February 1st, 1881.

SUSSEX COUNTY LUNATIC ASYLUM HAYWARDS HEATH.

TWENTY-SECOND ANNUAL REPORT OF THE COMMITTEE OF VISITORS.

To Her Majesty's Justices of the Peace for the County of Sussex, assembled in Quarter Sessions, held at Lewes, in and for the Eastern Division of the County of Sussex, on Monday, the 3rd day of January, 1881, and at Petworth, in and for the Western Division of the County of Sussex, on Thursday, the 6th day of January, 1881.

THE COMMITTEE OF VISITORS of the Sussex County Lunatic Asylum, appointed at the Epiphany Sessions, 1880, beg to report—

That the same high standard of order, efficiency, and Condition of Asylum.

general good management prevails, as heretofore, in the County Asylum. The Report made by the Lunacy Commissioners, on their last official inspection of the Asylum, fully confirms this opinion of the Committee.

The Committee refer the Court to the annexed Report of Dr. Williams, the Medical Superintendent, and also to the Statistical Tables appended thereto, which contain much valuable information.

Numbers in Asylum. The number of Patients now in the Asylum is as follows:—

Males .			349
Females		•	453
Making a	Total	of	802

The	Admissions	during	the	year	have	been	229
The	Discharges						138
The	Deaths	100					85

Increase in Numbers. These figures show a considerable increase in the numbers during the current year, and the filling up of the Asylum, commented upon in last years' Report, still continues.

At present, even if all the Out-County and Private Female Patients were removed from the Asylum, there would remain but 67 beds available for Female Pauper Patients; and were all the Out-County and Private Male Patients in like manner removed, there would then be but 42 vacant beds for Male Pauper Patients, or a total of 109 beds for Patients of both sexes.

Looking, therefore, at the ratio of increase of Patients in the Asylum during the present year, it is evident that if this increase be maintained during the next few years, the County of Sussex, at the expiration of that period, will have to make further provision for its Lunatics.

Your Committee feel strongly that such an emergency will be best met by the erection of buildings—for the reception of chronic, aged, and imbecile cases—of a less expensive character, both in construction and management, than the present County Asylum, the latter being reserved for acute cases, or of such as admit of improvement or cure under medical treatment. In the opinion of your Committee, it will be to the advantage of the County if the Magistrates will in the interval consider and determine in what manner and where such arrangements may be best carried out.

The Works sanctioned by the Court of Quarter New Works. Sessions, in October, 1878, for building a New House for the Medical Superintendent, and for the conversion of his apartments into Wards for the reception of Female Patients, have been finally completed. Dr. Williams took possession of his new house in January last, but the new wards were occupied only in September, the Contractor having failed to complete the work within the time specified.

The Visiting Justices of the Berkshire Asylum have Out-County given notice of their intention to withdraw the Patients—

20 in number, belonging to that County—on the 31st instant.

The Workshops in the Asylum have continued in Patients' Emactive work during the current year, and have afforded profitable employment to a large number of Patients, and it is worthy of remark, that, with the exception of the bedsteads, the whole of the furniture of the new wards has been made by Patients in the Asylum.

The Farm.

The Farm has continued to improve under the management of Russell Ford, the bailiff last appointed, and its accounts when finally made up will, it is anticipated, compare favourably with those of last year.

Pensions.

The Committee report that Edward Boniface, to whom a pension of 12s. a week was granted by the Court, in 1878, died on the 17th of September last.

A Superannuation Allowance of 14s. a week, which after full consideration by the Committee was strongly recommended by them, was granted by the Court to Aaron Welfare, a stoker, who after 16 years of steady and useful service in the County Asylum had become wholly incapacitated by organic disease affecting his life.

Conclusion.

During the past year no change has occurred in the principal officers of the Asylum. Dr. Williams continues to discharge his duties, as Medical Superintendent, in the same able and efficient manner, and the conduct of the other officers, and of the staff, has been highly satisfactory to the Committee.

JAMES H. SCLATER,

Chairman.

Haywards Heath,

31st December, 1880.

THE

MEDICAL SUPERINTENDENT'S

TWENTY-SECOND ANNUAL REPORT.

Twenty-second Annual Report.

The Medical Superintendent has the honour to submit the Twenty-second Annual Report to the Committee of Visitors.

