REPORT.

*North-Riding Lunatic Asylum, Clifton, York,
24th December, 1868.*

TWENTY-SECOND ANNUAL REPORT OF THE COMMITTEE OF VISITORS.

TO HER MAJESTY'S JUSTICES OF THE PEACE FOR THE NORTH
RIDING OF YORKSHIRE IN GENERAL QUARTER SESSIONS
ASSEMBLED.

In presenting their Annual Report, the Committee beg to call the attention of the Justices to the state of general efficiency of the Asylum, and also the condition of the building.

It is now twenty-three years since the Asylum was opened, and the state of various parts of the stone work is likely to cause some little anxiety and expense in the work of restoring; the weather has acted on the porous nature of the material, and the chimney stacks are in a somewhat dangerous condition; careful inspection will be made, and a due regard to economy will be considered in the measures proposed as remedial.

The new kitchen and offices are nearly ready for occupation, and the Committee are satisfied that the working arrangements will be materially improved when the apparatus is in operation; a detailed report of work and expenditure will be laid before the Easter Sessions, in the meantime the Committee are happy in announcing that the whole cost will be borne without entrenching on the County Rates.

The various dormitories and single rooms have been materially improved by warming with hot water; this is found to answer extremely well, and the comfort of the inmates improved correspondingly; the expense of this has also been met by the Committee, without asking for any grant from Sessions.

For the better information of the Justices, the Committee would here append a short statement of the various works undertaken by them this year, without charge upon the County Rate, also the amount already expended and further liabilities for the same, as far as in their power to do so, without the certificate of the Architect on completion.

WORKS ORDERED.

	£.	s.	d.
New Kitchen, Bakehouse, Larder, and Offices, with			
New Dormitory* for 19 beds	1500	0	0
* This was estimated at an additional outlay of £35.			
Chimney Shafts for hot water boilers	60	0	0
Cooking Apparatus, complete	520	0	0
Hot Water Apparatus	308	0	0
	<u>£2388</u>	<u>0</u>	<u>0</u>

AMOUNTS ALREADY PAID.

	£.	s.	d.
To Builders, on certificate of Architect	1200	0	0
„ Hot Water Apparatus	308	0	0
„ First instalment.—Cooking Apparatus as per contract	260	0	0
	<u>£1768</u>	<u>0</u>	<u>0</u>

leaving a liability of £620, towards which the Committee have £1000 in hand.

The Committee would call attention to their having contracted with Messrs. Benham for the cooking apparatus, at the apparently large sum of £520, it being clear to them that a large economy in working would be the result, as the whole of the cooking and baking would be done by one fire, whereas at the present time no less than four are in constant use.

From the fearful damage done in the early part of the year by the heavy floods, it was found necessary to improve the strength of the bank skirting the Ings. Various scientific opinions were taken on the subject, and the result was, that the Committee decided on greatly widening it at the base, making the slope more gradual, and raising the whole about 18 inches; at present this seems to be successful; the expense incurred has not exceeded £50, whereas it threatened at one time to amount to nearly £300, in accordance with the recommendation of an eminent Engineer, who was consulted.

The arrangement mentioned in last year's Report, as to sending harmless and incurable Imbeciles to the various Workhouses, was not found to answer, most of the cases then sent out having been again returned to the Asylum; still, with judicious management, a large number of out County cases were for a period admitted from the West Riding, and now that these have been accommodated at Wakefield, the vacant beds have been immediately filled by the admission of cases from the Metropolitan County of Middlesex, a measure that will of itself explain the means of income that has enabled the Committee to meet the extraordinary expenditure incurred.

The Court is reminded that the election of the Committee of Visitors for 1869 takes place at these Sessions.

The Annual Report of the Superintendent, and the copy of Accounts, will be presented as usual at the Easter Sessions.

JOHN V. B. JOHNSTONE,

CHAIRMAN.

North Riding Lunatic Asylum, Clifton, York
25th March, 1869.

