THE TWENTY-FIRST
ANNUAL REPORT
 OF THE
VISITING JUSTICES
 OF THE
Joint Counties' Lunatic Asylum, Abergavenny,
 AND
THE THIRD REPORT
Under the New Union of the Three Counties,
FOR THE YEAR 1873.

THE Asylum has been laboriously and skilfully administered by Dr. M'CULLOUGH during the past year, with the able assistance of Dr. GLENDINNING, and has met with the usual high commendation from the Commissioners in Lunacy. The number of patients has increased by 3; there being an increase of 8 on the male side, and a decrease of 5 on the female side. The male patients are at this time 6 in excess of the accommodation, while there are 15 vacant beds on the female side. The present total number in the House is 199 males and 230

females. There are, besides, 28 male patients and 1 female boarded out in other Asylums; and the Committee have entered into a further contract with the Visitors of the Hereford Asylum, to receive 50 more patients, if necessary, at a weekly cost of 13/6 for males and 13/- for females.

The additions and improvements approved by the several Quarter Sessions of the Three Counties will probably render the Asylum sufficient and complete on the male side for many years to come; and there is at this time room for 15 patients on the female side.

The Visitors have received notice from the Town Commissioners of Abergavenny not to let the sewage of the Asylum flow into the River Kenvy, the river being rendered very offensive as it passes through the town of Abergavenny.

The Visitors have anxiously considered the best means, and the most economical method of carrying out this reasonable requirement. They find that the most practicable plan is that of utilizing the sewage in the increased production of garden produce, and general distribution over the land. But the land available for this purpose is very limited. The operation can only be carried on below the sewage eject, which is at the lowest foundation of the buildings; and the land belonging to the Asylum below that level is small in quantity.

It will be very advantageous to obtain, in addition, half-an-acre and 26 perches of land lying at a lower level, between the Asylum land and the river Kenvy. There is a present opportunity of purchasing this strip of land, together with another rather smaller piece, which notches into the land of the Asylum, an offer being made to them at £250; and the Committee of Visitors recommend this purchase to the several Quarter Sessions as affording the best means of complying with the order of the Local Sanitary Authority, which is imperative. The apportionment of that amount will be—

To the County of Monmouth...	£188	10	10
„ „ Brecon	42	14	2
„ „ Radnor	18	15	0

The only other plan of dealing with the sewage which offers itself in alternative with utilizing it on the land below the level of the eject, is that of a pump worked by a steam engine, to be acquired at considerable expense, and superintended by costly skilled labour, to raise the sewerage to the level of the high ground through iron pipes, which the Committee find would be far more expensive and of very doubtful success.

S. R. BOSANQUET,

Chairman.

Committee Room, Asylum,

24th December, 1873.

Commissioners' Report.

*Joint Counties' Asylum, Abergavenny,
25th and 26th November, 1873.*

SINCE the last visit, rather more than thirteen months ago, 79 men, and 52 women have been admitted, and 29 men, and 21 women have been discharged. The deaths have amounted to 58—28 of the male, and 30 of the female sex. These changes leave 429 patients on the books, of whom 197 are males, and 232 are females, and there are besides 28 males at the Hereford Asylum, and 1 woman at Fisherton House, also chargeable to the Counties in Union. The numbers in the house leave fifteen vacant beds in the female division, but are four in excess of the accommodation on the other side. This continued pressure for male patients has been under the consideration of the Committee of Visitors, who have directed plans for additions to be prepared, which, we understand, will shortly be submitted for the sanction of the Secretary of State.

We have, as usual, seen every patient in the course of our inspection, and have visited all the wards and offices — Except a little noisy talking amongst the women, the patients were very free from excitement, and as respects their clothing, and personal cleanliness, in a creditable state.

No one was secluded—As regards the employment of seclusion here, we find from the register, that since the last visit, 23 men and 26 women have been placed in seclusion, the former on 61, and the latter on 62 occasions. The duration has generally been for short periods, and of the 123 instances above adverted to, 87 were for less than three hours. No case of instrumental restraint is reported. There were yesterday, 15 men, and 21 women in bed, several sinking from paralysis and consumption, but others merely owing to epilepsy and excitement. The numbers under medical treatment are 21 of the male and 20 of the female sex.

