Justices of the Borough of Reading.

Resolved that the following

REPORT*

of the SUPERINTENDENT be printed and circulated.

TO THE COMMITTEE OF VISITORS.

GENTLEMEN

At the opening of the year 1865 negotiations had been commenced with the Visitors of the DORSETSHIRE Asylum at CHARMINSTER, for the transfer, to their temporary charge, of a certain number of Lunatic Male Patients for whom the LITTLEMORE Asylum had not sufficient accommodation; especially as it was threatened with an increased number of Inmates,

^{*} RULE 25—[of the General Rules of the Asylum.] The Superintendent shall submit to the Committee of Visitors, at their first meeting after the Epiphany Quarter Sessions annually, a Report in writing, of the general condition of the Asylum, and the number and character of the Patients; distinguishing the numbers who have been received and discharged as cured; the number of re-admissions; the number employed, and in what manner; the deaths which have occurred in the preceding year, and also the total number of discharges, cures, and deaths since the opening of the Institution, and specifying the sexes in each statement; with such other facts as the Superintendent may think desirable, or which the Visitors may have suggested.

in Patients recently attacked, as well as by the return of Patients who had been sent (under contract) to the BUCKINGHAMSHIRE Asylum at STONE.

The Visitors of the two Asylums (LITTLEMORE and CHARMINSTER) at once agreed upon terms, taking,—as the basis, the Contract already subsisting between LITTLEMORE and the WORCESTERSHIRE Asylum at POWICK.

The Contract with CHARMINSTER however, could not be completed until sanctioned by the Secretary of State; and, pending the correspondence with him, an extension of the number of Patients proposed to be sent to CHARMINSTER, was agreed upon. This number embraced the LITTLEMORE Patients then, under contract, at the Licensed House at BETHNAL GREEN;—the Visitors considering it to be more consistent with their duty that all the Lunatic Patients under their charge should be in County Asylums (under the care of cognate bodies of Visitors) than at BETHNAL GREEN or any similar Establishment,—however well conducted.

The Patients at BETHNAL HOUSE had from time to time been visited by Members of the LITTLEMORE Committee, as well as by Officers of that Asylum, and their care and condition were always favorably reported of. And, before removing the Patients from BETHNAL, an expression of the satisfaction of the LITTLEMORE Visitors at the care and treatment of the Patients, was officially conveyed to Dr. Millar, the Superintendent.

The Contract with CHARMINSTER being completed, the Patients were removed thither, by Railway, (partly from LITTLE-MORE, and partly from BETHNAL HOUSE) in July and September last; and that without any untoward circumstance occuring.—The number so removed was 60; (of whom 35 were Male and 25 Female Patients). In addition to this number at CHARMINSTER, there are still 7 Male Patients at the BUCKINGHAMSHIRE, and 30 Female Patients at the WORCESTERSHIRE Asylum.

Reports of the condition of all of them have recently been received; and they have all been seen by Officers of the LITTLE-MORE Asylum within the last year. It is probable that the remaining Patients at STONE Asylum will be returned to LITTLE-MORE in the ensuing Spring.

The number of Patients received at LITTLE-MORE during the year 1865, has been 131; namely 69 Males, and 62 Females. This is a smaller number than usual; the diminution being principally in respect of Female Patients, and in the first quarter of the year.

The re-admission of Patients in the year, amounted to 20 in number; 3 of

them being Men, and 6 Women received back within twelve months of their previous discharge as cured; whilst the remainder (6 Men and 5 Women) had been away for longer periods.

The discharges in the year have consisted of 24 Men and 32 Women, recovered; 5 Men and 3 Women discharged for other causes: (being a total of 64), exclusive of a Criminal Patient whose name was, by order of the Secretary of State, taken off the books, after being absent from the Asylum, (by escaping), for some years.

The number of Deaths in the Asylum during the year was unusually small.—The deaths of 18 Men (out of 309 who were under charge in the year), and of 27 Women (out of 370), present a favorable report of the mortality in the year.

Throughout the year there was ample accommodation in the Female Wings for the number of Female Patients, and for any small number likely to be received.

There were 255 Female Patients in the LITTLEMORE Asylum on the 1st of January 1865, and 253 on the 31st of December. The average daily number in the year was 247; being about the number for which those Wings were provided.

As regards the Male Wings it was otherwise; for there were on the 1st of January 224 Male Patients; but, previously to the removal of Patients to the CHARMINSTER Asylum in July, the number had reached 236. They were however, reduced by that transfer to 207. The Wards had been unusually free from sickness and continued to be so. On the 31st of December the number of Males again reached 220.—The average daily number in the year was 219.

