1862		•••••		153	226	379

The receipts and payments during the year are as follows :---

#### MAINTENANCE ACCOUNT.

The weekly rate of payment for patients has been all through the year at 7s. 7d., and in consequence of the high price of provisions the loss upon the year has amounted to  $\pounds 151$  14s. 5d.

The subject of the future rate of payment was fully considered and discussed; but under all circumstances, and with the present price of bread, it was judged expedient to try and go on for the time at the same rate, though it is not improbable that the Treasurer will be occasionally overdrawn.

#### PRINCIPAL AND INTEREST ACCOUNT.

The amount received from the rates during the year has been £3556 8s. 11d.

The following payments have been made :---

	£	s.	d.
Principal paid off	2000	0	0
Interest on debt	1648	15	4

#### 3648 15 4

leaving a balance of £637 1s. in the hands of the Treasurer on this account, which will be required for the payment of interest which will be due previous to the Easter Sessions (until which time no further receipts will accrue) amounting to £500 5s. 10d. The original debt has been reduced to £31,500, but there has been an additional loan of £2000 to defray the cost of the new buildings now in the course of erection, which leaves the debt the same as it was last year, viz., £33,500.

#### FIRST COST ACCOUNT.

The receipts during the year, from Unions and individuals, for charges beyond the ordinary payment for maintenance—all of which go to this fund—have amounted to £236 15s. 2d.

There has also been received  $\pounds 2000$  on loan, already referred to.

The payments during the year have amounted to  $\pounds 1002$  19s. 5d., leaving a present balance of  $\pounds 980$  13s. 1d., which would have been paid to the Contractor, but has been withheld in consequence of his not carrying on the new buildings at the rate of progress agreed upon.

Your Committee were in hopes that they might have informed the Court at these Sessions that the whole work had been roofed in; but in consequence of the non-supply of materials by the Contractor, the work is not in that state of forwardness which might justly have been expected. The Committee are quite satisfied with the way in which the buildings have been executed as regards the work.

#### SPECIAL RATE AND REPAIR ACCOUNT.

This account has been drawn upon to the extent only of £43 14s. 9d., leaving a balance in hand of £645 7s. 6d., which will render any further rate on this account for this year unnecessary.

#### SEWAGE.

Serious complaints of the sewage from the Asylum having been made by the proprietors of adjoining lands, the Committee have considered how best to remedy the evil.

Various methods have been proposed, but they have not yet been able to determine the most suitable mode of abating the nuisance. This question, which is beset with difficulties, is at this moment engaging the best attention of the Committee.

## THE CHAPLAIN'S REPORT.

The Chaplain's duties, comprising full Morning Service, the Service on Sundays, Christmas Day, and Good Friday, with daily Morning Prayer, have been duly performed, with an attendance averaging fully two-thirds of the patients.

The Committee are happy to record their satisfaction with the condition of the Asylum, and the management of the Medical Superintendent.

The statistics of management are given in the Report of Dr. Thurnam; and a detailed Account of the Receipts and Expenditure will be added to the Report, which will be ready for circulation previous to the Easter Sessions.

For the Committee,

G. P. LOWTHER, Chairman.

## REPORT

#### OF THE

## COMMITTEE OF VISITORS,

## Presented at the Lent Sessions, held at Salisbury, April 8th, 1862.

The Committee of Visitors of the Wilts County Asylum report that in consequence of the increasing number of pauper lunatics, the County Asylum is overcrowded, especially the female department. This excess was attempted to be provided for, by various expedients, till it became a matter of pressing necessity that the accommodation afforded must be permanently increased. The Commissioners in Lunacy, in their Report in October last, state that "the Asylum is quite full, and that in most of the female dormitories there are one or two beds beyond the proper number."

This increase of pauper lunacy—arising probably, amongst other causes, from the notice now taken of cases which formerly passed unobserved or unheeded—is in progress and likely to continue, especially under the provisions of an Act just come into operation, which transfers the charge of all pauper lunatics from the parish to which they belong, to the common fund of the union.

