SUSSEX COUNTY LUNATIC ASYLUM,  
HAYWARDS HEATH.

SIXTH ANNUAL REPORT OF THE COMMITTEE Sixth Annual Report.  
OF VISITORS, 1864.

*To Her Majesty's Justices of the Peace for the County of Sussex, assembled in Quarter Sessions, held at Lewes, in and for the Eastern Division of the said County, on Monday, the 2nd day of January, 1865; and at Petworth, in and for the Western Division of the said County, on Thursday, the 5th day of January, 1865, The COMMITTEE OF VISITORS OF THE SUSSEX COUNTY LUNATIC ASYLUM, appointed at the Epiphany Sessions, 1864, REPORT:—*

THAT the improvements and alterations which were mentioned in their last Report have been completed during the year, and are now in full working operation. Completion of enlargement and alterations of the Buildings.

In the month of June last the Visitors were enabled to receive additional patients, and since that date 67 Female Lunatics have been admitted. There are now in the House 277 Females and 225 Males, making a total of 502.

Increase of  
Patients.

Although this is a considerable addition to the former numbers, the Visitors do not find the Male Patients increase so rapidly as the Females, but they believe a steady increase of both sexes may be expected.

Success of the  
recent alterations  
in the Buildings.

The alterations in the Working Establishment have quite answered the expectations which were formed; and the necessary house-work for so large a number is performed with great ease and comfort to the establishment.

Detail of the  
year's results.

The Visitors refer to the Report of the Medical Superintendent which accompanies this Report for the details of the number of Patients during the year, with the changes by receiving and discharge, and also a statement of the Mortality among the Patients. The Committee have been enabled to make a reduction in the charge for Maintenance which, during the last quarter, has been fixed at 9s. 9d. per head per week, and they hope that a further reduction will soon be effected.

General condition  
of the Asylum.

The general state of the Asylum and the Establishment, and the conduct of the Officers, are very good; and the care taken of, and the attention paid to, the Patients very satisfactory.

(Signed)

EDWARD SMITH BIGG,

*Chairman.*

Haywards Heath,

December 24th, 1864.

REPORT  
OF  
THE FARM COMMITTEE,  
1864.

---

THE Farm Committee have again a favourable Report to  
represent of the condition of the Farm. Report of the  
Farm Committee.

They have been occupied, during the Year, in bringing  
the recently-purchased Land (which had for years been Improvement of  
Land recently  
purchased.  
badly farmed) into proper cultivation. They have also grubbed  
22 Acres of the Great Wood, and thereby added two valuable  
Fields to the Farm.

The application of the whole of the Asylum Sewage to the The use of the  
Asylum sewage.  
Grass Land continues most successful. The Committee pro-  
pose to extend the cultivation of Italian Ryegrass under  
Sewage irrigation.

The Committee have recently added to the Farm Buildings Additional Farm  
Buildings.  
Additional Pig Pounds, and a Covered Shed and Yard for  
Stock.

They have also, during the past Quarter, supplied the Meat Supply of Meat to  
the Asylum.  
required for the Establishment, partly by killing off the dairy

Cows when dry, and partly by the purchase of Stock subsequently fattened on the Farm. The Committee have reason to hope that this system will prove alike beneficial to the House and to the Farm.

Farm and Garden  
Accounts

The Farm and Garden Accounts for the Year are herewith annexed. They show a total profit on the Year's transaction of £409 1s. 1d.

(Signed)

EDWARD SMITH BIGG.  
JOHN MANSHIP NORMAN  
JAMES H. SCLATER.

 JOHN MARSH HOLLAND

THE  
 MEDICAL SUPERINTENDENT'S  
 SIXTH ANNUAL REPORT.

---

THE Medical Superintendent has the honour to submit his Sixth Annual Report to the Committee of Visitors. Sixth Annual Report.

On the 25th December, 1863, the numbers in the Asylum were 220 Male, 243 Female—total 463. Numbers on the 25th December, 1863.