The total number of Patients at LITTLE-MORE on the 31st of December was 466; of whom 219 were Males, and 247 Females. There was, during the year, an increase of 22 Men in the whole number of Patients under the charge of the Visitors.

That number may be thus summarised:

		M and the M	ales	Females	Total
In	the	LITTLEMORE Asylum 2	20	253	473
"	"	STONE Asylum -	7	-	7
"	,,	Powick Asylum -	-	30	30
"	"	CHARMINSTER Asylum	35	25	60
		Total 2	.62	308	570

The CORONER of the District (WILLIAM BRUNNER Esquire) held the following Inquests during the year. I. Upon the Body of a Female who died under Epilepsy. The circumstances evoked no comment. 2. Upon the Body of a Male Patient, who died by an act of Suicide, the cutting of his Throat. The Verdict of the Jury was that he committed suicide, being at the time of unsound mind. The CORONER, on this latter occasion,

addressed a Letter to the Visitors, which was read at the following Monthly Meeting of the Committee, calling attention to the damage, by wear, of the locks of the Asylum; and to the fact that the doors were so shrunk, and so much withdrawn from the jamb of each doorway, that the bolts of the locks could be easily forced back, A party of Visitors examined the door and lock which were especially referred to, and conferred with the Committee upon it. The subject of the shrinking of the doors, and the wear of the locks had been previously under the consideration of the Visitors. The inquiry resulted in a bead being fitted to the door of the room in question, and to some of the other doors,-so that the space between the door and its jamb is covered, and its lock bolt protected.

The accidents in the year have been more remarkable for the ages of the Patients who were the subjects of them, than for the ill consequences following. They consisted of the following. A Female Patient, aged 72, fell over a basket at which she was shelling peas. She had broken her thigh bone. It united favorably, and she has now for some months walked without a stick. A Male Patient, 80 years of age, failing in health, and tottering with debility, fell against a bed in the Infirmary. Three ribs were fractured. Notwithstanding his failing health, the union of bone was effected without the Patient appearing to suffer from injury.

The occupation of the Patients able to work, has been little otherwise than what has been reported of in former years. Two thirds of the whole number resident in the Asylum have been employed according to their ability. The Women in House, Needle, and Laundry work; the Men in the Grounds of the Asylum to the extent of one-third; a few in Shoe-mending, and in the Workshops; and a remainder sufficient to make up the two-thirds in the Wards.

Importance has recently been given to the much canvassed question of the use of Sewage as a Manure in the ground adjoining to an Asylum. The Superintendent of the Asylum for the County of CUMBER-LAND has published and circulated, (under the Title of "Sewage exhalations the cause of Dysentery") an account of severe and fatal illness engendered at that Asylum by the exhalations of Sewage which was allowed to run over Grass Land at a distance of 150 yards or more from the Asylum Building. It is sufficient here, as regards that Asylum, that the clearness and satisfactoriness of Dr. Clonston's report are recognised and acknowledged. It is however, a challenge to those Asylums

which continue the use of Sewage, as Manure, to give an authoritative account of the practice of those Asylums, and to shew a justification for it.

The Cumberland Asylum has been open about five years. Referring to the first five years after the opening of the Littlemore Asylum, I may say that it narrowly escaped a similar visitation. The getting rid of the waste of the Asylum was a difficulty which was treated "on the most approved principles." I shall be glad if an exposition of the system pursued here, (which is progressive and followed with the faith of success), may help to clear the difficulty elsewhere. The LITTLEMORE Asylum is on the slope of a Hill of Sand; and is 50 feet above the Watercourse which drains its base. Objection is made to that Watercourse being converted into the Asylum Sewer. It flows close by the Turnpike House; and has, after that, been offensively discolored when checked in its

course before it joins the main River,—the Isis. I have been anxious that the whole of the Sewage should be used on the Asylum Garden. It has however, not hitherto been so used throughout a whole year. But, at the same time, the quantity which has been allowed to run into the Brook, has recently diminished every year.— And the Sewage has, year by year, been more valued for utilisation in the Garden.

The Gardener encourages me to expect that the whole quantity of Sewage from the Asylum will be applied, in this year (1866) on the 16 acres of Garden over which it can flow. The probable amount, (54 Inches in depth), exclusively of 9000 Gallons daily during the dry heat of Summer, equals two average Rainfalls, which are estimated at 27 Inches annually.

The quantity of Water which percolates those acres of sandy soil annually, is equal to a column of seven feet. There are 20 acres cultivated; and 16 watered; the higher and therefore the drier parts, being more scantily supplied than those at the lower levels.