During the year 1872 the mortality was, lower than usual, being at the rate of 8·4 per cent upon the average daily numbers resident. During the 13 months which have elapsed since our last visit, the death rate has been considerably higher, being at the rate of 12 per cent upon the daily average number resident. This is 2 per cent higher than the usual rate in County Asylums. No epidemic or exceptional disorders have however prevailed, but a

large number of aged people have died, chiefly from disease of the lungs and heart, the following are the assigned causes of death :—

	M.	F.	Total.
General Paralysis	11	2	13
Other Diseases of the Brain, including ordinary Paralysis and Apoplexy	4	4	8
Epilepsy	3	1	4
Exhaustion of Mania and Melancholia	1	1	2
Pulmonary Consumption, & other Diseases of the Lungs and Heart	5	15	20
Abdominal Diseases	2	4	6
Senile Decay	2	1	3
Other ordinary causes	0	2	2
	<hr/>	<hr/>	<hr/>
	28	30	58
	<hr/>	<hr/>	<hr/>

Post-mortem examinations were made in 37 cases only. Two Coroner's Inquests were held on the bodies of patients, whose deaths had been sudden, but they were found to be due to natural causes. The wards were clean and well-ventilated, and some of them have recently been painted and re-papered. The bedding was, as usual, in excellent order.

With respect to matters of structural arrangements, referred to in the last and preceding entries, we find that, although postponed for the present,

the Visitors have it in contemplation to provide a general bath-room, to improve and enlarge the sculleries and water-closets, and to substitute wood for the tile flooring where it still exists; but no steps have yet been taken for the enlargement of the Chapel, or the erection of a general dining-room. The supply of gas is now obtained from the town, and the Gas-works here will shortly be pulled down. The staircase, on the female side, alluded to as being dark, has been improved, and hand-rails have been fixed to the walls, both here and on other staircases, where wanting. Small hand-engines have been obtained for use in case of fire, and, as stated in the last Report, some of the stone division walls have been carried up above the roof, and iron doors have been inserted in them, so as to cut off, as far as possible, all communication. These improvements will no doubt diminish the risk; but still we cannot think that the arrangements to prevent the spread of flames are satisfactory, and again draw attention to the subject.

Divine Service is performed as usual: the numbers present last Sunday were 78 of the male, and 71 of the female sex—At the daily prayers only about 60 of both sexes are present.

The numbers usefully employed yesterday were 117 men and 135 women, and this is about the average.

The staff of Attendants and Nurses is adequate as regards numbers, and we have no complaints of their conduct from any of the inmates. We think it important that arrangements should be made so that Wards No. 5 and 6 in each division should never be left without two Attendants, as is now the case during the time the Attendants themselves are at dinner.

Associated amusements are given as before in the laundry day room, at which about 25 men and 50 women are usually present weekly. There are besides occasional readings and dramatic performances, attended by somewhat larger numbers, but of course much restricted for want of a proper room.

In the wards occupied by the more impulsive class of patients, the supply of books, papers, and games seems still to be very scanty. The introduction of such matters will, we are aware, cause some loss and destruction at first, but this will gradually cease, and the conduct of the inmates will ultimately be improved. A good musical box would prove a great source of amusement to this class.

As matters tending to the greater security of the patients, we recommend the provision of light wire fire guards, or high fenders, for protection, in the male wards, and especially in those where epileptics are placed. Also that locks should be fixed on the closet doors in the sculleries in which

brooms, fire-irons, and other articles are kept which might be used as dangerous missiles. We likewise suggest that a single room on each side should be padded up to about four feet from the ground, for the use of restless feeble patients suffering from paralysis or epilepsy.

Owing to the similarity of names, we had great difficulty in identifying some of the patients, and we have begged that in future the dates of admission be placed opposite the names in the ward lists.

Dr. M'CULLOUGH was absent for a short holiday, but we received all needful assistance and information from Dr. GLENDINNING.

Subject to such remarks as we have thought it our duty to make relative to various matters requiring structural alteration and improvement, we have to report that the Institution continues to be in a satisfactory state, and we are glad again to bear testimony to the judicious manner in which the comfort and welfare of the patients are attended to.

Since writing the above, we have had an opportunity of perusing the Report of the Committee of Visitors to the Michaelmas Quarter Sessions, and have learnt that the money has been granted for the various additions and improvements therein referred to.

W. G. CAMPBELL, } Commissioners
JOHN D. CLEATON, } in Lunacy.

REPORT
OF THE
MEDICAL SUPERINTENDENT
FOR THE YEAR 1873.

