REPORT

OF

THE HOUSE COMMITTEE.

THE House Committee of Visitors of the United Counties Asylum in North Wales, in putting forth their sixth report, have the gratification of recording the satisfactory condition of the Institution.

In compliance with 16 & 17 Vict., cap. 97, sec. 62, they have to state that the house is in thorough repair, very clean, and adequately furnished; that the gasometer and the apparatus connected with it are in good working order; and that the number of patients now under treatment amounts to 205; viz.—

MALES. { Private . . . 12 { Paupers . . . 84		FEMALES. { Private . . . 9 { Paupers . . . 100
---	--	---

The Committee state with concern that owing to the great increase in the price of provisions, and almost every article of consumption, they have been under the necessity of raising the scale of weekly charges, as explained in the official communication addressed to the Clerks of the Peace of the several counties in union with the Asylum, on the 22nd of June last. Whenever there may be a reduction in the general prices, these advanced payments will, of course, be lowered in proportion.

The Committee have to report that a considerable outlay was rendered necessary in the course of the last summer, in consequence of the great scarcity of water. To supply this deficiency, it was found requisite not only to enlarge the reservoir but to sink a new well. The result, up to this time, has answered every expectation—there being now a plentiful supply of water.

The Committee have pleasure in stating that the new buildings are in course of forwardness. The laundry and wash-house are completed; the joiners', tailors', and shoemakers' shops are in use, although not entirely finished. The Committee feel called upon to record their satisfaction with the manner in which these additions have been planned and executed.

The Committee beg to call the attention of the Magistrates of the several counties in union to the fact that the stables and cowhouses now attached to the Institution are mere temporary buildings—very insecure and inefficient;—and to express an earnest hope that the Visiting Justices will co-operate with the Committee in remedying this serious inconvenience.

A reference to the Annual Reports issued since the opening of the Asylum will show that there has been a steady increase in the number of patients from year to year. From this cause the accommodation in the pauper dormitories and day-rooms has occasionally been found inadequate, particularly during the summer months, when the overcrowding of these apartments has at times rendered the atmosphere oppressive and injurious to the patients.

The Committee cannot close their Report without expressing their warm appreciation of the zeal and devotedness with which the Medical Gentlemen, the Chaplain, the Matron, the Clerk, and other officials, have continued to discharge their arduous duties.

Signed,

JOHN HEATON,

CHAIRMAN.

THE
MEDICAL OFFICERS' REPORT.

TO THE CHAIRMAN AND COMMITTEE OF VISITORS OF THE
NORTH WALES LUNATIC ASYLUM.

GENTLEMEN,

The able report of the House Committee, already before the several Courts of Quarter Sessions of the counties in union, has left little for our notice respecting the general state and progress of the Asylum during the past year. We shall, therefore, confine our observations mainly to matters professional:—

The admissions have been	-	-	-	-	67
Discharges—cured	-	-	-	-	30
Relieved	-	-	-	-	6
Deaths	-	-	-	-	24

which will show that the mortality has proportionably diminished, and the cures increased, as compared with the previous year. The deaths have, however, we grieve to be under the necessity of again remarking, been increased by the continuance of a practice which we have frequently had reason to complain of in previous reports: viz., the want of consideration (to say the least of it), on the part of some parochial authorities, in sending patients into the Asylum in the last stage of existence, from disease and debility. One poor creature who was dying of organic disease of the heart, only survived her admission a week.

This is a practice which cannot be too severely condemned, as cruel in the extreme towards the unhappy sufferers, and very unfair towards the Asylum.

The Commissioners in Lunacy visited the Asylum in September last, and made the following entry in the Visitors' Book.

“NORTH WALES ASYLUM, DENBIGH, *September* 15th, 1854.

“Since the last visit of the Commissioners on the 24th of last October, 41 males and 34 females have been admitted; and within the same period 35 have been discharged, of whom 22 were recovered. The deaths amounted to 24, principally from cerebral diseases in their various forms.

We have seen and examined all the patients, and found them in general tranquil and orderly, and clean in their persons and dress. No one was in seclusion at the time of our visit; and the employment of instrumental coercion is quite unknown in this establishment. The different apartments, both day rooms, and sleeping rooms, as well as the galleries, we found clean, well ventilated, and in good order; but we are informed that the supply of water is so very deficient that it has been judged expedient to abandon the use of most of the baths and water closets for the present. Steps are now in progress for obtaining an additional supply by enlarging the reservoir and sinking a fresh shaft for a new well.

We saw most of the parish patients at dinner, and examined the viands, which appeared to be of good quality, and supplied in sufficient quantity.

The general health of the inmates is at present good, there being only one patient seriously or dangerously ill—a case of typhus fever.

We learn on inquiry that a very large proportion of the patients—fully three-fourths of the entire number—are pretty regularly employed in various occupations suited to their age, sex, and previous habits of life. About 25 of the males are employed on the land, the whole of which is under spade cultivation, and appears to produce excellent crops of vegetables. It is to be regretted that the extent of land for such cultivation is not greater.

