### REPORT

#### OF THE

#### COMMITTEE OF VISITORS.

Presented at the Hilary Sessions, 1855.

The Committee of Visitors of the County Lunatic Asylum report as follows :---

During the past year 48 males and 72 females have been admitted into the Asylum, and the total number now is 289, or 128 males and 161 females. Sixteen males and thirty-five females have been discharged as recovered, and 3 males, 2 females, as relieved. One male has been removed to another Asylum; 19 women and 10 men died during the year; but no epidemic or serious disease prevailed.

Four patients escaped, three being brought back very soon, one not until after two nights, having in that time wandered as far as Marlborough. It is satisfactory to state that mechanical restraint has not been resorted to, and the patients have been generally orderly and tranquil. Between 40 and 50 have daily been employed on the farm.

At the Michaelmas Sessions the Committee reported on the subject of enlarging the Asylum, and an order was passed that the same be re-considered by the Visitors, and further reported on. The Committee accordingly met, and having considered a letter from Dr. Thurnam, also having gone over the premises and heard Dr. Thurnam's observations thereon, were of opinion that it was not at present necessary to enlarge the Asylum, beyond what was proposed at the last meeting, and the Committee adhere to their recommendation at the last Sessions.

The total receipts and payments on maintenance account, from the 22nd of September, 1853, to the 21st of September, 1854, inclusive, are as follows :---

F

					£	8.	d.	
From Unions					6550	17	11	
From other sources	•	•	•	•	159	6	4	
					6710	4	3	
Gain		•			340	12	2	

The payment for repairs and alterations, £873 15s. 8d.; to which are to be added for other charges under the same head, £267 9s. 2d. Total, £1141 4s. 10d.

As a total gain has been found to exist at the end of the year of £340 12s. 2d., the Committee are inclined to recommend a reduction in the rate of charge from 9s. 4d. to 8s. 9d. per week for county patients, and a similar deduction for other patients.

# R. PARRY NISBET,

Chairman.

### REPORT

#### OF THE

### COMMITTEE OF VISITORS.

Presented at the Michaelmas Sessions, 1854.

The Committee of Visitors of the County Lunatic Asylum, report :---

That our Clerk has laid before us a correspondence with the Town Clerk of the Borough and City of New Sarum, and with the Commissioners in Lunacy, relative to the reception of the pauper lunatics of the Borough and City into the Asylum ; and we have taken the same into our consideration, more particularly with reference to the opinion of the Commissioners in Lunacy, that it is highly desirable that we should entertain the question of the propriety of enlarging the Asylum to such an extent as to make ample provision for all the pauper patients in the county, including the City of Salisbury.

That we have ascertained from Dr. Thurnam that the number of patients for whom accommodation is required for the City does not exceed ten of each sex. That there is already sufficient accommodation for so many males, but not for any females; and he proposes to erect an additional story to the buildings of the refractory wards for females, whereby he could receive seventeen more females, and he estimates the cost thereof, with the requisite additional furniture, at £1295, with two additional attendants.

That we think it advisable that the plan proposed by Dr. Thurnam should be carried into effect; and it was resolved that application be made to the Court for powers to enlarge the Asylum accordingly.

J. H. JACOB,

Chairman, pro. temp.

### FOURTH

# ANNUAL REPORT

#### OF THE

# MEDICAL SUPERINTENDENT.

At the expiration of another year, in accordance Fourth Anwith the regulation to that effect, the Medical Superin- nual Report. tendent submits to the Committee of Visitors, his fourth annual Report.

A reference to the usual statistical tables, ap-Statistical pended hereto, will shew that the operations of the Tables. Asylum have been considerably extended; and that, as compared with the previous year, about fifty more of the insane poor of Wiltshire have partaken of the benefits which the institution is calculated to confer.

At the beginning of the year, there were in the Asylum 255 patients; namely, 110 men, and 145 Admissions. women. During the twelve months which have elapsed, 120 cases, or 48 males, and 72 females, have been received; of whom 12 were persons who had previously been in the Asylum. The number under care at the date of this Report is 289; namely, 128 men, and 161 women. One of the latter, apparently convalescent, is absent on trial with her family ; and will be discharged at the end of a month, should her recovery be confirmed.