The supply of Water to the Asylum is from the Brook,-but at a point above that at which it could be contaminated by our Sewage. The Water is raised by Steam Pumps, to Cisterns in the Turrets of the Asylum. And, after being used in the various parts of the House, it converges, in glazed Pipes laid at a fall of one inch in ten feet, to the highest and nearest point of the Garden at which it can be discharged. The quantity of Water, and constancy of flow, are depended on to secure a clear passage: (there not being any cess Tank). The Sewage Water is then discharged on to the surface of the Land which is levelled to a fall of three inches in ten feet,---or it is carried on to a further point of the Garden, by Pipe; according to the position at which it may be wanted. Its speedy use, at an earlier period of time than will allow of much decomposition, and its diluted state are its securities against the exhalations which have been so prejudicial at the Cumberland Asylum. The Gardener would often desire that the amount of Water was less. The Garden is at present prolific. He calculates on getting his four crops in three years; and occasionally two crops in one year. He needs no fallow. His most difficult season is when severe Frost hardens the Soil so much that he cannot use his Spade. The Sewer Water, ordinarily, penetrates the recently turned soil during a frost; and prepares the Land for an early thaw. The influence of a Manure so minutely divided, and laid on by Water, is enlivened by the earliest Spring, and supported by the latest Sun. The ground is so far prepared for seed ; and the young Plants will thrive in a dry Season. The drought of Summer may be paralysed by its action. The rapidity of the succession of Crops depends very much on the rapidity and quantity of the Manure. It however, needs other than Patients' labor and judgment to sustain such a system of Gardening. There is also a practice of preparing the Ashes for use as Manure. The draining of the Sewage Water, through Ashes, Weeds, and other waste, delays the Water in its course but little, and does not diminish its quantity. The coarser Ashes, Clinkers, and broken Ware, have been used very much in effecting the Land Drainage; which was much needed at the base of the Garden slope. It may be thought that Sewage so much diluted must be inefficiently weak; it may be well therefore to state, that if a stoppage occurs in a drainpipe, and a day or two allowed to pass, so that a state of decomposition is effected (which is certain in about three days); and if the accumulated Sewage is then allowed to flow on to a row of young Cabbage Plants, the Plants flooded will be killed by the strength of the then very offensive Manure. If Cess Tanks were employed to cherish the increased strength,

the increase of Water supplied must be in proportion; and the extent of Tank itself would become an additional difficulty. Although there is no doubt of the benefit of such Manure to Grass Land, if applied, it is considered that it could not be continuously and satisfactorily applied, as the growing Grass would prevent its diffusion. It will run down the drills of growing Plants if the fall of the ground will admit of it; it will spread, or be led over uncultivated Land; but it will not find its own way far against such obstruction as Grass.

The practice of this system has been under the cognisance of the Visitors for about fifteen years. The work of appropriately levelling the ground was commenced at an earlier period. It was long before the continued barrowing of Sand, by Patients, to improve the level of the Land,—could shew a satisfactory purpose. The prospect of a prolific Soil would probably not have supported the continuously monotonous and apparently useless labour. It was not the prospect of pecuniary value that ever animated the work. It was that it was absolutely necessary that some wholesome expedient should be created for the management of the increasing wastes of a rapidly increasing Asylum population; for the purification of the Atmosphere which was tainted with the overflow of Cess Tanks; and to secure the health of the Establishment.

It is not necessary for me to raise the question of other courses that might have attained more perfect success, or greater advantages. I confine myself to reporting how the difficulty of earlier years was met at this Asylum; and somewhat of the success which has attended the experiment. It will be for the Visitors to judge of its sufficiency, and to favour its development. The suppression of the knowledge of facts published at another Asylum would not be the course to maintain the confidence of the Visitors of this Asylum, to give due publicity to what is assumed to be the mastering of a difficulty; or to take the credit which is due to a successful expedient.

The Tables; and the Accounts of the Clerk of the Asylum, are appended to this REPORT.

I have the honor to be

Gentlemen,

Your most obedient Servant

WILLIAM LEY.

Littlemore Asylum, 30th January 1866.

This Table which gives the number of Admissions in each year, does not give the Transfers of chargeability; consequently it does not give with accuracy the number of Patients chargeable to each body in the Union. Any statement made at the Asylum is liable to inaccuracy. The chargeability of Patients is not fixed at the Asylum, or regarded as any part of its business. Precise accuracy on that point is not necessary to it.

Table of the number of Patient	in the Asylum at Littlemore, and of the Unions to which they are	
CELETERS AN	chargeable in the Year 1865.
