REPORT BY THE DIRECTORS

stances to finish the building HT TO the original plans

DUNDEE ROYAL LUNATIC ASYLUM

the rest set spart for the arr or class. The number of the

ANNUAL GENERAL COURT,

JUNE 1883.

to be recorded that notwith

THE Directors of the Dundee Royal Lunatic Asylum, in laying before their constituents and the public their Sixty-third Annual Report, have much pleasure in directing attention to the fact that the old Buildings have now been abandoned, the removal of the inmates to the new Asylum having been effected in safety and without any serious difficulty by the middle of last October. They regret, however, to have to state that possession of the new Asylum, so far as it has been completed, has been entered upon under financial circumstances of a very embarrassing character. When the erection of the new Asylum was decided upon, the value of the old property was estimated at £65,000 sterling. The Directors consequently considered themselves fully justified in entering on the new undertaking; but no sooner had a commencement been made than a period of commercial depression set in, which has proved so protracted that the old Asylum and its site have been unsaleable. As yet it has been found impossible to realise any portion of it at a price at all approaching its estimated value, and the interest of the debt hitherto incurred in the erection of the new Asylum,

which now amounts to about £60,000, has been found a serious burden and an obstacle to the completion of the works. As it was not considered prudent under the above circumstances to finish the buildings according to the original plans, it was determined, as a temporary measure, to accommodate all the Patients in the building which had been completed, a certain portion being appropriated for the Private Patients, and the rest set apart for the poorer class. The number of the latter class of Patients has, however, so greatly increased, especially on the female side, that difficulties are already experienced in meeting the demands made for admission, and ere long the question as to the best manner in which additional accommodation can be provided must engage the serious consideration It has further to be recorded that, notwithof the Board. standing the exercise of the most rigid economy consistent with a due regard to the welfare and safety of the inmates, it will be seen from the Treasurer's Report that the Expenditure for the past year has considerably exceeded the Income, although the latter, in consequence of the increased number of Patients under treatment, is much above that of any previous year. This has been the result in a great measure of an Expenditure of an altogether exceptional character, due to the transference of the Establishment and opening of the new Buildings. Although the Directors have every reason to believe that this increase will be only temporary, they do not, under the circumstances in which they at present feel themselves placed, consider that they would be justified in adding to the debt already incurred. They therefore see no means of meeting their annual obligations unless by raising the rate of Board charged for the Pauper Class of inmates. This proposal they recommend with all the greater confidence when the low rates of Board hitherto charged in the old Asylum for Pauper Patients are borne in mind,-rates which barely covered, if they indeed did cover, the cost of the Patients' maintenance. This subject was fully referred to in a

recent Report (Sixtieth for 1880), but on the present occasion it may not be out of place to recapitulate what these rates were.

When the Asylum was opened for the admission of Patients in the year 1820, the rate charged for Pauper cases received from privileged Parishes was 7/- per week, a rate which continued unaltered for eight years. In 1828, however, "in consequence of the reduced price of provisions and other circumstances" this charge was lowered to 6/- per week, and remained at that figure till 1835, when a further reduction to 5/- per week was effected, which, as was stated in the Annual Report for that year, did not more than cover the actual outlay of the House upon the individual. The 5/- rate continued unaltered for twelve years till 1847, when, in consequence of the high rate of interest charged on the debt, which then amounted to fully £9000, and the high price of provisions, it was found necessary to raise it to 6/- per week. For another twelve years no change was found to be necessary, and when in the year 1859 the rate was raised to 8/- per week, the alteration was as much a new agreement entered into with the Parishes as an increased charge for the maintenance of the Patients, because the Asylum then undertook new obligations in agreeing for this sum to provide and maintain wearing apparel, clothing, shoes, &c. for the inmates so long as they remained in the Asylum, articles which previously had been supplied by the respective Parishes. The operation of the Lunatic Wards in connection with the Dundee Poorhouses commenced in December 1864, and the systematic removal of the quiet, harmless, and least expensive class of Pauper Patients soon told seriously on the financial position of This led Sir JAMES COXE, one of Her Majesty's the Asylum. Commissioners on Lunacy, to remark in his official Report of 11th December 1866, that as the interchange of patients consisted in "taking out good cases and sending in bad," and had

already resulted in "an accumulation beyond a proper proportion of excited, destructive, and expensive Patients in the Asylum," the Directors would "find themselves compelled to raise the rate of payment for Parochial Patients," but no alteration on this rate was made till 1868, when it was increased as a tentative measure to 9/-. This proving insufficient, a further increase to 9/6 was made in 1873, and to 10/- in 1875, when a satisfactory balance between Income and Expenditure was reached. 10/- per week has been until now the rate charged for this class of inmates.

