LITTLEMORE ASYLUM.

[*comprising an Union of the Counties of Oxford and Berks, the City of Oxford, and the Boroughs of Abingdon and Reading, for the maintenance of their Pauper Lunatics.*]

At the first Meeting of the Committee of Visitors of the PAUPER LUNATIC ASYLUM at LITTLEMORE appointed for the Year 1855 held at the Asylum (pursuant to due notice) on Wednesday the 31st day of January 1855 (being within one Calendar month after the election of the present Committee.)

PRESENT

HUGH HAMERSLEY Esquire, *Vice-Chairman,*
and

ROBERT BULLOCK MARSHAM Esquire, D.C.L.
Justices of Oxfordshire.

JOSEPH ARNOULD Esquire, M.D.

HENRY RICHARD EYRE Esquire,

GEORGE CHARLES CHERRY Esquire,
and

JOHN BASIL BARRETT Esquire,
Justices of Berkshire.

WILLIAM THORP Esquire,
and

RICHARD JAMES SPIERS Esquire,
Justices of the City of Oxford.
and

WILLIAM STACY Esquire,
A Justice of the Borough of Abingdon.

Resolved

Resolved that the following

REPORT *

of the SUPERINTENDENT be printed and circulated.

TO THE COMMITTEE OF VISITORS.

MY LORDS AND GENTLEMEN,

The number of Patients received into the Asylum in the year 1854 was larger than in any previous year; excepting from this review the number of Patients who on the opening of this Asylum, were admitted in large numbers from Licensed Houses. The number of patients who having previously been in the Asylum have been again sent to it; and the number of those removed from other Asylums, (especially on the closing of the House at Hook Norton,) has contributed largely to that Increase.

* RULE 25—[of the General Rules of the Asylum.] The Superintendent shall submit to the Committee of Visitors, at their first Meeting after the Oxfordshire Epiphany Quarter Sessions annually, a Report in writing, of the general condition of the Asylum, and the number and character of the Patients; distinguishing the numbers who have been received and discharged as cured; the number of readmissions; the number employed, and in what manner; the deaths which have occurred in the preceding year, and also the total number of discharges, cures, and deaths since the opening of the Institution, and specifying the sexes in each statement: with such other facts as the Superintendent may think desirable, or which the Visitors may have suggested.

The admissions in the year consisted of 67 Males and 58 Females: Total 125,—of which number 21 were cases of readmission; and 10 of removal from other Asylums. A somewhat larger number than usual of the Patients admitted, were suffering under recent attack; and the proportion of those who have recovered, and of those who died, has also increased. The Mortality was aggravated by the occurrence of severe febrile illness, which affected the aged and debilitated Male Patients, especially in the month of April. In the latter part of the year, when the neighbourhood was much affected with an Epidemic, more or less fatal, the Asylum was happily exempted; and indeed, since the spring it has maintained its usually healthy character.

Four Inquests by the Coroner were held in the year upon the bodies of Patients who had died suddenly, of these one was to investigate the cause of death of a young Female who being subject to Epilepsy, had turned upon her face in bed in a Fit, and was found dead in that position. In the earlier years of the Institution such occurrences were more frequent than has since been the

case. And the present infrequency of the occurrence may be attributed to the following precautions. All the Patients who are known to be subject to Epilepsy are supplied with a pillow of well curled Horsehair which is covered with the coarse material used for straining Milk. And in the event of a Patient turning on his face on this Pillow, the breathing is not arrested, but is carried on as through a Respirator. The roughness of the coarse cover of the Pillow is very unpleasant to persons not accustomed to the use of it; and the Patients consequently endeavour, at first, to avoid it. The Patient in question did so by getting her head under the bed clothes, and thus on to the sheet; whereby death ensued.

The number of Epileptics in the Asylum is nearly one fourth of the average number of Patients resident.

The Escapes of Patients from the Asylum have been more than heretofore and of a peculiarly resolute and determined character. The criminal Patient J. D. (who in my last Report, was noticed

as being absent by escape) has not since been heard of at the Asylum.

The vagrant J. T. who was sent to this Asylum on his discharge from the prison at Oxford, and was reported as having escaped last year, was readmitted in the Asylum in February under the name of J. B. on his discharge from the Castle at Oxford. He had been committed to the Aylesbury Gaol, and was sent thence to the County Asylum from which he had also escaped. He was returned to that Asylum to which he had been consigned by an order of the Secretary of State.