Numbers on the 31st December, 1879, the Numbers in the 31st Dec., 1879.

Asylum were—Male 359, Female 437. Total 796.

Admissions. The Admissions during the year have been—Male 115, Female 114. Total 229.

Discharges. The Discharges during the year have been—Male 72, Female 66. Total 138.

Deaths. The Deaths during the same period have been—Male 53, Female 32. Total 85.

Mean Annual Population. The Mean Population resident during the year has been—Male 361, Female 448. Mean average 809.

Numbers this day, 31st Dec., 1880) are—Male 349, Female 453. Total 802.

Numerical Results of the year first Table in Appendix A to this Report.

The Numerical Results of the year 1880 yield the following percentages:—

Annual percentage for 1880. The Discharges (including the cases relieved) are 53.7 per cent. on the admissions of the year.

Excluding those cases relieved, the percentage of recoveries on the admissions stand at—Male 40.0, Female 28.0. Average 34.6. On the mean number resident it is—Male 12.4, Female 7.1. Average 9.8.

(b) The Mean Annual Mortality on total number Mean Annual under treatment is—Male 11.1, Female 5.8. Average 8.2.

The Total Number of Pauper Lunatics chargeable to Total Lunatics in Sussex.

Unions and Places in the County of Sussex is 1,223,
being an increase of 31 over last year. This increase is distributed as follows:—15 more Lunatics are in Asylums, 5 more in Workhouses, and 11 more with friends.

It is satisfactory to note that the gradual decrease in Lunatics boarded out, which has been going on for the last few years, notwithstanding the large numbers annually sent out from the Asylum, has at last received an appreciable check.

The Admissions have again been very numerous, and Admissions. contain a large proportion of aged, infirm, and chronic cases. Otherwise there is nothing unusual to note respecting them, beyond the fact that as many as forty-four are re-admissions, which rather throws doubt on the advisableness of the indiscriminate discharges from Asylums so strongly advocated in some quarters. But on the other hand shows that in this Asylum Patients are not unduly detained, rather the contrary.

The deaths have been fewer than in any year since Deaths. 1876, and likewise give cause for nothing to note, having been due in most cases to long-standing disease of one or other of the vital organs.

Inquest.

An Inquest was held on the case of E. M., who was admitted into the Asylum on June 30th, and died on July 2nd, the verdict being that he died from Congestion of the Brain accelerated by Congestion of the Lungs. The Inquest was held because the Patient was many hours on the road, and the question arose whether the long journey did not accelerate his death. But the Jury seemed satisfied that the delay was unavoidable, and that no blame attached to anyone.

Discharges.

The Discharges are much the same, numerically, as in former years. They include the twenty patients, ten of each sex, who had been sent here in 1877 under a contract with the Visiting Justices of the Berkshire Asylum. The Berkshire Justices gave notice at Michaelmas of their intention to terminate the contract, and the Patients were moved during the last week in December.

It is gratifying to record that a communication has been received from the Authorities of the Berkshire Asylum, and from Dr. Gilland, the Superintendent, expressing entire satisfaction with the condition in which their patients have been returned to them.

Numbers in Asylum. There are now 802 Patients in the Asylum, as against 796 at the end of last year. These Patients are chargeable as follows:—

		M.	F.	T.
To Unions in Sussex		309	388	697
To Non-Contributing Boroug	ghs			
in Sussex		28	44	72
To Out-County Unions		I	3	4
Private Patients		II	18	29

These figures, when compared with those published in the last Report, show that the increase of Lunatics in the Asylum from Unions in Sussex is only one, whereas the Lunatics from the Non-Contributing Boroughs have increased from 61 to 72, a very unusually large and unaccountable increase. It is equally distributed between the two sexes.

The Asylum now contains 379 beds for Male Patients and 500 for Females, exclusive of 20 beds in the Sanatorium. There are, therefore, beds available for 182 more Patients, supposing the Private Patients and those admitted from Non-Contributing Boroughs were removed. And if the rate of increase during the next decennium is not greater than during the last, when it was 12 per annum, the present accommodation ought to suffice for the next fifteen years.