At first sight this rate may seem to be ample for the maintenance of the insane poor, but when the character of the present population and the continued effect of the Poorhouse Lunatic Wards are taken into consideration, it will be found to compare favourably with the rates charged by other Chartered Asylums, and even some of the Parochial Asylums, as will be seen from the following extract from the last Report of the General Board of Lunacy for Scotland for year 1882 :--

The Architects have kindly furnished the following Report as to the new Asylum :--- "The Buildings have been for some time completely finished and occupied, and they are in every way well suited to their purpose. It was found, however, that the Female Pauper Patients when placed in the parts of the building allotted to them, after providing room for the Private Patients in the same building, were very much overcrowded, and that it was necessary to provide for them additional accommodation. After considering the matter, we were of opinion that the easiest available space for extension was to be found in the Amusement Room. One-half of it has therefore been boarded off and fitted up temporarily as dormitories.

"At our last visit we found the Patients engaged in finishing the roads and slopes, so that the whole place is now assuming a completed appearance.

"The shrubs and trees looked healthy, and had made great progress.

"The irrigating scheme is not yet properly in operation on account of the openness of the soil, which causes it to be necessary to form some open drain tracks of wood or other material to spread the sewage, otherwise everything is in excellent working order."

On referring to the	Treasurers' Rep	ort it wi	ill be ob	served
that the Income of	the Institution	during	the pas	t year
has been			£9549	14 1
and the Expenditure			9797	19 11
showing a deficiency of			£248	$5 \ 10$

The Resident Physician's Report shews that on the 19th June last there were 326 Patients in the Asylum, 127 males and 199 females, while at present there are 340, that number being made up of 134 males and 206 females, 139 Patients having been admitted during the year, 61 having recovered, 33 having died, 9 having been removed to the Lunatic Wards of Poorhouses, 14 to other Asylums, 2 by friends not recovered, 3 escaped, and 2 removed by Minutes of Parochial Board.

The Directors have again to state that they are satisfied with the manner in which the various Officials of the Corporation perform their duties.

The Resident Physician's Report shows that on the 19th

Expenditure of the Bandee Rogal Lunatic Asglum.

THE following twenty-six parishes, the parishioners of which have contributed $\pounds 20$ or more to the funds of the Asylum, are entitled to have their pauper patients admitted into the lowest class, and are accordingly charged the lowest rate of Board; but no other parish, since 1823, can claim the privilege. The parish of St. Andrews was privileged in 1837, and the parish of Kingsbarns in 1852, to have each one patient only in the Asylum at the lowest rate of board.