In March 1854 J. S. a criminal Lunatic, who had been sent here from the Gaol at Reading effected his escape. He was absent until September, when it was reported to me that he was in the custody of the Police at Macclesfield. He is now in this Asylum. In May three Male Patients escaped together. Two of them had, by the death of relations, become interested in property; which they conceived it to be necessary that they should themselves look after. The third was convalescent after a recent attack; he, being a trusted

patient, found means to make a false key by which the whole party were liberated. He has not been sent back to the Asylum; but resides with his mother at Reading and good accounts are reported of him. One of the others was sent back immediately. The remaining one was given into custody by his friends and brought back at the end of fourteen days. His effort to provide for himself had improved the state of his mind. The having a claim to property raised a doubt of his being chargeable to his Parish. I recommended to the Magistrates of the City of Oxford, that he should be allowed to continue his effort to provide for himself under the supervision of the parish authorities. This was assented to; and he calls at the Asylum from time to time to show himself and thank us for the kindness he received here. In June G. L. a discharged soldier; and W. H. a criminal from the County Gaol at Reading, effected their escape from the Asylum by an effort of extreme recklessness, and disregard of danger to their lives. The one was brought back by the Police of Abingdon, and the other was apprehended at Hillingdon and also brought back to the Asylum. G. L. had made many previous

attempts to escape, of crafty design, and deliberate purpose; cherishing a hope of getting a free passage to Australia, which had been refused in consequence of his being in the Asylum.

Many other acts of disregard of a scarcely existing boundary have been manifested. The impulse to run away, without consciousness whither, is manifested by many Epileptics; and the desire of being their own Masters exists in the Minds of many others. The Escapes alluded to have caused much anxiety, and have been under the notice of the Committee of Visitors at their monthly Meetings.

It was believed at the institution of the Asylum that Criminal Lunatics would not be received into it; and consequently no means of safe custody of Patients were provided beyond what was considered requisite for the ordinary Pauper Lunatic. The obligation to receive Insane persons from the prisons was imposed on the Asylum by an authority vested in the Secretary of State. In a former Report to the Visitors I called the attention of the Committee to the unsuitableness of such persons

to be detained under their care; pointing out that their habits previously to imprisonment, and probably to Insanity; their vagrant and unsettled disposition; their proneness to live by irregular means; their aversion to control; and their disorderly example, conduct, and conversation; made it undesirable that we should be burdened with them. The Asylum not being constructed for the safe custody of Criminal Lunatics, could not be altered for their accommodation, excepting at an unwarrantable expense. It may be said then, that the responsibility of the escapes of the Patients in question, rests rather with the Legislature for withholding suitable provision for their care, than with the Asylum which takes unwilling charge of them. It is observable too, that the proper Inmates are injured by the association with criminal Lunatics: and are irritated by the extra surveillance required, and the restrictions placed on them.

The Commissioners in Lunacy in the early part of the year, made inquiry of this,—in common with other Asylums, concerning the Dietary of the Patients; and of the progress made in the

management of them, especially as regarded the use or the disuse of mechanical restraints, and of seclusions;—also of the accommodation which had been afforded by the Asylum during the five previous years, and the results of treatment. The fact of the inquiry was made known to the Committee, and my reply was laid before them. The information was not however of a character otherwise than was previously in the possession of the Visitors. The subsequent publication of the replies given to the Inquiry by the Superintendents of most of the other Asylums gave an importance to the Replies which was not contemplated by the Writers; and which, singly, none of those Replies would have possessed. And they contain some matters of comparison to which I would invite the notice of this Committee.

With that view I have appended to this Report a comparative Table of the Dietaries of the County Asylums. The question of the diet to be allowed the Patients in the Littlemore Asylum, when not specially altered by the Medical officer, was considered by the Committee previously to the opening of the Institution. The Metropolitan Commissioners in Lunacy had then recently reported that;

“The supply of a sufficient quantity of proper food appears to us one of the most important aids towards the relief or cure of Insanity.” again; “In two County Asylums,—those of Middlesex and Dorset, the diet of the Patients was sometime since improved by an increased allowance of food, and in both these Asylums, there was recorded after this alteration an increase in the number of recoveries.” The Table affords a view of the Dietaries of thirty five Asylums.

