear and tear, which in normally developed men, and in many of the Insane, creates the demand for a liberal supply of animal diet and alcoholic beverages; we have also lately adopted the plan of giving Australian Meat to our convalescents for some weeks prior to their discharge, and of withholding beer; this is done with the view of gradually approximating them to their ordinary dietary in their own homes, so that on their return they may not be conscious of sudden change in this respect.

I must now draw your attention to the crowded condition of the female side. For six months our proper complement has been exceeded, and when we bear in mind the fact, that the associated bed rooms, have only a definite amount of cubic space allotted to each occupant, it is obvious that this cannot be curtailed, without serious impairment of health; thus, every supernumerary patient inflicts a positive injury on the rest, by consuming the allowance to each of oxygen. Air for 100 cannot any more than food, be made to serve for a larger number; and starvation in the matter of air, is as serious in its effects, as in that of food.

The problem how to deal with our numerous chronic harmless permanent inmates, remains unsolved as in former years ; the complex machinery and liberal arrangements of an Asylum, are equally superfluous and disproportionate as regards this class of lunatics ; if sent to the Workhouse, they do not flourish on that uncongenial soil, but soon deteriorate and return to us, in a worse condition.

The rate at which our numbers have augmented, will be found for the decade just completed, to have been a little over 2 per annum for the Men, and about 7 for the Women ; but, if we take the last 5 years (the latter half of this decade) we shall find it to have been  $1\frac{1}{2}$  and 9 respectively. The number of cases of relapse was 22, being less than one-third of that of admissions ; and on studying carefully the various causes of the *recurrence* of insanity, I find that in one-fourth, it was due to impairment of general health, and in another fourth, to cerebral disease ; in 2 cases *only* could it be traced to intemperance ; domestic troubles accounted for a certain proportion, and the remainder could not be referred to any assignable cause.

The period of relapse between discharge and re-admission, varied from two months to nineteen years, with intervals of six months and under ; 3 were re-admitted.

Of One Year	4	„

„ Five Years	2	„
„ Six Years	1	„
„ Seven Years	1	„
„ Nineteen	1	„

Our Amusements and Entertainments of one kind and another, have been as heretofore, carried out with success, and attended with the best results. In addition to the customary walks in the country, 50 of the patients took a trip down the river, in a Steam Boat, and had a Pic Nic, which was enlivened by our band of musicians, and was thoroughly appreciated and enjoyed by all. Lastly, it affords me extreme pleasure.

to be able to report favourably, upon the general conduct of the Servants and Attendants, who, with a few trifling exceptions, have given complete satisfaction. An application from the male attendants for an increase of wages, was after due consideration, responded to by an addition being made, which raised their rate to the standard of other large establishments in this County.

WILLIAM C. HILLS, M.D.,

MEDICAL SUPERINTENDENT.

*The Commissioners in Lunacy inspected the Asylum in August last, and made the following Report.*

NORFOLK COUNTY ASYLUM,  
29TH AUGUST, 1872.

Since the visit of our colleagues, 10th June, 1871, the following have been the changes in the patients, viz:—

		M.	F.	Total.
Admitted	...	55	94	149
Discharged	..	35	58	93
„ of whom recovered		27	39	66
Died	...	30	26	56

The Deaths were all from ordinary causes, the principal being Phthisis, 16 ; General Paralysis, 9 ; Epilepsy, 5 ; Exhaustion after Mania, 6, and Senile Decay, 6. Post-mortem examinations were made in 11 cases ; there has not been any inquest.

The present number of patients on the books is 456, viz:—180 males, and 276 females, of whom 2 are absent on trial. Although a few days since, as many as 40 men, and 98 women were suddenly seized with Diarrhoea, which in Dr. Hills' opinion was attributable to atmospheric causes, it was only temporary, and the bodily health of the patients appears now to be generally good, notwithstanding the number of aged and infirm, which continues to be large. The patients registered as under medical treatment are 35 in number, viz:—9 males and 26 females ; we found only 2 men and 8 women in bed. Seclusion has since the last visit been limited to 6 female patients, one of whom was secluded on two occasions, and the others once each.

The patients generally at the time of our visit, were very free from excitement, and their personal condition as to clothing and cleanliness, was most satisfactory and creditable to the attendants. We saw 306 patients, 126 males and 180 females assembled at dinner in the hall, whose demeanour was very orderly ; the dinner consisted of good baked beef and potatoes, bread and beer, and was comfortably served.

The attendance at Divine service, averages, on Sundays 148 males and 210 females, total 358, and on week days 85 of the former and 165 of the latter. According to the latest ward returns, 92 males and 186 females are usefully employed: Of the former 35 work on the farm and in the garden, and 20 as Carpenters, Painters, Smiths, Tailors, Shoemakers and Upholsterers, and of the latter, 89 sew and knit, and 30 are engaged in the laundry department ; the remaining working patients, 37 men and 67 women are occupied more or less in the kitchen, offices and wards.

The arrangements for out-door exercise and recreation continue as heretofore quite satisfactory. The patients of both sexes are taken out frequently for walks in parties averaging about 20 men and 30 women, and from 12 to 14 patients of the respective sexes enjoy weekly boating excursions. The associated entertainments consist of fortnightly dances, occasional concerts and exhibitions of the magic lantern.

On the 8th inst., 20 male and 30 female patients enjoyed a steam boat excursion down the river, all the expenses of which were borne by " the Johnson fund. "

Amongst the more important alterations and improvements completed since the last visit, or in progress, we have to report the following, viz. : —

The Dining Hall has been warmed by means of hot air. In each of the wards in the old building, the water closet has been improved by the addition of a seat, and the conversion of a single room into a scullery. Orders have been given and preparation made for the immediate substitution of boarded, for stone floors in the only remaining rooms which are flagged, viz :—two dormitories and one large day room in each division.

An excellent aviary has been constructed in the principal female airing court, at the cost of the Johnson fund. The airing courts or gardens on each side have been improved by additional planting and re-arrangement of the flower borders.

We found the several wards and rooms in their usual excellent state, well furnished and cheerful and comfortable in aspect, and the beds and bedding throughout were clean and in the best order.

The increase latterly in the number of patients has been at the rate of from 10 to 11 annually, and at the present time, the female division contains more than can be properly accommodated, and there are only 10 vacancies for men. In these circumstances the the question of making further provision for the insane paupers of the County should no longer be delayed. The present Asylum contains as many patients as can be properly and satisfactorily taken charge of by the existing Staff of Officers, and our experience in other Asylums, leads us to think that any material addition to the numbers, would greatly interfere with the satisfactory working of the institution, and with the proper care and comfort of the patients.

The Estate is only 36 acres in extent, 9 of which are covered by the Buildings and airing courts, leaving 27 acres only as farm and garden. This amount of land is very insufficient for the occupation of the male patients now here, and would be quite inadequate for any increased number, and we are informed that there is little or no chance of its extension in any direction ; we therefore venture strongly to suggest, that for the more quiet and chronic cases, of which there are always a large number, provision should be made in a building of an inexpensive character, at some short distance from the present asylum, and which might have the benefit of Dr. Hills' general supervision, leaving the existing buildings for the more recent and excitable cases.

Signed,

R. W. S. LUTWIDGE,	}	Commissioners in Lunacy.
JAMES WILKES.
