SUSSEX COUNTY LUNATIC ASYLUM,
HAYWARDS' HEATH.

I. — ACCOUNT OF THE CONSTRUCTION OF THE
ASYLUM, AND THE EARLY PROCEEDINGS
CONNECTED THEREWITH.

*AT THE EPIPHANY SESSIONS held for the
Eastern and Western Divisions of the County,
in January, 1860, THE COMMITTEE OF
VISITORS appointed for providing an Asylum
for the Pauper Lunatics of the County of Sussex,
REPORTED, among other things:—*

THAT, at the Easter Sessions, 1846, a Committee of Justices was appointed to superintend the erecting or providing an Asylum for the Pauper Lunatics of the Eastern Division of the County alone, or to treat and enter into an Agreement with the Justices acting for the Western Division.

That in September, 1854, in consequence of the passing of the 16 and 17 Vict., cap. 97, which rendered it compulsory upon Counties to provide an Asylum for the Pauper Lunatics thereof, that Committee, after several previous

meetings with the Committee of the Western Justices, entered into an Agreement to unite in providing an Asylum for the Pauper Lunatics of both Divisions; and such Agreement stipulated that the expense thereof, and of its future maintenance, should be borne in the proportion of 67 parts in every 100 parts by the Eastern Division, and of 33 parts in every 100 by the Western Division: and that the Committee of Visitors should consist of 14 Eastern Justices, and 8 Western. The number of Justices for the Eastern Division was fixed by the Committee at 14, in order that when the Borough of Brighton nominated 2 Justices of that Borough as Members of the Committee, the correct proportion between the two Divisions should be maintained.

At the Michaelmas Session, 1854, the Agreement for uniting was reported to the Court, and the Committee was then appointed to carry the same into effect.

That several Farms were inspected, and after much consideration, it was finally resolved, unanimously, to recommend that a portion of Hurst House Farm, in Wivelsfield, being nearly in the centre of the County, and within about a mile of the Hayward's Heath Station, should be purchased. A provisional Agreement was entered into with Henry Charles Lane, Esq., the owner, for the purchase of the portion which had been selected, comprising about 120 acres, with a Farm House and Buildings, at the price of £5,750, and Timber at a valuation. The selection of the site met with the full approval of the Commissioners in Lunacy, and the Agreement was sanctioned by the Secretary of State, and ratified at the Midsummer Session, 1855.

That the Committee, in execution of the duty which

devolved upon them, invited five eminent architects, who were all experienced in the erection of Lunatic Asylums, to furnish designs, with plans and estimates, for the proposed Asylum for the County. Four of those gentlemen complied with the request, and the several plans and designs, together with their respective estimates, received the anxious and careful consideration of the Committee; it was eventually determined that those of Mr. Henry Edward Kendall, Jun., of 33, Brunswick Square, London, were the most eligible, as well as the least expensive, and accordingly they were selected;—such plans and estimates were submitted to the Commissioners in Lunacy, and by them reported to the Secretary of State, who duly approved of them, and they were then submitted, at the Epiphany Sessions, 1857, to this Court for approbation, which was at once given.

That the Committee immediately afterwards took steps for obtaining tenders for the erection of the Building, and at the Easter Sessions, 1857, they reported that they had entered into a contract with Messrs. Rees and Ayers, of Dover, for erecting the Asylum for the sum of £37,400; such contract was approved by the Court, and Messrs. Rees and Ayers commenced their work.

That a Sub-Committee was appointed to superintend their progress, and, in addition to the frequent visits made by individual members, fortnightly meetings were held at the Works by such Sub-Committee, and monthly meetings by the general Committee, during the erection of the Asylum. The progress made was from time to time reported to the Sessions, and at Easter Sessions, 1858, the Building, having been sufficiently advanced to require that provision should be made for the Engineering Works, a contract, which had

been entered into with Messrs. Ayers and Ismay for £3,423, was then submitted to, and approved by, the Court.