The chief incident of the year's history has been the Opening of New Ward. Opening of the New Ward for the reception of 61 Female Patients. The Medical Superintendent gave up his old quarters and entered into possession of the new detached residence on January 6th, but it was not until September that the adaptation of the old rooms into Wards was completed, and the Patients were able to be placed in them. These rooms make extremely handsome, convenient Wards, and are a great addition to the Asylum. They are used by the Convalescent Pauper and quiet Private Patients. The new house for the Medical Superintendent also answers its purpose admirably, and he cannot too warmly thank the Committee for the consideration they have shown him in the matter, and the liberality they have displayed.

It will be necessary immediately to enlarge the

Females' Dining Hall, which was built for 325 Patients, and now has to accommodate 450, or else recur to the old and objectionable practice of dining the Patients in the Wards. Otherwise this Asylum may be considered to have reached its extreme limit. It was built for 450 Patients, and has just doubled its numbers in twenty years without any corresponding increase in the administrative departments, such as the Kitchen, Laundry, Stores, &c., and with but only a slight increase to the staff of Officers. These various departments and their respective heads begin to be severely taxed, and they could not be put to any further strain of work without risk of a sacrifice of efficiency. Unfortunately the Asylum was so planned that it is utterly impossible to enlarge these departments without entirely remodelling the building-indeed, it would probably be found necessary to raze it to the ground and entirely re-build it.

As it is now, the Asylum is just a manageable size with its present staff, and the numbers are sufficiently numerous to enable it to be worked with economy to the Ratepayers and benefit to the Patients. Any further increase would probably sacrifice both.

Visit of Commissioners in Lunacy. The Commissioners in Lunacy visited the Asylum on the 21st and 22nd of May. They saw every Patient in the Asylum and visited all its departments. Their Report is published at page 21.

General History

The General History of the Administration has been happily free from incident, and with the exception of the illness of the Chief Attendant, Mr. Buckle, who was in consequence away from his duty for seven weeks, and who the Medical Superintendent is glad to see has so far recovered as to be able again to conduct his work with his old vigour, there is nothing calling for remark. There have been no changes amongst the senior members of the staff, and there has been but little illness amongst the Patients.

In concluding his Report the Medical Superintendent has again the pleasing satisfaction of being able, as in so many former years, to thank the Senior Assistant Medical Officer and the Officers of the staff generally for the hearty co-operation they have afforded him in carrying on the working of the Asylum.

S. W. D. WILLIAMS, M.D.,

Medical Superintendent.

Haywards Heath,

December 31st, 1880.

THE CHAPLAIN'S TWENTY-SECOND ANNUAL REPORT.

Twenty-second Annual Report.

The Chaplain submits his Report for the last year to the consideration of the Committee of Visitors.

The Services on Sundays and other days have been duly performed at the appointed hours in the Chapel, the Dining Halls, and Female Infirmary.

Administration of Holy Communion has been administered in the Chapel and to the sick from time to time.

Classes. The Classes have been continued, and the number of Patients who have attended them has been considerable.

The Library for the Household, and the books supplied to the Wards continue to afford much pleasure to a very large and increasing number of readers.

Visits. The Chaplain has visited the Wards, Workshops, Infirmaries, &c., at the usual fixed hours, and whenever else there has been any special reason for his visit.

Burials. Fifty-eight Burials have taken place in the Cemetery during the year.

Savings Bank. The Savings Bank is very successful, a large number of the employés having accounts therein.

Conclusion. The Chaplain desires to thank all the staff for their continued assistance and support.

THOMAS E. CRALLAN, M.A., Chaplain.

Haywards Heath,
December 31st, 1880.

METEOROLOGICAL REPORT.

The rainfall of the whole year 1880 was about the average for this district, but its distribution was unusual. During the first five months the rainfall was very small; and this, following on the three dry months at the end of the previous year, caused a serious deficiency in the water supply throughout the neighbourhood. During the eight months from October 1st, 1879, to June 1st, 1880, the total rainfall only amounted to 9.75 inches, while in the three months at the end of this year we have had 15.13 inches instead of 2.66 only which fell in the corresponding period of 1879.

The total rainfall of the year amounted to 33.04. The number of wet days was 167.

The least monthly rainfall and the least number of wet days for any month occurred in May, the greatest in October.

The largest amount of rain in any twenty-four hours fell on October 9th; on that day 2.23 inches of rain were recorded, the greatest amount ever recorded here as falling on any one day.