THE Medical Superintendent has the honour of submitting to the Committee of Visitors his Report for the year 1873, together with the usual Statistical Tables.

On the First of January last there remained under treatment in this Asylum 437 patients—202 males and 235 females. In addition to these, 17 males and 1 female were boarded in other Asylums, so that the number of patients chargeable to the Counties which form the present Union were at the commencement of the year, 455 ; viz., 219 males and 236 females. During the year there have been admitted 123, viz., 77 males and 46 females. This is considerably above the average. The total number under treatment during the year was 560, and the average number resident was 428, viz, 198 males and 230 females. The highest number resident at one time was 441, in March ; and the lowest, 418, in May. The number discharged, recovered, was 47,

viz., 28 males and 19 females, being in the proportion of 38.2 of the admissions. During the year 60 deaths have occurred, 29 of males and 31 of females; being in the proportion of 14 per cent. of the average number resident. This is more than 3 per cent. above the average, and higher than it has hitherto been, except in the years 1854 and 1855.

In my last Annual Report, in commenting on the low rate of mortality of the year 1872, I pointed out that the chief decrease was in diseases of the brain, and stated that owing to the absence of cold weather and other causes, a number of patients in an advanced stage of disease, lingered on until the end of the year, making an increased mortality in 1873 probable. On comparing Table V., shewing the causes of death for the two years, it will be seen that these anticipations were remarkably fulfilled. Diseases of the brain, which caused death in only 9 cases in 1872, were fatal in 28 in 1873, thus accounting for almost the entire difference in the mortality of the two years. The most remarkable item is that of paralysis of the insane. This hopeless form of disease, of which the supply in Asylums is pretty uniform, caused death in only three cases in 1872, and 15 in 1873. This only shows that in such matters trustworthy deductions from statistics can only be drawn from the comparison of long

periods. There was also some increase in diseases of the lungs, to which the changeable and ungenial weather of a considerable part of the year no doubt contributed. There was no contagious disease and no serious epidemic during the year.

At the beginning of the year, 17 male patients were boarded in the Hereford Asylum, under contract. During the year, 13 more were sent there, and 2 died, so that 28 now remain. During the year there has been an increase in the numbers chargeable to the three counties of 9 males, and a decrease of 8 females, being a net increase of one only. The total number chargeable is now 456, the number of males and females being exactly equal. At the end of the year there remained in this Asylum 200 males and 227 females—total 427. The males are 7 in excess of the sleeping accommodation, while there is room for 18 more females. This reduction in the number of females has enabled me to close for a time one of the villas occupied by female patients.

The most remarkable fact in the statistics of the last two years has been the increase in the proportion of male patients admitted, and as this has a very serious bearing on the nature and extent of our future accommodation, I shall endeavour to point out the causes. In all the County and Borough Asylums of England and Wales, the number of male

patients admitted is from 48 to 49 per cent. of the whole, being in about the same proportion as the male sex in the general population. Owing however to the higher rate of mortality amongst male patients, arising chiefly from the greater frequency of organic diseases of the brain, incurable female patients accumulate in Asylums, so that at the end of 1872 the female patients in all the County and Borough Asylums were more than 54 per cent. of the whole; or in the proportion of about 7 females to 6 males. Now at the end of 1870, before the separation from Herefordshire took effect, there were on the books of this Asylum, chargeable to the four counties then in union, 300 males and 349 females, and of these 148 males and 173 females were chargeable to Monmouthshire, in both instances the proportion being as nearly as possible 7 females to 6 males. At this time then the proportion of the sexes, either taking the four counties together or Monmouthshire alone, was the same as the average throughout England and Wales. When therefore we find that in the years 1871 and 1872 the admissions were, males 141, females 96, and at the end of 1873 the number of the sexes on the books of the Asylum were equal, the changes are so great as to require investigation.

In examining the returns of the proportions of the sexes in the different County Asylums of England

and Wales, we find that a few form exceptions to the general rule, the male patients being most numerous. These counties are Cumberland, Durham, Northumberland, Stafford, and Glamorgan. It is at once evident that these counties resemble Monmouthshire in the possession of coal fields, and generally of iron-works—industries which in times of activity attract large numbers of men from other districts. The Unions of Bedwelty, Newport, and Pontypool are those from which we chiefly receive those employed about coal-mines or iron-works; and from these three Unions 52 male patients were admitted during the past year, and only 21 females. I think therefore that to the great activity in the coal and iron trades during the last two years, we may without much hesitation assign the chief share in the increase of male admissions. I have no means of ascertaining what the increase in the population of Monmouthshire has been during the last two or three years, but it must have been many thousands. Whether this increase will continue must depend on the varying activity of the iron and coal trades.

