SIXTEENTH ANNUAL REPORT
OF THE
TRUSTEES OF THE STATE LUNATIC HOSPITAL.

DECEMBER, 1848.

To His Excellency the Governor, and the Honorable Council :—

The Trustees of the State Lunatic Hospital would respectfully present their SIXTEENTH ANNUAL REPORT.

During the past year, this institution has, under the blessing of Providence, continued to exert its benign influence on the most unfortunate portion of the human family, greatly ameliorating the condition of those who, by an inscrutable deprivation, will never again enjoy the light of reason this side eternity, and restoring to their friends, society, and usefulness, many whose insanity, without the advantages afforded by the Hospital, would become chronic ; thus diminishing the amount of human misery unspeakably, and reflecting the highest honor on the people of Massachusetts, by whose liberality it was founded, and in whose midst it stands a monument to bespeak their generosity, and the tenderness with which those, appointed to guard the public weal, watch over the unfortunate.

The financial condition of the Hospital is quite satisfactory. The receipts have exceeded the expenditures by fifteen hundred and forty-six dollars twenty-seven cents, notwithstanding the price of board was reduced, at the beginning of the year, from two dollars and fifty cents to two dollars and thirty-three and one third cents per week.

The whole receipts for the year ending December 1st, 1848, were forty-four thousand four hundred six dollars and thirty-two cents, and the expenditures were forty-two thousand eight hundred and sixty dollars and five cents. The balance on hand, December 1st, 1847, was six thousand two hundred eighteen dollars and forty-seven cents,

leaving a balance on hand, December 1st, seven thousand seven hundred sixty-four dollars and seventy-four cents.

About three years ago, an opportunity presented of purchasing a valuable tract of land known as "Chandler Hill," containing twenty-seven acres, for three thousand dollars. The land was needed for the use of the Hospital, but the Trustees were not authorized by law to pay a sum exceeding five hundred dollars annually for the purchase of real estate. Hon. Stephen Salisbury proposed to purchase and hold the land for the use of the Hospital, receiving interest annually for its use, and to deed when paid for. The Trustees thought best to accept the liberal offer of Mr. Salisbury. The Trustees would suggest the propriety of having legislative authority granted for paying for said land out of the funds now lying idle in the hands of the Treasurer, which may be done without prejudice to any other wants of the Hospital, and would relieve it from the payment of interest and taxes on the land. The lot is now considered worth four times the amount paid for it by Mr. Salisbury.

The Report which the Treasurer will submit to you, affords an ample and complete exhibition of the financial condition of the Hospital.

The able Report of Doct. Chandler, which is herewith submitted, contains much valuable information, and, with the statistics, forms a safe basis for many interesting and important deductions in regard to insanity, and the condition of the Hospital in its details.

Dr. Chandler brings to the arduous duties of Superintendent, abilities rarely equalled, and an untiring zeal in the faithful execution of them. We cheerfully accord to him our unqualified approbation and thanks.

We regret to state that Charles P. Hitchcock, Esq., in consequence of ill health, resigned his place last April. In the retirement of Mr. and Mrs. Hitchcock, the Hospital has lost a kind and affable Matron, and a Steward than whom none could be found more "faithful." His judicious and efficient services need no encomium, for he has devoted many of the best years of his life to the interests of the Institution, winning, by his kindness and gentlemanly deportment, the esteem of all, and, by his scrupulous fidelity, the respect and confidence of those officially connected with him. We trust the consciousness of having contributed, in no small measure, to the comfort and happiness of those who seek an asylum here, will lend additional zest to the pleasures of the retirement he has chosen, and to which he

carries our hearty thanks and our kindest wishes. Since his resignation, the duties of Steward have been discharged under the immediate direction of the Superintendent, until the first December, when Mr. Thomas Hill was appointed Steward. Miss Elizabeth A. Reed has been appointed Matron.

Dr. Rufus Woodward, one of the assistant physicians, has vacated his place to visit the hospitals of Europe, that he may become intimately acquainted with their arrangement, and the mode of treatment adopted in them, and the more completely to perfect himself in his profession. The vacancy was supplied by the appointment of Dr. Thomas E. Hatch, who has performed the labors allotted to him with success and ability, but who has been compelled to give them up on account of ill health. To him, and to Dr. John R. Lee, the senior assistant, an acknowledgment is due for their valuable services. Dr. Merrick Bemis has been appointed in his place.

During the past year, fifteen strong rooms for the more violent female patients have been completed and brought into use. They fully answer the expectations of those having charge of the Hospital, and the result proves them to have been a *desideratum*, for they are of the greatest utility in promoting the comfort of the more quietly disposed patients, by removing from their wards those more excited.