The total number of lunatics in the county of Wilts in 1847 was 364, whereas in 1861 the number was 647. It is not, however, to be inferred that this enormous increase of pauper lunacy is peculiar to the county of Wilts; for during the same period the increase in the entire kingdom has advanced at the rate of 74 per cent. In 1849 the reported number of pauper lunatics under care in asylums was nearly 11,000, which in the next ten years had reached to 18,022. This very important subject is alluded to by Dr. Thurnam in his report (for 1861), and is deserving of the deepest consideration.

The Committee of Visitors felt that it was no longer possible to postpone the demand for more accommodation by temporary shifts and expedients, under the hope that lunacy had reached its maximum. They took, therefore, the whole question into consideration, and in communication with the County Surveyor endeavoured to ascertain the best practicable mode of effecting the necessary enlargement at the least expense.

The Committee in the Annual Report presented at the Hilary Sessions, informed the Court that they had been compelled to take this subject into consideration; and, admitting its urgency, they asked for authority to make such enlargement, or addition, as to them seemed absolutely necessary for carrying on the purposes of the Asylum, but they said that they were not then prepared with any specific plan for the adoption of the Court.

Under these circumstances, the Court determined to postpone the consideration of the matter, until it was in possession of definite information as to the extent of the enlargement, accompanied by drawings and plans, and an estimate of the whole cost. They, therefore, referred the ubject back to the committee, requesting them to give it heir best attention, and to be prepared with some plan which they could recommend for adoption.

The Committee of Visitors have obeyed these instrucons; they have had several meetings, and various plans ave been submitted to them. The County Surveyor, who, om continued ill-health and absence from home, was unable give the business all the time and attention he otherwise ould, stated that it would be satisfactory to him to call in the aid of Mr. Wyatt, under whose direction the whole of e Asylum and the additions since made to it had been built. he Committee acceded to this wish; and on application eing made to Mr. Wyatt, he very readily and kindly underok (in conjunction with the County Surveyor) to prepare e necessary drawings for the information of the Court.

These drawings are now submitted to the Court, at an timated cost of about £3,250, and will afford accommodain for 77 female patients. At a very trifling additional pense three more single rooms may be obtained, thus ring a total of 80 additional beds. With a view to future largement, should such a necessity arise, which the Comttee fear is too probable, they advise that the actual floor sts for an upper floor be introduced during the progress the building, instead of mere ceiling joists, which, in the int of enlargement, would have to be destroyed. The litional cost of these joists would probably amount to 00, but this provision for a future contingency would ure the saving of at least  $\pounds400$ , to say nothing of the nomy and convenience of not having to disturb the ients occupying the first floor, during the progress of the rk.

The mode of enlargement has been unanimously approved by the Committee, and they confidently recommend for the adoption of the Court the plans now presented for carrying out this work, and request the authority of the Court to enable them to proceed with it without any further delay.

For the Committee,

G. P. LOWTHER, Chairman.

## TWELFTH

## ANNUAL REPORT

#### OF THE

## MEDICAL SUPERINTENDENT.

The Medical Superintendent begs to submit his Twelfth Twelfth Annual Report to the Committee of Visitors, Annual Report. as follows :---

The numbers admitted during the year have Numbers amounted to 123; as many as 30 of these being Admissions. This number, which shews a prore-admissions. gressive increase, would no doubt have been still higher had not the Committee of Visitors, in July last, adopted a resolution to the effect "that in the present crowded state of the Asylum, female patients should not be received except under very urgent circumstances." This notice was accordingly sent to the Clerks of the several Unions, who were directed to instruct the Relieving Officers to write before bringing patients to the Asylum. It will be satisfactory to the Justices and Ratepayers to learn that it has not been found necessary to refuse admission to any serious case, though there can be no doubt that several chronic and imbecile patients have been retained, either in the Unionhouses or with their friends, who, under other circumstances, would have swelled the numbers of incurable cases already in the Asylum.

Average Numbers. Notwithstanding the precautionary measures referred to, the numbers admitted somewhat exceed those of any previous year; whilst the average numbers under care, in part owing to the low rate of mortality, have considerably increased, viz., from 351.2 to 372. Of these last, 149.7 are men, and 222.3 women. The numbers at present in the Asylum are 379, viz., 153 men and 226 women; numbers which, as regards the female department, imply a considerable and increased degree of crowding in the dormitories.

Discharges and Recoveries.