The number of females admitted, though so much less than the males, was nearly up to the average, and with an average rate of mortality there would, instead of a decrease, have been a slight increase in the numbers remaining at the end of the year.

In the adjoining County of Glamorgan attention has been called to the fact that during the last six months of 1871 and the first three months of 1873, when the mines, and consequently the docks, were deserted on account of strikes, the admissions of male patients into the County Asylum fell to half their usual number, the female admissions being almost unaffected; and the natural inference was drawn that the diminution was due, as the decrease in drunkenness and crime no doubt was, to the want of money to spend in drink and debauchery. As these strikes affected Monmouthshire almost equally with Glamorganshire, and in the last strike especially, when the 60,000 men "out" were divided almost equally between the two counties, I have examined the male admissions into this Asylum during the two periods. In the former there was no marked difference in the admissions during the first and second halves of 1871, and in the latter there was, instead of a decrease, a considerable increase in the male admissions of the first three months of 1873, whether compared with the preceding three months, or the corresponding periods of previous years. My experience therefore does not bear out the inference that has been drawn in the other portion of the district affected by the strike, but is rather at variance with it. The causes of insanity are many and far-reaching, and in but comparatively few cases can an attack

be traced to a distinct recent cause. One case seemed clearly due to the strike. A man who had come a long distance, in the expectation of high wages, found he could get no employment, and having left a wife and children at home, depending on him, he became depressed, and was for some months in the Asylum.

In Table XVIII., showing the ages of the patients remaining on the books of the Asylum, the greater longevity of the female patients, to which I have previously adverted, is clearly shewn. Of 276 patients not exceeding fifty years of age, 156, or 56 per cent., are males, while of 180, who are upwards of fifty, only 72, or 40 per cent. are males.

The plea of insanity has been so often advanced to excuse the eccentricities of crime, that it has fallen into disrepute, and is apt to be received with incredulity. Those who are placed as I am know well that real insanity is, by no means rarely, punished as crime. The name of Kleptomania is apt to be received with a smile as a polite phrase for stealing. Yet there is a mania for stealing which is not a creation of the advocate or the physician, but a disease so very real that it always ends in death within a limited period. Such cases abound in all Asylums. The man who, after eating his dinner, tries to steal the plate, who conceals the coal-scuttle under his bed, and a dozen times a day appropriates

the same article, or, in default of anything better, fills his pockets with rubbish, is so constantly found to be suffering from hopeless organic disease of the brain, that in cases of doubt the mere existence of this habit is sufficient to decide the nature of the case. During the past year, a steady, industrious man had for several months shown such a change in his conduct that his neighbours considered him insane. He then stole a horse, and for this he was convicted, and after being imprisoned five or six months, being found insane, he was sent to the Asylum. On admission, the disease of the brain, which I have described, was so far advanced that I was satisfied it had lasted a very considerable time ; and he has since died from it. Other cases of the same kind have occurred to me.

In other forms of mental disease there is often greater difficulty. A patient who, while I write is dying from consumption, having become enraged with a pony with which he was working, killed it. His friends observed a change in him, and he was observed to be odd when committed to prison, but insanity did not become fully developed until several months after conviction. Had his passion been expended on a fellow creature, and he had incurred a capital sentence, there would have been abundant time for its being carried out before his insanity became sufficiently evident to save him.

I thank the Committee of Visitors for their continued kindness and aid in the discharge of my duties. From the various Officers I continue to receive the most active assistance, and I can state, with confidence, that at no time has the Institution been in a more efficient state.

D. M. M'CULLOUGH.

Chaplain's Report.

Joint Counties' Asylum,

January 15th, 1874.

MR. CHAIRMAN AND GENTLEMEN,—

I have the honour of submitting to you my Annual Report for the year 1873.

The Daily and Sunday Services have been held in the Chapel, as in former years, but nothing calling for particular remark has occurred in this department.