The amount paid for the building containing the strong rooms, as shown by the Treasurer's account, is forty-six hundred seventy-three dollars and seventy-seven cents. By a resolve of the Legislature, in 1847, the Trustees were authorized to use the balance of the Johnson Fund, thirty-seven hundred eleven dollars and fifty-three cents, together with an appropriation of six thousand dollars from the State Treasury, for the purpose of erecting strong rooms for the more furiously insane. Only fifteen hundred dollars of that appropriation have been drawn from the State Treasury; there is now in the hands of the Treasurer of that fund, five hundred sixty-five dollars and seventy-six cents.

The average number of patients, the past year, has been four hundred and four, one hundred and fifty of whom are foreigners, and mostly State paupers. The maximum capacity of the Hospital for the comfortable accommodation of patients, and the most effectual application of remedial treatment, has, some time since, been reached, so that now the Institution labors under a disadvantage, notwithstanding the addition of the fifteen strong rooms.

The number of incurables is every year increasing, consequently,

unless more room is provided, many, whose insanity is recent, and who, if sent here, might reasonably be expected to recover, must be denied the benefits of this charity, while the wards will be filled by those whose condition is hopeless, unless the alternative is adopted of turning out the incurables upon their friends, or sending them to pauper-houses or prisons. This expedient is revolting to those who know how much more comfortable and happy they are made by a place here, where every thing is adapted to their peculiar circumstances.

The insane not only deserve the sympathy of those to whom the use of their faculties is still vouchsafed, but they have a positive claim to our substantial aid, which we cannot repudiate with impunity. To discharge the obligation which rests upon the people of this Commonwealth, more ample accommodations must be supplied for these "poor who are always with us," and the time has come for the question to be asked, Shall we provide a place for *all* who need the benefits of an Insane Hospital, or shall we allow a portion of our fellow-beings, who cannot be admitted here, to forego that amelioration of their pitiable condition, and, in many cases, that effectual cure, which cannot otherwise be obtained than in an Institution for the Insane? The Trustees will not here express an opinion as to whether it is more expedient to enlarge the present establishment or to erect a new Hospital in some other part of the State; but they are unanimous in the belief, that no time should be lost in making more provision for the proper accommodation of this most unfortunate portion of the human family.

SIXTEENTH ANNUAL REPORT
OF THE
SUPERINTENDENT TO THE TRUSTEES
OF THE
STATE LUNATIC HOSPITAL.

GENTLEMEN:—Another year of Hospital duties and trials has past. Its results, and the condition of the Institution, are herewith imperfectly presented. The results are favorable to the cause of humanity; and the condition of the Hospital, during the year and at its close, is prosperous. For this state of things, so agreeable to our own feelings, we acknowledge the guiding hand of Providence, and the hearty co-operation of all our associates, in the management of this great charity.

The Hospital has, at all times, been full to overflowing. There have been more inmates than ever, and the apartments more crowded, although there have been added, during the year, fifteen rooms. There has been no severe accident to either patients or those who have the care of them, to interrupt the order and harmony of our daily duties.

The following tables are presented to meet the requirements of the statutes, and to continue a former custom, which embodies the most material facts in figures.

TABULAR VIEW

Of the Condition of the State Lunatic Hospital, from December 1st, 1847, to November 30th, 1848, inclusive.

No.	Time of admission.	Age when admitted.	Sex.	Civil condition.	Supposed Cause.	Duration before admission.	By whom committed.	Time spent in the Hospital.	Discharged or Remaining.	In what state.	Suicidal. Hereditary. Periodical.	Homicidal. Periodical.

TABLE 2.

Showing the Admissions, and the state of the Hospital, from December 1st, 1847 to November 30th, 1848.

Patients in the Hospital at the commencement of the year, . 394	Cases, the duration of whose insanity before admission, not ascertained, 7
Males, 207	Males, 4
Females, . . . 187—394	Females, . . . 3—7
	261
Patients admitted in the course of the year, 261	Patients committed by Courts, . 166
Males, 128	Males, 91
Females, . . . 133—261	Females, . . . 75—166
Whole number of Patients in the Hospital in the course of the year, 655	Committed by Overseers, . . . 22
Males, 335	Males, 10
Females, . . . 320—655	Females, . . . 12—22
Patients remaining in the Hospital at the end of the year, . 409	Private Boarders, 73
Males, 217	Males, 37
Females, . . . 192—409	Females, . . . 46—73
	261
	Foreigners admitted during the year, 65
	Males, 38
	Females, . . . 27—65
Of the admissions, there were cases of less duration than one year, 149	Foreigners discharged during the year, 36
Males, 69	Males, 17
Females, . . . 80—149	Females, . . . 19—36
Of longer duration than one year, 105	Foreigners remaining in the Hospital at the end of the year, 150
Males, 55	Males, 76
Females, . . . 50—105	Females, . . . 74—150

This year commenced with three hundred and ninety-four patients in the Hospital. The smallest number, at any time, was three hundred and eighty-eight, and the largest number was four hundred and twenty-eight. The average number for the year has been four hundred and four. Last year, we thought the institution was crowded to

its fullest capacity; but, some part of this year, we have been more pressed with patients, for accommodations, than ever.