During the year 68 patients have been discharged as recovered, and 9 as relieved. This is a high proportion, and higher than in any year since the Asylum was opened; the recoveries being at the rate of 55.3 per cent of the admissions; the mean rate for the ten previous years being 42.4 per cent. Thirteen of the whole number were discharged on trial, for periods of two months each. Of these two were brought back to the Asylum before the expiration of the time of trial. Four were removed not improved: three of these were transferred to the Asylums for Counties to Unions in which they were chargeable, and one was removed at the request of relatives, under the provisions of the Statute, 16 & 17 Vict., c. 97, s. 81.

" Criminal Lunatics." There are at present six male and two female "criminal lunatics" under care. One of the latter was admitted in February, from the gaol at Salisbury, under a warrant of the Secretary of State, she having been "found insane before trial," on a charge of "maliciously wounding" a little girl, her niece. One man was admitted from the same gaol, on the like authority, having been "found insane before trial," on a charge of "burglary." This last case has been one of some doubt and difficulty, in connection with the probability of his feigning insanity in order to evade conviction.\* He escaped from the Asylum during the night of the 14th December, as described further on.

The general health of the inmates has been good, General and no epidemic disorder has prevailed. There have been only 29 deaths, viz., 13 of men and 16 of women. Of the whole number, 13 were persons of 60, and 8 of these 70, years and upwards; one being 80, and another 82 years of age. The mortality for the year has been at the low rate of 7.8 per cent.; whilst the mean annual mortality since the opening of the Asylum stands at 11.4 per cent.

MEAN ANNUAL MORTALITY.	MALES.	FEMALES.	BOTH SEXES.
For the year 1862	8.7	7.2	7.8
For 11.35 years-1851-186%	2+14.9	8.7	11.4

\* The detection of feigned insanity is not so easy a matter as is sometimes supposed. The author of the most complete treatise on the Medical Jurisprudence of Insanity observes :- " Nothing requires a severer exercise of a physician's knowledge and tact than a case of simulated insanity. . . When required to examine and report upon cases of suspected simulation, the medical man cannot be too cautious in arriving at his final decision. . . Ample time should be demanded for this purpose, and unless it be granted, the physician would be justified in declining altogether the duty assigned him. . . Again we caution the practitioner not to be in haste to form his opinion, but to wait long and patiently for opportunities that may shed new light on the difficulties before him."-Ray's Medical Jurisprudence of Insanity, chap. 15 .- Simulated Insanity.

+ Viz., from the opening of the Asylum, Sept. 19th, 1851, to the end of the year 1862.

Health.

Causes of

Rather more than one-half, or 16 of the deaths, Death. have resulted from diseases of the Brain and Nervous system, viz., from apoplexy, 3; paralysis, 1; general paresis, 5; epilepsy, 5; and softening of the brain, 2. There is nothing particular to notice in the other deaths, with the exception of that of a partially imbecile man, 65 years of age, who accidentally slipped on a stone step, and falling forwards ruptured the liver, producing, as shewn by post mortem examination, internal hæmorrhage, from which he sank at the end of three hours. This was the only case calling for a Coroner's inquest. The verdict of the Jury was "Accidental Death."

Escapes.

Inquest.

Eight escapes have been reported. Of this number, two were of the same patient; and three of three other patients, all of whom have in former years made similar attempts. Three were retaken within three hours, and three others in periods varying from one to three days. In none of these cases did injury arise either to themselves or others, nor, with one exception, was any blame attributable to the attendants or servants. In the case referred to, some neglect being proved on the part of the workman in whose charge the patient had been, a fine of 7s. 4d., the cost of recapture, was exacted. Another case was that of a patient who escaped at the close of last year, and who has not been retaken or heard of. He was, however, nearly convalescent, and being an able-bodied man, he probably succeeded in reaching South Wales, where he had been formerly employed. Another escape, as yet permanent, is that of the "criminal lunatic" already referred to. Great cunning was

displayed by this man in effecting his object. On Sunday evening the 14th of December he made up his bed with pillows as if himself were there; the attendant, before locking his door, said "good night" as usual, but, as the patient was a sulky fellow, thought nothing of receiving no answer. He was not missed until the next morning, when it appeared that the lock of the outer door had been picked; his slippers were found in the airing court, where he had stopped to put on his strong shoes before climbing the wall. It is to be hoped that this man, who is an old offender against the laws, will not again succeed in imposing upon the authorities, as there is great reason to believe he did both before and since his removal to the Asylum.

