REPORT

OF THE

COMMITTEE OF VISITORS,

Presented at the Hilary Sessions for 1866.

The Committee of Visitors of the Wilts C Lunatic Asylum report as follows :	ounty
The Number of Patients in the	. TOTAL.
Asylum January 1st, 1865, was : 161 241	402
M. F. T.	10%
Admitted for the first	
time during the	
year 42 52 94	
Re-admitted during	
the year 10 12 22	
52 64	116
Total under care during the year 213 305	518
Discharged or Removed :	
М. F. T.	
Recovered 19 36 55	
Relieved 3 4 7	
Not improved 1 0 1	
Died 24 19 43	
Total discharged and died within	100
the year 47 59	105
Remaining in the Asylum Dec.	
31st, 1865, inclusive of two	
Women absent on trial 166 246	412

The receipts and payments during the past year are as follows :---

MAINTENANCE ACCOUNT.

The weekly rate of payment for patients during the first quarter of the year was 7s. 7d., and during the last three quarters, owing to the increased price of provisions and other causes, has been raised to 7s. $10\frac{1}{2}$ d. for each patient—viz., at the rate of one halfpenny a day.

There has, notwithstanding, been an excess of expenditure in every quarter, excepting that ending at Midsummer, beyond the receipts; amounting in the whole to $\pounds 165$ 9s. 8d.

Your Committee therefore, under the impression that the present price of provisions is more likely to rise than to fall, recommend that another halfpenny be added to the daily cost of each patient, making the weekly rate 8s. 2d.

PRINCIPAL AND INTEREST ACCOUNT.

The amount received from the rates during the year has been £3555 3s. 3d., and the following payments have been made :—

	£	s.	d.	
Principal paid off	2000	0	0	
Interest on Debt	1629	7	5	
	3699	7	- 5	

The balance in the hands of the Treasurer on this account is £722 5s. 10d. Of this balance about £405 will be required to pay the interest due previous to the Easter Sessions. Your Committee however having, with the authority of the Sessions, borrowed £2000 to pay for the new buildings now in course of erection, the present debt is £32,500.

SPECIAL RATE AND REPAIR ACCOUNT.

This account has been drawn upon to the extent of $\pounds 294$ 19s. 9d., leaving a balance of $\pounds 258$ 19s. 5d. due to the Treasurer; to meet which balance, and provide for the future expenditure under this head, a rate of one farthing in the pound was made at the last Michaelmas Sessions, and is now in the course of payment.

FIRST COST ACCOUNT.

The receipts from Unions and Parishes for charges beyond the ordinary rate of payment for patients belonging to the county, and which have been carried to the First Cost Account, amount to £265 14s. 6d.

The £2000 borrowed, as mentioned above, has been received.

The payments in the year have amounted to £629 2s. 4d., which, with the balance due to the Treasurer of £371 9s. 4d., will make a total of £1000 11s. 8d., which deducted from the £2000 borrowed, leaves a balance in the Treasurer's hands of £1265 2s. 10d. available towards the payment of the new buildings.

NEW BUILDINGS.

Your Committee inform the Court that they have completed a contract with Mr. B. Mullings for the construction of the new buildings at a cost of £1800, which provided extra joisting for the ceiling in case, as on the female side, it may hereafter be necessary to add to the building. The building is in a forward state, and will be fit for occupation by Midsummer.

There has been a steady increase of the number of the patients during the past year, showing that the expense of more building was not incurred before it was needed.

Your Committee have also contracted for some additions to the farm buildings, rendered necessary for the accommodation of the cows. The yearly consumption of milk for the patients amounts to 5500 gallons, which for many years past has been purchased at the exorbitant rate of 11d. per gallon, at an aggregate cost of £250. This milk is now produced off the land, and will very soon give ample remuneration for all expenses incurred for its production. The contract for the building required is £112, which includes the addition of an extra gateway, the whole of which is nearly completed.

THE SEWAGE.