There have been two hundred and sixty-one admissions, which make, with those here at the beginning of the year, six hundred and fifty-five who participated in the benefits afforded by the Hospital.

The number of foreigners sent in this year is greater than ever before. But a very small per cent. of these cases are supported otherwise than by the munificence of the Commonwealth. They are mostly sent in by the legal tribunals; and, unless they recover and are able, on leaving the Hospital, to provide for themselves, they remain in our wards. Before becoming insane, they are comparatively destitute and homeless; and afterwards, when what little reason and forethought they may have had, is deranged, they are peculiarly the objects of sympathy and commiseration for the benevolent. In this Hospital, no distinction to their prejudice is made between them and those who were more favored in their place of nativity.

This year ends with about one hundred and fifty, supported out of the Treasury of the State. It will be seen, by the following table, made up from previous reports, that this class of patients have, of late, been rapidly accumulating:—

Whole number of foreigners in the Hospital during

1837,	23
1838,	45
1839,	29
1840,	30
1841,	47

The number remaining at the end of

1842,	34
1843,	38
1844,	38
1845,	57
1846,	52
1847,	121
1848,	150

Those who left the Hospital had generally recovered.

TABLE 3.

Showing the number of Discharged and Deaths, and the Condition of those who left the Hospital, from December 1st, 1847 to November 30th, 1848.

The number of discharges the past year must of necessity have corresponded very nearly with the admissions, as the Hospital was full at the commencement. One hundred and thirty-six have recovered, and have returned to their accustomed avocations and stations in society; only one year has shown a larger number of cures. The cures are as perfect as they are from any disease. Some few relapse from returning too soon to the former scenes and associations of their excitement.

It is often difficult to ascertain how long the disease has been undermining the system and interrupting the healthy functions of the brain.

Several have been committed to our care whose name even we could not learn. They appeared in the Commonwealth suddenly, as though they had grown up in a night; and, when they had fallen into the hands of some benevolent Samaritan, they were sent to us. Some of these individuals have recovered and told us their history, and some still remain with us. How many of these pitiable objects were thrown upon this State by other communities, for their support, is not known.

Thirty-two have been discharged, partially restored. Some of them were taken away by their friends after the violence of their malady had passed off, because of their pecuniary inability to support them here, and others we have requested to have taken away because of our great numbers. Most cases of insanity are better off, and their sufferings ameliorated by a residence in the Hospital. The incurable are made as physically comfortable as their mental condition will allow, while with us; and it is painful to see them removed from our comfortable wards to almshouses, especially where there is much intelligence or self-respect left. Not that all of our household are made happy here. If it were so, some of those in the community called sane, would here seek relief from their troubles, real or imaginary. A good share of our family are comparatively happy. This fact the numerous visitors, who have daily passed through our wards, have witnessed. But there are others whose sorrows weigh heavily upon them. Some give utterance to their grief, and others let their own hearts alone know their bitterness.

TABLE 4.

Showing the number of Admissions and Discharges, and the average number in the Hospital, each month in the year.

	Monthly Average.	Admissions.	Discharges.
December, 1847,	398	28	25

October, "	413	16	22
November, "	410	17	19
Average for the year,	404	.	.

The number of rooms designed for dormitories for patients, is three hundred and sixty, but our average number of patients has been forty-four more than that. Perhaps some of the inmates should have been sent away, that the accommodations for those who remained, might have been more ample. But it is difficult to discriminate, where all have nearly equal claims to remain. It is contemplated by the statutes that foreigners should be sent off first to make room for those who remain, whenever the Hospital becomes too much crowded. But they are generally the most destitute class of all our patients, and their relatives are unable to afford them assistance, so that, if this class were sent away, it would be to consign them to the jails of the several counties.

In this crowded state of the Hospital, it is no small part of our difficulties in its management, to know how to dispose of the surplus. When every dormitory is occupied, and as many of them have two beds in them, as we can find safe and suitable room-mates for the night, and beds in every hall on the floor, for the night, for quiet patients, then it is we dread to see new and violent cases brought to us. To say who of our most quiet boarders shall give up a comparatively comfortable room and bed for one less so, on the floor, is not at all pleasant to our feelings.