During the past year the "Act to amend the law "Lunacy relating to Lunatics," xxv and xxvi Vict., c. 111, has received the assent of the legislature. The particulars Act, 1862." in which this act affects those County Asylums in which, like our own, private patients are not received, are neither numerous nor very important. Some obvious defects have been corrected, and several minor amendments of an administrative character have been The act introduces no sweeping changes, and, made. on the whole, appears to be a wise and judicious As has been well observed legislative measure. "like all amendment acts, it is neither systematic nor complete; though one which, we trust, will prevent the necessity for any meddling with lunacy law for some time to come." An able commentary on this act will be found in the "Journal of Mental Science" for October 1862, p. 431.

Amendment

Additional

The crowded state of the female department Ward. renders it very desirable that the new wards now in course of erection, which were commenced in May last, should be completed as soon as possible. The delay which has already occurred is much to be regretted, as it is evident the summer of 1863 must be far advanced before the new building can be fit for occupation. In the meantime, it is a cause for thankfulness that there has been a diminution of bodily disease in the establishment rather than the reverse. It is a further source of satisfaction that the thorough ventilation and sanitary state of the building has been repeatedly noticed by the Visiting Magistrates, as well as by the Commissioners in Lunacy.

Sewage.

The subject of the proper disposal of the sewage has engaged the close attention of successive meetings of the Committee of Visitors and of the House The discharge of the sewage into the Committee. neighbouring brook had led to complaints, the occasion for which it was felt should, if possible, be removed. A plan which has been adopted elsewhere, for discharging the contents of the sewers on a part of the farm, to be laid down in grass, has been favorably entertained by the Visitors. It has been proposed to pump up the liquid by a water wheel, turned by a spring conveniently situated within the limits of the farm. The execution of this plan has been suspended, but only for the present, in consequence of some doubt being entertained as to the sufficiency of the water power. In the meantime there is no resource but to carry out as sedulously as possible the filtration and deodorisation of the sewage in the tanks already erected for this purpose.

Further additions have been made to the furni- Decoration ture and fittings of the wards. The Committee have and Furnot, however, thought it right, in this particular, to of Wards. acquiesce in the somewhat extensive suggestions which have been made on this subject. In the Asylums for the Metropolitan, Home, and Manufacturing counties, a large proportion of the patients are from the class of skilled and less educated artizans, and include more or persons who have occupied somewhat many superior stations, and been accustomed to a style of domestic arrangement unknown in the cottages of labourers in agricultural counties, such as Wiltshire. Whilst, therefore, providing everything that can really conduce to the health and comfort of the patients, it appears to be in the exercise of a sound discretion to refrain from habituating them to superfluities, which could only tend to excite dissatisfaction with their own homes. Among other objects introduced into the wards are some illuminated Scripture texts, published by the National Society, which, whilst enlivening the walls by their bright colours, may not be without a good moral influence on the minds of certain of the patients. Other texts, appropriate to the place, painted on zinc, were in the previous year placed in the chapel, by which its blank walls have been much relieved.

The patients have enjoyed their usual recreations. Recreations. The celebration of New Year's Day, with which it has been customary to close the festivities of Christmas, has been more than usually successful. Through the exertions of the female attendants, the spacious ward in which the party, numbering nearly 300, assembled, was

&c.

very tastefully decorated with evergreens and paper flowers. A Christmas tree, its branches loaded with toys, ornaments and articles of fancy work, almost entirely of home manufacture, when wheeled into the midst of the company, pleased all, and surprised many who had not been in the secret of its preparation, which had afforded interest and occupation for many weeks to the inmates of the principal ward for the excited patients.\*

Books and Periodicals.