It is satisfactory to the Committee to be able to inform the Court that the operation of the water-works lately erected for the distribution of the sewage, has been entirely successful, and it is the opinion of our Engineer that the sewage may be driven to the highest part of the land lately added to the Asylum Farm. As an experiment, draining tiles have been purchased for 250 yards, and if this succeeds, of which no doubt is entertained, the sewage will then be carried over the remainder.

NIGHT ATTENDANCE.

A considerable addition to the cost of in-maintenance has been incurred by the formation of a staff of nurses and others for night attendance upon the patients, in compliance with the urgent and pressing recommendations of the Commissioners in Lunacy. On this subject the Medical Superintendent will, with more propriety, speak in his report.

CHAPLAIN'S REPORT.

The usual religious services have been performed in the chapel, but the Chaplain will present his own report on this subject.

CONDITION AND MANAGEMENT OF THE HOUSE.

Your Committee, in compliance with the regulations in the Act of Parliament on the subject, have given a pension to the old Porter, who from infirmity and advancing years, had become incapable of performing the duties of his place. The Committee conclude their report by recording their satisfaction with the condition and management of the Asylum. The quarterly reports of the Visitors, and the monthly reports of the House Committee, state that the wards and patients have been visited by them, and record their testimony to the cleanliness and careful ventilation of the wards, and the order and tranquillity that was generally found amongst the patients.

The Medical Superintendent will present his own report of the management and statistics of the Asylum; and the Clerk of the Asylum will append a detailed and minute statement of the general expenditure.

This report, with these additions, will be ready for distribution amongst the Magistrates previous to the Lent Sessions.

For the Committee,

G. P. LOWTHER, Chairman.

REPORT

OF THE

COMMITTEE OF VISITORS,

Presented at the Trinity Sessions, held at Warminster, 27th June, 1865.

The Committee of Visitors of the County Pauper Lunatic Asylum, in obedience to an order of the Court made at the Hilary Sessions last, report as follows :—

The Committee have not only been pressed by the Commissioners in Lunacy to provide further accommodation for male patients—the Wards now containing about 15 more beds than they were calculated to hold—but a case strongly illustrative of the necessity has arisen.

The case was that of an attendant attacked by scarlet fever, and who was removed; but if it had been the case of a patient, the embarrassment and danger would have been extreme, as the Infirmary had, in consequence of the crowded state of the house, been necessarily otherwise occupied.

It must be obvious that the Asylum ought not to be so crowded that there should be no means of separation in case of the occurrence of an epidemic.

Your Committee therefore fully admit the necessity of making the additional provision for male patients required by the Commissioners in Lunacy, and propose that the precedent of the addition to the Women's Wards be

followed by the erection of a wing for about 40 male patients. By this plan the uniformity of the buildings will be very little impaired. This work should, in the opinion of the Committee, be proceeded with without delay, in order that the Wards may be fit for occupation as early as possible in the ensuing year. Plans and specifications of the additions recommended have been submitted to the Committee by the County Surveyor, and accompany this The Committee are advised that the additional Report. buildings may be probably erected at a cost of about £1700, and that the cost of furnishing the buildings will be about £300, making a total of £2000. Two other plans have been suggested, but as the accommodation would be inadequate, and the cost per head would be considerably greater than that which has been adopted, the Committee do not find it necessary to lay them before the Court.

With respect to the question proposed for the consideration of the Committee—whether any patients in the Asylum could, without danger, be removed to their own homes, or to the workhouses of their respective Unions, your Committee are satisfied that the excess cannot be relieved by the removal of patients to the workhouses. The reason appears in a Report of the Medical Superintendent at p. 19 of the 13th Report (being that for the year 1863), in which the impracticability of such a transfer is shewn, as regards Union houses. It is already the practice to send patients who appear sufficiently recovered to be trusted with their friends, to their own homes on trial.