TABLE 5.

Showing the whole number of Residents during the year, the average number at the end of each year, and the Expenses of each year, for the sixteen years the Hospital has been in operation.

The Year.	The whole number of Residents during the year.	The average No. each year.	No. at the end of each year.	Current Expenses each year.	Annual Expense per Patient.
1833	153	107	114	\$12,272 91	\$114 67

1848	655	404	409	42,860 05	106 09

It is seen, by this table, that the patients in the Hospital have been increasing every year. But it would now seem that its utmost capacity had been reached. Still, the great majority of the insane, in this State, are not in this nor any other proper Institution. Convenient and well-ordered accommodations for the insane are yet needed in this Commonwealth, and would be occupied immediately by proper subjects, if the expenses could be placed within the means of those who support them. Poverty follows very closely in the train of insanity. It is with only a few favored individuals that they can be long separated. Not more than five per cent. of those, in this Institution, have been well able to meet the expense of their maintenance here. The families of some others, making a larger per cent., struggle on against their hard fortune, and, by denying themselves many of the comforts of life, pay their bills here as they become due. This is the class of patients that most needs to have their burdens made lighter by the generous hand of the Commonwealth.

It is true economy with us to expend all that may be necessary for the most speedy cure of all the curable patients; and it is just and humane to spare no expense of time or money to relieve, as far as possible, the mental condition of those who cannot be entirely restored, and to render the condition of the incurable as happy and as comfortable as the nature of their several maladies will allow.

Such of the insane as become so by causes beyond their control, have a just claim upon the community for a comfortable and respectable support. And it is indeed true, that all are liable to become insane. Every year, some of our best minds become deranged, and a retreat from the cares and troubles of life is sought for them in the Hospitals of the country, which shield them from many sources of affliction, and afford them increased chances of recovery. The teasing and over-anxious interference of relatives is avoided in Hospitals. There, too, he is not the object of particular observation to the curious. Freedom of action and motion is much less restricted than is often thought necessary in one's own home. Full liberty to move about is given in our wards, unless others are disturbed thereby. When restriction of one's liberty becomes necessary, our wards answer that purpose much better than personal restraint. About one half of the insane in the community would be, from the character of their maladies, made more comfortable and happy in Hospitals than out of them, and the community relieved of the fear and anxiety that is naturally produced by their presence.

The harmless insane need not be restrained of his liberty, but the dangerous surely ought. The Hospitals of this country possess many advantages over the common physician, for the treatment and management of most cases of insanity. The patient is more constantly within the observation of the physician. The nurses are more competent to their peculiar duties. The causes which brought on the disease can be more readily removed, and new associations brought to bear upon the patient's mind.

The rooms built the past year for the noisy and violent females have of late been fully occupied, and they have answered our anticipations in regard to them. They are a part of the main building, an extension east of the north Johonnot wing. Their peculiar internal arrangements do not mar the architectural harmony of the outside of the Hospital. The five rooms in each of the three stories are placed within the outside walls, leaving an area in front of seven feet, and, in the rear, of three feet. These rooms are eleven feet by six in the clear. The pannels of the doors are a net-work of wire, and there is a large window in the rear of each room, with gratings. This arrangement allows the free circulation of air between the spaces in front and rear, and the rooms themselves. When it is necessary to have artificial heat, a current of warm air is brought up in the walls from a coal furnace in the basement, to each story, to give the proper temperature to the air in the rooms and spaces round them. From each story, there are fifteen ventilating openings, carried up to the attic in the brick walls. Five of these start from the top, and ten from the bottom of the rooms, or near the floor. One of the last starts from just over the soil-pans in each room. The escape of foul air from the attic is by a large fan-light at the eastern extremity, and by a sky-light on the south side of the roof, and by a large opening, a foot square, in the brick chimney, carried out to the top of the chimney, separate from, but heated by, the smoke of the furnace. Thus a forced current of foul air will, in some degree, take place through this ventilator.

The only real objection to the location of these rooms is, that the view of the end windows of the galleries adjoining is obstructed. These windows now open into a veranda, ten by thirty-six feet, which admits some light to that end of the galleries, but a view of the surrounding country from these windows is cut off. These Johonnot wings, however, are in the form of a cross, and the windows of two of the ends are unobstructed, while the other two open into covered verandas.

The objection to the location, that the noise of patients in these apartments would disturb the galleries adjoining, is not at all serious, because the noise is not often heard through the two brick walls and a veranda.

