# REPORT

## OF THE

### COMMITTEE OF VISITORS

#### For 1866.

---

THE Committee, in putting forth their 18th Annual Report, have again the satisfaction of bearing testimony to the continued efficiency of the institution.

In obedience to the 16th and 17th Vic., chap. 97, sec. 62, they have pleasure in certifying that the House is in thorough repair, very clean, and adequately furnished.

The number of patients now under treatment amounts to

MALES	Private ...	10	FEMALES	Private ...	11
	Pauper ...	173		Pauper ...	178
		183			189
Total	...	...	...	...	372.

The confident anticipations expressed in the Report of last year as to there being no danger of a further deficiency in the yield of water has been fully realized. The supply during the year has been ample—more than sufficient to meet every requirement. The works have been prosecuted with all diligence, but the prevailing wet weather in the spring rendered all out of door labour at times impossible. The works are therefore still in progress, but will soon be completed. It may be well to repeat, that these works have been carried on by the Patients and their attendants under the superintendence of the Clerk—thus saving a large outlay on the part of the Visitors.

The new wash-hand ranges for the Lavatories have been fitted up, and are now in use. Their convenience and comfort is very great.

The Lower Corridors, of both wings of the old Buildings, have been painted, papered, and coloured. The large store of valuable prints, so charitably presented to the institution by Messrs. COLNAGHI, Messrs. GRAVES, and Messrs. HOGARTH, have been framed, and suitably hung

in the various Wards and Corridors:—thus brightening up these apartments, and adding much to the cheerfulness of the inmates.

The Female Wards, in the new Buildings, are now furnished, and the furnishing of the Male Wards is also in progress. Care has been taken in the selection of the furniture, which consists of such articles as are usually found in ordinary dwellings. Plain strong white curtains have been put up round all the large windows. Carpeting has been laid down at the sides of the beds, and along the middle of the large rooms. All this has, in every way, been very beneficial to the health and well-being of the Patients.

The hand-rails, recommended by the Commissioners in their Report of April, 1865, have been affixed to the several staircases, and have proved a great convenience.

The Courts on the Female side will shortly be completed. Those on the Male side will be taken in hand as soon as may be. The large additional area thus secured to the Inmates will be a great and merciful boon.

Owing to the increased number of patients, the work in the laundry became very heavy. The three wooden washing machines were not equal to the additional requirements. A new machine, all iron, has recently been brought into use. The outside cylinder is of galvanized iron, and was procured from the manufactory. The whole of the interior works have been constructed on the premises. The machine is now in full work, and answers admirably. Taking into account the officials and attendants, the population of the Asylum amounts at present to about 400. A large accumulation of "foul linen" is therefore turned over, and sent to the wash-house every week. Yet, this immense mass of soiled clothing, &c., is, by the effective help of the new iron machine, easily and thoroughly cleansed and washed, within the space of eight hours. An iron wringing machine is also in course of fabrication on the premises, and will soon be finished. It is right to note that these substantial improvements have been designed and wrought out at the instance, and under the skilful and intelligent supervision of the Clerk, Mr. Robinson.

The chapel having been found too small to accommodate the increased number of patients, the committee have provided that there shall be two services on every Sunday. This arrangement is, under the circumstances, productive of much good.

All the attendants have been supplied with appropriate uniforms, thus marking their official position—proving satisfactory to themselves, and creating a corresponding impression upon the inmates.

The Committee, while reiterating their strong sense of Miss Mesham's generosity, gladly avail themselves of the present occasion to publish a Resolution, passed at their General Meeting, held October 12th, 1866.

RESOLVED,

“That the Committee of Visitors, at their quarterly Meeting, take this their earliest opportunity of presenting to Miss Mesham their very grateful acknowledgments for her considerate and most valuable gift of Fourteen Acres of Freehold Land, in perpetuity, for the uses of the Institution.

The Committee feel called upon to offer their heartiest acknowledgments to the Medical Superintendent, the Assistant Medical Officer, the Chaplain, the Matron, the Clerk, and the other officials, for the considerate and untiring manner in which they have respectively discharged their trying duties.

THOMAS HUGHES,

CHAIRMAN.

Dec. 21st, 1866.

THE  
MEDICAL SUPERINTENDENT'S  
REPORT.

---

GENTLEMEN,

I HAVE again the honour, for the eighteenth time, of submitting my annual report for the year 1866.

On the first of January, 1865, there were under treatment in the Asylum 9 male and 10 female private patients; 138 male and 154 female pauper patients:—total, 311.