For the Committee,

G. P. LOWTHER, Chairman.

FIFTEENTH

ANNUAL REPORT

OF THE

MEDICAL SUPERINTENDENT.

The Medical Superintendent submits to the Committee of Visitors his Fifteenth Annual Report, Annual as follows :--

There have been admitted into the Asylum, during the year, 116 cases; of which 23 were readmissions. The total number under treatment has been 518; of whom 213 were men, and 305 women. The average number resident in 1864, was 385.8; and the number remaining under care at the Numbers. end of that year, 402; whilst during the year which has now expired, the average was 402.6, and the number remaining under care, 412. Of these, 166 were men, and 246 women (two of the latter absent on trial); as compared with 161 men, and 241 women, at the beginning of the year. A comparison of these numbers shews a steady and not inconsiderable increase.

The recoveries during the year have been 55 in number; in addition to which, 7 cases have been removed or discharged as relieved. It will thus be seen that a larger proportion than usual, have been restored to their friends and families; many of them, it is to be hoped, permanently cured of their malady.

Fifteenth Report.

Numbers and Admissions.

Average

Discharges and Recoveries.

This compensates, in some degree, for the less satisfactory results in this respect, obtained during the preceding year. One case only has been removed not improved; being that of a man chargeable to an Union in Northamptonshire, and who was transferred to the Asylum at Northampton in April last.

" Criminal Lunatics."

The so-called "Criminal Lunatics" remain, with one exception, as reported last year. There were then confined in the Asylum, under orders of the Secretary of State, four men, who have since been added to by the admission of one woman, a native of Ireland, who had been committed to the Gaol at Sandwich "in default of sureties to keep the peace"; and was thence transferred, first to the private Asylum at Peckham House, Surrey, and subsequently to this Asylum, as chargeable to the parish of Collingbourne Ducis.

General

Deaths and rate of Mortality.

The general health has been good, and the Health. deaths below the average in county asylums, as well as below that which has obtained in this establishment since its opening. There were 24 deaths of men, and 19 of women, of whom 5 men and 4 women were of the age of 70 years and upwards; two of the men being octogenarians. The average mortality for the year has been at the rate of 10.6 per cent.; that for the 14 years and upwards since the Asylum was opened, being 11.6 per cent.

> MEAN ANNUAL MORTALITY. MALES. FEMALES. BOTH SEXES. For the year 1865 14.8 7.910.6. . For 14.35 years-1851-1865* 14.9 9.1 11.6

Of the 43 deaths, 21 were from diseases of the Causes of Death. nervous system, - apoplexy (4), paralysis (5), general

> *Viz., from the opening of the Asylum, Sept. 19th, 1851, to the end of the year 1865.

paresis (4), epilepsy and convulsions (3), disease of the brain (5). Of the last, one was a case of tubercular disease, another of syphilitic softening of that organ. There were as many as eleven deaths from pulmonary consumption, and three from inflammation of the lungs.

One man aged 77, and one woman aged 70 Casualties. years or upwards, died from the remote effects of fracture of the thigh-of the upper part, though not the anatomical neck, of that bone; in both arising from slight accidents. Inquests were held Inquests. in both these cases; and the jury acquitted the servants of the establishment of any blame in connection with them. The verdict in the case of the man, was "Fracture of the thigh bone causing exhaustion," and in the other "Accidental Death." Inquests were held in four other cases. Two, one of each sex, were epileptics who were found dead in bed. The verdicts returned were "Accidental Suffocation in a fit of epilepsy," and "Found dead from an epileptic fit." Another was the case of a paralytic patient, whose arm was fractured by a slight accident, and who, though going on favourably, died suddenly on the fourth day, from an attack of inflammation of the lungs. The result was in no way connected with the accident, and the verdict returned was "Death from natural causes." The other case was that of the young woman aged 22, adverted to in the Report of the Commissioners in Lunacy, her death having occurred in the course of their visit, on the morning of the 30th of March. On examination post mortem, the principal lesion was found to consist of intense

congestion of the vessels of the brain with dark blood. The verdict returned, in accordance with the medical evidence, was "Visitation of God from congestive apoplexy." The patient had been admitted four days previously, suffering from "acute recent mania, complicated with convulsions."