AT THE

ANNUAL COURT OF DIRECTORS

OF THE

DUNDEE ROYAL LUNATIC ASYLUM,

HELD IN THE TOWN HALL OF DUNDEE

ON MONDAY, 18TH JUNE 1883,

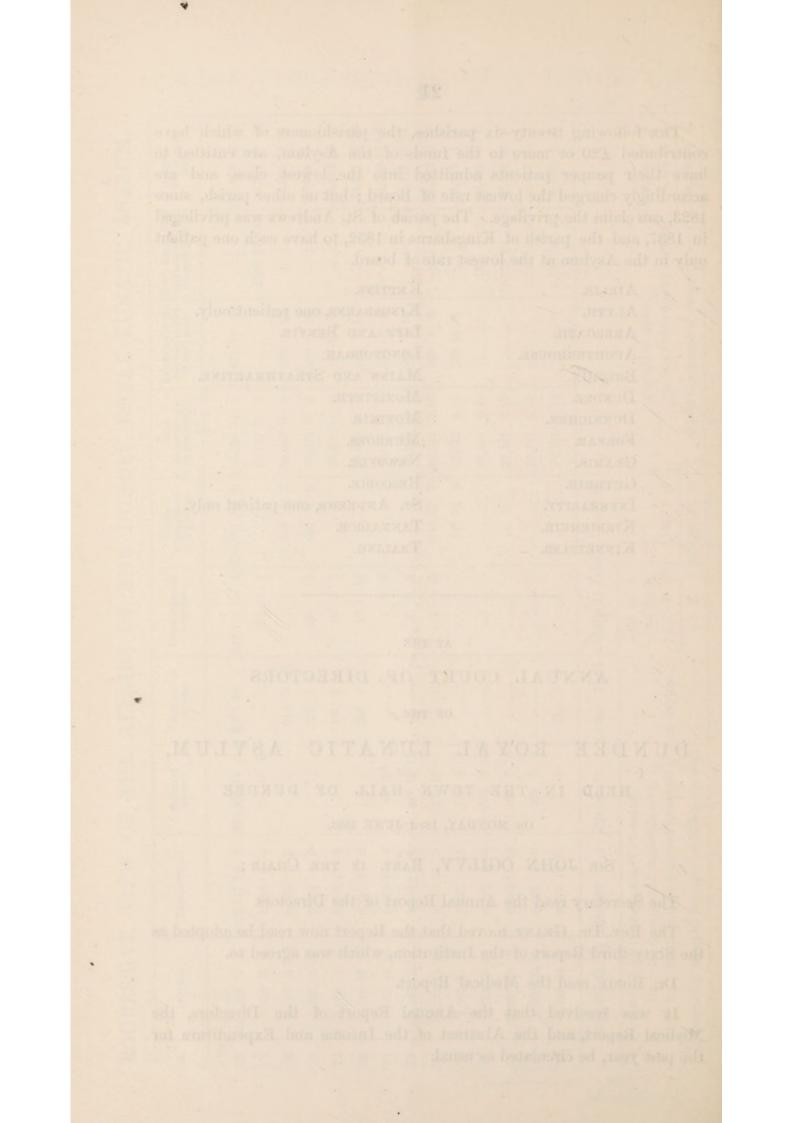

SIR JOHN OGILVY, BART. IN THE CHAIR;

The Secretary read the Annual Report of the Directors.

The Rev. Dr. GRANT moved that the Report now read be adopted as the Sixty-third Report of the Institution, which was agreed to.

Dr. RORIE read the Medical Report.

It was resolved that the Annual Report of the Directors, the Medical Report, and the Abstract of the Income and Expenditure for the past year, be circulated as usual.

MEDICAL REPORT.

18TH JUNE 1883.

ON the 19th June 1882, the date of last Annual Meeting, the number of patients resident in the Asylum was 127 males and 199 females; total, 326. Of these, 59, namely, 29 males and 30 females, were private patients, and 267, namely, 98 males and 169 females, were paupers.

139 have since been admitted, of whom 53 were males and 86 females. 17 of these were private cases, that is, patients the expense of whose maintenance was defrayed by their relatives or friends; and 122 were pauper patients, sent in by, or afterwards found chargeable to, the following parishes— Dundee Combination, Monifieth, Arbroath, Mains and Strathmartine, Barry, Turriff, Aberdour, Perth, and Kettins.

The total number under treatment has therefore been 465, being 39 in excess of last year.

Of these, 61 have been discharged recovered, namely, 19 males and 42 females, 13 being private and 48 being pauper cases; 6 males and 8 females were transferred to other Asylums, being chiefly pauper patients chargeable to parishes beyond this district; 1 male and 2 females were removed from the Asylum by Minutes of Parochial Boards; 4 males and 5 females were transferred to the Lunatic Wards of Poorhouses; 1 female was taken home by her friends; 1 male patient was taken charge of by an Inspector of Poor and removed to the care of his friends; and 1 male and 2 female pauper patients effected their escape. 33 patients have died, of whom 14 were males and 19 females.

24

There remain therefore at the present date 134 males and 206 females; total, 340.

