REPORT
OF THE
COMMITTEE OF VISITORS.

Presented at the Hilary Sessions, 1857.

The Committee of Visitors of the County Lunatic Asylum report as follows:—

The receipts and payments for the year ending in September last, exhibit a profit on the whole year, on the Maintenance Account, of £64 2s. 7d.; a balance too small to justify any reduction of charge at present.

The price of meat and all other provisions, with the exception of bread, remains as high as at the beginning of last year.

The number of patients in the Asylum on the 31st of December, 1856, amounted to 314—viz., males 145, females 169; which exceeded by 13 the number of patients on the 31st December, 1855. The attention of the Committee was directed by Dr. Thurnam, in October last, to the crowded state of the Asylum, in the female wards, arising from the great number of chronic patients. If the numbers continue to increase, it will become necessary to make some addition

to the building in the course of this year ; and the Committee think it advisable to renew the application, already made at the Michaelmas Sessions, 1854, to the Court, for power to carry this intention into effect if they should find it absolutely necessary to do so.

A sum of £379 0s. 5d. has been expended for repairs of the building, and other matters for which the Maintenance Fund is not liable ; which being added to a former payment of £215 1s. 5d., recorded in the Visitors' last Report, makes a total on this head of £594 1s. 10d. To meet these demands, and to provide a fund for current expenditure under this head, a farthing rate was granted at the last Michaelmas Sessions, and is now payable.

The three-farthings rate has enabled the Treasurer to pay off £1500 more of the principal sum borrowed for the First Cost, as well as to meet the calls for interest on the remaining debt. Provision is also being made to pay off a further sum of £1000.

The First Cost Account has had an increase of £241 11s. 7d., from sums received for the maintenance of the paupers from Devizes, Salisbury, and other places not contributing to the original building.

This sum, in lieu of a contribution towards the first erection of the building, is directed by the Act to be paid to the Treasurer of the Asylum : but it may be a matter for consideration whether all moneys accruing on this account should not be paid over to the Treasurer of the County, in reduction of the debt originally incurred for the Building.

A very minute separation of the accounts has been made, with much care and labour; but the Committee do not consider the present plan of accounts satisfactory. To keep the accounts strictly accurate, they should be looked over and checked every quarter; and it is doubted whether any members of the Committee will be willing to continue to undertake an office so troublesome, and making so large and frequent demand upon their time. It deserves serious consideration whether this duty should not be assigned to a paid Auditor.

Before they resign their trust into the hands of their successors, the Committee desire to record their opinion of the "kind and judicious management"* of the Asylum, which reflects much credit on the Superintendent, and the official persons under him.

Attention and vigilance are manifest on the part of the attendants, some of whom have held their posts from the commencement of the Institution.

Constant employment is the great principle in operation as regards the patients, and its success, in every point of view, is unquestionable. As far as is possible, under their sad affliction, the patients seem contented, and often happy and cheerful.

Divine Service is daily performed in the Chapel, and the attendance is very large and regular.

* Terms used by the Commissioners in Lunacy, in their last Report.

The Committee do not enter into any details,—these, and the general statistics, with a statement of the accounts, will be given in Dr. Thurnam's Annual Report, which will be in the hands of the Magistrates before the Salisbury Sessions.

G. P. LOWTHER,

Chairman.

S I X T H
A N N U A L R E P O R T
O F T H E
M E D I C A L S U P E R I N T E N D E N T.

The circumstances of the past twelvemonths do not seem to call for an extended report from the Medical Superintendent; which, on this occasion, may be nearly confined to a simple record of the events of the year.

Sixth
Annual
Report.

At the commencement of 1856, there were 301 patients under care—namely, 141 men and 160 women. During the year, 100 have been admitted—39 males, and 61 females; of whom 20—6 men, and 14 women—were re-admissions. The number in the Asylum, at the date of this report, is 314—145 men, and 169 women. The average number resident during the year, has been 304.

Numbers
and
Admissions.

Of those discharged, 52 were registered as recovered;—a proportion exceeding half the number of the admissions, and which cannot be regarded as other than favourable. Two patients chargeable to parishes in Somersetshire, were removed to the Asylum for that county at Wells; one “relieved,” the other “not materially improved.”

Discharges
and
Recoveries.

General
Health.

No serious epidemic disorder of any kind has prevailed; and the general health of the patients has been good.

Deaths and
rate of
Mortality.

There have been 28 deaths—16 of men, and 12 of women; the mortality being at the rate of 9.21 per cent.; which is 2 per cent. lower than the mean rate of mortality during the 5.35 years since the opening of the Asylum.

MEAN ANNUAL MORTALITY.	MALES.	FEMALES.	BOTH SEXES.
For the year 1856 . . .	11.53	7.25	9.21
For 5.35 years*—1851-56 .	13.15	9.46	11.14

Causes of
Death.