The admissions during the year have been Male 64, Female 70,—total 134. Admissions.

The Discharges during the year have been Male 23, Female 16,—total 39. Discharges.

The Deaths during the same period have been Male 36, Female 21,—total 57. Deaths.

The mean Population resident during the year has been Male 223, Female 250,—total 473. Mean Annual Population.

The numbers in the Asylum to-day (December 31st, 1864,) are Male 225, Female 276,—total 501. Numbers this day, 31st December, 1864.

These several Numerical Results are summed up in the first Table in the Appendix to this Report. A similar statement of the Total Numerical Results since the opening of the Asylum will be found in Table II. Numerical results of the year, and also since the opening of the Asylum.

The Numerical Results of the year 1864 yield the following per centages :— Annual per centages

(a) The Recoveries (including the cases discharged relieved) are 23·0 per cent. on the Admissions of the year. Excluding

those cases relieved the per centage of recoveries stands at Male 22·0, Female 14·0—total 18·0.

(b) The mean annual Mortality is Male 16·14, Female 8·4—total, 12·27 per cent. A reference to the Obituary Table in the Appendix to this Report will show that no less than fourteen Patients were admitted during the year 1864 in a dying state. Deducting these fourteen Patients thus sent here to die—many within the first week—the annual mortality on the mean population resident stands at 8·56 per cent.

Comparative  
Statistics.

The following Table, taken from a Review of the English County Asylum Reports for 1863, in the *British and Foreign Medico-Chirurgical Review*, October, 1864, will give the Visitors a fair statement of the average number of cures and of the mean annual mortality in the principal Asylums in England.

*Table shewing the per centage of Recoveries and the Annual Mortality in the mean population in the undermentioned Asylums during the year 1863.—(From the 'British and Foreign Medico-Chirurgical Review,' October, 1864.)*

<sup>1</sup> Curable patients only admitted, and all cases of Paralysis and Epilepsy rigidly excluded.

Among the cases discharged Cured (see Table of Discharges, p. 784) will be found the case of B.H., in whom it was necessary—while in a state of recent mania—to amputate the leg below the knee, in consequence of destructive inflammation of the soft parts—the result of an attempt at suicide, previous to admission, by jumping out of a window. The operation, with the use of chloroform, was performed by Mr. Jowers, of Brighton, whose aid the Medical Superintendent sought in consultation. The patient made a complete recovery.

A case of Amputation discharged cured.

The Sanitary condition of the Asylum continues good. The limited supply of Pure Water, the complete system of drainage, and the excellent arrangements for Warming and ventilating the Wards, conduce to this result. The Sickness of the House, ever since the opening in 1859, has been merely minimal. The number of Patients confined to Bed does not average three on each side.

Sanitary condition of the Asylum.

The additional Land acquired last Year renders the means of Farm employment both varied and ample. The Hay and Corn Crops have been mown and reaped entirely by the Patients.

Value to the Patients of the additional land purchased last year.

The whole of the Fittings connected with the new Wards, including Gas, Water, and Drainage, has been done by the Asylum Staff; and the greater part of the new Furniture and Bedding was made in our Workshops.

Fitting and furnishing of the New Wards.

The fifth anniversary of the opening of the Asylum was celebrated on the 25th July. The Commemoration Sermon was preached by the Rev. Carey Borrer, M.A., Oxon, Rector of Hurst.

Commemoration Day.

Mr. Basil Young, of London, gave an amusing Entertainment, in the Recreation Hall, in the afternoon. The celebration of this day is to many of the Patients an object of great interest, and much pains are previously taken by them in the decoration of the Chapel and Recreation Hall.

State of the  
Female Wards.

The Wards on the Female side of the Asylum have been much crowded and inconvenienced during the past Year, consequence of the alterations and enlargements of the Building now completed. During the Winter Months, 40 of the Female Patients slept in the Recreation Hall; and the Infirmary was closed and given up to the Builders.

Head Female  
Attendant.