The percentage of recoveries, calculated on the number admitted, is consequently 43.88; while that of the deaths, calculated on the whole number under treatment, is 7.09.

46 of the patients admitted were found to be suffering from monomania; 27 from acute mania; 27 from dementia; 21 from melancholia; 5 from epileptic mania; 4 from idiocy; 3 from general paralysis; 2 from chronic mania; 1 from recurrent mania; and 3 from puerperal mania.

The physical condition of the patients on admission still continues to be of the same unfavourable character to which we have so often directed attention. Of the 139 patients admitted, only 15 could be recorded as in thoroughly good physical health; 57 were in a fair condition; 39 were frail; 6 very frail; 7 frail and paralytic; 2 were entered on the Registers as frail and emaciated; 1 as frail and exhausted; 2 as in good health but epileptic; 1 as very frail and paralytic; 2 as very frail and exhausted; 1 as in a fair condition but suffering from heart disease; 2 as frail and epileptic; 1 as fair but paralytic; and 3 as frail and suffering from heart disease.

10 patients were brought to the Asylum from other Public Institutions, 3 having been received from other Asylums, 4 from the ordinary Wards of Poorhouses, 1 from the Infirmary, 1 from Wellburn Institution, Lochee, and 1 from the Sailors' Home. Several were also brought direct from the Police Office, having either gone thither and given themselves up on imaginary charges, accused others of injuring them, or been found on the streets insane and unable to take care of themselves. 3 were re-transfers from the Lunatic Wards of Poorhouses, cases which in some way or other had been thought unsuitable for detention in these Wards. One of the patients received into the Asylum was found early one morning rolling about on the grass in front of the Buildings, and being evidently unfit to be at large was admitted on an Emergency Certificate. He was afterwards identified as having been at one time in a neighbouring Asylum; and his friends having been communicated with, he was allowed to leave the Institution in charge of the Inspector of Poor, Perth. It has again to be recorded that many of the patients admitted were well advanced in years: one being 63; two, 64; one, 65; two, 66; two, 67; two, 70; three, 71; one, 74; and one 76 years of age.

Of the patients discharged recovered, 4 had been under treatment for periods varying from 2 to 3 months; 14 under 6 months; 14 under 9 months; 5 under 1 year; 19 under 2 years; 2 under 3 years; and 1 under 4, 5, and 8 years respectively. The discharge of so many patients who had been more than two years resident in the Asylum was in a great measure the result of an effort made to reduce as far as possible the number of inmates by sending the most likely cases out of the Institution on trial. In order to do this efficiently and safely, advantage was taken of the statutory powers which allow patients to be out of Asylums on pass for a period not exceeding 28 days. Several were returned to the Asylum before the 28 days had expired, having proved in some way or other unsuitable for liberation; but the above statistics show that on the whole the experiment was successful.

As already stated, the entries in the obituary register amount to 33 in all. Of these, 14 refer to male and 19 to female patients. In 7 cases death resulted from paralysis; in 5 from phthisis; in 5 from general paralysis; in 4 from senile decay; in 2 from exhaustion; in 3 from heart disease; and in 7 cases bronchitis, pulmonary congestion, erysipelas, chronic meningitis, apoplexy, marasmus, and suicide by drowning were severally the causes of the fatal results. The case last-mentioned was that of a female patient, who, although known to be suicidal, and therefore carefully watched, yet succeeded in secreting herself in one of the bath-rooms and drowning herself in the bath, although not out of sight for fifteen minutes. Artificial respiration and other means for her recovery were immediately adopted and persevered in for fully two hours, but without success.

In the Medical Report of last year it was stated that a considerable number of male patients, under charge of a few trustworthy attendants, had already been residing for some time in the New Asylum, and had been busily engaged in putting the house in order, preparatory to the removal of the rest of the inmates. On the 14th July this number had been increased to 47, including attendants; on the 22nd July, to 64; on 11th August, to 81; on 18th August, to 113; on 29th August, to 118; on 30th August, to 144; on 1st September, to 160; on 4th September, to 186; on the 7th September, to 220; on the 12th September, to 242; on the 15th September to 264; on 22nd September, to 274; on 27th September, to 296; on 29th September, to 308; on 6th October, to 326; on 16th October, to 342; and on the 17th October the removal of the whole Establishment, amounting to 358 individuals, had been effected in safety, no accident having occurred, nor any special difficulty worthy of notice having been encountered.