The admissions during the year were 10 male and 9 female private patients, 99 male and 78 female pauper patients:—total, 196.

The number under treatment during the year was 255 male, and 251 female patients:—total, 506.

Average daily was 174 male, and 188 female patients:—total, 362.

The admission is much larger than on previous years, but it is accounted for by having received 19 male and 20 females from the city of Chester, and 15 male patients from the Abergavenny Asylum. There were, however, 20 more patients admitted belonging to the united counties than the previous year.

The discharges have been 22 males and 41 females recovered, 10 males and 3 females not recovered, and 38 males, and 18 females have died.

The per centage of the patients that have recovered may appear smaller, and the deaths higher than on previous years; but it must be taken into consideration that a much larger number of the admissions have been old and chronic cases.

The causes of death have been from phthisis, 17; exhaustion, 13; general paralysis, 12; debility, 3; disease of heart, 1; puerperal mania, 1; hæmoplycis, 1; disease of throat, 1; suffocation, 1; and dropsy, 1:—total, 56. The only cause of death requiring any remark is that of a

male patient who was found by the night attendant lying on his face, and quite dead, with a handkerchief tied tightly round the throat. No inquest was held, but the matter was carefully investigated by the house committee, and the result was fully reported to the Commissioners in Lunacy.

The Sunday services continue to be well attended, and the chapel generally over-crowded. The additional morning service has tended much to relieve the long and monotonous hours, and proved beneficial in every way to the patients.

The occupation and amusements of the patients have been carried on as usual, and a dance takes place generally twice a week. In conclusion, I have again to tender my warmest thanks to the Chairman and Committee of Visitors for their warm support, and also to my colleagues in office for the efficient and kind assistance I received from them.

I am, Gentlemen, your obedient servant,

G. TURNER JONES,

SUPERINTENDENT.

# REPORT

## OF THE

### COMMISSIONERS IN LUNACY.

---

DENBIGH COUNTY ASYLUM,

*21st May, 1866.*

SINCE this Asylum was visited on the 10th of April, 1865, there have been 166 admissions, 119 discharges, and 58 deaths—under the first head 96 males, and 70 females; under the second, 56 males and 63 females; and under the third, 33 males and 25 females. Of the admissions, 17 belonging to the private class; of the discharges, 11; and of the deaths, 2. The deaths have all been from ordinary causes,—the principal being general paralysis, phthisis, and old age; but though three of them were sudden, only one inquest was thought necessary, in the case of a patient whose death resulted from the manner in which he had been brought to this Asylum from the Wrexham Union, and of which the circumstances were stated to our Board.

The numbers in the Asylum to-day are 347; being in the male division 166, and on the female side 181; of whom 10 men and 11 women belong to the private class; and all of whom, except a man reported to have escaped this morning out of the field in which he was employed with others, we have seen at our visit. They were generally very quiet: one or two of the women were a little noisy, but there was nothing to be called excitement on either side. We were sorry to observe several in bed, and some serious cases; but these were chiefly patients aged or paralysed, and there does not seem to be any special illness in the house.

The new wards built for 75 patients on each side now contain about 108 altogether, or 63 women and 45 men. This does not seem to us, however, any good reason for the generally unfinished condition of these wards in respect of furniture and other matters. The discomfort being

as great to the inmates as if the wards were fully occupied ; as yet they are not more than half furnished, and some portion of the work connected with the new buildings, such as the very necessary and important enlargement and turfing of airing courts, appears now to be in progress only on the female side, having been stopped altogether on the other. We regret this, and think it very desirable that all the works, including the furnishing, papering, and painting, and relaying out of the courts, should be resumed and finished in both divisions.

Thus far the furniture supplied, some parts of which, including tables, benches, and bedsteads, has been made by patients, is of a good, homely, serviceable sort ; and the arm chairs, chests of drawers, washstands, and single tables are suitable, and such as will contribute to comfort. We very strongly recommend that carpeting be placed in the day rooms and dormitories on both sides, that matting or linolcum be placed in all the corridors where the floors are tiled, and that the recreation rooms on both sides be better decorated and made more fit for the use they are put to. A recommendation was made at the last visit for assimilating the female recreation room to the work-room adjoining, by putting a dado or skirting round the former ; and in repeating this we hope that both rooms will be plastered in the upper part of the walls and painted. It would also add greatly to the cheerfulness of the larger room, if (as might be done at a small cost) windows were opened in the west wall. Another recommendation then made for hand rails throughout the building, old and new, we again strongly repeat. This would earlier have been attended to, we are assured, but that the smith employed has been engaged with the lavatories which have been supplied since the last visit, and we were glad to see new general bath rooms on both sides constructed since then, and where there will be additional comfort when the proposed partitions are placed between the baths. We take the opportunity of suggesting that printed rules, to be strictly observed in bathing the patients, should be placed in all the rooms, and that one of them should be an instruction to change the water for every patient. The additions made, since the last visit, to the water supply, for which the excavations appear to have been made wholly by the attendants and patients, will enable this to be effected without inconvenience ; and whenever it is possible, we consider it to be essential.