Notwithstanding these many inconveniences, the Medical Superintendent has the satisfaction of recording that no accident, injury, or escape of any Female Patient occurred during these tedious building operations. He feels that he is indebted for this success to the ability and unwearied diligence of the Head Attendant, Miss Buckle, of whom he is glad to have this opportunity of making such favourable mention to the Visitors.

The New Wards.  
The Infirmary  
Ward.

The new Wards are now completed, and afford additional accommodation for 130 Female Patients. The Infirmary has been remodelled, and has 26 Beds, including 5 single Rooms. It is well warmed, both by Hot-Water Pipes and two open Fires. The Ventilation is excellent, and the South and West aspects fill the Room with sunshine throughout the day. It is provided with a separate Bath-Room, W.C., and Nurse's-Room, and has every necessary comfort for the sick, as Couches, Easy Chairs, Spring-Beds, Water-Pillows, &c., &c.; while in Summer the Greenhouse provides an ample supply of Flowers.

The Infirmary Ward will now bear comparison with the wards in any of the London General Hospitals. The cheering influence on the Sick of these liberal arrangements of the visitors has been most gratifying to the Medical Superintendent.

The additional Sleeping Rooms in the new Building are New Dormitories. three dormitories, one containing 25 beds and two 45 beds, with 8 single rooms. There are also five extra nurses' rooms, and 2 lavatories with W. C. attached.

No. VI. (the Refractory Ward) has also been enlarged by the The Refractory Ward. addition of a day-room with an open-timber-roof connecting the ward, which was detached, with the main building. Six single rooms in the basement have also been added to this ward. All rooms in Ward VI. are warmed with hot water.

The total accommodation for Female Patients is now 355. Total accommodation for Female Patients.

The Day-Room accommodation stands thus:—

In Wards I., II., III., IV., there are in the sitting-room, dining-room, and gallery 4,428 superficial feet, and 48,708 cubic feet, giving, at the Commissioners' measurement of 25 superficial feet per Patient, day-room space for 276 Patients, or 276 in each of these wards.

In addition there is Day Room space for 30 Patients in No. V., and for 25 in the Infirmary (No. V.). The total day-room accommodation, by measurement, is therefore 332, while the number of beds is 355. These numbers will be thus distributed:—

*I. Day-room space.*

Infirmary Ward V. ....	25 patients.
Refractory Ward VI. ....	30 „
Wards I. (Admission) ....	75 „
II. (Idiot and epileptic)	75 „
III. (Convalescent) ..	75 „
IV. (Laundry, kitchen, &c., &c.)....	75 „
	—
Total ....	355

Bed-rooms  
(Female)

*II. Sleeping-room Space.*

Ward I. 2 Dormitories (6 bedded).  
5 Single Rooms (1 padded).  
1 Attendant.

Wards II., III., IV., each.—

2 Dormitories (6 bedded).  
1 Dormitory (3 bedded).  
5 Single Rooms (1 padded in Ward II).  
1 Attendant.

Sleeping Gallery. 4 Dormitories (9 bedded).  
2 „ (8 „ ).  
1 „ (2 „ ).  
4 „ (3 „ ).  
8 Single Rooms  
11 Attendants' Rooms.

Ward V., Infirmary.—

1 Dormitory (20 beds).  
5 Single Rooms.  
1 Attendant.

Ward VI.	1 Dormitory (7 beds).
	1 „ (4 „ ).
	1 „ (13 „ ).
	8 Single Rooms.
	1 Attendant.
New Building.	2 Dormitories (25 beds each).
	2 „ (45 „ ).
	8 Single Rooms.
	8 Attendants' Rooms.
	(2 double bedded.)

The space in the Dormitories averages 50 superficial feet per patient, and in the Single Rooms 63 superficial feet.

It will be observed that, contrary to the received principles of Asylum architecture, the Patients, instead of living by day and night in separate detached Galleries,—each with all the appliances of an Asylum,—are, by the new arrangements in the Female Department of this Asylum, distributed by night over the associated Dormitories of the Sleeping Gallery—third story—and of the new Building; and farther, that the proportion of single Rooms is reduced from two-thirds (as recommended by Dr. Conolly) to one-seventh of the total numbers.