That Dr. Charles Lockhart Robertson, of Charles Street, Berkeley Square, had been appointed the resident Medical Superintendent, and the Rev. Henry Hawkins, had been appointed the Chaplain.

That the necessity of having a plentiful supply of water, prevented the opening of the Asylum so soon as otherwise it might have been. An Artesian well, which had been sunk to the depth of 217 feet, required longer time to complete, owing to the extreme hardness of the strata, than had been anticipated. The Well had been finished, and the result was a most abundant supply of good water.

That the Asylum had been fitted and furnished, and clothing obtained for 400 Patients. The Asylum, however, is capable of containing 450.

That on the 25th July, 1859, the Asylum was opened for reception of Patients, and the whole of the Lunatic Paupers who had been confined in other Asylums, were soon after received into the Asylum, with the exception of two old and feeble Patients, whose removal might have been attended with danger to them.

That since the opening of the Asylum it had been visited by the Commissioners in Lunacy, and they had expressed their satisfaction as well with the Building as also with the care bestowed upon the Patients, and with the arrangements generally.

That the sum for which it was assumed the Building alone could be erected was £42,000; but owing to an alteration in the levels produced by a change, at the instance of the Commissioners in Lunacy, of the site originally proposed for the Building, and to sundry alterations and additions, which, as the erection went on appeared to be necessary, many extra expenses were incurred, which caused the sum for building and engineering to amount to £46,531 6s. 10d.

That other sums had been expended in the making of approaches to the Asylum, Roads, Airing Courts, Yards, in laying out the Garden, and bringing the Farm into better cultivation, in the purchase of Stock, Farming Implements, and in all those works which were found to be necessary for the occupation of the Building, and in providing the requisite Fittings, Furniture, Clothing, &c., for the Patients, together with other incidental expenses, as will appear in the Abstract of Accounts appended to the Report.

That the burial of the Patients in a distant church-yard having been found to be inconvenient, and attended with expense, the Committee had selected a spot on the farm, contiguous to the Asylum for a burial ground, which has been approved of by the Secretary of State.

That the portion of Hayward's Heath, which is situate within the Manor of Oathall, in which Manor Hurst House Farm is comprised, was about to be inclosed under the Inclosure Acts. That in allotting several pieces for sale, the valuer set out two small portions, together 3R. 12P., immediately adjoining the North-west corner of the Asylum property; and to prevent any annoyance which might be occasioned if such two lots had fallen into other hands, the

Committee considered it expedient to purchase the same at the sum of £104, and a small quantity of timber on one of the lots, to be taken at a valuation. That the Secretary of State, and the Commissioners in Lunacy had approved such purchase.

That the number of Patients at the date of the Report, in the Asylum, was 285 ; viz., 135 Males, and 150 Females.

That the total number of admissions and discharges, and also the number of deaths, together with the number cured since the opening of the Asylum, was stated in the Medical Superintendent's Report, which accompanied the Report of the Committee.

That the rate of Maintenance had been fixed by the Committee for the period from 25th July to the 30th September, at 13s. per week, and at the same sum for the then current quarter.

The Medical Superintendent at the same time made his First Report, which was appended to the Report of the Committee, and was as follows :—

THE MEDICAL SUPERINTENDENT'S FIRST ANNUAL REPORT.

THE Medical Superintendent has the honor to submit his First Annual Report to the Committee of Visitors.

On the 25th July the Asylum was opened for the reception of Patients, and 50 Patients, selected at a previous visit, were removed from Bethnal Green Asylum, London. By the end of August, nearly all the Insane Patients belonging to the County, confined in Licensed Houses, were removed to the Asylum at Hayward's Heath, to the number of 230. Opening of
the Asylum.

The Medical Superintendent has to acknowledge the assistance rendered to him in his difficult undertaking by the Medical Officers of the Licensed Houses at Bethnal Green, Camberwell, Hoxton, and Peckham. These 230 Patients all arrived at Hayward's Heath without the slightest accident, although as many as 60 were removed at one time.