TO HER MAJESTY'S JUSTICES OF THE PEACE FOR THE NORTH
RIDING OF YORKSHIRE IN GENERAL QUARTER SESSIONS
ASSEMBLED.

The Committee of Visitors, on presenting the Annual Report of their Medical Superintendent, cannot refrain from expressing their deep sense of the loss which the County at large and the North Riding Asylum in particular have sustained by the lamented death of SIR JOHN JOHNSTONE, BART., their Chairman.

He was a member of the Committee of Visitors from the foundation of the Institution, and its present satisfactory state is in a great measure due to the constant care and attention which he bestowed on its interests.

Untimely as was his death, he had lived long enough to see the Asylum placed in such a position as to make the Chairmanship a far easier task to his successors than it had been to himself; but still it will not be easy to find one who will so completely possess at the same time the personal good-will and esteem of the Officers of the Asylum and the confidence of the Ratepayers of the Riding.

BASILL T. WOODE,
CHAIRMAN.

REPORT OF COMMISSIONERS IN LUNACY.

*North Riding Asylum,
27th January, 1868.*

On Friday last we inspected the Asylum in its several departments, and with the exception of two women absent on trial, saw all the Patients then on the Books. We have this day completed our enquiries.

	Males.	Females.	Total.

	—	—	—

The vacant beds on the day of our first visit were only five in number, viz., two in the Male Division and three in the Female. The latter will to-night be occupied by Patients received this morning.

With the following exceptions, the Deaths since the last visit were from ordinary causes.

The exceptions were in the cases of three suicides, one of a Male Patient, who escaped on his way to the chapel, and laid himself down before a train on the railway; of another by strangulation in a single room; and of a woman by hanging in a bath room.

The particulars were duly reported in each case, and the two latter have been the subject of recent correspondence with the Board. The single room referred to, of which the double sliding shutter is of an unsafe construction, has not since been occupied and no longer used for sleeping. The gas bracket from which the woman was found suspended and the other brackets of the same kind, in bath-rooms, sculleries, and water closets, are in course of being removed, and their place supplied by enclosed jets over the doors, giving light on both sides.

We saw some completed, and which appeared to be well constructed, in the Male Division.

An inquest was also held in the case of a Male Patient, who died of apoplexy.

The sanitary state of the Asylum is good, the patients last registered as under medical treatment being 6 on the Male side and 5 on the Female.

According to the Medical Journal since the last visit, the instances of seclusion have been 25 in each division, and applicable, respectively, to 6 men and 2 women.

It has been considered necessary, in the cases of two Patients (one of each sex) of determined suicidal propensities, to resort at night to the use of the strait jacket. The man has been so restrained for about six weeks, and the woman during the last three nights. The latter on the day before our first visit, twice attempted to strangle herself, first in a water-closet, and afterwards in a dormitory, wherein the night nurse was sitting.

We have nothing especial to report in reference to Divine Service, and can only repeat the hope that suitable provision will shortly be made for its celebration in a detached chapel.

The Records of Employment shew the following results:—

<i>Males.</i>		<i>Females.</i>	
Farm and Garden	. 52	Needlework and Knitting	110
Workshops	. 33	Laundry Department	. 60
Wards and Offices	. 55	Kitchen & Domestic Work	38
	—		—
Total employed	. 140	Total employed	. 208
	—		—

The arrangements for out-door exercise are very satisfactory. About 40 of the men and 50 of the women walk out daily in fine weather, and on Sundays about 70 men and 50 women walk in the country in the morning, and the same numbers in the afternoon, making 240 in all.

The Returns of the Night Attendants shew that the numbers of wet beds average from 4 to 6 in the Male, and 6 to 8 in the Female divisions.

We are glad to report that since our last visit an efficient Head Attendant has been appointed on the Male side.

With a single exception, in the No. 3 Female Ward, the Patients at the time of our visit were most orderly, and their personal condition, as to clothing and otherwise, was very satisfactory, and creditable to those immediately responsible for their supervision and care.