New principle in Asylum construction.

This plan of arranging the sleeping accommodation will lead to considerable reduction in the future cost of Asylum construction.

The Wards on the Male side, which remain as they were arranged on the completion of the Asylum, are now nearly

State of the Male Wards.

ll.

## A Second Infirmary.

Twelve additional Beds have been added by the conversion of the Tailors' and Shoemakers' Shop into a second Infirmary which has been very comfortably fitted up as a joint day and night Ward, and appropriated to the use of those suffering from general Paralysis of the Insane. The Beds on the Male side are now 235 as compared with 355 on the Female side.

## Workshops.

The Workshops have been much improved and enlarged by the erection of a second story; and they now consist of

1. The Carpenter's Shop.
2. The Painter's „
3. The Mat Maker's „
4. The Basket Maker's „
5. The Upholsterer's „
6. The Blacksmith's „
7. The Tailor's „
8. The Shoemaker's „

These Shops, with the exception of the Blacksmith's, which is cramped and small, leave nothing to be desired in their space, fittings, and arrangements.

## The Bakehouse.

The Bakehouse has been transferred to the Centre Court where the old Steam-boilers were. It is fitted with two Ovens (one for Baking the Meat for the Wards), and an Hydraulic Lift, communicating with the Kitchen above. One of Stevens' Bread-Making Machines is also in use. The arrangements of the new Bakehouse are most excellent. It is well lighted with a Glass roof.

## The Kitchen and Vegetable Stores and cleaning room

The fittings in the Kitchen (originally intended for 30 Patients) have been extended by the addition of four new Steamers. A separate Vegetable Cleaning-Room has been fitted in the basement (formerly used as a Coal-Cellar), which is well lighted and heated.

The Laundry has been provided with Steam-Washing Machinery, viz., a Dash-Wheel, a Washing-Machine, and two Wringing Machines,—by means of which thirty sheets could be washed and dried, and ready for use, in an hour. The ceiling of the Ironing-Room has been removed, and the Room opened to the roof, and a Glass-Lantern added for light and ventilation.

The Drying-Yard has also been enlarged; and the Laundry is now in every way equal to the heavy requirements of the establishment.

The new Steam-Boilers, placed in a detached Building communicating with the Laundry, supply Hot Water and Steam for every part of the House, including all the Wards, the Kitchen, and the Laundry, and the small Engine which works the Laundry Machinery. This Engine also grinds the Malt and the Cocoa.

New Steam Boilers.

The Medical Superintendent has the satisfaction of reporting that the whole of the new Laundry, and Kitchen Fittings, and Steam-Boilers, are in the most efficient order, and apparently of the best quality. They were supplied and fixed by Messrs. Hadon, of Trowbridge.

Success of Messrs. Hadon's engineering works.

A series of Tables, illustrating, in detail, the Medical, Domestic, and Financial results of the Year 1864 are annexed as an appendix to this Report.

Appendix to this Report.

(Signed) C. L. ROBERTSON, M.D., CANTAB.,  
*Medical Superintendent.*

HAYWARDS HEATH,  
December 31, 1864.

The Laundry has been provided with Steam-Washing Machinery, including a Dress-Press, a Washing-Machine, and two large Sinks, by means of which thirty shirts could be washed and dried and ready for use in an hour. The floor of the Laundry-Room has been removed, and the floor laid to the roof, and a Glass-Roofing added for light and ventilation.

The Hospital has been provided with a new and improved Water-Works, and the Hospital is now in every way equal to the requirements of the establishment.

The new Steam-Bolton, which is a detached building communicating with the Laundry, supply the Water and Steam to every part of the House, including all the Wash-rooms, and the Laundry, and the engine-kitchen which works the Laundry machinery. This Engine also drives the Mill for the Cotton.