The removal to the County Asylum of the Sussex Patients confined under the Secretary of State's Warrant, and subsequent recent admissions, including the Patients belonging to the Borough of Hastings and nine private Patients, have Subsequent
Admissions.

raised the total number of admissions, during the five months the Asylum has been opened, to 303, viz., 142 Males, and 161 Female Patients.

Discharges. During this same period, eight cases have been discharged, and ten have died. (*See tabular statements of Discharges and Deaths at the end of this Report.*)

Of the eight cases discharged, six were sent home cured. The two last in the table of discharges (Table III) are of interest, the one, as being the first Patient admitted direct from his Parish into the County Asylum, and who, although suffering from a severe form of mental disease, entirely recovered; and the other, as one in whom the mere removal to the County Asylum from a Licensed House in London, where she had been many years confined, was apparently the cause of cure.

Deaths.
(Obituary
Table.)

The average age at death of the ten fatal cases, was 45.8 years. One case lived only 13 days after admission; she was dying when she arrived from her Parish at the Asylum. Another case survived only 13 days her removal from London, in consequence of inflammatory cold caught on the journey; her age was 63 years.

The advanced age and weakly condition of many of the chronic cases removed from London, leads the Medical Superintendent to fear an unusually large mortality during this winter.

**Table of
Changes
since the
Opening of
the Asylum.**

The following table exhibits, in a statistical form, the changes which have occurred in the Asylum during the five months it has been open.

TABLE I.

Shewing the Admissions, Re-admissions, Discharges, and Deaths, from the opening of the Asylum, 25th July, to 25th December, 1859.

Improved
Condition of
the Patients
removed
from London

A very marked improvement has taken place in the general health and conduct of the patients (many cases of long standing mental disease) removed from London. The invigorating influence of the pure air and water of Hayward's Heath has given light and colour to many who on admission presented a worn and debilitated appearance; while the order and discipline of the Establishment have reduced into harmony and good conduct some of the most violent and unpromising cases of insanity which the Medical Superintendent ever met with in practice.

The beauty also of the site of the Asylum, looking out on the free downs, which are ever changing their distance and their shape, as the lights and cloud-shadows sail over them, and over the graceful forms of whose endless variety of slopes the eye wanders unarrested by abruptness, with an embracing feeling of fulness and a restful satisfaction to the pure sense of Form,* has not been without its calming influence on many of the Patients, and has, in several instances, been the subject of their conversation with the Medical Superintendent at his visit to the Wards.

The general
Order of the
House.

The House is already in good working order; each duty and requirement of the day have their appointed hour and agent, and the means best fitted for the curative employment of the Patients are in daily operation.

Employment
of the
Patients.

The cleaning of the Wards, on both sides of the House, is performed by them, and all the domestic labour of a large household is entrusted to some of them. The Male Patients

* See Lectures and Addresses by the late Rev. Frederick William Robertson, M.A., of Brighton.

are also employed on the Farm and Garden, under proper supervision, and in the Workshops, with the artisans of the Establishment, as tailors, shoemakers, carpenters, bakers, bricklayers, painters and glaziers; and a beginning has been made in mat-making.

In the Asylum, however, of an Agricultural County like Sussex, outdoor Farm Labour is the principal source of employment, and the Patients employed with the Artisans are a small minority. In the Female Department, the Kitchen and Laundry, together with the Needlework, are the chief means of employment. The Classes, it may be here stated, for general Instruction and for Music are fairly begun, under the superintendence of the Chaplain. The Medical Superintendent anticipates considerable benefit to the convalescent Patients from these Classes: their personal superintendence by the Chaplain will contribute materially to their ultimate success.

Occasional amusements—not too frequent—to encourage Amusements those who work, and to break the monotony of the routine life of an Asylum, are, in the opinion of the Medical Superintendent, of advantage both to the Patients and to their Attendants. A weekly dance for the Patients and Household is held on Wednesday evening, in the Recreation Hall, at which 100 of the Patients have more or less joined in the evening's amusement. A very fair Band, composed of Attendants and Patients, has been formed. On Christmas Eve the Hall was decorated, and the dance kept up till a late hour.