The advantages of this attachment of these rooms to the main building greatly overbalance the evils. The access is easier for the patient and nurses. The patient can be, and often is, taken into galleries, where a better class of patients are, and placed back into these rooms several times in a day, as the state of their excitement may require.

The location of these rooms is very similar to that of rooms, for the same purpose, at the new Butler Hospital, at Providence, R. I., and at the new Hospital at Trenton, N. J., and at Columbus, Ohio, of which the learned and judicious Superintendent of the Lunatic Asylum at Utica, N. Y., says, in his correspondence to the *Journal of Insanity* :—
“The arrangements for noisy and violent patients, and verandas, we were particularly pleased with, being better than we have ever seen.”
The easy access and supervision of these rooms give them decided advantages over isolated solitaires.

The strong rooms for males have not been erected, as was contemplated by the Resolve of 1847. It was thought best to build for females, and prove them, before those for males were commenced. These rooms are now finished, and answer our expectations. They cost \$4,673 77, which is \$311 56 for each room. If more rooms were to be erected for females, I would propose a similar plan. The subject has been delayed, because the Resolve of the Legislature of last winter contemplated increasing greatly the accommodations for the insane in the State, provided such were needed. The number of the insane and their wants, had been suspected by us to be what the commission found true in regard to them, during their investigations the past season. If a new Hospital is to be erected, as it is presumed the commission will recommend, then I would advise that the erection of the strong rooms here for males be still further delayed. But still, we have felt the want of such rooms very much for some years, and should have them unless relief is afforded by withdrawing from this Hospital some of the violent male patients.

When the commissioners, under the Resolve of 1848, for inquiring if any further accommodations for the insane were necessary, in this Commonwealth, visited this Hospital, I stated to them that I thought such accommodations were necessary; that it would not be convenient,

nor would it be judicious, to enlarge this Hospital much, if any, further. I also stated that, in my opinion, it would be desirable to separate the sexes, if there were to be two public institutions in the State. Some of the Hospitals in Europe are for one sex only. There are some advantages which suggest themselves, in having the insane in an institution, all of one sex, and few or no disadvantages. I suggested that three small Hospitals, in different sections of the State, would have some advantages over a large one. People near an institution avail themselves more of its advantages than those at a distance. Small institutions can be more thoroughly managed and controlled, by its responsible officer, if not more economically conducted. But, if only one Hospital was to be erected, I advised that it should be for males, and be where it would be accessible by railroad travelling, and where land enough could be obtained. If it was for males, a mile square would not be too much land for farming purposes; and then, if the buildings were placed near the centre, the institution would not be encroached upon.

Such a Hospital could be more economically managed in the western section of the State, but it would be more accessible to a majority of patients nearer the capitol.

Males can be supported in a Hospital somewhat cheaper than females can. Their labor is more profitable, and they are satisfied with less attention of nurses. In this Hospital, about fourteen dollars per annum is expended for attendants' care of each male patient, and about twenty-one dollars for each female. Females, too, require a larger carriage establishment. Probably the expense of provision and clothing is somewhat larger for males than females. These considerations would operate to the disadvantage of this Hospital, if it was devoted to females exclusively. But it would be an expense that would fall upon those where it more justly belongs than it now does.

This Hospital, if one sex were taken away, would probably fill up again in a few years with the other sex. If the males should leave it, the apartments they now occupy should undergo a thorough repair. The floors, plastering, and much of the furnishing, should be renewed. It is almost impossible to do much towards repairing our wards when they are occupied every day and crowded as they now are. But still we have, within two years, repaired and painted the floors and standing work of four of the female galleries. Public buildings should, at all times, be kept in good condition. Some parts of this Hospital

have been in constant hard use for sixteen years, and the effects of such usage is plainly visible.

The expenses of the year do not much exceed that of previous years. It has been our intention to be prudent in the financial management of the institution; but in no thing to diminish the comfort of a single patient.

Within the last year, an aqueduct, for the extinguishment of fire, has been laid. It is an extension of the city aqueduct. The pipe is of iron four inches in diameter. It is six hundred and fifty-nine feet long. The hydrant is in the rear of the chapel, and is one hundred and fifty feet below the fountain-head. It cost \$644.58, and two hundred feet of hemp hose, with pipe, cost \$75.50, making \$720 08. On our first experiment, it threw a column of water on to the roof and over the Hospital. It will be very effective in case it should ever be needed.

But a small per cent. of those remaining are recent cases, only about one in ten. Few of the chronic cases recover. The curability of insanity diminishes with its duration. Recent cases, after excluding those arising from palsy and epilepsy, which almost never recover, are as likely to get well as fever or rheumatism. When removed from the exciting causes, diseases of the brain and nervous system yield readily to curative treatment under judicious management. The indications are, to restore the organs of the body to their healthy standard, and divert the mind from its morbid trains of thought.