Among the deaths, have been four from general paralysis—a disease so fatal to the insane, and almost peculiar to them. The number of deaths from this disease now recorded, is greater than in any former year. In the case of one epileptic patient found dead in bed, a coroner's inquest was held; the verdict being, "died suddenly by the visitation of God." Death in this instance probably occurred from a fit of epilepsy during sleep, which at once proved fatal; the patient appearing to have died almost without a struggle, and being found in a recumbent attitude, and with an aspect of perfect composure.

Birth of
Children.

Two female patients have been admitted in a state of pregnancy. One of these—an unmarried woman—gave birth to a child on the 18th of June; the other

* Viz., from the opening of the Asylum, Sept. 19th, 1851, to the end of the year 1856.

on the 1st of January, 1857, a few hours only after the expiration of the year to which this report refers. In the last case the child was still born; in the former it survived a few months only, after its removal from the Asylum.

Three patients only have escaped. One man succeeded in reaching his home in the south of the county; and, his malady being much relieved, he was allowed to remain with his friends; though his case is one which will probably result in further recurrences of the disorder. Another, a week after admission, eluded the care of his attendant, and made his way homewards; he was however traced, followed, and brought back, by the servants of the Asylum, after an absence of about ten hours. The third, a quiet old man, late in the afternoon of the 17th of December, escaped, in consequence of a delusion and insane impulse: he remained undiscovered all night, in spite of a diligent and continued search; but was met, early the next morning, endeavouring to find his way back to the Asylum, where he shortly afterwards resumed his ordinary occupation, and appeared to have suffered very little from the exposure.

Escapes.

During the year, the number of patients has gradually increased; and the Institution must be regarded as nearly full in the male, and as crowded in the female division. Under these circumstances, it would seem scarcely expedient much longer to postpone the small addition to the female department, which two years since obtained the sanction of the Court of Quarter Sessions. The Superintendent drew the

Crowded
state of the
Asylum:
Proposed
Enlarge-
ment.

attention of the Committee of Visitors to this subject, at their quarterly meeting in October; and it will be satisfactory to him to find that the needful preliminaries can be arranged, so that the contemplated addition may be speedily carried out, and the whole completed and fit for use before the commencement of another winter. Under any circumstances, the inconvenience from the crowding of patients, and the interruption of a proper classification, during the progress of the works, must be considerable: perhaps it may be needful for the Committee to exercise their power of refusing admission to patients; and altogether, it is most important that the arrangements should be such as shall reduce these evils to the lowest possible extent.

Improve-
ments.
Cricket
Ground.

No considerable alteration in, or addition to, the building has been made during the past year. A cricket ground has been laid out, which will afford the means of healthy recreation to many of the male patients, and their attendants. The situation of this ground—near the oak plantation—is convenient for the open-air tea-parties, with which the patients are usually indulged twice in the course of the summer, and which are occasions of much enjoyment. In connection with these parties, the large tent, purchased at a very moderate cost, will prove very useful. This tent—which is capable of giving shelter to nearly a hundred persons—is decorated with the English and French flags, having been used by officers in the Crimean war.

Sewage
tanks.

Some inconveniences have arisen from the escape of the sewage into the adjoining brook and mill-stream;

complaints in regard to which having been made, the attention of the Committee has been directed to a remedy. On inquiry, it has been agreed to construct two small supplemental tanks; by means of which further subsidence may take place, and a process of deodorization, by peat charcoal or other means, be carried out. It is believed that this measure will prove successful, both in remedying the existing evil, and in making the sewage more available, by irrigation and otherwise, in the cultivation of the farm. Plans for carrying out this improvement have been prepared, by Mr. Holland, the Clerk and Steward, who estimates the cost at £25.

In his last annual report, the Medical Superintendent felt called upon to direct attention to the "often unsatisfactory manner in which the removal of patients to and from the Asylum was performed, by those on whom this duty legally devolves." These observations having attracted the attention of the Poor-law Commissioners, that body addressed a circular letter to the Board of Guardians of every Union in the county, requesting their attention to this subject, and which seems generally to have been paid to it.

Mode of
removal of
Patients by
Relieving
Officers.