The supply of Newspapers, Books, and Games, granted by

the Visitors, is by a certain number of the Patients appreciated.

The
Incurable
Cases.

But in referring to these various evidences of mental activity and healthy employment in the Asylum, the other side of the picture must also be looked at.

It must not be forgotten that a large number of hopeless cases of Insanity, on whose weary path no remedial agencies can throw any light or change, are also the objects of our care. It is in their treatment that the heavy pecuniary expenditure of the Asylum is incurred, and they form (though the least prominent feature in such a Report as the present,) the most anxious portion of the Medical Superintendent's charge. They require a daily and hourly care and watching, often of the most wearying and harassing kind, yet of which labour the remedial results can only be seen and recognized by those familiar with the symptoms and progress of chronic mental decay.

It is due to the Officers of the Establishment that the Medical Superintendent record here his approval of the manner in which the Patients now referred to have been tended and cared for. He has in evidence thereof the satisfaction of adding that, since the opening of the Asylum, no accident, injury to a Patient, or even escape has occurred. He cannot, indeed, venture to hope that another year will prove as free from such accidents and mishaps, which appear with the permanence of a natural law in the history of every large Asylum, however well-ordered.

Diet.

The Diet scale in use is herewith annexed. The Insane require a liberal, nourishing diet. The Medical Superinten-

dent ventures to think that this Diet scale combines this requirement with a reasonable regard to economy. He has ordered very few extra articles of Diet during the period, an important item of expense in many County Asylums.

Wednesday in each week has been set apart for the visits of the friends and relations of Patients; visits which the Medical Superintendent is always anxious to promote and encourage. In cases of urgent sickness notice is sent to the relations, who in such cases are admitted on other days also. Visiting Day

A Uniform dress has been adopted for the Attendants, Male and Female. The dresses are made in the Asylum Workshops. Uniform of Attendants, Male and Female.

The hours of the Chapel Services and Chaplain's visits to the Wards have been fixed by the Medical Superintendent, in conjunction with the Chaplain, so as to suit the various hours and other requirements of the House. The Chaplain's Annual Report to the Visitors is herewith annexed. Chapel Services.

The Medical Superintendent has, in conclusion, to submit the Balance Sheet for the five months the Asylum has been opened. Several of the items are preliminary expenses which tend to increase the Maintenance Account in the early history of every Asylum. The steady reduction, so far as is consistent with the curative treatment of the Patients, in the weekly charge for Maintenance, is a subject of his most anxious care. He confidently anticipates a gradual reduction of this charge. Financial Statement.

(Signed) C. L. ROBERTSON, M.B. CANTAB.,
MEMBER OF THE ROYAL COLLEGE OF PHYSICIANS,
Medical Superintendent.

25th December, 1859.

THE HISTORY OF THE

REPUBLIC OF THE UNITED STATES

The history of the Republic of the United States is a story of the growth of a nation from a small group of colonies to a great power. It is a story of the struggles of the people to establish a government that would protect their rights and promote their welfare. The story begins with the first settlers who came to the New World in search of a better life. They found a land of opportunity, but they also found a land of hardship. They had to fight against the elements of nature and the resistance of the native Americans. They had to build a new society from scratch, and they did it with courage and determination. The story continues with the struggle for independence from Britain. The people of the colonies wanted to be free to govern themselves, and they fought a war to achieve that goal. They won, and they established a new nation. The story then goes on to describe the early years of the Republic, the struggles of the young nation to establish itself, and the growth of the country. It is a story of the triumph of the people over adversity, and it is a story that inspires us to this day.

THE
CHAPLAIN'S FIRST ANNUAL REPORT.

Christmas, 1859.

THE Chaplain has the honor to submit his first Report to the Committee of Visitors.

He entered upon the partial fulfilment of his duties on the last Sunday in July.

From that date until the end of September, according to arrangement, Afternoon Service only, with Sermon on Sundays, was performed in the Chapel, and occasional attendance given on week days.

On the first Sunday in October the Chaplain commenced his regular ministrations.