To fulfil these indications, we have the assistance of medicine, baths, cold and hot, equable temperature of our wards, a prescribed diet, and the means of classification of our inmates into such society as corresponds with their malady and present state. Labor and amusements, reading, riding and walking about the fields and the city, tend to interest the attention and change the current of the thoughts, and keep the mind from dwelling upon its own insane fancies.

Our means are ample, and our success depends upon our judicious application of them.

Cases arising from Physical Causes,	105	1103
Cases arising from Moral Causes,	47	808

The causes of insanity are usually divided into moral and physical. But they are usually complicated. Both a physical and a moral cause are combined to produce the result. In most cases, the general health had been suffering, and the system had become susceptible to slight impressions, and then some moral cause, as some severe domestic calamity, would easily disturb and derange the reasoning powers. Such, or similar, are the accounts given us by their friends in almost every case. Intemperance has directly produced a large per cent. of the cases of insanity. The continued use of alcoholic drinks produces functional and soon organic disease of the brain itself, which is almost certainly incurable. The symptoms of this form of insanity are somewhat peculiar,—a confused mind, a horrid apprehension of pending evil, timidity and rashness, and often a homicidal propensity. The term *horrors*, is peculiarly descriptive of these poor sufferers' state of feeling. The indirect causes of insanity, produced by intemperance, are numerous. Much of the domestic affliction that overwhelms so many families is attributable to this cause. While the head of a family is sinking himself by the indulgence of his besotted appetite to a level with the lowest of his race, hard work, poverty, disgrace, and disappointed ambition become the companions of the wife and children. It would be strange if their reason should not occasionally be crushed under such a great calamity.

Diseases of the nervous system, such as palsy and epilepsy, are apparently becoming more frequent causes of insanity.

TABLE 10.

Occupation.

The Hospital has been remarkably exempt from all acute diseases the past year, except for about six weeks, during the heat of summer, when bowel complaints were rife and troublesome. Three cases proved fatal, where the patients had become exhausted by the excitement of insanity and other diseases. One kind and faithful nurse, who had endeared herself to the unfortunate insane by eleven years, devoted to their welfare, in this Hospital, was cut down, in the midst of her duties and her usefulness, the past season. She was the second one of this large family of assistants that has died since the Institution has been in operation. While disease and death have been so often among those committed to our charge, we feel as though we had hitherto been providentially spared.

Death has generally taken its victims from the ranks of those who had become much diseased in body, and who were dragging out a miserable existence. Cases of palsy are almost sure to terminate fatally within three years. There are several cases of palsy now in the Hospital. It is a disease almost peculiar to the male sex. It is very seldom that general paralysis is met with among females. The active man of business, who has contracted habits of intemperance, is very liable to become paralytic.

Closely allied to palsy is a disease of the nervous system, resulting in convulsions of an epileptic character. The insane, who have epileptic fits or convulsions, seldom or never recover. They continue along many years, perhaps, but almost always becoming gradually more diseased and more demented.

From these two classes of patients, much of our fatality proceeds.

Consumption and disease of the functions of nutrition, or marasmus, are very common in the last stages of fatal cases of insanity.

It is shown by this table how long patients have been insane before being brought to the Hospital. In a large part of the cases, the disease has been running on more than a year. A few are brought to us after having lived more than thirty years in a state of mental derangement. It is not to be supposed that there is much hope of recovery in cases of so long standing. They may have become more unmanageable, and come to us for care and safe keeping.

One boy, less than eight years old, was brought to us the past year. He was taken insane soon after having a fever before he was three years old. His mind has not expanded much. His case is a hopeless one. We thought his habits were improved by a few months' residence under our care. But he will be a troublesome person to manage, for those who may have the care of him. The middle period of life sends us the most patients. A few come to us after they have passed the age allotted to man.

This table also leads us to suppose that the unmarried state is unfavorable to a healthy condition of the mental faculties. This is undoubtedly a true view of the matter. The unsettled purpose of life with the unmarried, and their solitary, wandering habits, tend to distract the mind and injure the physical health. Whereas the necessity the married person has, of concentrating his efforts to supply the wants of a family, and his attachment to home and place, all tend to induce habits of sobriety, and a healthy activity of body and mind.

Man needs the sympathies of his fellow man, and he needs motives to call forth activity of mind and body sufficient for their own healthy growth and condition. Such sympathies and motives to action are best presented by the domestic relations.

TABLE 13.

Showing the causes of Insanity as affecting persons pursuing different occupations.