The greatest heat in the sun, viz:—163.5°, was registered on May 29th. The greatest cold was recorded on January 29th, when the Thermometer 4ft. above ground went down to 20° below freezing point.

The usual Table is annexed.

THOMAS E. CRALLAN.

REPORT OF THE

VISITING COMMISSIONERS IN LUNACY.

Sussex County Asylum,
May 22nd, 1880.

Our inspection of this Asylum we have this day completed, and we have with much satisfaction to make a very favourable report of the condition in which we found the Asylum and the Patients, and we think that much credit is due to the Medical Superintendent, Dr. Williams, and his staff in general for the admirable management of this Asylum. The last official visit paid by two members of our Board was made on April 29th last year, at which time the Patients here of both sexes numbered 795. They are this day 805 in all-358 men and 447 women, and there are nine more women and one more man than were here at the last visit. We have been occupied yesterday and this day in going over the whole of the Building, Workshops, Farm, Hospital, and Chapel, and seeing all the Patients now in residence. One woman is absent on trial, and she was the only Patient we did not see. The changes which have taken place amongst the Patients since the last visit, have been the admission of 215 Patients-108 men and 107 women, and the discharge of 58 men

and of 59 women; 40 of the former and 38 of the latter were discharged on recovery. 88 Patients-49 men and 39 women, have died. There are now on the books seven women in excess of the number for whom accommodation is provided in the Asylum, the overcrowding which would have arisen from this has been temporarily averted by placing 20 women in the Detached Hospital, and we saw the works in progress by which the apartments formerly occupied by the Medical Superintendent are being converted so as to accommodate 61 women; and when this is done the Hospital will be no longer used by the Ordinary Patients, but will be kept for Infectious Cases. There are 23 vacant beds on the Male side. In the Asylum there are 25 Out-County and 22 Private Patients; the charge for the former is 14s., and for the latter 16s. per week. The County Patients are paid for at the rate of 9s. 6d. per week. The mortality has been at about the average rate in County Asylums. The causes of the 88 deaths which took place were as follows:-

	Males.	Females.	Totals.
General Paralysis	8	I	9
Epilepsy	4	I	5
011 (() : 7:	II	10	21
Exhaustion after Mania and			
Melancholia	3	2	5
Pulmonary Consumption	3	I	4
Other forms of Lung Disease	5	8	13
Disease of the Heart	5	5	10
Diseases of the Abdominal Organs	5 7	3	10
Senile Decay	2	6	8
Other Ordinary Causes	I	2	3
Market Committee of the Special State		_	
	49	39	88

There has been no suicide or fatal casualty, and but one Coroner's Inquest was held. The facts of the case were at the time duly reported to our office and call for no remark in this Report. Post-morten examinations were made in 26 instances only, but Dr. Williams informs us that though he applied for leave to make such an examination in every case, permission to do so was refused in every other instance. The health of the Patients at this time is fairly good; 40 men and 56 women are registered as being under medical treatment last week, and we found in bed during our progress through the Wards nine women and four men. One woman we saw in bed was also in seclusion, which mode of treatment has been adopted in the case of two men, on one occasion each for a total of one hour and a half, and for seven women on fourteen occasions for a total of 42 hours; one woman, however, accounts for 26 of these hours. Restraint in the shape of wet packing has been resorted to as medical treatment for five men and seven women on 36 and 13 occasions respectively, and for a total duration of III hours for the men and 25 hours for the women. The behaviour of the whole of the Patients was quiet and orderly; there was a little loud talking in the worst Ward on the Female side, but no excitement was shown in any of the other Wards, and no one was aggressive. Dress of both sexes was clean and tidy, and the personal cleanliness of the Patients struck us as being very creditable to those who have the immediate charge of them. In accordance with the suggestion made by our colleagues at the last visit, there has been a supply of plaid dresses for the women provided, but they are not in general use. The state of the Wards and