Other recommendations made at the last visit have received attention. The defects in the water closets have been remedied, the windows through-

out are made to open, and the staff of female attendants has been increased by three. We still doubt, however, whether two nurses are sufficient for the thirty very troublesome women in the No. 4 Ward, and we suggest the addition there of one more nurse. In connection with this subject, we notice with pleasure the resolution of the committee to allow a uniform of good material, in addition to the usual wages to the attendants in both divisions. The records of employments show the usual returns, and that about 113 men, and 98 women, are working regularly, and others occasionally assisting. The numbers attending chapel during the two services on Sundays are between 110 and 120 of each sex, and we have much to regret that the intention of enlarging the chapel has for the present been abandoned. We saw dinner served in the general dining halls today—about 70 patients sitting down in each, and all very orderly. The night watch continues very effective; the return of last night, notwithstanding the many feeble and helpless, showing only one wet and one dirty case on the female side, and only one wet case among the men. We wish the few straw beds remaining could be dispensed with altogether, but as long as they are used we think that under blankets should be put upon them.

The returns of seclusions show only sixteen instances on the female side, and seven on the male side, being confined to five men and six women.

Every thing we have seen at this visit confirms the impression stated on former occasions, that the inmates of this Asylum are treated very kindly, and upon the whole, that very proper provision is made for their comfort, we only hope that an early completion of the works in progress may strengthen the means at Mr. Jones's disposal for continued and increased efficiency in the performance of the duties which he discharges in general so satisfactorily.

JOHN FORSTER, }  
JAMES WILKES, } *Commissioners in Lunacy.*

## THE CHAPLAIN'S REPORT.

---

TO THE COMMITTEE OF VISITORS OF THE NORTH WALES  
COUNTIES LUNATIC ASYLUM.

GENTLEMEN,

I have the honour to state for the information of the Committee of Visitors that the chapel services were regularly performed during the past year. The patients were also visited in the wards, and such advice and consolation were administered to them, from time to time, as their several cases seemed to require. In accordance with the resolution of the committee in March last, arrangements were made for a second service and sermon at the chapel on Sundays. From that date there have been two services and sermons on Sundays, and two services on week days. The average attendance at the week-day services has been 40 males, and 44 females; and at each of the Sunday services, 76 males, and 62 females. I have continued and most satisfactory proof that attendance at chapel has been always considered by the patients as a happiness and privilege, and there is reason to believe that the additional Sunday service has been to many of them a source of much comfort.

Amidst much that has been sad and distressing, I cannot but acknowledge the many encouragements I have experienced in the course of my ministrations amongst the afflicted inmates. In visiting the sick and dying, it has often cheered me to find, that while the mind was dark to everything else, it still retained the light of divine truth, clear and distinct, as when first impressed upon it in years long gone by.

It has, indeed, at times almost startled me to listen to the earnest and impassioned, yet lucid and scriptural manner in which they have spoken of the religious truths taught them in early childhood, leaving me almost to conclude that, although the remembrance of all other things may be effaced from the mind of man, still, where the light of God's truth has

once shone, the impression made by it may be, as it were, for a time clouded ; but it is seldom, if ever, permanently obliterated.

I would again tender my best thanks to Mrs. Turner Jones, and Mr. Owen Robinson, for their valuable services in conducting the musical parts of the chapel services.

It gives me much pleasure also gratefully to acknowledge the assistance which I have invariably received from Dr. Turner Jones, and the other officers of the institution, in the discharge of my duties as chaplain.

I have the honour to be, Gentlemen,

L. LEWIS,

CHAPLAIN TO THE N. W. C. ASYLUM.

THE FOLLOWING TABLES ARE GIVEN FOR THE PURPOSE OF FURNISHING STATISTICAL INFORMATION ON THE SUBJECTS TO WHICH THEY REFER.

TABLE I.

*Showing admissions, discharges, and deaths during the year.*

	In the House Jan. 1st, 1865.	ADMITTED during the year.	Cured.	DISCHARGED not relieved.	Died.	Remaining 31st Dec. 1865.