Escapes.

Five escapes have been reported; all of them of men. One succeeded in crossing the borders of Wilts and Gloucestershire, and subsequently reached his home at Ashton Keynes, whence he was brought back on the sixth day. His mother had been alarmed by his volubility and excitement, but otherwise no ill effect resulted from his escape. Another man, who wandered across the fields to the neighbouring hamlet of Nursteed, caused some little alarm to the inhabitants, by his resisting their attempts to secure him. Happily, no serious consequences arose; and after a little delay he was brought back safely by the police, who, from some misconception, were less prompt than usual in rendering assistance. The only other case worthy of notice was that of a bargeman, who had been employed on the Kennet and Avon Canal, who being aware of the depth of the water, threw himself into the canal, in order to avoid capture by the police, who were in pursuit of him. He was however secured and brought back in a few hours, none the worse for his adventure. This last was the only case in which any culpable neglect in connection with the escape was attributed to the attendant in charge. He had omitted to lock the door between the ward and the airing court, at the proper time before dusk; but on a

promise of greater care for the future, the fine to which he had made himself liable, was not exacted.

In his last Report, the Medical Superin- Addition tendent referred to the crowded state of the male wards, which had become more and more inconvenient; and the probable speedy necessity for increased accommodation was pointed out. The consideration of the subject being pressed on the Committee of Visitors by the Commissioners in Lunacy, in their Report of the 30th March, the sanction of the Quarter Sessions was as soon as possible obtained; and the erection of an additional ward for about forty patients was commenced in The works have been rapidly proceeded August. with, and are now far advanced towards completion. This additional accommodation will afford great relief to the male department; which, as has been shewn, is still more crowded than was the case a year ago; there being six more men under care than at that date.

The adequacy of the water supply being Water threatened by the drought of the early part of the Supply. year, it was resolved to extend the rain-waterspouting to such parts of the building as had not previously been provided with it; and to connect all the down pipes with the rain water tank. This utilisation of the rainfall has been so far useful, as materially to diminish the complaints as to the insufficiency of the water supply in some parts of the establishment.

The walls of the corridors and day-rooms, which Painting had previously been only coloured in distemper, have and Decoration been much improved by being painted shoulder height of Wards. of a stone colour, with a border of bright blue and

The Visitors have marked their approval maroon. of this slight decoration, by recording that "the appearance of the wards has been considerably enlivened by the addition of a little colour." In a few of the day-rooms, the upper parts of the walls, which are painted below, have, in addition, been hung with a neat marbled paper.

Furniture.

Some additional furniture has been provided for the corridors, consisting chiefly of settees of a comfortable description, with cushions covered with horsehair.

Har-

A harmonium has been procured for the Chapel, monium. in lieu of the old barrel organ. The instrument, a good one by Alexandre, is highly appreciated by a large portion of the congregation; and the numbers joining in the psalmody have been much increased.

Sewage.

On the farm, the process of irrigation by the sewage has been thought to succeed satisfactorily; and, though, in some states of the wind and in close weather, an effluvium is sometimes perceived in the house, no ill effects to health have as yet been traced to it. The regular addition of lime and of a disinfectant liquid, (carbolic acid), to the tank, morning and evening, as practised in the Sussex, and in some other, county asylums, appears to have been useful in the prevention of any deleterious effects. The Committee have determined to extend the system to a portion of the land lately acquired, and pipes are about to be laid down over about 5 acres, to an extent of not more than 250 yards.

Cow-shed

In connection with the cows, which have been and Yard. kept for the supply of milk to the establishment, during the past two years, it has been decided to erect a new

cattle shed, and to enclose for them a yard properly drained and fenced. These works are progressing rapidly towards completion.