Dormitories call for commendation from us; they were clean, bright with flowers, and entirely free from offensive odour, and even in the Ward where the destructive women were collected we found flowers and pictures for decoration, and books, which were evidently read, in sufficient quantity on the tables. Much seems to be done here, both indoors and out, to ameliorate as much as possible the condition of the Patients. The Wards are well supplied with games, books, and periodicals (in the women's Wards there are pianos also), and there is a liberal allowance of daily papers, whilst parties of Patients are taken frequently to the Brighton Aquarium, Shoreham Gardens, and in large numbers they go for Picnics to Ditchling Common. One of these took place the day before yesterday, and not a few of the Patients expressed to us their pleasure at the treat. During the winter months Dramatic Entertainments and Balls take place on an average about six times a month, and there are besides certain Special Entertainments, such as the Anniversary Fête and Christmas Ball. The Beds and Bedding were, whereever we examined them, in best order, and we observed that the underblankets were regularly supplied to the beds of the Patients of faulty habits. We saw both Male and Female Patients at dinner, and the dinner appeared to us to be generally approved. We afforded to every Patient opportunity of speaking with us, and of this many availed themselves. No Patient made any complaint to us which we found to have any foundation, indeed the only grievance alleged by any one was that they were detained too long in the Asylum, but we could not see any Patient who so complained whose case appeared likely to us to give prospect of early

discharge. We gave a separate interview to a Male Patient, H. W., to whom we had been requested by the Committee to pay especial attention in consequence of some proceedings which had taken place in one of the High Courts of Justice. H. W. is at the present time, in our opinion, very insane and quite unfit to be cared for out of an Asylum. The Chaplain reads prayers in the Dining Hall in each division daily, at which services 260 men and 312 women are on an average present. At Church last Sunday the total numbers who attended the three services were 646-276 men and 370 women. The Chaplain in addition to his clerical duties is also the Librarian, and sees that the books are properly circulated through the different Wards. At the Indoor Associated Entertainments about 150 men and 170 women are usually present, whilst a large proportion of both men and women are taken regularly for exercise beyond the Grounds. The number of those who are never taken beyond the Airing Court, has been given to us as nearly 190 of both sexes, but in these are included not only those not able to be trusted outside the yards, but also those whose age and infirmity prevents them getting far. We are glad to find that the Pleasure Van is in use here still, and affords to many of the aged and infirm a break in the monotony of their lives. We have been furnished with a return of the Epileptic Patients, who are 46 in the Male and 30 in the Female side. There are also eight men and six women who are considered actively suicidal. These latter Patients sleep in the Epileptic Dormitory in their respective divisions, in each of which there are two Attendants sitting up with them all night. Their wakefulness is tested by a tell-tale clock, and there is also a Head Night Attendant

on each side who visits the Dormitory at uncertain intervals. The Attendants as a body appeared to us to belong to a respectable class, and to be able to properly perform their duties. There are 30 men and 35 women-65 in all, and 20 of them have been in the Asylum service for a long period, whilst 18 more have lived here from two to five years. We do not find that the number of Patients who are usefully engaged differs much from the Return furnished by our Colleagues last year; 236 men and 314 women are in some way employed; 81 men work on the Farm or in the Garden, and go men clean the Wards, the rest of the men who are returned as workers are mostly engaged in some trade, whilst of the women 70 are employed as Ward Cleaners, 64 are in the Laundry, 10 in the Offices, and the rest work with their needle or knit. We have made enquiries as to the means of extinguishing an outbreak of fire, and learn that, besides testing the hydrants once a week by the Engineer and fastening on the hose, there is once a month a Fire Brigade Drill. There is sufficient pressure of water to reach over the highest roof in any part of the building. The principal additions and alterations which have taken place, have been the completion of the building of the Medical Superintendent's house, and the alteration above-mentioned of the Superintendent's old rooms into Female Patients' day and sleeping rooms. We were informed that the alteration, including the building of the new house, would bring the cost of the additional accommodation

provided to about £70 per bed. The Senior Assistant Medical Officer's rooms are also being built in this block, and an improved Surgery and Office. The other alterations have principally consisted of the usual painting, papering, and decorating, which must be always required in some parts of the Asylum.

W. E. FRERE, Commissioners in Lunacy.

APPENDIX,

CONTAINING THE
TABLES OF THE MEDICO-PSYCHOLOGICAL
ASSOCIATION, &c.

The Medical Superintendent desires to acknowledge the services rendered to him by the Clerk of the Asylum (Mr. S. A. Mortlock) in the compilation of these Tables.

* The apparently low per centage of Recoveries in these years is due to the Admission of many Chronic Lunatics from St. Panoras, Maidstone, and Peterborough.
