THE
ANNUAL REPORT OF THE COMMITTEE OF
VISITORS OF THE COUNTY LUNATIC ASYLUM AT
STAFFORD,
PRESENTED TO THE
COURT OF QUARTER SESSIONS, JANUARY 1st, 1872.

53RD ANNUAL REPORT OF THE ASYLUM AT STAFFORD.

THE Committee of Visitors of the County Lunatic Asylum, Stafford, report to this Court, that 918 Lunatics belonging to the County are at the present time maintained in the Asylums at Stafford and Burntwood.

Of this number 501 are under treatment at Stafford and 417 at Burntwood.

Within the twelve months ending December 31st, 1871, 232 have been admitted into the Asylum at Stafford, of whom 110 have been discharged, out of which number 12 were relieved and the remainder recovered: 90 have died; and 34 have been transferred to the Asylum at Burntwood.

The average of discharges has been at the rate of 42·24 per cent, and the average of deaths 12·24 per cent upon those under treatment during the twelve months.

The out-break of Small Pox in various parts of the County has compelled your Committee to refuse admission to Lunatics from the Districts suffering from this

Epidemic ; and consequently the admissions have been less in number than in the preceding year.

The per-centage of Discharges on Recovery still rather exceeds the usual average ; whilst the numerous deaths, annually recorded, take place generally within a short period of admission, and indicate the diseased and exhausted state in which Lunatics are admitted.

The excited condition of the Lunatics at Stafford, and the difficulty in isolating any ward for Children at the Asylum, have induced your Committee to cause their removal to Burntwood, where the inmates are of a less violent and acute class.

The death of the Reverend Thomas Harrison, for many years connected with the Asylum, caused a vacancy in the Office of Chaplain ; which has been filled by the appointment of the Rev. J. H. Theodosius to the post, at the Salary of £100 per annum.

The Office of Treasurer has also become vacant by the death of the late Thomas Salt, Esq., and has been filled up by the acceptance of the office by Thomas Salt, Esq., M.P., on the same terms as those in force previously.

With the exception of the above-mentioned appointments, but few changes have taken place in the Staff of Officers or Attendants. Although the class of Lunatics in the Asylum has been characterized by more than usual outbreaks of violence and excitement, no casualties or accidents of serious import have occurred, and no instances of ill-treatment or neglect of duty have required the interference of your Committee.

At the July Sessions, 1870, a sum of £460 was granted for a New Roof to the Female Infirmary, which

Roof has been completed for the sum of £411. 1s. 11d., leaving a balance in favour of the County of £48. 18s. 1d.

Acting in accordance with the 54th section of the Lunacy Act, your Committee have thought it right to make the increased charge of 14s. per head per week for the maintenance of Pauper Lunatics from the City of Lichfield; that place never having contributed to the erection of the County Asylum or its maintenance, and therefore not being entitled to send Lunatics on the same terms as Unions or Parishes in the County which have contributed.

Constant reparation has been required during the year to various portions of the building, but the main fabric continues in a substantial and satisfactory condition.

The cost and consequently the charge for the maintenance of the Lunatics belonging to the County have been at the rate of 8s. 9d. per head per week during the year, notwithstanding the constant increase in the prices both of clothing and of food.

Your Committee have given their best attention to the interests of the Asylum during the past year, and have always found the Officers and Servants attentive to their duties and the Building in a satisfactory state.

Signed,

Shrewsbury,

CHAIRMAN.

REPORT OF THE COMMISSIONERS IN LUNACY.

—◆—
Stafford County Asylum,
12th July, 1871,

WE inspected the Asylum in its several departments, and with the exception of one man, absent on trial, saw all the Patients, 495 in number: viz. 250 of the male and 245 of the female sex, and we have to-day repeated our visit and completed our enquiries.