The following is an extract from the letter of the Poor-law Board, bearing date Sept. 6, 1856 :—
"The Board request that the Guardians will strongly impress upon such of their officers, as may be employed in the removal of Lunatics, the necessity of exercising the greatest possible humanity, care, and prudence in such removal; and would wish the Guardians to remind

Letter of
the Poor-law
Board.

them that any neglect or improper treatment by such an officer, of those persons, whose mental state is such, as unhappily to render them incapable of taking care of themselves, will be visited by the Board with their severest censure." The Board likewise addressed a letter to the Clerk to the Committee of Visitors of the Asylum, requesting that "in the event of any future instance in which there may appear reason to complain of the conduct of any of the officers engaged in the administration of the Poor-law in this respect, the Committee of Visitors or the Medical Superintendent of the Asylum will immediately bring the matter under the notice of the Poor-law Board, in order that the proper steps may be at once taken to have the conduct of such officer investigated." A public notice of this kind was not in the least contemplated, when the remarks of the Medical Superintendent on this subject were written, a year since. The observations were by no means intended as a general censure ; and the discretion and humanity with which a large majority of the relieving officers discharged their duties, were expressly commended. It is however satisfactory to state that the notice which has been taken has been productive of good. Since the distribution of the report, there has been a marked improvement in the several respects which were complained of.

Relief of
Necessitous
Patients on
discharge.

In several Asylums for the pauper insane, the pecuniary circumstances of patients ordered for discharge have received the attention of Committees of Visitors. In the large Asylums for Middlesex, and in those at Wakefield, Gloucester, and Nottingham, sepa-

rate funds, for the relief of those requiring it, have been established, by voluntary subscriptions, aided by donations from visitors to the Asylum, and in other ways. At Hanwell, the fund for this purpose was liberally supported by the late Queen Dowager, and is called the "Adelaide Fund": whilst the "Victoria Fund," at Colney Hatch, owes its name to the support and encouragement of Queen Victoria. At Hanwell, the Adelaide Fund, invested in stock, amounts to upwards of £14,000; from the proceeds of which an annual sum of £300 is usually appropriated to the relief of such patients as on their discharge from the two asylums would otherwise be likely to suffer from their necessitous condition; and, consequently, be the more liable to become the subject of a relapse. The need for such a provision as this is doubtless more urgent in populous manufacturing or trading districts, than in a more thinly inhabited county, such as Wiltshire; where a majority of the patients are of the labouring agricultural class, and are tolerably secure, on leaving the Asylum, of employment in their respective parishes. Cases of distress however, particularly among the female patients, do from time to time present themselves; for the relief of which any aid that can be obtained is important. The Superintendent has therefore been glad to avail himself, for this purpose, of the alms collected by the Chaplain at the communion, which takes place quarterly. In several instances, the small sums with which the Superintendent has been able to assist discharged patients have proved very useful, and have been most gratefully received. In some Asylums, an alms-box is provided; or other means are taken to inform visitors

that donations for the relief of discharged patients are received ; and did such an arrangement exist in this Institution, the Superintendent has found that visitors to the Asylum would, in several instances, have gladly contributed to a fund of this kind.

Officers,
Attendants,
and
Servants.

It is satisfactory to report that the conduct of the servants and attendants has, in the main, been worthy of approbation. The Medical Superintendent has also great reason to be satisfied with the aid which, in their respective departments, he has received from the Matron, Miss Rosedon, and from the Medical Assistant, Dr. Chapman ; the latter of whom has recently resigned the situation which he has filled between three and four years, for one of a similar nature in the much larger county Asylum for the West Riding of Yorkshire.

Conclusion.

The Medical Superintendent will only add to this report the expression of his thanks to the Committee of Visitors, for their continued support and encouragement in the discharge of the duties of his office.

(Signed,)

JOHN THURNAM, M.D.

.REPORT
OF THE
COMMISSIONERS IN LUNACY.

“ WILTS COUNTY ASYLUM, August 22, 1856.

“ There are 303 patients in this Asylum ; of whom 135 are males, and 168 are females. Twenty patients (ten of each sex) are registered as being at present under medical treatment. No one is now restrained or secluded ; but seclusion appears occasionally to be resorted to. There is no mechanical restraint in this Institution.

“ Since the last visit of the Commissioners, on the 25th July in last year, 124 patients have been admitted, 71 have been discharged, and 26 have died ; 5 dying from inflammation of the lungs, 3 from phthisis, 4 from paralysis, 3 from exhaustion, 2 from diarrhoea, and the rest from other causes.

“ We have to-day seen all the patients, and have inspected their wards. The patients were generally clean, and the various galleries and rooms appointed to their use, clean, well ventilated, and in good order.— We think it advisable however to diminish the amount of straw beds as far as possible.

“ We learn, on inquiry, that about two third parts in number of the patients are employed in various ways, and that about the same number attend religious exercises, which are regularly performed :—viz., prayers every day, and the Church service on Sundays. A considerable proportion of the patients take exercise occasionally beyond the limits of the premises.

“ We recommend that a night watch should be engaged on each side of the Asylum, and that they should be exclusively occupied in this duty.

“ Upon the whole, we consider that this Establishment is under kind, and judicious management, and we have much pleasure in bearing testimony to its present excellent condition.”

(Signed,) B. W. PROCTER, } Commissioners
 JAMES WILKES, } in Lunacy.