Numbers &

Among the cases admitted were a few, which, though certified in the usual form, the Medical Superintendent could not regard as bona fide examples of insanity. Of these, two or three were cases of senile imbecility, popularly known as mental superannuation; one or two were cases of the delirium of fever; and one was an example of delirium tremens. In a different rank of life, the idea of sending such cases to a lunatic asylum would not even be entertained, and a doubt must be allowed as to the propriety of such a practice in the case of the poor. In one instance, that of a respectable female servant, who became delirious under an attack of fever, all required for her treatment was such careful nursing as she might have had in any private house, or properly regulated infirmary. The Superintendent is of opinion that the precipitate removal to the Asylum of such cases as these, is an evil which ought to be guarded against by relieving officers and those whose duty it is to sign the orders and certificates for their admission. As regards delirium tremens, a disease which, under appropriate treatment, is generally susceptible of cure in a few days, the Commissioners in Lunacy have expressed their opinion, that this malady "alone does not constitute a sufficient ground for confinement in an asylum:" and there can be no doubt that it is even less contemplated by the law that cases of fever, attended by temporary delirium, should be sent to an asylum for the insane. In the case of delirium tremens above referred to, the "facts" alleged in the medical certificate, as "indicative of insanity," are that the patient "fancied that he saw rats and birds on his bed, and was seen to attempt to get through an imaginary aperture." Every practical physician is aware

that these are the very symptoms which are characteristic of delirium tremens.

During the year, 51 cases have been discharged Discharges as recovered, and 5 as relieved. Several of these latter and Recoveries. were quite as satisfactory, in regard to the benefit derived from their residence in the Asylum, as many of those, which the Superintendent felt justified in registering as recoveries. One male patient, not improved, chargeable to a Union in Somersetshire, was removed, in accordance with the provisions of the Act of Parliament, to the Asylum at Wells.

The general health has, for the most part, been General good; and it must be thankfully recorded that, during Health. the prevalence of epidemic cholera in the last summer, the Establishment, unlike some other asylums, has been exempt from any visitation of that disease, which indeed has prevailed but slightly in this county. With the exception of some additional attention to the means of cleanliness and ventilation, the only precautionary measure, which the Medical Superintendent thought needful, was a slight modification of the dietary for the patients. This consisted in the substitution, for the pease soup, forming the usual dinner once in the week, of a plain white soup, made from the liquor in which the mutton for the previous day's dinner had been boiled, with milk, flour, onions, pepper, and salt. This formed a very palatable and savoury food, at once wholesome and free from some objections to which pease soup is liable. At the commencement of the winter, and since cholera and diarrhœa have ceased to prevail, the ordinary dietary has been resumed. During the hot weather, cases of slight diarrhœa frequently occurred ; but the disorder was, in every instance, speedily

relieved, by appropriate treatment. Rheumatic and bronchial affections have been somewhat prevalent. Boils and severer forms of furuncular inflammation have, through the greater part of the year, appeared among the patients ; to whom, indeed, these affections, which seem to have assumed an almost epidemic character, have not been confined. In one case, the disorder assumed the form of carbuncle, and being complicated with inflammation of the lungs, proved fatal in a few days. These forms of disease have been common throughout the country; and from a recent "Summary" by the Registrar-General, for London, we learn that "carbuncle began to prevail in 1847, and although it is rarely fatal, the deaths from it in a year, have increased from 5 or 6-to 50, 70, and in 1854, to 91."

Deaths and tality.

There have been 29 deaths during the year, rate of Mor- namely 10 men and 19 women; the mortality having been at the rate of 10.52 per cent., which is rather less than the mean rate from the opening of the Asylum. The mortality among the males has been much lower, that among females much higher, than usual; the ordinary rule in this respect having been reversed.

MEAN ANNUAL MORTALITY.	MALES.	FEMALES.	BOTH SEXES.
For the year 1854	8.28	12.27	10.52
For 3 <sup>1</sup> / <sub>4</sub> years*—1851-54	12.77	8.77	10.57

Causes of Death.

Among the deaths, were a few cases from inflammation of the lungs, chiefly in the aged, and in persons labouring under protracted insanity. Generally speaking, however, the causes of death were diseases offering but little prospect of recovery. Seven of the whole

<sup>\*</sup> Viz., from the opening of the Asylum, Sept. 19th, 1851, to the end of the year 1854.

number were from seventy to eighty years of age and upwards. Two patients died within twelve and fifteen days, and one female within two days, of admission. In this last case, as in several others which have previously been brought to the Asylum, the patient was dying from exhaustion when admitted. In cases like these, and, under circumstances so hopeless, it is matter of regret that patients could not be spared the risk and suffering of a journey to the Asylum, by which their last days may be shortened and perhaps embittered. Were the infirmaries of the union workhouses better organised, and provided with one or more experienced nurses, as they might be at no great cost, the charge to the Unions, in such cases, as well as in others previously referred to, might be lessened; and the Asylum spared the necessity of admitting cases, the only result of which is to swell the table of mortality.