The Replies of the Superintendents above alluded to, so far as they develope the principles and practice of management of their respective Asylums, record the existing condition of the Asylums of this Country. The first reply on the list, (being that of the late Superintendent of the Bedfordshire Asylum,) and the last on the list, (being that of the Superintendent for the North and East Ridings of York)—alone avow an approbation of the use in County Asylums, of restraints in Medical cases. They are however supported by the Superintendent of the Kent Asylum, who did not reply to the Commissioners, but who, in a report to the Visitors of the Asylum, expresses strongly his anxieties on the subject and

calls the attention of his Committee to the cases in which he has used restraint, expressing his conviction that it is at times beneficial, and that as yet its disuse is not made justifiable by any known substitute.

The Superintendents of Private Asylums generally use restraints. They may be most necessary where the limited size of the Asylum admits of no other resource ; and the confinement of the arms of a Patient,—which still admits of his taking air and exercise,—may be better than that he should be denied the advantage by a lengthened seclusion. The late Superintendent of the Bedford Asylum observes—“ A large staff of Attendants and sufficient classification, render much restraint unnecessary.”—He appears to be pointing an argument against the existence of too small Asylums. The Superintendents of ten of the county Asylums did not reply to the Inquiries of the Commissioners. The remainder of those whose replies I have not quoted, being advocates of nonrestraint, vary in the caution observed in their answers. They are generally cautious and qualified.

As regards the use of personal restraints in the Littlemore Asylum, the Visitors are already cognisant of my practice. In my reply to the Commissioners I stated that; "Excepting for surgical necessity, mechanical restraint to the limbs has not been used." I however alluded to the fact of seclusion being resorted to. The novelty of the position in which I am placed by this comparison with certain other Superintendents, makes me desire to explain more freely than has been hitherto necessary, my sentiments on the subject of restraints. I feel that I should be justified in saying that no restraint to the limbs is used in this Asylum; but it would be injudicious to allege this while the following notices are in the Medical Journal, and in the report of the Commissioners in Lunacy. "November 1, 1853 E. T. has in the last week had a Jacket to which a strap can be fixed confining the elbow to the side, to assist in restraining the convulsive action by which he while under Epilepsy, tears his face." This not being an efficient restraint, was not persisted in; but the plan substituted for it is thus alluded to in the Commissioners' record of a visit to the Asylum, "We have found the patients quite free from Mechanical restraint, unless a stiffened sleeve worn

by an Epileptic patient be considered as such." The sleeve being stiffened with whalebone, the elbow joint does not bend; and, in the Patient's convulsion, the hand is carried beyond the object at which he grasps.

As regards the case of extremity in which Restraint was applied as an agent of Medical Treatment, by the Superintendents of the Kent Asylum. My experience tells me that such restraint under similar circumstances would not have been applied here; and tells me that forbearance is very little liable, if not impossible to be carried too far. I gather from the replies of the Medical Superintendents that my own remedy would meet with very doubtful assent; it would have been the trusting to the ultimate reaction of abstinence and fatigue to force rest, and to beget the desire for food. I must at the same time avow that I thoroughly feel the anxieties of my position; that the use of restraint would relieve me of my difficulties; that justification and the sympathy of many others would be certain; that the propriety of the measure would be manifest; that the repetition of restraints would be more inviting;—the benefit or convenience more delusively apparent;

the advantage of the remedy still to be proved ; and the practice of it condemned by very extensive experience.

In July last I had occasion to call the attention of the Committee to the injuries inflicted on the Patient C. S. a Policeman, by the injudicious restraint applied to him before his admission to the Asylum. I have received a letter regarding him, from which I extract the following passages. “ The horrible lacerations on the Arms of C. S. have been the just object of enquiries and animadversions of yourself and the visiting Magistrates.—As the last Medical Attendant I will relate the case to you, and I think you will find that I was not the cause of it.—It was quite evident that he was suffering from Fever :—he was a quiet, temperate man of exceeding good character.—His wife employed a regular keeper, a man who had been employed in that capacity in several Asylums.—On the following Thursday I desired that all restraint should be removed, that clean linen should be applied to him preparatorily to his removal to St. Luke’s. At night the keeper left him, and went home to bed, having first fastened cords round his arms and feet and secured them to the bedstead. These cords,