It has been the system in this Asylum for the Night attendants, in both the male and female departments, to Attendants. watch in rotation, the sick and any other patients who might require special care during the night; but it had not been thought necessary nightly to visit every epileptic or paralytic case, or other "wet and dirty" patient, with the view of diminishing the inconveniences arising from faulty habits and bodily infirmity. In deference, however, to the opinion urged upon the Committee and Medical Superintendent, by the Commissioners in Lunacy, during several years, a system of night watching has, within the last year, been adopted. A night attendant, relieved from all duty by day, has been appointed for each side of the house; and every case such as above described, is visited three or four times during each night; the epileptics and sick being likewise specially placed under the night attendant's care. A set of rules for their guidance has been drawn up, and has received the approbation of the Committee of Visitors. A particular report of the number and condition of the cases visited is made out by each attendant, and submitted every morning for examination by the Medical Superintendent. Three or four months' experience of the plan is not sufficient to permit any confident opinion as to the benefit to be expected. In a few cases, an improvement in habits has been reported, and two or three appear to have been entirely cured. The average numbers requiring such attention is, however, much the same; and about 23 men and 40 women are at present taken

out of bed two, three, or four times every night, on this account.

Weight of

The analysis of the weights of the brain, in 470 the Brain. cases, which was stated to be in preparation when the last Report was drawn up, has now been completed, and is appended to this Report. The Tables referring to this subject have been prepared with great care, and it is hoped may prove worthy of the notice of anatomists and physiologists interested in such inquiries.

Attendants and Servants.

The changes in the staff of male attendants have continued to be rather frequent; and the difficulty of meeting with suitable persons for the duty has been great, notwithstanding the sanction by the Committee of a higher scale of remuneration than had been hitherto considered adequate. The porter, who was advanced in age, and had filled the situation for more than thirteen years, has retired on a small pension.

Conclusion.

The Medical Superintendent concludes his Report with the renewed expression of his obligation to the Committee, for their continued support and encouragement in the discharge of the duties devolving on him.

(Signed)

JOHN THURNAM, M.D., Medical Superintendent.

REPORT

OF THE

CHAPLAIN,

To the Chairman and Visitors of the Wills County Lunatic Asylum.

GENTLEMEN,

I have nothing very material to add to my usual Report.

The Services in the Chapel have been duly performed throughout the past year. The number of communicants continues about the same. The Chaplain's visits to the wards, as heretofore, have been but occasional.

One improvement I have to note in the Chapel Service is with reference to the singing. The harmonium, kindly provided in compliance with my last year's representation, is an excellent one, and is played with much spirit by one of the attendants. Chaunting has been introduced, and the singing altogether improved.

On the whole, I have but to repeat my convictions of the beneficial effects of Religious Services on the afflicted class with whom we have to deal.

I am, Gentlemen,

Your very faithful servant,

B. C. DOWDING, Chaplain,

REPORT

OF THE

COMMISSIONERS IN LUNACY.

"WILTS COUNTY ASYLUM, 30th March, 1865.

"The changes in the patients since the 9th March, 1864, the date of the last visit of the Commissioners, and their present numbers, are shewn by the following Table :—

	MALES.	FEMALES.	TOTAL.
Admitted	53	64	117
Discharged	26	25	51
Of whom recovered	18	25	43
Died	24	27	51
Present numbers on Books	157	236	393
Of whom absent on trial		1	1

"Of the male patients not recovered at the time of their discharge, two were removed to other County Asylums, and four to the Criminal Asylum at Broadmoor.

"The deaths were all attributed to natural causes, excepting that of a man who died from abscess, following an accidental fracture of the thigh bone. In the above, and five other cases, inquests were held, three being on the bodies of patients who were found dead, or dying after epileptic seizures, and the other two being cases in which there had been fractures of the collar bone and arm respectively.