Per cent. of deaths of all in the Hospital each year, .	2½	3½	3½	3½	3½	4½	5½	3½	3	2¾	4¾	3	4½	6	5	4¾

There have been discharged 2675, of whom 1433 recovered, which is 53½ per cent.
 And 272 have died, which is 10 per cent.

Amusements of various kinds have been introduced into all the galleries, to keep active the minds and invigorate the physical systems of the patients. Some, who feel as though they cannot labor, may be induced to take exercise in this way. The in-door plays are chess, cards, backgammon, rolling of a soft ball over our long hall floors, which is much like nine-pins, graces, jumping the rope, &c.; and out-door amusements consist in the game of quoits, base ball, walking in parties, with their attendants, and alone, when the individual has gained our confidence. The double carriage has been devoted entirely to the use of the females. And the male Supervisor has, every pleasant day, carried out some of the feeble male patients in the covered one-horse carriage. It is our intention to have every patient go out into the open air frequently, unless there is some special reason to forbid it.

The Matron's sewing parties have been continued every two weeks. These gatherings are made pleasant by the social meeting together of about sixty patients, with their attendants. After sewing for about two hours, a treat is served around. Sometimes the pianoforte helps to enliven the assembly. The greatest degree of decorum is here observed, as any breach, in this respect, would render it very doubtful whether the offending party would receive another invitation. These parties are anticipated with pleasure by most of the ladies who attend them. Some of the efforts of these parties go to supply articles for the show-box. We have quite a number of patients who work many curious, fancy, and useful articles, which are sold from this box. Strangers, visiting the Hospital, are often glad to procure some ingenious article, made by some of our inmates, as a memorial of their visit. There has been realized, the past year, from the profits of sales made from this box, one hundred and two dollars and fifty cents.

Some books have been purchased to replenish the library connected with it, and for the use of all the patients. And, as a token of their respect for their Supervisor, who has, for about ten years, been devoted to the best interests of the Institution, the patients and attendants of this society have, at an expense of sixty dollars, procured a portrait of her, by Mr. Osgood of Salem. It was designed that this likeness should be hung up in some suitable place in the Hospital. It is a good painting, and will be a useful ornament to the Hospital, if those who come after her shall be stimulated, by her example, to a more disinterested performance of their duties.

The library contains several hundred volumes of miscellaneous

books. It is frequently replenished with interesting works, which its constant and severe usage seems to require. Many of our inmates read with pleasure and profit. Periodicals are furnished by some of our friends. And we are glad to acknowledge the constant reception, from their proprietors, of the following :—The Daily Advertiser, Recorder, Olive Branch, Youth's Companion, Christian Witness, Christian Watchman, Zion's Herald, Prisoner's Friend and Harbinger, from Boston. The Springfield Republican, Fall River Monitor, Old Colony Memorial, Gospel Messenger, Worcester Cataract, Daily Spy, Monthly Religious Magazine, Christian Citizen, Lynn News, Salem Register, Congregational Visiter, Southern Journal of Medicine and Pharmacy, Neal's Saturday Evening Gazette, Sandwich Observer. A copy of the Report of the Commissioner of Patents from Hon. E. Burke himself, and public documents from Hon. Charles Hudson and Hon. D. P. King.

From the printing offices in this city, we have received bundles of their exchange papers. Mr. Thompson, of the periodical depot, has sent our inmates valuable reading matter. And Mr. Gray has sent our people the Daily Traveller and the Daily Mercantile Journal. The Rev. Mr. Norris still remembers us, and sends us frequently a large bundle of exchange papers.

Besides the above, our assistants receive several newspapers, which go into the general use of the Institution.

An evening school has, the past month, been in successful operation. Some fifteen or twenty male patients have attended. It promises to be of some use to those who take part in it.

The religious exercises continue to be one of the most interesting and important means used in the management of this Hospital. The public teaching from the desk on the Sabbath, and the evening services, at half-past eight, have been conducted by the same chaplain, who has so acceptably performed the same service for more than eight years. The Bible class, in the afternoon of each Sabbath, for such as choose to attend, the reading of the Scriptures by all in their own rooms, and social singing parties for the cultivation of sacred music, have been kept up.

Our congregation, on the Sabbath, consists of some two hundred patients, with their attendants, and some strangers from the city. The chapel and Johonnot Hall, thrown into one room, by opening the large folding doors between them, are usually filled with as quiet and attentive an audience as can be found in the Commonwealth. It is

now quite rare that our meetings are disturbed by any one. The appearance of the meeting is, in all respects, like that of any orderly congregation in New England, in their own house of worship.