The Day Rooms, Corridors, and Dormitories were clean and suitably furnished and decorated. The Beds and Bedding were in the best order, and the atmosphere throughout was untainted.

The temperature of some of the Wards was much too low, and we learned with satisfaction that this serious defect has engaged the special attention of the Committee of Visitors, and that the result has been a resolution forthwith to introduce throughout the Asylum a circulating hot water system, by means of which the temperature of the galleries, associated dormitories, and single rooms, wherein no provision for warming at present exists, may be regulated.

Amongst other improvements completed or in progress since the last visit we have to report the following :—

1. Painting and papering the corridors and day rooms, and colouring the upper portions of the walls of the dormitories and single rooms, and generally of the interior.

2. Hand rails to staircases, already provided in the Male division.

3. A Male infirmary under the charge of a married couple, and containing a good dormitory with dwarf screens, and 30 beds, also 4 single sleeping rooms.

4. No. 4 Ward in each Division rendered more airy and cheerful by throwing open the arches, hitherto closed up by wooden partitions.

5. New Baths, better arranged and of a superior kind, which can be filled in one minute and emptied in 20 seconds. Shower Baths done away with.

6. A new shop in the basement for tailors, who previously worked in the Wards.

7. The introduction of comfortable reclining chairs for epileptics, fitted with canvas seats attached to rods, which when soiled can be removed and replaced.

8. The removal of the old fixed open commodes from the dormitories.

9. Earth closets about to be tried on a large scale, some already prepared for use.

10. Doors at the foot of the stairs leading to the dormitories, to which patients formerly had access.

11. An increased supply of washstands in dormitories and single rooms.

12. The enlargement of the Eastern Male Airing Court by the removal further back of the north boundary wall, and the construction of some large earth closets, accessible from the interior and the court.

The erection of new Kitchen and Offices has been sanctioned by the Committee, and Plans for the same will shortly be submitted to our Board. The existing kitchen, &c., are quite inadequate and inconvenient.

There are now frequent Concerts, Lectures and Readings. Dr. Christie has also organized a brass band, and a singing class and choir for the Chapel.

The game of croquet has recently been introduced and contributes much to the amusement of the patients.

The Case Books and other Medical Records are now properly kept.

We, this day, made further enquiry respecting the fracture of an arm sustained by a Female Patient, to whose case our attention had been directed during our first visit. The circumstances had been reported by the nurse (the only one at the time in the Ward, most of the Patients being at Chapel) as having been occasioned by a fall during a fit of excitement, and the fact was not disclosed, until elicited by us, that the nurse had tied her by a handkerchief round her waist to a heavy chair, with which she ran across the room, and which caused her to trip up and fall.

In course of our visits we had satisfactory proofs of Dr. Christie's active management and the progressive improvement of the Asylum.

R. W. LUTWIDGE, }
ROBERT NAIRNE, } *Commissioners in Lunacy.*

TWENTY-SECOND ANNUAL REPORT OF THE MEDICAL SUPERINTENDENT.

To the Committee of Visitors :

MY LORDS AND GENTLEMEN,—During the year 1868 the numbers under treatment in the Asylum were as follows :

Males . . .	337
Females . . .	348
	685

The Admissions have been	86 Males	}	190
" "	104 Females		
Discharges	38 Males	}	114
" "	76 Females		
Deaths	21 Males	}	44
" "	23 Females		
			} 158

The form of disease was classified as follows in those admitted :—

	Males.	Females.	Total.
Mania	23	25	48
Do. Acute	10	8	18
Do. Recurrent	1	0	1
Do. Epileptic	4	5	9
Do. Senile	1	0	1
Do. Puerperal	0	4	4
Do. Chronic	2	1	3
Melancholia	16	23	39
Do. with excitement	1	0	1
Dementia	15	19	34
Do. Acute	4	2	6
Do. Senile	5	1	6
Do. Epileptic	0	6	6
General Paresis	4	1	5
Idiocy	0	7	7
Moral Insanity	0	2	2
	86	104	190

The social position of the patients has been extremely various, and I have introduced another table setting forth, as far as I can, the result of my enquiry, deeming it an important matter in the question of tendency to disease; of these 41·5 per cent. were married, being 44·1 per cent. males and 39·5 per cent. females.