The Chapel Services are as follows :—On Sundays, Morning Prayer at Ten ; Litany with the Commandments, Epistle, and Gospel, &c., and an Exposition of Scripture, at Twelve ; full Evening Service, with Sermon, at Three.

It is purposed to celebrate Holy Communion for the first time on Christmas Day, and thenceforward on the last Sunday in each month.

On Wednesdays and Fridays the Litany alone is said.

On Tuesdays, Evening Service with Lecture, is performed at 7 p. m., for the convenience of the Household; on this occasion, the Patients do not attend.

The Congregation, (Household and Patients) on Sundays is considerable, and the behaviour of the Patients orderly. Some of them appear to take a devout and intelligent interest in the service. On week days the attendance is smaller, but very satisfactory.

visitation of
wards.

The Chaplain usually visits each Infirmary twice, and the other Wards once in the course of the week.

In reply to a communication addressed to the Incumbent of Wivelsfield, a letter has been received, in which permission has been kindly granted to the Chaplain to visit those *employés* of the Asylum who may be resident in houses situate in Wivelsfield parish. He will accordingly visit those houses, from time to time.

classes for
patients.

An encouraging report, it is thought, may be made of the Male and Female Adult Classes, which have been held on Tuesdays and Fridays, during several weeks, under the Chaplain's superintendence; more than thirty different Patients have attended since the commencement. The usual number of the two Classes is not less than twelve. Instruction is given chiefly for writing; and a short time is devoted, before the Classes separate, to some subject of Geography or History, treated in a familiar or entertaining manner. But not the least result hoped for from the Class Meeting, is the friendly understanding and intercourse which it is anticipated will be gradually promoted between a large number of the Patients and the Chaplain.

An evening in each week is set apart for receiving back Library. and distributing the Books belonging to the Asylum Library. A convenient opportunity is thus afforded for conference with the Attendants and Servants who come to exchange their books.

A Grace to be used before and after Meals, and a simple Grace and Form of Prayer. form of Prayer for morning and evening, has been drawn up Prayer. for use in the Wards.

In any future Report which the Chaplain may prepare, he trusts that he may be able to present a more detailed account of matters within his province, than he has done at this time.

(Signed) HENRY HAWKINS, M.A., OXON.,
Chaplain.

II.—SECOND ANNUAL REPORT

OF THE

COMMITTEE OF VISITORS, 1860.

AT THE EPIPHANY SESSIONS held for the Eastern and Western Divisions of the County, in December, 1860, and January, 1861, the COMMITTEE OF VISITORS of the SUSSEX PAUPER LUNATIC ASYLUM appointed at the Epiphany Sessions, 1860, reported:—

THAT, prior to the time they were appointed, the Asylum was only partially occupied; that there were in the House at the time of their appointment 285 Patients, viz., 135 Males and 150 Females. Of these, 274 were Pauper Patients from various parts of the County, and 11 were Patients from other places.

That the weekly cost of maintenance of the County Pauper Patients was at that time 13s. per head.

That the number of Patients in the Asylum at the date of their Report was 399; of whom 172 were Males, and 227 Females. Of these, 357 were Pauper Patients from various parts of the County, and 42 were from other places.

That the Patients admitted and discharged during the year, with the number of cures and deaths, were stated in the Second Annual Report of the Medical Superintendent.

That they had been able, during the year, to reduce the weekly cost of Maintenance of the Pauper Patients from 13s. to 10s. 6d., which was the rate for the then current quarter, and although the present prices of provisions were higher than before. The Committee confidently hoped the cost of Maintenance would be still further reduced. The reduction had not been attained by any diminution of the comforts and care of the Patients, which had been rather increased, but by the improved working of the Asylum.

That the Burial Ground, which was mentioned in the last Report, had been cleared and levelled, and had since been fenced in, and having received the approbation of the Bishop, had been conveyed to the Ecclesiastical Commissioners, and that, on the completion of these necessary preliminaries, the Bishop, on the 11th June last, attended at the Asylum and performed the ceremony of consecration.