The escapes have only been four in number. Of these, one only seems to call for particular notice. is that of a female patient, aged sixty-five, labouring under chronic insanity with delusions ; who, in August last, accompanied a party of patients in a country walk. While resting on the down at Roundway, the old woman escaped, unobserved by the attendants, and wandered on the London road as far as Marlborough; spending two nights on the open down, under shelter of the corn or the Sarsen stones of the district, and receiving hospitality from certain cottagers. She returned quietly, with the policeman who had been directed to look out for her, and who brought her back to the Asylum; where she related her adventures with unwonted glee, and has since continued in a more cheerful and contented state of mind than previously.

It Escapes.

Employment.

It would be superfluous to load these Reports with a repetition, from year to year, of similar details as to the employment and recreations of the patients, and other heads of management. No new features, requiring notice, have been introduced in any of these departments. The agricultural labour of the male patients has been equally beneficial to those employed in it, and equally profitable to the establishment, as in previous years. Several of the men have been engaged in handicraft and mechanical employment, chiefly tailoring, shoemaking, and joinery; and a large number of both sexes have been daily occupied in the various domestic services of the house. The women have been, as usual, fully engaged in needlework, and in the laundry: some of them have also aided in the tailor's department. Two or three have been occupied in lace making; though the proceeds of their labour hitherto, have barely enabled the matron to defray the cost of the necessary outfit.

Recreations.

In addition to frequent parade with the band of music, as heretofore described, in which a large proportion of the male patients unite, they have, on a few occasions, been taken long walks in the country, much to their gratification and advantage. In three instances tea parties have been given: two of these took place in the open air, under the shade of the plantation, and were much enjoyed by the large numbers who participated in them. On these occasions a few small balloons were sent up, the services of the band were called largely into requisition, and those who could sing readily contributed their share to the amusement of their companions. Dancing, we believe, seldom forms a part of the ordinary amusements of the reputable poor

of Wiltshire; and the Medical Superintendent entertains considerable doubt as to the propriety of its formal introduction into asylums for the poor, at least in this part of England. In the asylums of the Metropolis, and of Ireland, the case no doubt may be different. In accordance with these views, dancing forms no part of the prearranged plan for the evening's amusement : still, under the influence of the music, some are generally ready to join in the dance, which a few of the more lively of their companions almost involuntarily commence. In contemplating the cheerful and contented group, one is ready to exclaim with a poetical friend-

"Are these then those turbulent souls whom rage and demoniac fury Urge with an impulse dire, as though sprung from the madness of Satan ? Ah, no! let us soften with love the harshness of words breathing terror; Restored to humanity's rank, let us hail them once more as our fellows !"\*

It is gratifying to know that the care and atten- Extracts tion which they receive, are, in many instances, grate- from Letters fully appreciated and acknowledged by the inmates. A few extracts from the letters of convalescent patients, all of the labouring class, cannot, the Superintendent thinks, be read without interest. A patient (No. 487), twelve days after his admission, writes to his wife as follows :--- " I am happy to say that I soon got better here, thank God for it. I went to chapel a few days after I came and have been every morning since, and I goes out into the field every day, and makes myself quite happy, as I hopes to be at home again after a little time, if please God. We gets very good living

of Patients.

<sup>\*</sup> From lines written on the occasion of a fête at the asylum at Meeremberg, near Haarlem. From the Dutch of Dr. D. H. Van Leeuwen. -Psychological Journal, July, 1854.

