Captain Thomas. John Scott Bankes, Esq.

REPORT

OF THE

COMMITTEE OF VISITORS FOR 1871.

THE Committee, in issuing their 23rd Annual Report, are again gratified in being able to notify the continued efficiency of the Institution.

In conformity with the 16th and 17th Vic., cap. 97, sec. 62, they have pleasure in certifying that the house is very clean, and comfortably furnished.

The number of Patients, now under treatment, amounts to

Private Pat	ients			MALE. 13	FEMALE. 11	TOTAL. 24
Pauper Pat	ients from Cour	ties in Ur	nion	159	171	330*
,, ,	, from out	Counties		24	16	40
	TOTALS			196	198	394

Counties in Union.	No. of Patients allowed for each County by Quota upon the Scale of the New Census, 1871.	Actual No. of Patients of each County in the Asylum, Dec. 15th, 1871.	Over Quota.	Under Quota.

TOTAL	393	330	11	74

At the Annual Meeting of the Visitors, held on January 17, 1871,-

of Turkish Baths, and it was decided that they should be forthwith carried into effect.

At a subsequent Quarterly Meeting of the Visitors, held on the 23rd of June, it was resolved:—" That the cost of erecting the Turkish Baths (not to exceed $\pounds 400$) be charged to the five Counties in Union." The Baths have been completed within the estimated sum, and are now in full use. The results are most satisfactory.

The Committee, after mature consideration, have determined to employ their own butcher. They have every reason to believe that by so doing, the expenses of the Institution will be lessened.

The Commissioners in Lunacy visited the Asylum on the 7th July last. They have entered so fully into all the arrangements, details, and requirements of the Institution, that the Committee judge it best to refer all who take an interest in the establishment, to the Commissioners' Report, which is annexed. It should be added, that the suggestions of the Commissioners have been fully discussed, and that several of their recommendations are now in course of being adopted.

Looking at the average charge of the maintenance of Pauper Lunatics in the County and Borough Asylums throughout the Kingdom, it will be found that it amounts to 9s. 6d. per week; whereas the weekly charge, in this Asylum, for each Pauper amounts only to 8s. 2d.

The Committee cannot conclude without recording their approbation of the humane and energetic manner in which the Medical Superintendent, the Assistant Medical Officer, the Chaplain, the Matron, and the Clerk have respectively fulfilled their arduous duties.

THOMAS HUGHES,

CHAIRMAN.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

NORTH WALES COUNTIES ASYLUM, Denbigh, July 7th, 1871.

UPON our visit, this day, we have inspected the Asylum in its various departments, and have satisfaction in again reporting most favourably of its general condition, and the provision for the care and comfort of its inmates.

The changes in the Patients since the visit of our colleagues, 24 September last, have been as follows:—

Admitted					MALE. 65	FEMALE.	TOTAL. 126
Aumitted			•••	 • • • •	00	61	120
Discharged				 	70	60	130
,, of	whom a	recover	red	 	25	26	51
Died (all from	n ordin	ary can	uses)	 	15	15	30

The rate of mortality, as will be observed, has during the period referred to been very low. In no case have the circumstances attending the death been of an unusual character calling for an inquest.

Post mortem examinations were made in only four instances.

There has not, since the last visit, occurred in the Asylum any serious casualty.

The Patients at present on the Books, all of whom we have seen, are 387 in number, viz., 193 Males and 194 Females, of the former 12 and of the latter 11 are of the private class.

Of the Paupers 331 are chargeable to the five Counties in Union at 8s. 2d. per week, and 32 to Lancashire at 12s. 10d.

The Asylum is estimated to afford accommodation for 418 Patients. There are therefore now 31 vacant beds, which would be increased in number to 63 by the removal of the out County (Lancashire) Patients.

In reference to occupation, we find that of the male patients, 63 are employed on the land, and 14 at trades and in shops; and of the female patients, 38 in needle work and knitting, and 19 in the laundry department.

A few of each sex assist in the kitchen and offices, and about 45 men and 20 women are engaged in cleaning the wards. We have suggested to Dr. Jones that a number of men now entirely without occupation might be usefully employed in picking hair and flock, and assisting in re-making beds.

About 140 patients attend the morning (English) service on Sundays, and the same number the Welsh service in the afternoon.

The attendance would in Dr. Jones' opinion be much larger, were the chapel of adequate size.

Good provision continues to be made for associated amusements. At the weekly dance about 220 patients of both sexes are usually present, the music being supplied by the Asylum Band.

The supply of illustrated papers and periodicals, and means of recreation in the Wards, are, we think, somewhat deficient, and we suggest the introduction, on the men's side, of one or two bagatelle boards.