The Holy Communion has been administered as on former occasions, but to a diminished number of communicants, owing, it would seem, to the fact that so many of the permanent inmates have been taken to the new Asylum for Herefordshire.

Of those patients who died during the year, thirty-five have been buried in the Asylum Cemetery. Without the exercise of great care and skill in cutting the graves, there remains room for no more than from twelve to fifteen interments.

The wards have been periodically visited, and the wishes of the patients, when reasonable, duly attended to.

Books have been placed in the various book-cases, and when read, replaced by others. I am glad to find that the destruction among the books has not been so great since a proper lock has been placed on each case. This encourages me to suggest that an allowance for new books would be desirable, as those at present in circulation have been read by nearly all who care to read them.

I have to thank the Committee for an allowance of £5, for the purchase of Bibles, Testaments, and Prayer-books.

Singing, both to the class, and to persons separately, has been taught, as in former years

Dramatic performances, readings, and other recreations were got up during the season.

I am made to understand that the Commissioners, at their late visit, spoke of a musical box as desirable for the back wards. Several years ago, the Committee were pleased to vote the sum of £20 for the purchase of a portable barrel-organ; but such an instrument was not then to be got, though considerable effort was made to obtain one. A musical box could easily be procured, and would not cost very much.

The Commissioners in Lunacy, at Whitehall, demanded a return to be made of the religious persuasion of all the patients in the Asylum on the 1st of June last. The result was as follows:— Church of England, 182; Roman Catholics, 30; other denominations, 124; unknown, 90;—total, 426.

I have the honour to be,

Gentlemen,

Your obedient Servant,

W. GEO. DAVIES,

Chaplain.

To the Committee of Visitors.

	Uncooked Meat, 20 per Cent. allowed for Bone.				Meat.	Vegetables.	Bread.	Beer or Cider.	Bread.	Butter.	Tea.	Bread.	Cheese.	Beer or Cider.	
	M. F.	M. F.	M. F.	M. F.											M. F.
Sunday	8..7	1..1	5..5	1..1	5..5	1..1	8..7	1..1	8..7	1..1	1..1	2..2	1..1	1..1	
Monday	8..7	1..1	5..5	1..1	5..5	1..1	8..7	1..1	8..7	1..1	1..1	2..2	1..1	1..1	
Tuesday	8..7	1..1	3..3	1..1	3..3	1..1	8..7	1..1	8..7	1..1	1..1	2..2	1..1	1..1	
Wednesday	8..7	1..1	5..5	1..1	5..5	1..1	8..7	1..1	8..7	1..1	1..1	2..2	1..1	1..1	
Thursday	8..7	1..1	5..5	1..1	5..5	1..1	8..7	1..1	8..7	1..1	1..1	2..2	1..1	1..1	
Friday	8..7	1..1	5..5	1..1	5..5	1..1	8..7	1..1	8..7	1..1	1..1	2..2	1..1	1..1	
Saturday	8..7	1..1	3..3	1..1	3..3	1..1	8..7	1..1	8..7	1..1	1..1	2..2	1..1	1..1	

The additional allowance to Working Patients is thus divided:—Bread and Cheese, with half a pint of Beer or Cider in the morning, and half a pint of Beer or Cider in the afternoon.

On Tuesdays the Meat and Vegetables are made into an Irish Stew, and occasionally Rhubarb, Suet, or Meat Puddings are substituted.

On Saturday the Meat is made into Peas Soup.

The Female Patients in the Refractory Wards and those resident in the Laundry Building, are each allowed half a pound of Bread weekly extra.

The Rations are sent to each Ward in Bulk, and are there divided by the Attendant among the Patients resident, according to their respective requirements; by this practice, very little, (if any) waste occurs.

The Tea and Coffee is made by the Attendant in each Ward—each Female Patient being allowed 1½oz. Tea, ¼lb. Sugar, and 1pt. Milk weekly; each Male Patient being allowed 2oz. Coffee, ½oz. Tea, ¼lb. Sugar, and 1pt. Milk weekly.

Five days in the week the Patients have two kinds of Vegetables—Potatoes always; the second vegetable consisting of whatever may be in season, such as Cabbage, Broccoli, Beans, Peas, Turnips, Carrots, Parsnips, &c.

An equivalent in Cheese is often given in lieu of Butter for Supper.

LIST OF NEEDLEWORK

DONE BY FEMALE PATIENTS
 FOR THE YEAR 1873.