That the Committee had had occasion to notice some defects in the construction of the Buildings of the Asylum, and some departures from the Specification of the Works contracted for. As these had not been brought to their attention by Mr. Kendall, the Architect employed in the erection of the Building, the Committee thought it right to call for the opinion of Mr. Shaw, another Architect. Mr. Shaw made a report on these matters, and the Committee had had several communications with Messrs. Rees and Ayers, the Contractors, and Mr. Kendall, the Architect, thereon, but nothing had been decided on.

That the Farm and Garden were being brought into better order and condition ; and considerable quantities of produce were then obtained from them. The old Farm Buildings

were, however, totally inadequate for the purposes required ; and such Buildings as existed were in a ruinous state. New Buildings were in course of erection, and nearly completed.

That the inclosure of the Oathall Common adjoining the Asylum, alluded to in a former Report, had been completed during the year, and an allotment of nearly six acres had been made to the County. This ground, which extends along the whole front of the Asylum, will be of material importance and advantage ; but being in a very rough and irregular condition, and totally unfenced, there would be expense for levelling and the necessary Fences, which are required under the provisions of the Inclosure Act.

That the occupation of so large a building, with its numerous inmates, had been productive of serious inconvenience to the neighbourhood ; and the drainage from the sewers into brooks and watercourses on other persons' land, had been made the subject of complaint. The Committee were then happy to report that they have been enabled to remedy this grievance, by having a new Sewer made ; but this had been attended with some expense.

That the supply of Water proved most ample ; and the Engines and Works supplied by Messrs. Easton and Co. had answered in every respect, and it was hoped they would be sufficient for any probable increase of Patients.

The Medical Superintendent at the same time made his Second Annual Report, which was appended to the Report of the Committee, and was as follows :—

THE
MEDICAL SUPERINTENDENT'S SECOND
ANNUAL REPORT.

Second
Annual
Report.

THE Medical Superintendent has the honour to submit his Second Annual Report to the Committee of Visitors.

Numbers on
the 25th Dec.,
1859.

On the 25th of December, 1859, the numbers in the Asylum were 135 Male, 150 Female; total, 285.

Admissions.

The Admissions during the year have been 81 Male, 107 Female; total 188.

Discharges.

The Discharges have been 19 Male, 21 Female; total 40.

Deaths.

The Deaths have been 25 Male, 9 Female, total 34.

Mean
Annual
Population.

The mean population resident, during the year has been 159 Male, 198 Female; total 357.

Numbers
this day.

The numbers in the Asylum this day are 172 Male, 227 Female; total 399.

Table shew-
ing the
numerical
results of the
Year.

These numbers may be stated in the following tabular views :—

TABLE I.

Return shewing the Admissions, Re-Admissions, Discharges, and Deaths, during the Year 1859-60.

				Male.	Female.	Total.
In the Asylum December 25th, 1859 .				135	150	285

Remaining December 25th, 1860	172	227	399
Average numbers resident during the period	133·79	161·05	294·84

The following Table III. shews the numerical results of the year arranged according to Unions :—

* "The true per centage of recoveries is one which in different institutions in different degrees is intermediate to that calculated on the admissions and that calculated on the discharges. Whilst, therefore, I fully admit that the plan of calculating the recoveries upon the admissions fails in exhibiting with precise accuracy the results of treatment in any hospital for the Insane, I yet believe it affords a much nearer approximation to the truth when considerable periods are concerned, than that calculated on the discharges; and that it is, therefore, very decidedly to be preferred to the latter method of calculating the recoveries."—*Dr. Thurnam on the Statistics of Insanity.*

Admissions. The Admissions during the year have been no less than 188. Besides the recent cases occurring in the County, the Admissions (and also the mortality) have this year been increased by the transfer from the Union Houses of a number of chronic cases. It is not to be anticipated that the Admissions of the coming year will equal these numbers.