here, and a very nice place to be in, and good beds, and I sleeps well at night. \* \* So I hope \* \* you will make yourselves happy. I have \* \* asked the Doctor's leave to write and also to see you, and I hope to see you soon." This patient was discharged recovered at the end of about six weeks. Another patient (No. 453), who was discharged recovered at the end of a month, also in a letter to his wife, says :-- "Thank God I am better, and thank God I ever came to this place, for it is a school to me. I go out to work a little every day, and I get time to read, and time to pray, and time for all things, and thank God for it, I have good friends too." A female patient (No. 405), on her recovery, writes thus to her husband :--- " I must thank God and the people of this establishment to think there is such places for people afflicted in their minds and head, for no one out can do for us as we are done for here ; if you get a nurse out and a doctor, and pay the best price for it, you are not done by as you are here." This person returned to her friends, recovered, at the end of ten weeks. Similar to this was the statement made by another female patient (No. 324), who, after an attack of melancholia, left the asylum, recovered, in ten months :-- " It is a blessing for the parishes and the patients, there is such a place for people afflicted in their mind. There is many as can cure the body, but here you see account is taken of the head and trouble of the mind." Passages like these, from "the simple annals of the poor," quaint as they are, have a truth and freshness about them which must commend them to the feelings of all. Fully does our intercourse with the insane of all ranks prove that, as a class, they are not, as often thought, separated in

their mental and moral characteristics, by any broad line, from the rest of the world. In a great majority of cases, the powers of observation are acute, and the mental faculties, to a large extent, unimpaired; whilst the affections are as warm, and the sensibility as lively, as in persons of sound mind. The celebrated French physician, Pinel observes, that nowhere, except in the pages of fiction, had he met with brighter examples of conjugal affection and fidelity, with fonder parents, more faithful friends, or with instances of more pure and lofty patriotism, than he had witnessed among the inmates of the Bicêtre, in their intervals of reason and tranquillity.\*

In carrying out satisfactorily the important objects of a large Asylum for the Insane, much must neces- Attendants, sarily depend on the character and fitness of those employed, whether as officers, attendants, or servants. A certain, and by no means low, standard of intellectual vigour and ability, is to be desired in all who have the charge of, or come in contact with, the insane. Such endowments, however, are not the most indispensable. Method, punctuality, and a steady application to business, must be considered as decidedly to be preferred to remarkable talent or energy of character, where all these are not happily combined in the same individual. In the ordinary relations of life, these every-day virtues are of more genuine value than more striking and brilliant qualities ; and this is especially the case in connection with insanity; as persons afflicted with it absolutely need a regular and systematic course of treatment. In their immediate attendants, are required vigilance and discretion, firmness tempered by kindness, and,

\* Pinel, "Sur la Manie," s. 1, c. 5.

Officers, & Servants. above all, the patient discharge of duties which may often be trying to the feelings. During the year, there have been a few changes among the servants and attendants in the Asylum, chiefly by their own desire; two only having been discharged for misconduct. With little exception, all the rest have fulfilled their duties in a creditable manner. There has been no change among the resident officers; which personally is a source of satisfaction to the Superintendent.

Improvements.

During the year, a few improvements and additions have been ordered by the Committee of Visitors, under the provisions of the 38th section of the "Lunatic Asylums Act, 1853," which have much conduced to the advantage of the establishment, and benefit of the The first and most important of these, is the inmates. provision of a work-shed, of considerable extent, which has enabled the male patients to be occupied in wood cutting and stone breaking in bad weather, when, without such shelter, they must have remained unemployed. The drying closets in the laundry, already much improved, are in course of being considerably extended; the amount of accommodation, in this respect, required in such an institution, having, in the first instance, been much underrated. This alteration will add considerably to the efficiency of the laundry department.

Proposed addition. In the last Report of the Medical Superintendent, attention was drawn to the probability of further accommodation being required, on the female side of the establishment. The experience of another year has fully verified this anticipation. The proportion of women has gone on increasing ; and, during the last six months, there have generally been resident twenty

more female patients than had been contemplated in the erection of the Asylum. This additional number has only been provided for, by the appropriation of the infirmary apartments as dormitories; and by the use of sleeping rooms, in the central building, intended for female servants. A greater number than already admitted, could not, with propriety, be received ; and even now, were epidemic disorder to prevail in the establishment, considerable inconvenience must be experienced. In April last, the insane patients of the borough of Devizes, namely one male and four females, were admitted, under the provisions of an agreement between the Council of that Borough and the Committee of Visitors, for their reception, at a weekly charge of 3s. more than that made for other patients. A similar application having been made by the Council of the City of Salisbury, and being urged on the Committee of Visitors, by the Commissioners in Lunacy, it became a question how to provide for the probable permanent addition of about twenty patients, nearly half of whom are females. The suggestion of the Medical Superintendent, which has been adopted by the Committee of Visitors, to raise the female refractory ward to the same height as the rest of the building, by the erection of another story, to be appropriated to a great extent as an associated dormitory, will provide for the immediate wants of the establishment, and enable the Committee to enter into an arrangement for the reception of the Salisbury patients. By the proposed enlargement, accommodation will be afforded for seventeen additional female patients, at a cost, including the requisite furniture and fittings, as estimated by the clerk of the asylum, of about £1,300, exclusive of the architect's commission