The tables appended fully set forth the historical record as to admissions, recoveries, deaths, &c., and from them it will be seen that the past year has been eventful as regards the large increase of usefulness the Asylum has afforded as a shelter to the afflicted; in no previous year, has the average of those resident been so large, neither has the total number discharged, cured, occupied a higher position.

In calling attention to the great increase in the number of those admitted during the year it must be borne in mind that they belong as follows: to the

	Males.	Females.	Total.
North Riding	48	27	75
East Riding	18	13	31
Private	2	4	6
Out-County	18	60	78
	—	—	—
Total	86	104	190
	—	—	—

While of the total resident in the Asylum, on the 1st of January, 1869, they were as follows:—

	Males.	Females.	Total.
North Riding	143	120	263
East Riding	100	78	178
Private	5	7	12
Out-County	30	43	73
	—	—	—
Total	278	248	526
	—	—	—

It will thus be seen that during the year a small increase has taken place in the number from our own Riding (though still in number below the year 1867), and of so small a per-centage that alarm need not be created, more especially as in the course of a few years so great a decrease in the number resident must of necessity arise by the removal of the East Riding Patients. The question of the increase of insanity still occupies a prominent position, and as far as reliable data have been published, it does not appear to be demon-

strated to be the case; that in some counties a great increase in the number of the insane has taken place is beyond a doubt, but it must be borne in mind that a corresponding increase in population has also taken place, and until the effect of recent legislation in bringing to the surface all the hidden cases, and also the increased longevity that has certainly arisen with the more humane treatment of the insane can be properly brought forward, with statistics of a non-disputable character, I am at a loss to see any cause for despair on this point.

The per-centage of cures in comparison with the last few years will at first sight seem dispiriting, but if we take into consideration the large number of Chronic incurables that have been admitted from out-county places during the year, the result will compare with any former period. During the last two months of the year there were admitted no less than 31 Chronic insane from the County of Middlesex; deducting these from the admissions, it shews a per-centage of cures of 46 per cent. on the Male admissions, and 63·8 per cent. on the Female, with a total of 53·4 per cent., a result that will bear a favourable contrast with any year since the opening of the Asylum.

Notwithstanding the oft told tale of the desirability of early treatment in mental disease the delay that often takes place in calling in the aid of the skilled Physician is a source of great evil. From table 7 it will be observed that no less than 26·3 per cent. of the cases out of a total of 190 were of longer duration than one year, while only 35·2 per cent. were brought under treatment within the first three months of the detection of the disease; it is to be regretted that friends do not earlier seek the Asylum for Patients, and which would probably prevent in a great degree the large amount of Chronic cases that exist in all the Wards. I cannot call attention too strongly to this evil, and it appears to me the opposition to early Asylum treatment may be attributed to the fallacy that insanity is a fact that anyone can detect, whereas, in truth, the early stages are only to be determined by the experienced, so gradual are the symptoms in their first approach; therefore slight vagaries of conduct are not thought of sufficient import, and valuable time is lost; this unbelief of "disease" thus causes Patients to be kept from treatment till the malady very often becomes permanent. Instead of looking on mental disorder exactly in the same way as so called bodily disease, friends will look on it as something so opposed to humanity as to require

the utmost secrecy and avoidance of observation. The metaphysical test of insanity is one root to a great degree of this evil; as though the subtleties of the organization of the brain were to be observed by every one, and years of study which are virtually required thrown over; and again to some extent is to be blamed the fashion that has existed to look upon the specialist in insanity as hardly above a simple keeper of the insane, instead of the Physician to the mentally afflicted; it may be this has arisen from the Profession walking too blindly in the beaten path of empiricism, and thus virtually reducing the cure of Patients to one of so many months of confinement.