With reference to the suggestions in the last entry of Visiting Commissioners, we learn that the laundry is now being enlarged, but that the plan for adding a joiners' workshop stands over for the present.

The gas works are now completed, and are found to answer well.

The establishment altogether is in a satisfactory and creditable condition.

“Signed,

“J. W. MYLNE, } *Commissioners*
“J. R. HUME, } *in Lunacy.*”

During the early part of last year, the town and neighbourhood of Denbigh were visited by typhus fever, of a very fatal and malignant character. During this period, the Asylum remained perfectly free from the epidemic; and it was not until late in the summer, when the serious scarcity of water alluded to in the report of the House Committee, prevented the flushing of the drains, that a low type of typhoid fever appeared. By careful separation and other sanitary measures, we were enabled to check the spreading of the disease beyond some 10 to 12 cases, all of whom recovered; and the Asylum has continued extremely healthy since that time. Few as the cases of fever were, the expense to the establishment was very considerable, as large quantities of wine and other costly cordials were found absolutely necessary to combat successfully with the disease.

Although many and most important improvements have been effected or

are in course of completion since our last report—amongst the most valuable of which are the new and commodious wash-house, and the conversion of the old one into an excellent laundry, mangle, and drying rooms, and the removal of shoemakers and tailors to new shops out of the house—we must most earnestly call the attention of the Visitors to the absolute necessity for the erection of joiners' and carpenters' shops; as the increased number of patients renders it imperative upon us to appropriate the room now used for that purpose, to the use of the patients, who are already overcrowded, both as regards day rooms and dormitories.

Whilst these and other offices are, we hope, about to be built, we must again remind the Visitors, that the stables, so long contemplated, together with cow-houses, piggeries, &c., are much required; as those now in use are mere temporary sheds and very imperfect and dilapidated.

The patients continue to be employed as heretofore—the able-bodied males in spade husbandry, gardening, and other out-door work. Some are occupied in assisting the engineer; others in shoemaking, and tailoring; and those who are not to be trusted out of the enclosed airing grounds, in pumping, and picking cocoa-nut fibre, &c. &c.

The women are employed in the kitchen, the wash-house, the laundry, and the sewing rooms—spinning is a favourite occupation with others. All the clothing is made by them, of which the matron keeps an account. We have considerable difficulty in finding suitable in-door occupation for the private male patients in wet weather. That ever ready refuge from the tedium of confinement—the needle—so successfully resorted to by the weaker sex, is not open to their male fellow sufferers under misfortune; and well might the pious and gifted Robert Hall have lamented that he “was never taught to hem a pocket-handkerchief; for,” said he, “I should never have been insane if I had.” In order to afford an additional source of occupation and amusement for the class of patients above mentioned, we would strongly recommend the purchase of a good turning lathe for their use.

Frequent excursions into the country are made by the patients during the spring, summer, and autumnal months. These walks tend to amuse and enliven the poor creatures in a degree scarcely to be credited—lessening the tedium of their confinement, and producing new ideas and associations, to the exclusion of morbid ones.

The long and joyfully anticipated Christmas party—or, as it is called, “The Ball”—was, if possible, more than usually enjoyed, and was attended with the happiest results.

The Commissioners in Lunacy during the last year, addressed a list of

questions to the superintendents of every Asylum in the kingdom, requesting information as to the practice pursued by them, particularly as to the use of restraint, &c. &c.

This long mooted subject has been revived, and much discussion and difference of opinion still exist amongst the medical officers of Asylums.

We find we are classed amongst the advocates for the abolition of all restraint—although we are not of the number of those who would dogmatically condemn the limited use of mechanical restraint—nor would we venture to deny, that cases may possibly occur which might render it necessary: yet, we have no hesitation in saying, that we have hitherto never had occasion to resort to any beyond a short confinement in a padded room, and even that remedy is now very sparingly and cautiously used. We find exercise in the open air the best sedative, in promoting sleep and tranquillity—even during the most violent maniacal paroxysms.

We cannot conclude, without an offer of our warmest thanks for the continued support and confidence which the Chairman and House Committee are pleased to extend towards us; and we beg to tender our grateful acknowledgements to our colleagues in office—the Reverend the Chaplain, the Matron, and Steward—for their valuable and efficient co-operation in their several departments.

We have the honour to remain, Gentlemen,

Your obedient servants,

R. LLOYD WILLIAMS, M.D., *Visiting Physician.*
GEO. T. JONES, *Superintendent.*

THE FOLLOWING TABLES ARE GIVEN FOR THE PURPOSE OF FURNISHING STATISTICAL INFORMATION ON THE SUBJECTS TO WHICH THEY REFER.

TABLE I.

Showing admissions, discharges, and deaths, during the year.

	In the House Jan. 1st, 1854.	ADMITTED		DISCHARGED		Remaining	
		during the year.	Cured.	relieved.	not relieved.	Died.	31st Dec. 1854.