Considering the time of the year that the transference of most of the inmates took place, and the fact that many were aged and infirm, the amount of physical derangement which always accompanies the removal of so large a number of the insane from one Institution to another has been considerably less than was anticipated, for, with the exception of a few rather severe cases of erysipelas, which however had shown itself in the Old Asylum, and had probably been due to the overcrowed state of the female pauper Wards there, and the occurrence of an attack of diarrhœa, which threatened at one time to assume an epidemic form, but which was fortunately confined to 10 or 12 of the more degraded female patients, no serious illness has taken place. On the contrary, the physical health of many, especially of those engaged in farm and field operations, has very materially improved. It is also a fact worthy of notice, contrary to what was expected, that the removal has not increased materially the actual death rate, this year's mortality having been frequently exceeded in the Old Asylum, where such disturbing influences were not in operation.

As regards the internal arrangements of the Institution, the hot-water heating apparatus and the steam-cooking apparatus have been found to answer well, with the exception of the means for removing the steam coming off from the meat boilers, which are inadequate and will require some slight modification. The laundry machinery has wrought well and been found suitable, and the steam-engine power ample for its purpose. A certain loss of heating power having, however, been experienced in the operation of the steam boiler, a competent engineer has recently carefully examined it and its connections with the hot-water cisterns, and has reported that this can readily be remedied by the addition of a stop cock to the feeding pipe, and by covering the underground steam pipes with felt and the cisterns with wooden cases.

One of the most marked improvements, however, has been that in the Dining Hall. Accustomed in the Old Asylum to have their food served out in the different wards and day rooms, it was at first feared that a difficulty might be experienced in inducing so large a number of patients, and of both sexes, to take their meals in the same hall, but this has not proved to be the case. With comparatively few exceptions, namely, the very violent or degraded, all the patients readily fell into the new system, and now breakfast, dine, and sup together with a wonderful amount of quietness, order, and decorum. A portion of the hall, including the large bow-window, has been screened off by a curtain 7 feet high for the exclusive use of the private patients, and forms an admirable dining room for this class, and as their hours for meals have been arranged different from those of the poorer class of patients, thorough privacy is secured, and no inconvenience results to either portion of the community. Several of the more intelligent private patients have frequently expressed their appreciation of the improvements thus effected in the dining arrangements.

In consequence of the financial difficulties in which the Asylum has been hitherto placed and the consequent necessity experienced of restricting all expenditure to what was absolutely required for the safety and well-being of the patients, much less progress has been made in painting, papering, and otherwise furnishing and adorning the house than could have been desired, and in more favourable circumstances could have easily been effected by the inmates. Still, especially during the last two months, a good deal of useful work has been done in this direction. Under the supervision of the male Head Attendant from 4 to 5 male patients have been busily engaged in oil painting and stencilling the day-rooms and corridors on both sides of the house. The improvement thus already effected is very marked, and will add much to the comfort of the patients and sanitary state of the building, the only expense incurred being the price of the materials used.

The farm and grounds have afforded ample and very beneficial occupation for a large number of the male patients—to more than double the number who were formerly thus employed —a large proportion being engaged in the usual garden and farm work, while others have done good service in breaking stones and repairing the roads, which were found in a very unsatisfactory state. And although much attention has necessarily been directed to these more important matters, it is but right to mention that the more agreeable forms of distraction, namely, the recreation and amusements, have not been allowed to fall off. During the winter months the usual fortnightly dancing and musical parties were resumed and continued till the middle

of March, the New-Year's festivities being greatly enhanced by a private theatrical entertainment, somewhat similar, but of a more ambitious character, to that which during the previous winter gave so much satisfaction. The piece chosen on this occasion was "the well-known romance of real life by John Maddison Morton, entitled Box AND Cox, followed, after an interval, by a Musical Entertainment by a world-renowned troupe of Christy Minstrels," nine in number, and dressed in the usual characteristic and orthodox costume, and who, as the playbills circulated among the audience informed them, " never had performed and never would perform out of Dundee and its neighbourhood." In other words, the artists and minstrels were all drawn from the staff and inmates of the Asylum, and it is not too much to say that the entertainment was successful beyond expectation, and proved a source of much enjoyment to the rest of the patients.