as it appeared, were left loose ; and, in the night, he became violent,—straining and lifting up the bed in his rage with the cords. I was called up to see him about six o'clock in the Morning,—when this tragical occurrence was first made known to me, the whole extent of the injuries I at once saw. I could not have foreseen that the Keeper would have acted thus, but it was quite evident he had a considerable knowledge of Insane people, picked up in his capacity of keeper. I trust that you will show this statement to the Visiting Magistrates who commented on S.'s case!" The conduct of this Keeper is an evidence of what example teaches with deficient intelligence on the part of the person who ought to have profited by it. It is a precedent of restraint followed in the mildest manner by one who had neither the anxiety nor the intelligence of his Teacher. To be really mild, a restraint, applied to the limbs, needs to be firm and secure. The handcuff of iron is well proved to be the mildest application of the sort. It is effectual ; it forbids resistance ; and it inflicts no injury to the wrist ; it is revolting and disused ; yet it is an object which the advocates of restraint need to contemplate.

Seclusion is occasionally resorted to in every County Asylum, and it is usually reported of as beneficial. It is however apparently used for different purposes, and several Superintendents record that as a punishment, they have not found it successful. The opinion however, of Dr. Diamond, the Superintendent of the Female Wings of the Asylum for the County of Surrey, is too remarkable to be unnoticed; it is—"Seclusion, or solitary confinement of Patients in a separate room against their will, I also much object to. I have no doubt cases may occur in which this may be requisite and beneficial, but they must be of rare occurrence. I have not had a single patient under seclusion during the past 12 months."—(the year 1853.) It is expected that he will explain points on which any misapprehension may exist. In the management of persons who need to be separated from others, very much must depend on the greater or less crowding of the Wards, and airing courts. He especially refers to a "free range out of doors" and the spaciousness of his airing courts. Still, a substitute for quiet to a patient who labors under sickness is to be provided for.

The account which I sent to the Commissioners of the Seclusions in the Littlemore Asylum during the last five years was as follows; the account of 1854 being now added to it.

		Number of Patients in the Asylum.	Num ber in Seclusion in the Year.	Under Epileptic Excitement.	Under Sickness.	For Discipline or Casually Occasions.
In the year	1849	382	52	15	21	30
	1850	406	45	10	24	47
	1851	440	34	12	16	8
	1852	456	38	18	15	11
	1853	473	13	7	5	1
	1854	519	15	7	8	2

I must remark that the increase of the number of Seclusions in 1850 over 1849, (as regards occasions for Discipline or casually,) might be accounted for by Berkshire Patients who being removed from Licensed Houses were received at the latter end of the year 1849. The number of seclusions very rapidly diminished as the Patients and Attendants learned confidence in each other; and the opening of an additional Building admitted of greater separation of Patients by classification. The three Seclusions—casually—of the last two years—apply to one person J. L. who imagines herself to be upon earth on a mission to govern the world, and fre-

quently attempts to take away the ward keys from her Attendants "by Divine orders." When she has caused a struggle it is necessary to separate her from the Attendants, and to allow her rest and solitude for a time.

The condition of the Patients when admitted to the Asylum is so variable that I have been afraid to think that any one year was a promise of what might follow in the next.

The Statistics which the Commissioners have collected do not give information of the Population of the Districts, from which the Lunatics are taken to the respective Asylums which receive Patients from those Districts.

And an assumption that the number of Pauper Lunatics in every Asylum would be much the same in proportion to the Population for which it was provided, would be erroneous. For instance the Hanwell Asylum being unequal to the reception of all the Lunatics of the County of Middlesex could at one time not allow the most urgent cases to be sent to it. But the Colney Hatch Asylum, recently

opened in the same County, received from the eastern part of the County, crowds of Patients of an urgent Character.

It may still be said of the Littlemore Asylum that it has not yet refused admission to any Patient who has been brought to it with a legal order from any Parish within the two Counties in union.

	Average Number in the Asylum.	Admitted.	Recovered.	Died.
Littlemore Asylum in 1853	381	107	39	34
Hanwell Asylum in 1853	968	127	43	68
Colney Hatch Asylum in 1853	1244	392	142	208
Littlemore Asylum in 1854	402	125	52	50

Thus the results, which may appear to be to the credit of an Asylum or otherwise, may be produced from causes which would exclude the results from fair comparison.