Discharges.
(See Table of.) Annexed to this Report is an accurate tabular statement of the history of the cases discharged during the year. It will be seen that the recoveries, with few exceptions, have occurred in the cases submitted early to treatment in the Asylum. It cannot too often or too strongly be urged on the Parochial authorities how much the patient's chance of ultimate recovery depends on his immediate and early removal to the Asylum. Attempts to treat recent cases of mental disease in the wards of a Union House, result only in the aggravation of the symptoms and imperil the chances of cure altogether.

Deaths.
(See Table of.) A similar tabular statement of the history of the fatal cases is also annexed.

The mortality for the year is large, among the Male patients especially. Several very infirm old men were removed from London at the opening of the Asylum, who died during the winter from slow decay. Again, several cases have been admitted during the year in a dying state.

All past experience tends to show that the early history of an Asylum is marked by a small per centage of recoveries and by a high rate of mortality, and that when the transfer from the Union Houses of chronic cases has ceased, and the current mental disease of the year is at once brought under treatment these proportionate results materially improve.

The sanitary condition of the Asylum throughout the year has been very good; no serious disease, save that incidental to the course of the mental malady, having in any case shewn itself. There has been no diarrhoea or other zymotic disease.

Sanitary
condition of
the Asylum
during the
Year.

This high standard of health is owing mainly to the abundant supply of good water and to the perfect system of sewage. It is also the result of the liberal dietary allowed, (a copy of the diet table is herewith annexed,) including an abundant supply of fresh vegetables from the Asylum garden, and of sweet milk from the farm, and of the regular hours enforced on the Patients.

The general management of the Asylum, to which detailed reference was made in the First Annual Report, including under the term all that relates to the moral and medical treatment of the Patients, is in progressive development. The various means of employment are more fully carried out; the order and discipline of the Establishment is being consolidated, and the staff of Attendants, on whose efficiency the working of the several elements of treatment so much depends, is decidedly on the improvement.

General
Management

The Medical Superintendent is, however, fully conscious of how much remains herein for the future to accomplish.

The Rules as required by the 53rd sec. 16 & 17 Vict., c. 97, have been submitted to the Secretary of State, and on the 10th January, 1860, received his final approval.

Rules.

The annexed table (IV.) shows the daily average number of Patients employed and the nature of that employment. A rough calculation, at a low average of the money value of this labour, amounting to £1,534 15s. 2d. is added. As a curative agent its value to the patients is priceless.

On the 25th of July, being St. James' Day, the Anniversary of the opening of the Asylum was celebrated as a holiday. The sermon was preached by the Rev. Arthur Garfit, M.A., Curate of Richmond; the Patients afterwards had a public dinner in the Recreation Hall, followed by games on the lawn and a dance in the evening. It is proposed in future years to continue the celebration of this day in commemoration of the benefits which this House has been the means of conferring on the Insane poor of the County.

The Medical Superintendent has the satisfaction of recording that another year has passed without any serious accident or injury to any patient. The only nominal exception has been the loss, by escape, of a male patient, who subsequently was heard of as an inmate of Oxford Castle, whither he had been committed as a vagrant. He is now at large. It was a case, the leading feature of which was the delusion that the sun had got into his throat, and that an operation was necessary for its removal. On other subjects he was tolerably sane, and the authorities at the Oxford Gaol do not appear to have discovered the existence of his mental disease.

The Balance Sheet for the year 1860 (Table IX.,) as examined by the House Committee, is herewith annexed. It exhibits a steady reduction in the average weekly cost of maintenance.

The Medical Superintendent has, in conclusion, to record his approval of the conduct of the Officers, and, with few exceptions, of the Attendants and Servants of the Asylum, during the year now ended.

(Signed) C. L. ROBERTSON, M.B. CANTAB.,
Medical Superintendent.

ROBT. TROTTER.

THE CHAPLAIN'S SECOND ANNUAL REPORT.

25th December, 1860.

THE Chaplain has the honour to lay before the Committee of Visitors a brief Report of various matters relating to his Office.