During the summer months the patients have frequent dances on the Green, and they also enjoy the games of bowls, quoits and croquet.

With a few exceptions among the females of the worst class, we found the patients tranquil and orderly, in a satisfactory state as to personal cleanliness, and well and suitably clad.

No one was regarded as in seclusion, though several patients who were in bed owing to bodily illness, had their room doors locked, to prevent the intrusion of others. There has not since the last visit been any instance of the use of mechanical restraint; and seclusion has been very sparingly resorted to, its employment having been limited to 8 men on 12 occasions, and 2 women on 3 occasions. There are, at present, in the Asylum a large proportion of feeble cases, and we found 7 men and 5 women in bed; but otherwise, the sanitary state of the Establishment is good.

There has not since the last visit been any epidemic disorder.

The patients registered as under medical treatment are only 3 in the male and 5 in the female division. We are informed, however, that besides these, upwards of 40 patients of both sexes are taking sedatives, such as Hydrate of Chloral at night. This is noted in the case books, but the names of the patients thus treated should be entered in the Medical Journal, and this will in future be done.

The private patients, for whom the weekly rates of payment vary from 12s. 6d. to £1 ls. 0d., occupy for the most part, small, cheerful rooms, towards the front, which were comfortably furnished and in excellent order.

The Wards for paupers were found by us throughout clean and well

ventilated. On the male side the day room space is inadequate, and in this respect, compares unfavourably with the female division. We saw about 150 men assembled at dinner, chiefly in the Corridors of the older portion of the main building, which were, in consequence, much overcrowded. We submit for consideration the expediency of remedying this defect by some improved arrangement. If no other means can be found, the object could perhaps be attained by the conversion into properly boarded and furnished day rooms of a portion of the spacious shed in the back court.

The beds and bedding generally were good and comfortable, and, with a few exceptions in the female wards, where more frequent change would have been desirable, their condition was satisfactory.

The means of personal washing is in some instances insufficient, and we suggest the introduction into some of the domitories of simple, domestic, wooden wash stands, basins and other conveniences.

The staff of attendants by day consists of 13 in the male division and 12 in the female. Assistance in the Wards is also occasionally given on Sundays and at other times, by artisans and laundry maids. There is a night attendant in each division. An additional nurse is greatly needed on the female side, and much advantage would, we think, be found to follow the appointment of a chief attendant for the male division.

Several additions and improvements have since the last visit taken place, or are in progress,—including the construction of a Turkish Bath nearly completed,—the erection of a new foul linen house and two out door water closets,—the fixing of an apparatus for heating the chapel, the laying on of a main pipe to the Denbigh Water Works, so as to ensure an immediate and ample supply of water in the event of fire, and the fixing of a new steam pump of superior construction. A large croquet ground for the female patients is also in process of formation.

We recommend the planting with shrubs and forest trees of the principal airing courts on each side, and the erection of a summer-house or a sun-shade in the female court.

We have satisfaction in stating that in the course of our visit, we had not a single complaint made to us on the score of ill treatment by attendants. And we are glad again to bear testimony to the zeal and energy displayed by Dr. Turner Jones in the Superintendence of this Asylum.

THE CHAPLAIN'S REPORT.

TO THE COMMITTEE OF VISITORS OF THE NORTH WALES COUNTIES ASYLUM.

GENTLEMEN,

The usual Sunday and week day Services have been performed regularly during the past year, and I am glad to be able to add that the same degree of attention and reverence, which I have remarked upon in my last report, still prevails. I can confidently say that, to very many, our Services are a source of comfort; often has this assertion been made to me in course of conversation with the patients, and I have reason to know that they are disappointed when unable to attend Chapel through indisposition.

Strangers who attend our Chapel Services for the first time are much struck with the orderly conduct and devout appearance of the congregation, as well as with the solemnity and depth of feeling with which many of the afflicted inmates join in the different parts of divine worship.

It has been found by experience that incurable patients, who have been goaded by neglect and active cruelty into a worse than savage condition before they are brought into a public asylum, can, by kind and judicious treatment, be so trained as to be in their best moments, tidy in their persons, and orderly in their behaviour; and the bringing of such inmates as these to Chapel, serves, if it does nothing else, to foster in them habits of self-control and decent conduct. During my week-day visits to the wards it has been my constant endeavour to speak such words of comfort to the afflicted as their several cases seemed to require.

In ministering to the sick and dying during the past year, I have had occasion to observe, with much thankfulness and satisfaction, the consoling and sustaining influence of religion upon the minds of the afflicted sufferers.