"A female patient, Sarah Grace, who was admitted on the 26th inst. in a state of acute mania, after an attack of four days duration, was, during our visit, found on the floor of her room in a dying state, and expired before Dr. Thurnam, who was immediately sent for, reached the gallery. A *post mortem* examination will be at once made, and the result communicated to the Coroner.

"In reference to this case, we ascertained that although it was so very recent a one, and the patient was excited and restless, she had not since her admission been visited during the night. Adverting to these circumstances, and to the fact that there are in the Asylum a large number of epileptics, and that during the past year as above mentioned, three were found dead or dying, we again suggest for the consideration of the Committee the importance of ensuring due supervision by the appointment of Special Night Attendants.

"The patients last registered as under medical treatment for bodily ailments were 21 in the Male, and 24 in the Female Division.

"According to the Medical Journal, the patients secluded since the last visit have been 7 on the Male side, and 21 on the Female; the former altogether on 8, and the latter on 43 occasions. The causes of seclusion appear to have been generally violent excitement, or assaults on attendants and others. "The only case in which mechanical restraint in any form has been employed, was that of a female patient, in which it was found necessary for a few weeks, in order to prevent her from removing surgical appliances for a fractured arm.

"The records of employment shew results substantially the same as previously reported.

"The attendance at Divine Service in the Chapel on the Sunday prior to our visit was :---

	MALES.	FEMALES.	TOTAL.
Morning	80	114	194
Evening	88	117	205
The attendance on the 29th inst. was	68	112	180

"Possession was acquired at Michaelmas last of 21 acres of additional land, making altogether, with the 45 acres previously the property of the Asylum, 66 acres.

"The patients are regularly taken out for walks round the boundary of the older portion of the estate.

"We are glad to find that advantage has been taken of the acquisition of the additional land to divert the road of approach to a further distance from the building, and we think that this improvement might be with advantage carried to a greater extent.

"We have to report most favorably, as heretofore, of the cleanliness and good order of the several wards and rooms, beds and bedding. The temperature throughout was agreeable, and, with certain special exceptions, the atmosphere was pure.

"It is still our duty to point out the great deficiency noticed in previous Reports, of furniture of a domestic kind, and simple decorations and objects of interest. We refer more especially to Wards 3 and 4 on each side, appropriated to patients of the worst class. We strongly urge the expediency of relieving, by all practicable means, the bare and monotonous aspect of the wards referred to; the inmates of which are at least quite as likely as those in the better wards to derive benefit from being surrounded by objects calculated to divert the mind. The day rooms of Wards No. 4 were at the time of our visit rendered especially gloomy by the lower portions of the windows towards the adjoining airing ground being closed with shutters.

"We attribute much of the excitement which we found in the Female Wards last mentioned to their bare and cheerless aspect. The same observation applies to the corresponding Male Wards.

"We submit for the consideration of the Committee the expediency of increasing the staff of attendants, who are now on the Male Side 12, including the out-door labour attendant and tailor; and on the Female, 15 nurses and a laundress and occasional assistant.

"The personal condition of the patients generally as to clothing and otherwise was satisfactory.

"The weekly charge for maintenance was raised at Christmas last from 7s. 7d. to 7s. $10\frac{1}{2}$ d. "The result of our enquiries as to the extent of the accommodation was, that in the Male Division whilst the dormitories contain an excessive number of about 20 beds, there are in fact now only five vacancies, and that when the dormitories, as yet unoccupied in the new female building, are brought into use, there will be about 40 vacant beds in that division.

"It becomes, consequently, a matter of pressing importance to extend, without delay, the accommodation for male patients, and we recommend this subject to the immediate consideration of the Visitors.

"In any future plans for the extension of the Asylum, we trust that the Visitors will take into consideration the importance of providing a proper Recreation Hall.

"The superintendence and management of the Asylum continue to be very creditable to Dr. Thurnam and the other officers.

> "R. W. S. LUTWIDGE, Commissioners "JAMES WILKES, in Lunacy."