The changes in the Patients since the visit of the 12th May, 1870, have been as follows:—

	Males.	Females.	Total.
Admitted.....	166	141	307
Discharged from Books	128	100	228
„ of whom recovered	56	61	117
„ transferred to Burntwood Asylum	60	34	94
Died.....	58	47	105

Of the Patients discharged, two men were of the Criminal Class and had escaped.

Although there has not, since the last visit, been in the Asylum any disorder of an epidemic character, the rate of mortality has been very high. It is at the same time to be observed, that Acute Cases, which are very numerous, are, in accordance with a County arrangement, retained in this Asylum, and those of a Chronic Class only transferred hence to Burntwood.

The assigned causes of Death have been—

	Males.	Females.	Total.
General Paralysis	12	9	21
Apoplexy and other forms of Brain Disease	16	3	19
Epilepsy	10	8	18
Exhaustion after Mania and Melancholia	7	8	15
Pulmonary Consumption.....	6	6	12
Other Diseases of the Lungs and Heart...	2	1	3
Senile Decay.....	5	5	10
Other ordinary causes	0	7	7
	58	47	105

Post-mortem examinations were made in 12 cases on the Male and 8 on the Female side.

The physical condition of a large portion of the Patients on admission is very bad, which is partly illustrated by the fact, that as many as 22 of the Deaths, since the last visit, occurred within a month after reception.

In no case did the circumstances attending the Death call for an Inquest. There has not been any serious casualty.

The Asylum is estimated to accommodate 530 Patients, consequently the vacant beds are at present 35 in number.

The weekly charge for Maintenance, which is by arrangement the same at both Asylums, is now 8s. 9d. There are here two Out-County Patients only, at 14s. per week.

The Sunday Afternoon Service is attended by about 180 Men and 160 Women, and the Services on Wednesday and Friday evenings by about 130 Men and 140 Women.

About 50 Male and 40 Female Patients receive instruction in the Schools on three days in the week.

According to the Ward returns, about 145 Patients of each sex are employed: the Men on the land, at trades, &c., and in the domestic offices; and the Women in needlework, and knitting, and the laundry department, kitchen and offices. Many of each sex also assist generally in the Wards.

About 200 of the Male Patients are present at the Weekly Musical Performances in their Dining Hall, wherein 160 Patients of each sex meet Monthly for Dancing. From 50 to 60 of the respective sexes are taken out for Country Walks, and upwards of 100 to Pic-nics. There have also been several Exhibitions of Dissolving Views, at which about 200 Patients of each sex have been present.

We recommend a practice adopted with much benefit in most Asylums—the assembling of the Patients of both sexes in the Hall weekly, for associated amusements.

We also desire to repeat the suggestion already made as to the formation of additional walks upon the estates, for the daily extended exercise of Patients unfit to be taken for country walks, and who are now too much restricted to their airing courts.

There are in the Asylum upwards of 100 Epileptics and 80 Paralytics, and a large number of feeble cases.

The Patients registered as under Medical treatment, are 25 in number: 16 Males and 9 Females.

The conduct and demeanour of the Patients generally, at the time of our visit, were orderly, and their personal condition was satisfactory.

Neither restraint nor seclusion is ever employed.

We saw 179 Men assembled in the Hall at Dinner, which was very good and ample. In the course of our visit we received no complaints of ill-treatment.

The Staff of ordinary day-attendants is sufficient, but one night-attendant only for each division is, in our opinion, quite inadequate for the proper nursing and watching; especially where there are so many recent admissions and such a large number of Epileptics, Paralytic and feeble cases.

We have to report very favourably of the general cleanliness, good order, and proper ventilation of the wards throughout. Much has been done since the last visit to enliven them by papering and painting,—improvements which might with advantage be further extended as respects the basement wards, which are still, by comparison, gloomy and cheerless.

The beds throughout are of excellent quality and well attended to. The bedding, also, was found by us clean, but under blankets are not in general use, as should always be the case.