The Medical Superintendent has the satisfaction to report that the whole of the new Laundry, and Kitchen, Engine, and Steam-Bolton, are in the most efficient order, and supply of the best quality. They were supplied and fixed by the Messrs. J. & F. Cross.

The Messrs. J. & F. Cross, of London, were the contractors for the new Laundry, and Kitchen, Engine, and Steam-Bolton, and finished the work of the year 1851 and 1852.

The Messrs. J. & F. Cross, of London, were the contractors for the new Laundry, and Kitchen, Engine, and Steam-Bolton, and finished the work of the year 1851 and 1852.

## THE CHAPLAIN'S SIXTH ANNUAL REPORT.

---

THE Chaplain's Sixth Annual Report varies, in few particulars, from previous statements, with reference to his duties, which he has submitted to the Committee of Visitors.

Sixth Annual  
Report.

He continues to have the satisfaction to report the orderly conduct of both the Sunday and week-day congregations in Chapel. The attention and earnestness of many of the patients are evidence of the interest they feel in public worship. The average attendance, as appears from the Returns, is as follows :

Chapel Services—  
Sunday and Week  
Day.

On <i>Sundays</i> , Males, 162. — Females, 178.	Average Attend- ances.
<i>Week-days</i> , Males, 86. — Females, 85.	

The weekly Household Service, having failed in its object, has been temporarily discontinued : to be recommenced, it is hoped, with greater success.

Household  
Service.

The number of communicants has slightly increased. Several of them assemble, for a short time, in the Class-room, previous to the commencement of Divine Service, and proceed thence to the Chapel. They obtain, by this means, a quiet interval before entering upon the Communion Service. One female bedridden patient receives Holy Communion, from time to time in the Infirmary.

Communicants.

## Choir.

Since the commencement of the year the Choir has met for practice on Saturdays, and assisted at the Sunday afternoon services, under the direction of Mr. Stroud, whose perseverance and progress, since he has undertaken the harmonium, are very creditable. The Choir has renewed its attendance, as formerly, at the Festival Services.

## Burials.

Up to the present date 36 Burials have taken place in the Cemetery. Of this number two were those of children of artisans belonging to the establishment. Over one of these graves a simple memorial has been placed by the kindness of a lady, with the permission of the Visitors. Their sanction having been given to the erection by friends, at their own cost, of cemetery memorials (the designs of which shall have been previously approved), the Chaplain hopes that relatives will be occasionally disposed to place over graves in which they are interested, inexpensive, but suitable memorials, which would both relieve the present somewhat uniform aspect of the ground, and also exercise a soothing influence on the feelings of mourners.

## Cemetery memorials.

## Classes.

No special observations are called for with reference to the Male and Female Classes. Great interest is taken by many in *writing*. Transcribing passages from books is a favourite exercise with the more advanced scholars. An entertaining monthly serial furnishes matter for profitable reading. The numbers in attendance are about the same as in former years. With more ample accommodation they might, probably, be easily increased.

## Bible Class.

A Women's Bible Class meets once a week in the Classroom.

A portion of the Library Grant assigned by the Visitors Library. as been devoted to a subscription to Mudie's, with the object of furnishing the attendants and others with a varied supply of books.

The Missionary Meetings continue to be productive, in the Chaplain's opinion, of much good. Two interesting addresses have been delivered in the course of the present year; one by the Rev. Reginald Kerby, Incumbent of Hadlow Down, Sussex, the other by the Rev. Armine Mountain, late of Quebec, whose father and Grandfather were both Bishops of that Diocese. The last remittance forwarded to the Parent Society amounted to £6 7s. 7d. All the officers and nearly all the attendants, artisans, &c., are members of the Association.