The Sunday Services, consisting of Morning Prayer at 10 a.m., Litany, Commandments, &c., and Lecture at 12 noon. Divine Service. and Evening Service with Sermon, at 3 p.m., have been fairly attended. The conduct of the Patients has been orderly; in many cases, devout. Many of them take an intelligent interest in the Services, and join in the responses and singing. The average attendance of Patients on Sundays and Week-days in each of the months appears to be nearly as follows:—

On the Sundays in *January* the average attendance of Males and Females, 146, and on Week-days, 60.

Average attendance in *February*, on Sundays, Males 57, Females 94, and on Week-days, Males 21, Females 47.

	Males.		Females.		Males.		Females.
<i>March</i> , Sundays ..	53	..	93	Week-days ..	19	..	50
<i>April</i> , „	57	..	98	„	23	..	54
<i>May</i> , „	65	..	100	„	33	..	49
<i>June</i> , „	83	..	101	„	51	..	51
<i>July</i> , „	97	..	115	„	58	..	51
<i>August</i> , „	103	..	130	„	45	..	40
<i>September</i> , „	107	..	134	„	59	..	49
<i>October</i> , „	110	..	127	„	54	..	49
<i>November</i> , „	100	..	132	„	52	..	48
<i>December</i> , „	102	..	128	„	44	..	38

The Week-day Morning Service at 8.30, consists of the greater portion of the Church's Order for Morning Prayer. On Wednesdays and Fridays the Litany only is said.

On Tuesday evenings at 7, Divine Service, with a Lecture, is performed for the convenience of the Household; and on Saints' Days there is Evening Service, with Lecture, at 5 p.m.

Chaplains'
Visitations

The Chaplain is in the habit of visiting the Male and Female Infirmarys usually three times, and the other Wards once, in each week. It is his custom on Sunday afternoons to have interviews in his room, with a few selected patients, two or three coming together, the Females for the first, the Males for the last half-hour. During these visits the Chaplain has had convenient opportunities of becoming more familiarly acquainted with the dispositions and circumstances of individual patients than he could otherwise have been.

With the sanction of the Rev. George Dixon, Perpetual Curate of Wivelsfield, the families of artizans, &c., residing in that parish, have been, from time to time, visited.

Funerals.

Since the consecration of the Cemetery, ten burials have taken place in the ground. The funerals have been attended by several of the friends and also of the Patients, whose behaviour has been uniformly quiet and decorous.

Schools.

The Male and Female classes have been in operation for more than a year. Up to the end of October, men and women used to assemble in one room, at the same hour, but on the 25th of that month an evening class for Male Patients was commenced and has been since held on Mondays and Thurs-

days from 6.30 to 7.30. The Female Class continues to meet on Tuesdays and Fridays at 3 p.m. The average attendance at each class since the date of separation has been about 19. The chief subjects of instruction are Reading, Writing from Copies and by transcribing. An Elementary English History is being read aloud by the more advanced scholars.

Some popular and entertaining Books have recently been ^{Library,} added to the Library. The Chaplain assigns a portion of Tuesday evenings for exchanging the Books.

The Chaplain would conclude his summary of matters within his department, with the expression of a hope that in the next year's report, there may be evidence of further progress in the moral and spiritual condition of those committed to his pastoral charge.

REPORT
OF
THE FARM COMMITTEE,
FOR THE YEAR 1860.

THE Farm Committee are happy to report considerable improvement in the Asylum Farm during the past year.

In spite of the wet season, felt with peculiar severity, on a soil, foul and impoverished, the condition of the land is much improved; hedge-rows have been grubbed, and much progress has been made in the general cultivation of the Farm.

The Airing Courts and Grounds in front of the Building have been levelled, the slopes turfed, and the roads on the Farm (with the exception of some unfinished portions) put in order.

The Buildings on the Farm having been found insufficient and much dilapidated, it has been necessary to build new ones, which are now nearly completed.

The Farm, during the past year, only shows a small profit after paying rates and taxes ; but it has been of great service to the Lunatic inmates, by affording them healthy labour ; and the Farm Committee look with confidence to obtaining much more favorable results during the present year.