In reference to the suggestions and observations made on the occasion of the last visit, we have to report, that handrails have been fixed on all the staircases, and, that the objectionable associated water closets have been divided by wooden partitions. No decision has been arrived at as to providing a second Dining Hall, owing, among other things, to the difficulty of finding a convenient site.

We have made enquiry, and find that there are not in this Asylum any means for effectual isolation of Patients, in the event of an outbreak of a contagious disorder; and we desire strongly to urge upon the

Committee of Visitors the expediency of providing, without further delay, a detached Cottage Hospital for the purpose.

We recommend that the attendants in principal charge of wards be provided with lists of the names of the Patients under their care, and the dates of admission into the Asylum. Dr. Bower, as well as the Chief Attendant and Housekeeper, shewed remarkable accurate knowledge of the names of the Patients; but there are at present no ward lists as is usual in Asylums, and the identification of the Patients is entirely dependent upon the memory of these officers.

We have made all the statutory enquiries, and examined and signed the Register.

The Case Books, which are kept by Dr. Purdon, the Assistant Medical Officer, are carefully entered up.

Dr. Bower continues as heretofore to devote his best energies to the discharge of his responsible duties.

R. W. S. Lutwidge, } Commissioners
John D. Cleaton, } in Lunacy.

ANNUAL REPORT OF THE SUPERINTENDENT.

THE average numbers resident in the County Lunatic Asylum, Stafford, during the year 1871 have been 507; after making a comparison with the proportion of Lunatics in many other Counties, and taking into consideration the extent and large population of the County, this does not seem to indicate a large amount of Insanity, and constitutes apparently a low average with other districts of England, or at all events of the Pauper Lunatics retained in Asylums. Average Numbers.

The Statutory Tables, published with this Report, explain the discrepancy between the numbers retained in the Asylum and the actual number who became Insane in the County. Admissions.

A reference to the Table of Admissions for many years, shows that the actual admissions into the Asylum are very large, and in a greater ratio than most other County Asylums, whilst the numerous Discharges and Deaths are also above the average. These facts, together with the transfer of the surplus Lunatics to the Auxiliary Asylum at Burntwood, explain the comparatively small numbers at Stafford, but do not show the relative proportion of Insane Paupers in Staffordshire.

In the twelve months ending December 31st, 1871, 232 Lunatics, or Idiots, were admitted into your Asylum at Stafford, of whom 122 were Males and 110 Females.

These admissions are less in number than in several preceding years, in consequence of the evident necessity of refusing to admit Lunatics from districts suffering from Small Pox; whilst from adjacent districts in the County many are now taken direct to Burntwood, according to a recent order of Magistrates.

To correctly estimate the amount of Insanity in the County, it is necessary to take the number of Lunatics in Stafford Asylum and the number of those belonging to the County at Burntwood, amounting at the end of 1871 to 918; from which it will be seen that even then the average of Lunacy in comparison with population is small in Staffordshire; only being at the rate of 1 in 556, whilst throughout England and Wales the average is 1 in 468, see Table XXIII.

Form of
Disorder on
Admission.

Out of the 232 admissions into the Asylum at Stafford during the year, 74 were in a state of Acute Mania,—a form of mental disorder characterized by great violence and excitement, and in most instances on admission, by great exhaustion. In many of those admitted all prospect of recovery is gone before being received into the Asylum; and a disease which is one of the most curable forms of Insanity, if treated early, is found to be past all prospect of benefit from treatment, when brought for admission. The records of the Asylum show that more recoveries

and more deaths follow this type of Insanity than any other kind, and form the strongest argument for early treatment in Asylums.

Table XV. shows that 50 persons were admitted with active Disease of the Brain; while in many other cases, where the disease was in a latent state, it has since become developed and not amenable to treatment.

Numbers admitted with Cerebral Disease.

This result of functional Disorder of the Brain is too frequent in Lunatics to enable the Medical Officers to form a hasty prognosis, and depends upon some organic change of structure from scrofula;—over excitement of brain or membrane,—from intemperance,—or from hereditary pre-disposition to brain disease.