The insane appreciate their religious advantages here. They can discriminate between what is wrong and what is right, unless it is upon the subject of their delusions. They as heartily repent of their transgressions, when made sensible of them, as any rational person. Many have a deep religious feeling, and a strict sense of justice. It is only when their delusions and ungovernable propensities intervene, that their thoughts and actions vary from that of others. Hence reason, example, and persuasion, exert over them their appropriate influence, and enable them to walk with more propriety in the paths of rectitude and religion. The judicious application of the precepts of the Gospel consoles the melancholic in his despair, gives hope to the timid, and restrains the rash in his headlong career. There are but few that would not be benefited by listening to such preaching as the "Sermon on the Mount."

Our inmates have performed as much labor the past year, on the farm, as usual. The garden has looked as well and has yielded as abundantly. The effects of labor on those who work are salutary, unless they over-work, which is not apt to be the case, except in certain recent cases. Physical health is promoted, and mental quietude is increased, by out-door exercise, and some profitable labor is the most agreeable way of taking it. We try to furnish our inmates with as much exercise on the farm, and in the garden, as they can be induced to take. It has been, in a few cases, the great means of their recovery. This establishment has been liberally supplied, during the summer, with vegetables from the garden, and, besides these, that have been consumed at the time, the following list, with their prices, is presented, with the products of the farm :—

110 bushels of corn	at	90 cents,	.	.	.	\$99 00
75 " potatoes,	"	50 "	.	.	.	37 50
25 " dry beans,	"	\$1 25 "	.	.	.	31 25
11 " " peas,	"	1 00 "	.	.	.	11 00
107 " green peas,	"	1 00 "	.	.	.	107 00
95 " beets,	"	34 "	.	.	.	32 30
345 " turnips,	"	25 "	.	.	.	86 25
40 " parsnips,	"	67 "	.	.	.	26 80
105 " onions,	"	67 "	.	.	.	70 35

25 bushels of apples, at 50 cents,	812 50
1500 cabbages, 4 cents a piece,	60 00
36500 quarts of milk, at $3\frac{1}{2}$ cents a quart,	1186 25
4736 pounds of beef, " $6\frac{1}{4}$ "	298 50
4273 " " pork, " $6\frac{1}{4}$ "	267 06
90 " " poultry, " 10 "	9 00
	<hr/>
	\$2,334 76
	<hr/>

There was raised for wintering the stock,

50 tons of hay at \$10, per ton,	\$500 00
1206 bushels of carrots, at 25 cents,	301 50
corn fodder,	15 00
	<hr/>
	\$816 50
	<hr/>

Twenty cows and two oxen were pastured on the farm, which consists of one hundred acres. As there was more hay than we supposed we should need for the winter's use, we sold in the field what amounted to fifty-five dollars and fifty cents. There are now, on the farm, four horses, nineteen cows, four oxen, thirty-nine swine, and fifty-seven fowls.

The shoe shop, which has been under the care of its former overseer, has supplied the Hospital with most of its shoes, and has done some work for customers from abroad. A few patients work there with the overseer who reports the condition of the shop for the year, as follows :—

Cr. for work sold to customers,	\$580 13
" for work for patients,	555 27
" shoes on hand, November 30th, 1848,	116 00
" stock, " " " "	82 00
	<hr/>
	\$1333 40
Dr. to stock and tools,	\$606 15
" board and wages of overseer,	350 42
" binding shoes,	28 80
" fuel and lights,	20 00
" shoes and stock on hand,	135 00
	<hr/>
	1,140 37
	<hr/>
Balance in favor of the shop,	\$193 03
	<hr/>

Which arises from work done for customers in the city. It is our intention to supply our patients with shoes, at such a price as will barely cover their cost.

Our family consists of

Patients,	409
Those employed,	69
Others,	4
								<hr/> 482

Dr. Thomas E. Hatch, who was appointed one of the assistant physicians last February, will, I fear, be obliged to retire on account of his protracted ill health. We shall be sorry to lose the services of so skilful a physician, so acceptable an officer, and so gentlemanly a companion.

In April last, this Hospital was deprived of the valuable services of Charles P. Hitchcock, Esq., and wife, and their duties of Steward and Matron have since been performed by others. They were valuable officers in this Institution. He was from the first, and has been much of the time since, identified with the arrangement and carrying out of the successful plans for its management.

While entering upon the duties of another year, we cheerfully express our thanks to all those who have faithfully aided in bringing about the happy results of that which is past; and, commending the Hospital to the guardian care of those who watch over the interests of the Commonwealth, invoke the blessing of Heaven upon our future labors.

Most respectfully submitted.

GEO. CHANDLER.