One important means in the treatment of the insane consists in the provision of suitable books for their perusal. About two years since, an addition was made to the Asylum Library, by the purchase of eighty volumes of useful and entertaining works from the Society for the Diffusion of Pure Literature, which, through the kind recommendation of a nobleman of the county, one of the Patrons of that Society, were supplied at half-price. The number of patients, however, who can be induced to avail themselves of the books thus provided is not very large, as might indeed be expected in a county in which primary education is still only partially diffused among the adult labouring population. Still some of the patients are great readers, and to these books are almost a necessity, and the attendants, of course, share the advantage, and require such a resource, especially during the winter evenings. There are many of the patients, who can read and write a little, who prefer to read in the illustrated and other periodicals which are regularly

<sup>\*</sup> The different objects and curiosities on the Tree were disposed of, and the sum of £3 was realised for contribution to the fund for the relief of the distress in Lancashire.

supplied to them; and on the Sundays many confine themselves to the Bibles and Prayer-books which are furnished to each ward. The following is a list of the periodicals at present in circulation :- Illustrated News, Illustrated Times, Penny Illustrated Paper, New Penny Magazine, Sixpenny Magazine, Family Friend,

Chambers' Journal, Chambers' Book of Days, Good Words (2 copies), Leisure Hour (2 copies), Sunday at Home (2 copies), British Workman (2 copies), The Cottager, The Children's Friend, &c. These publications, with a certain number of volumes from the Library, are each week distributed to the several wards, so as to circulate through the house, and provide a change of reading for each Sunday and for the following week.

During the year, there have been but few changes amongst the attendants and servants, whose conduct and Servants. has been generally satisfactory.

Attendants

The weekly charge remains at 7s. 7d., which, at Weekly Charge. the present price of provisions, will, it is thought, suffice to cover the weekly cost.

In conclusion, the Medical Superintendent has only to express his obligation to the Committee of Visitors for the continuance of their support and encouragement in the discharge of the duties of his office. Conclusion.

(Signed)

JOHN THURNAM, M.D.

## REPORT

#### OF THE

## COMMISSIONERS IN LUNACY.

## "WILTS COUNTY LUNATIC ASYLUM, 19th June, 1862.

"We have officially visited this Asylum, and personally examined every patient. There are now 152 men and 223 women in the building, and two women, who are still retained on the books, are absent on leave.

"There are vacancies for two or three male patients, but the women's wards are quite full—many of the sleeping rooms being overcrowded.

"Workmen are now engaged in the construction of the new wards on the female side, but it is not expected that they will be ready for occupation before the month of March next.

"The following changes have taken place since our last visit :---

	MALES.	FEMALES.	TOTAL.
Admitted	43	45	88
Discharged	22	20	42
Died	14	14	28
Escaped	1	0	1

"Of the patients who were discharged, 33 were recovered.

"The deaths all appear to have arisen from ordinary auses, and no epidemic or preventible disease has occurred.

"We found the patients generally free from excitement; ix of the women were locked in their rooms, but all of them vere in bed.

"No man was secluded, and a reference to the Medical ournal shows that seclusion is principally employed with the emale patients. Instrumental resraint is never used.

"The general routine of the patients' lives is the same s has been reported on former occasions, and we have been urnished with the following table of the average numbers 'ho are employed, viz, :---

#### MEN.

Farm and Garden	39
Mason and Carpenters	5
Engine House, &c	3
House work	20
Laundry	4
Shoemakers and Tailors	7
Office and Store	2
WOMEN.	
House work	45
Laundry	37
Needlework	
T 1	000
Total employed	202

Il the clothes and shoes are made by the patients, and all e washing is done by them, superintended by one paid laundry maid, assisted only on two days in the week by another paid servant.

"The attendance at Chapel is the same as usual.

"With the exception of two or three patients of each sex, who were dressed in strong canvas clothing, the dresses were very good and clean. The bedding also was in excellent order.

"All the wards were clean, properly ventilated, and in the best order. We still think, however, that they are deficient in ordinary furniture, and greatly wanting in means for personal washing.

"According to the ward-returns, it appears that last night twelve beds on the men's side, and sixteen on the women's, were either wetted or dirtied. There is no regular night-attendance in this establishment.

"The Case Book, which we have examined, is kept in a most creditable manner, and the fullest details are accurately recorded.

"We were glad to find that the patients generally spoke well of their treatment. And we have again to record our opinion that the general state of the Asylum reflects great credit on Dr. Thurnam and those who with him are engaged in its management.

" (Signed) W. G. CAMPBELL, Commissioners S. GASKELL, in Lunacy."