The number of Recoveries within the 12 months has been rather larger than the average of preceding years, being at the rate of 42·24 per cent; and cases of Relapse have also been less frequent—2 Males and 4 Females having been re-admitted within the year from this cause. Many of these relapses probably would not have occurred had the person attacked remained in the Asylum; but frequently the permanency of recovery can only be ascertained by allowing those who are convalescent to return home, and become subject to the influences and habits of the life which they had led previous to removal to the Asylum.

Recoveries.

Relapses.

In Recurrent Mania the intervals between the paroxysms are in some instances of months duration apart; in many of such cases during the lucid intervals, the Patients exhibit but few if any signs of

Recurrent Mania.

aberration of mind. When visited by friends they appear and feel perfectly well, and if of harmless habits, it is frequently desirable and politic to allow of their removal by friends, although perhaps only for a time.

Causes of
Insanity.

Table X. shows that Insanity has been caused in the majority of the cases admitted by Hereditary predisposition, Epilepsy, Intemperance, Puerperal Mania, and Diseased Brain; whilst Old Age and Congenital Defects contribute 18 to the number. From Insanity thus caused but few recoveries can be expected, and frequent relapses must be anticipated.

Amount of
Suicidal Mania
and of
Dangerous
Lunatics.

57 Males and 50 Females, out of those admitted, were stated to have a Suicidal propensity; and several had made attempts to destroy themselves previous to admission.

45 Males and 38 Females were reported as Dangerous and Homicidal, leaving 42 only out of the 232, admitted harmless and inoffensive.

Incessant vigilance and watchfulness on the part of the officers and attendants in charge of these distressing cases, can alone prevent Lunatics, with suicidal or homicidal propensities, from carrying their designs into execution; but happily I am able to state that the Asylum has been, since last report, totally exempt from casualties, suicides, or injuries of any kind.

Proportion of
Attendants
required.

The proportion of Attendants to Lunatics in this Asylum is 1 to 13; and taking into account the excited and destructive class brought here, the proportion has not been found too great. Frequent

outbreaks of violence have occurred, but by the vigilance of the male and female attendants no bad results have ensued.

The large amount of Liberty necessarily granted to the Inmates, in carrying out the non-restraint treatment now adopted, offers great facilities for discontented Lunatics to escape. Although occasional attempts have been made, in only one instance did a Male Lunatic succeed. In this case the man was re-captured within a few hours, and brought back by the kind assistance of a farmer in the neighbourhood.

Liberty
allowed to
Lunatics.

Out of 501 Lunatics now under treatment, 33 alone present any prospect of recovery, the remaining 468 being totally incurable.

Small number
of Curable
Lunatics.

Of this number many are Epileptic, Idiotic, or in a state of Chronic Mania or Dementia; but most of these are subject to paroxysms of violence, during which they become dangerous and difficult of management.

88 of those resident are subject to Epileptic Fits. Many of them have lucid intervals, and are then most tractable, but who, nevertheless, become both before and after such fits, very dangerous and violent.

Epileptic
Lunatics.

The Deaths during the year, amounting to 90, have followed the ordinary causes. 65 resulted from some form of Diseased Brain; while most of the others, although not arising directly from Cerebral Disease, were connected with such affections in a secondary or indirect manner.

Deaths.

Of the above-mentioned deaths, 29 occurred

within three months of admission, and were far advanced in disease when received; 21 of the deaths took place in Lunatics above the age of 60, and 9 were attributed to old age alone.

Removal of
Children from
the Asylum.

The association of Young Children with Adult Lunatics was found to be attended with great danger to the children, and difficulty in the management of the adults. Consequently 34 children were removed during the Summer to the Asylum at Burntwood, where the Lunatics are of a more quiet class.

Refusal to
admit Lunatic
from districts
affected with
Small Pox.