Although the advance in the pathological evidence of disease of the brain has perhaps not been quite so rapid as in the other organs, yet with the modern means of scientific research I apprehend we may yet look forward to positive facts ere long being brought to light. In the meantime how much may be done by therapeutics properly regulated according to each individual case is evident; one day we find opium extolled, then digitalis, and then again bromides of potassium, as though either of these useful drugs was the one thing wanting for cure. Without doubt each is useful in the hands of the experienced, and it is patent that many cures may be effected by them; still, without care and judgement how powerless they are.

The death rate shews a great reduction, and this notwithstanding the anxious year caused from sickness that has just passed. In the early summer enteric fever prostrated a large number of the inmates; but happily only one death was caused by it, and this a deformed and demented man; no exciting cause could be detected, the drainage of the Asylum appeared good and the water supply pure; in fact, the Wards had been rendered better by the abolishing of several water closets that formerly existed and opened into them; no sooner had this evil been eradicated than unfortunately small pox broke out; the first attacked was an Attendant, followed altogether by 13 other cases; measures were immediately taken to prevent its spread; a separate hospital was fitted up in one of the cottages on the estate and a large proportion of the patients and servants vaccinated; one death took place in a male patient who had been weak and sinking for some time; the eruption in this case was suppressed, and he rapidly sank. In the latter of these Epidemics the Female side was free, thus shewing the importance of hygienic measures in zymotic diseases. It should be mentioned that at the time of both these outbreaks the city of York was visited with the same diseases.

No suicide has occurred, and there has not been any occasion for an inquest.

The improvement in the Male Airing Court has been a great success, and the result is evidenced in that no escape has occurred from it, whereas, before the alteration, patients were constantly getting over the iron railing.

Various improvements have been carried out in the buildings, and the warming by the hot water apparatus during the winter has not only tended to comfort as regards the additional warmth, but in promoting contentment and quiet among the inmates. The new Kitchen and Cooking Apparatus are not yet in complete working order, but it is patent that a great saving will be effected, while the working of the establishment will be rendered more complete and easy of accomplishment.

An experiment on an extensive though rude scale has been in operation for some months by the use of the Earth Closet in place of the old Water Apparatus. I can confidently say that not only is it much sweeter but the use in the farm and garden will amply repay the slight trouble occasioned by a daily attention; it is proposed now to improve on the system and carry out the details more fully; arrangements are in progress so as to ensure a good result: were the Asylum built on an elevation so that irrigation could be pursued, the old water closet system would, I think, be desirable, as from the sewage becoming liquid it could be easier and more economically used on the ground.

The various amusements have been carried out with the same happy results as formerly.

The Female nursing in the Male Infirmary has proved the greatest boon, advantage being taken to place the infirm and aged under her care.

A Ward has been fitted up on the Female side as an Infirmary, and the result of congregating the sick instead of allowing them, as it were, to take their chance of nursing in the various Wards, has been in a high degree encouraging.

An old and valued servant having become incapable from failing sight and increasing years, the Justices in Quarter Sessions have liberally granted him a pension, after being employed since the opening of the Asylum.

Before concluding, I must refer to the recent and very sudden loss sustained by me in the valuable help always afforded by the late

Chairman of the Committee, Sir J. V. B. Johnstone, Bart. Ever ready with his advice and counsel, it will be a difficult task to fill the blank created; genial and kind to those with whom he was associated, his friendly greeting will be no more, while as a Member of the Committee from the opening of the Asylum its business and interest were his first consideration and his constant anxiety; to his memory I take this opportunity of paying a parting tribute.

Thanking the various Officers and Servants for the able help afforded me,

I beg to subscribe myself,

My Lords and Gentlemen,

Your obliged and faithful Servant,

THOS. B. CHRISTIE, M. D.