Such result as is afforded by the comparison of these Returns from 22 County Asylums, which have been open five years, affords, as regards

those five years,—a favorable average to the Littlemore Asylum.

	Average No. Resident.	Average No. Admitted.	Recovered per cent. on No. Resident.	Recovered per cent. on No. Admitted.	Died per cent. on Residents.	Died per cent. on Admissions.
22 County Asylums - -	360	34	13	38.3	11.3	33.2
Littlemore Asylum - -	334	36	13.7	39.1	10.2	28.3

I append to this report a Table of the Populations of the Unions of Parishes in this Asylum District, of the number of Patients sent from each, and of the changes that have taken place in the year regarding them.

Consequent on the change in the certificates required by the Lunatic Asylums Act of 1853, it has happened that a considerable proportion of the Forms of order, sent with the Patients for admission to the Asylum, have not been filled up as the Act directs. These irregularities have generally been corrected before the orders have been presented to this Committee, or to the Board of Commissioners

in Lunacy. It has however also happened that an order has been refused to be corrected. This obliges me to remark that an order is invalid until made legal by all the certificates being properly filled up ; that the Paper is not an order, unless a legal order.

The Accounts of the House Steward accompany this Report.

I have the honor to be,

Gentlemen,

Yours' most respectfully and obediently,

WILLIAM LEY,

Superintendent.

*Littlemore,
25th January 1855.*

1892-1893

In January, 1892, the first of the
series was published. It was
a very small book, only 16
pages long, and it was
published at a price of 10
cents. It was a very
interesting book, and it
was very well received.
It was a very good
book, and it was very
interesting.

The second of the series was published

in the month of May.

The third of the series was published
in the month of June. It was
a very small book, only 16
pages long, and it was
published at a price of 10
cents. It was a very
interesting book, and it
was very well received.
It was a very good
book, and it was very
interesting.

The fourth of the series was published
in the month of July. It was
a very small book, only 16
pages long, and it was
published at a price of 10
cents. It was a very
interesting book, and it
was very well received.
It was a very good
book, and it was very
interesting.

The fifth of the series was published
in the month of August. It was
a very small book, only 16
pages long, and it was
published at a price of 10
cents. It was a very
interesting book, and it
was very well received.
It was a very good
book, and it was very
interesting.

The sixth of the series was published
in the month of September. It was
a very small book, only 16
pages long, and it was
published at a price of 10
cents. It was a very
interesting book, and it
was very well received.
It was a very good
book, and it was very
interesting.

The seventh of the series was published
in the month of October. It was
a very small book, only 16
pages long, and it was
published at a price of 10
cents. It was a very
interesting book, and it
was very well received.
It was a very good
book, and it was very
interesting.

The eighth of the series was published
in the month of November. It was
a very small book, only 16
pages long, and it was
published at a price of 10
cents. It was a very
interesting book, and it
was very well received.
It was a very good
book, and it was very
interesting.

The ninth of the series was published
in the month of December. It was
a very small book, only 16
pages long, and it was
published at a price of 10
cents. It was a very
interesting book, and it
was very well received.
It was a very good
book, and it was very
interesting.

APPENDIX.

Summary of Patients in 1854.

	M.	F.	T.
Remaining in the Asylum December 31, 1853	170	224	394
Admitted in the year 1854	67	58	125
Total	237	282	519
Discharged			
On Recovery, inclusive of a Male Patient whose period of Trial has expired..	28	24	52
Relieved		3	3
Not Relieved	2	1	3
Escaped	2		2
Died	31	19	50
Total	63	47	110
Remaining in the Asylum December 31 1854	174	235	409
The lowest numbers of Patients were on January 5, April 14, and January 6	167	222	390
The highest were in November	183	236	418
Daily average through the year has been	174	228	402
The increase on the average number of Pa- tients has been	7	12	19
On the last over the first day of the year	4	11	15
On the total number of Patients of the year over 1853	25	21	46
Of the number admitted in 1854 over 1853	12	6	18
Readmitted			
Within 12 months of their Discharge from this Asylum	5	2	7
After longer periods	7	7	14
Removals from other Asylums being of this Asylum Union.....	7	3	10

Duration of Insanity of 107 Patients admitted in 1853, and of 125 admitted in 1854.