The Religious Services on the Commemoration Day (25th July) commenced at 8.30 with a celebration of the Holy Communion. Several patients attended. At 12 Morning Prayer was said by the Chaplain, assisted by the Rev. J. Foster, M.A., Cantab., Incumbent of Wivelsfield. The lessons were read by the Rev. W. A. Fitzhugh, M.A., Oxon, Rector of Street, and the Rev. Dacre Craven, M.A., Oxon, Curate of St. George the Martyr, Queen's Square, London. The Ven. Archdeacon Harbett had originally consented to preach the annual Sermon, but in consequence of ill-health was compelled, at the last, to relinquish his intention. Under these circumstances the Rev. Carey Borrer, M.A., Rector of Hurstpierpoint, most kindly undertook the office of preacher. The Choir, as at the previous commemoration, was conducted by Mr. Alfred White, Organist and Choir-master of Cuckfield Church.

The Chaplain frequently visits the Infirmaries and other Wards.

Letters from  
Friends.

He continues to receive, from time to time, letters from friends of patients, who appear to derive satisfaction from the replies sent.

Secular Readings.

Two Readings from a popular author have recently been given by the Chaplain for the amusement of the patients.

He trusts that no important subject relative to the discharge of his office during the year has been omitted in the Report which he has the honour to submit to the Visitors.

(Signed) HENRY HAWKINS, M.A., Oxon.,  
*Chaplain.*

HAYWARDS HEATH,  
24th December, 1864.

THE REPORT  
OF THE COMMISSIONERS IN LUNACY.

SUSSEX COUNTY ASYLUM,  
20th June, 1864.

WE have found this Asylum, at our visit to-day, in very good order, making allowance for the very recent completion of the additional wing on the Female side, which was opened to the reception of patients on Friday last, and for other improvements still in progress. The inmates of both divisions were quiet and well-behaved; their personal condition, notwithstanding the large proportion of troublesome and demented cases, was on the whole satisfactory, and we had pleasure in observing that the suggestions made at the last visit had all more or less received attention.

Since that date 89 patients have been admitted; 77 have been discharged; and 55 have died; the respective numbers of males and females having been 72 and 17 under the first head; 56 and 21 under the second; and 15 and 17 under the third. The recoveries have been 32. In two of the deaths, owing to the suddenness, in one from epilepsy, and in the other from disease of the heart, inquests were held and verdicts returned accordingly. A third case became the subject of correspondence between our Board and the Committee. The rest of the

deaths presented nothing unusual—the majority being from general paralysis, epilepsy, disease of the heart, hemiplegia, phthisis, mania, exhaustion, and senile decay.

The numbers on the books to-day are 459 ; 225 being males and 234 females ; and we have seen them all at our visit, excepting one of each sex, absent on leave ; the six others, 10 absent and resident in cottages occupied by married attendants on the farm, having been also seen by us. The quantity of additional accommodation provided by the new wing appears to be estimated at 120 beds, to which are to be added 10 beds obtained by appropriation of the old workshops, these last representing all the new space gained on the male side ; but it struck us that the beds were placed too closely in the principal female Dormitory, and this estimate will probably have to be reduced. The result is that for the present there are vacant on the male side 10 beds, and on the female 111. The new Dormitories, and especially the Infirmary, are spacious, well-ventilated, and cheerful, and are in course of being supplied with good and comfortable furniture. But the new Dining Hall in this division, which formed part of the proposed addition, has not yet been begun, and we suggest that there should be no further avoidable delay in this respect. Enlarged Day Room accommodation is rendered absolutely necessary by the increase in the numbers of the female patients ; and when the new dining-hall is completed, it will be desirable that the spaces between their wards, on the several floors, at present used as dining-rooms, should be turned into day rooms, common to both wards by removing the partition walls. Another suggested change, of which we should strongly approve, would be the acquisition of greater space and light at the now gloomy end of ward No. VI., occupied by the worst class of patients, by throwing down the portico at the opening into the airing

yard, and substituting a corridor of communication with the new wing lighted from above.

We were glad to observe the progress made in constructing and laying out for planting a terraced yard to No. VI; and that the airing court designed for use of the inmates in the new building will be formed upon a portion of the garden ground. We take this occasion strongly to recommend that in the principal female airing court some trees and flowers should be planted along the borders of the walks; that the patients should be invited and encouraged to resort to this court as well in the mornings as the evenings, especially at the present season, and that with this view some shade and protection from the sun be provided here.