Of all the cases that come under my notice, those who consider themselves lost are the most difficult to deal with; but notwithstanding their rejection of the glad tidings, which it is the privilege of a Christian minister to convey to them, I follow up my visits, and wait patiently for the result, trusting that as the patient improves in general health, so his mind will become more capable of receiving divine truth.

It has been my happiness on many occasions during the past year to be made the medium of communication between patients and their friends, and there is reason to believe that comfort and satisfaction has often been derived from the replies received and returned. Many a patient who was sorely distressed in mind by home anxieties, has been relieved and soothed by receiving a cheerful letter, and a satisfactory assurance that all was going on well.

Although, during the past year, nothing of a prominent nature has transpired demanding special notice, yet abundant evidence continues to present itself to my mind as to the inestimable benefit accruing, not only to the patients themselves, but to society in general, from the establishment of well regulated institutions of a character similar to your own for the reception and proper care of such of our fellow creatures as are unhappily suffering from mental affliction.

Many are the difficulties with which an asylum chaplain has to contend. We know from experience how hard it is to induce those, whom the world calls sane, to bow down in humble submission before the throne of the most High in the day of their trial,—how much more difficult then must it be to instil such lessons successfully when ministering to unhealthy minds.

I would therefore venture to ask you to continue to extend to me that assistance and considerate forbearance which I have hitherto received at your hands.

It is impossible for me to speak too highly of the pains taken by Mrs. Turner Jones, Miss Robinson, and Mr. Owen Robinson, our excellent organist, in the management of the musical parts of our Chapel Services, which are heartily rendered, and always thoroughly enjoyed by the patients.

The new heating apparatus for the Chapel, recently put up under the superintendence of Mr. Robinson, has been an entire success, and a source of much comfort to all who attend the Services.

My best thanks are justly due to Dr. Turner Jones and the other officers of the Institution for the ready and cordial co-operation which I have, in the discharge of my ministerial duties, invariably received at their hands.

I have the honour to be, GENTLEMEN,

Your obedient Servant,

L. LEWIS, Chaplain to the Asylum.

Denbigh, January 16th, 1872.

MEDICAL SUPERINTENDENT'S REPORT.

TO THE COMMITTEE OF VISITORS OF THE NORTH WALES ASYLUM.

GENTLEMEN,

J have for the twenty-third time the honour to submit my annual report, with the usual statistical tables.

On the first January, 1871, there were on the books of the asylum 11 male, 11 female private patients; 177 male, and 183 female pauper patients; total, 382.

During the year 101 male and 76 female patients were admitted, being the largest number since the opening of the asylum.

Total number under treatment being 559. Daily average 393.

The discharges were—37 males, 37 females recovered; 31 males, 18 females have died.

Number of patients now on the books:—13 male, 11 female private patients; 178 male, 189 female pauper patients; total 391.

The increased number of admissions is accounted for by being enabled to receive out county cases, caused by the removal of the Chester and Abergavenny patients.

The per centage of cures was higher, and the deaths lower than on previous years, and I have pleasure in stating that no cause for an inquest or any casualty has happened, all cases of death being from natural causes.

Acting upon the suggestion of the committee of visitors, the proceeds of the Ablett fund has been more freely distributed to discharged patients, amount to the sum of £36.

The amusement and recreation, which have a marked effect in tranquilising the patients, have not been neglected. On Christmas Day about two hundred of the patients were assembled together in the recreation room, and dined off a liberal supply of roast beaf and plum pudding; and on the night of the 27th about the same number attended the annual ball, the room being gaily decorated. All seemed much pleased with their entertainment, and more especially at the attendance of several of the committee of visitors and friends of the officers and attendants.

At the last annual meeting of visitors I reported upon the advisability of erecting a Turkish Bath. An order was issued for its erection, and it has now been in full operation for nearly three months. The time has been too short to enable me to express any positive opinion as to its curative powers generally, but I feel sanguine that good results will follow its use. In several cases of acute mania it has produce a marked and beneficial effect. I am fully persuaded of the superiority over the ordinary warm bath in its cleansing power. The peculiarly disagreeable odour which is emitted from the secretion in the skin of the insane is preceptibly modified. This bath is much more liked by the patients. Many had a great aversion to the ordinary one, so much so that persuasion and in some instances gentle force was required to induce them to enter the bath. This has now almost entirely disappeared, and the pleasures of the baths are eagerly sought for. There is also great economy in labour and water.

I regret to state that I have lost the valuable services of my late colleague and assistant Dr. James, who resigned his appointment in conseuequce of his wish to enter into a wider field of general practice.

In conclusion, I beg to return to the committee my best thanks for their confidence, and also to the other officers and attendants for their cordial assistance and support.

I am,

Your obedient Servant,

GEO. TURNER JONES.