As was only to be expected, the changes among the servants and attendants have been numerous; and only quite recently it has been learned that, in consequence of his appointment to a similar situation in England, the Asylum is to lose the services of Dr. BENHAM, our Medical Assistant, who for the past two years has so zealously discharged the duties of his office, and by his ready participation in all the schemes for the amusement and recreation of the patients has contributed much to their comfort and welfare.

JAMES RORIE, M.D., L.R.C.S.E.,

Resident Physician,

of Morch the New-Year's festivities being greatly enhanced by a private theatrical entertainment, somewhat similar, but of a more ambitious character, to that which during the previous winter gave so much satisfaction. The piece chosen on this occasion was " the well-known romance of real life by John Maddis-n Morton, entitled Box AND Cox, followed, after an interval, by a Musical Entertainment by a world-renowned troupe of Christy Minstrels," nine in number, and dressed in playbills circulated among the antience informed them, " never had performed and never would perform out of Dundee and its not too innoh to say that the cutartainment was snecessful benot too innoh to say that the cutartainment was snecessful beto the rest of the year of the antience of the Asylum, and it is not too innoh to say that the cutartainment was snecessful bethe rest of the proved a source of much enjoyment to the rest of the proved a source of much enjoyment to the rest of the patients.

As was only to be expected, the changes among the servants and attendants have been numerous; and only quite recently it has been learned that, in consequence of his appointment to a similar situation in England, the Asylum is to lose the services of Dr. EXMAM, our Medical Assistant, who for the past two years has so zealously discharged the duties of his office, and by his ready participation in all the schemes for the annusement and recreation of the patients has contributed much to their comfort and welfare.

JAMES RORIE, M.D., L.R.C.S.E.

From the Opening of the Institution to June 18, 1883.

RATES OF BOARD.

THE following is the present Rate of Board, subject, however, to such alterations as the Directors shall judge proper, and which must necessarily vary according to the state of the funds and the expenses of the establishment. The Board in all cases must be paid quarterly and in advance. Before the entry of a Patient, the Board is to be paid up for one quarter.

First Class, includ	ing Clot	thes, &c.	, .		£0	10	0 per	Week.
Second Class, inclu	uding Cl	lothes, &	,		0	11	0	,,
Third Class, .	st them	11. 7	1.10	d. and	0	15	0	"
Fourth Class, .					1	1	0	,,
Fifth Class, .					1	11	6	"
Sixth Class, .					2	2	0	**
Seventh Class,					3	3	0	,,

The First Class: paupers belonging to the parishes that have contributed to the erection of the Asylum.^{*} The Second Class: all other paupers.

A Physician's Fee on admission is payable by the several Classes of Patients as under:

Third Class,				£1	1	0
Fourth Class,				1	11	6
Fifth Class,				2	2	0
Sixth Class,				3	3	0
Seventh Class,				4	4	0

When a patient is admitted, one Quarter's Board and the Physician's Fee, as fixed by the Directors, shall be paid in advance to the Resident Physician, and afterwards in advance quarterly to the Treasurer, on the 1st day of January, the 1st of April, the 1st of July, and the 1st of October. No part of any payment in advance, except in the cases of paupers, shall be returned, except in special cases to be judged of by the Weekly Committee; and if any patients who have been removed shall return to the Asylum, they shall be admitted in the same manner as if they had never been in the Asylum, and pay accordingly. If not removed within a year, the above fees to be repeated annually at the date of admission, as long as the patient remains in the House.

No Fees are paid for Paupers.

The Patient shall have no claim to remuneration for work done in the House.

* See List at page 19.

QUANTITIES OF THE

PRINCIPAL PROVISIONS, &c.

Purchased for the Asylum in the Years 1881-82 and 1882-83.

				188	1882-83.