and the clerk of the works; being at the rate per head, for each patient, of about £76. This plan will be seen to possess the recommendation of economy, when it is remembered, that the average cost per head of the original building and furnishing, exclusive of land, was not less than double this sum,\* even at the then much lower price of labour and materials of all kinds.

Weekly Charge. The high prices, which have prevailed during the two past years, have precluded the possibility of any reduction in the weekly charge, within that period. It is highly gratifying to the Superintendent to find that, notwithstanding the continuance of these high prices, the Committee of Visitors feel justified in declaring a reduction of the weekly charge, at the rate of 1d. *per diem*, or from 9s. 4d. to 8s. 9d. per week.

Conclusion.

Altogether the Medical Superintendent thinks he may be allowed to congratulate the Committee of Visitors, on the condition and progress of the Asylum under their charge ; and he trusts that its future course may be at least equally satisfactory, with that of the year the history of which it has now been his duty to review.

(Signed)

#### JOHN THURNAM, M.D.

\* The average cost per head for building and furnishing, exclusive of Architect's commission, and salary of the Clerk of the Works, was £158, and, inclusive of these items, £165. In this estimate, the Asylum is taken to accommodate 296 patients; and improvements and additions, down to the close of 1853, are included. The average cost per head, inclusive of land, calculated in the same way, was £194. In the last Report, by an accidental oversight (page 16), this average was given as £200.

### REPORTS

#### OF THE

## COMMISSIONERS IN LUNACY.

"WILTS COUNTY ASYLUM, 8th May, 1854.

"There are at present 272 patients in this Asylum, of whom 120 are males, and 152 are females. With the exception of one or two of the females, all the patients were quiet and orderly, and they were generally well dressed, and clean.

"Two patients of each sex were in bed, and thirty are reported to be under medical treatment.

"Since our last visit in March, 1853, 28 patients have died. We have made enquiry as to the causes of death, which do not call for particular remark. No epidemic disorder has prevailed.

"The names of several patients are recorded as having been placed in seclusion, but it does not appear that any instance of instrumental restraint has occurred.

"The whole of the land is now under cultivation, between 40 and 50 of the male patients being employed upon it. About 30 other male patients are also engaged in the kitchen, laundry, and wash-house, and in shoemaking, tailoring, &c.

"A large number of women are occupied at needlework, and they also assist in the laundry and household work.

"Prayers are read daily by the Chaplain, and about two-thirds of the total number of patients are in the habit of attending.

"There have been 124 admissions, and 53 discharges; 46 of the patients being reported recovered. "The Asylum and offices were throughout clean, well ventilated, and in good order, and the establishment generally in a satisfactory condition."

(Signed) W. G. CAMPBELL, Commissioners J. R. HUME, in Lunacy.

### "WILTS COUNTY ASYLUM, 24th Aug., 1854.

"There are 285 patients in this Asylum, of whom 123 are males, and 162 are females. Thirty-five patients are registered as being under medical treatment. No one is at present secluded, and mechanical restraint is never resorted to.

"Since the last visit of the Commissioners, on the 8th May last, 43 patients have been admitted, 23 have been discharged, and 8 have died; 2 deaths being ascribed to consumption, 2 to exhaustion, and the rest to various other causes.

"We have to-day seen all the patients, who were clean and comfortably clothed, and, with one or two exceptions amongst the females, tranquil at the time of our visit. The wards throughout were very clean, free from unpleasant odour, and altogether in good condition. We think it advisable, if possible, to diminish the straw beds now in use.

"Prayers every day, and the Church Service on Sundays, are read by the Chaplain, and are attended by about 180 of the patients; and 160 of the patients (of both sexes) are employed in various ways, besides others who occupy themselves in the wards.

"We have much satisfaction in reporting that this institution appears to us to be under kind and judicious management."

> (Signed) B. W. PROCTER, Commissioners S. GASKELL, in Lunacy.