The rapid spread of Small Pox throughout the various districts of the County, having been under the serious consideration of the authorities of the Asylum, notice has been given to the Relieving Officers of all the Unions and Parishes, that no Lunatics can be admitted from towns or districts where Small Pox prevails; and, also, that no visitors can be admitted from infected places.

Re-vaccina-
tion.

In addition to such precautions, Re-vaccination of the Lunatics in the House has been carried out at all times when possible to procure the necessary lymph; but from the impropriety of transmitting the lymph from one Lunatic to another, considerable difficulty has been found to obtain a sufficient supply.

Accumulation
of Chronic
Cases and of
Idiots.

The gradual but certain accumulation of Chronic Cases of Lunacy and Idiocy in Asylums, must sooner or later call for farther accommodation. In all Pauper Asylums there are many instances where harmless Lunatics and Idiots, or persons of Imbecile mind, now under confinement, might with safety be

allowed to reside with their friends; provided an adequate allowance was made to the persons in charge of them by the Unions; and provided they were under the constant supervision of the Medical Officers of the Unions in which they have a settlement.

The Amusements and different modes of Employment are carried out as in former years, and with the usual good effect. Amusements and Occupations.

Several instances of improvement have been clearly traceable to the periodical assembling of the Inmates at dances and entertainments* of a comic and laughable nature; whilst the wish for employment, which is always acceded to if the health of the Patient allows, has frequently proved the commencement of mental convalescence.

The Asylum has been singularly free from local or epidemic disease, and the health of the permanent residents has been very good. Freedom from Endemic or Epidemic Disease.

In no instance has it been necessary to resort to coercion or restraint, and the usual abolition of all punishment or confinement still continues satisfactory.

The Reverend J. H. Theodosius having been appointed in the place of our greatly lamented Chaplain, the Reverend Thomas Harrison, whose death has been a source of regret to every one in the Asylum, the services have continued to be carried on with the usual regularity and decorum; and the attendances at the Schools have averaged their usual numbers.

By direction of the Committee, the Steam Boilers belonging to the Asylum have been thoroughly Inspection of Boilers.

inspected by a professed Boiler Maker, and have been found in fair condition, and perfectly safe with a pressure considerably above that which is ever required from them.

In the anxious duties of my office, I have at all times met with the most cheerful and valuable assistance from every officer and servant in the Asylum; and I may remark that it is only by such co-operation and assistance that the Asylum has been successfully conducted throughout the year.

In conclusion, I once more return my sincere thanks to all the Noblemen and Gentlemen, constituting the Committee, for their invariable kindness and valuable directions at all times.

I am, my Lords and Gentlemen,

Your most obedient Servant,

Mark Noble Bower.

MEDICAL STATISTICS.

TABLE I.
SHOWING THE ADMISSIONS, RE-ADMISSIONS, DISCHARGES, AND DEATHS, DURING THE YEAR 1871.

	Males.	Females.	Total.
In the Asylum 1st January, 1871	257	246	503
Admitted for the first time during the year ...	108	93	201
Re-admitted during the year.....	14	17	31
Total admitted.....	122	110	232
Total under care during the year	379	356	735
Discharged or removed—			
Recovered	44	54	98
Relieved	27	19	46
Not improved
Died	43	47	90
Total discharged and died during the year	114	120	234
Remaining in the Asylum, 31st December, 1871, (inclusive of absent on trial—Males and Females)	265	236	501
Average numbers resident during the year	261	246	507

TABLE II.
SHOWING THE ADMISSIONS, RE-ADMISSIONS, AND DISCHARGES, FROM THE OPENING OF THE
ASYLUM TO THE PRESENT DATE, 31ST DECEMBER, 1871.

	Males.	Females.	Total.
Admitted during the period of 53 years	3607	3223	6830
Re-admissions	720	612	1332
Total of cases admitted	4327	3835	8162
Discharged or removed—