Adverting to subjects named and suggestions made at the last visit, we find that some additional domestic furniture and small objects of attraction or interest have been placed in the wards, that orders have been given for a bagatelle-board in each of the female wards, one having already been supplied; that between £50 and £60 has been expended in the planting of new trees and shrubs in the grounds and cemetery, much still remaining to be done in this respect, especially in the way of evergreens; that on the male side, new, roomy, and well-lighted workshops have been constructed; that more than 100 acres of land have been added by purchase to the farm, extending the farm employment and its profitable results; that the kitchen boilers and fittings have been made more efficient; that the laundry has been provided with new machines worked by steam; and that the improvement frequently suggested of heightening the laundry roof is now actually in hand, and is expected to be finished in a fortnight, including, as we hope, means of properly lighting from the roof.

We have to add that one suggestion has failed to receive the attention to which the importance of the subject entitled it, and we must again press the expediency of providing a better dead-house with conveniences, of which the absence is at present greatly felt by friends of the deceased.

We do not find that there is yet any material decrease in the numbers taking no part in active employment, but means appear to be taken by reading in the wards, as well as by classes for instruction, to give something in the nature of occupation to those otherwise without any resource (unhappily a large class here), and the Chaplain's exertions in this direction deserve much praise. As many as 50 of both sexes now attend these classes. Correction of the habits of the imbecile, demented, and paralysed, seems also to be kept up with success by means of efficient night supervision; the returns of wet cases for the week preceding our visit showing seldom more than two during the night on either side, and the dirty cases being extremely unfrequent. All the patients are bathed and their body linen changed twice a week; and we record with much satisfaction that in both divisions each patient, without exception, is bathed in fresh water.

In connection with this subject the attendants on both sides may be named as generally of a respectable and superior class, in which changes are rarely made—the result of a liberal treatment on the part of the Committee, who have lately, also complying with a suggestion made at former visits, allowed board wages during the ten days' yearly leave given to the nurses. The head attendants, in both divisions, are evidently experienced and capable, and on the men's side, more especially, this officer appears to give unremitting care and zeal to the provision and arrangement of the amusements as well as the occupation of the patients generally.

The numbers of men engaged in trades are now more than 50, and the working party in the fields averages the same number; the laundry and kitchen women amount to nearly 50, and there are more than 120 women engaged in needle-work and household work. The Sunday attendance at Chapel show about 350 of both sexes, and the week-day attendances about 150. Between 60 and 70 of each sex appear to join in the Sunday walks beyond the grounds of the Asylum; and between two and three hundred are said to take exercise about the grounds for the most part daily.

Restraint is not employed here, and the instances entered of seclusion are neither frequent, nor for other than short periods. The numbers under treatment for bodily disorders are at present small, and the health of the Asylum generally is good.

We continue to receive an impression in all respects favourable of Dr. Robertson's ability in the conduct of this Asylum, and in the selection of its officers. We were accompanied round the wards by his medical Assistant as well as himself; and the familiarity with every case, and evident acquaintance with all the patients shown by Dr. Browne, we thought highly creditable to him.

(Signed)

JOHN FORSTER,  
JAMES WILKES.

The number of men engaged in each industry was 1,000 in 1890 and the number in the following years: 1,100 in 1895, 1,200 in 1900, 1,300 in 1905, 1,400 in 1910, 1,500 in 1915, 1,600 in 1920, 1,700 in 1925, 1,800 in 1930, 1,900 in 1935, 2,000 in 1940, 2,100 in 1945, 2,200 in 1950, 2,300 in 1955, 2,400 in 1960, 2,500 in 1965, 2,600 in 1970, 2,700 in 1975, 2,800 in 1980, 2,900 in 1985, 3,000 in 1990, 3,100 in 1995, 3,200 in 2000, 3,300 in 2005, 3,400 in 2010, 3,500 in 2015, 3,600 in 2020.
